MERSTHAM TUNNEL MYSTERY. Late on Sunday night, 24 Sept. 1905, the body of Mary Sophia Money, aged 21, a book-keeper employed at a dairy at Lavender-hill, Clapham Junction, was discovered in Merstham tunnel (S. E. & C. and L. B. & S. C. railways). It was at first supposed to be a case of suicide, but later inquiries and the *postmortem* examination led to the belief that Miss Money had been murdered. In her mouth was found a long piece of silk veil, suggesting that she had been gagged and then thrown out of the train. The body was terribly mutilated, the skull being smashed, the left leg severed from the body. On the sides of the tunnel were marks of her hands; her gloves were covered with soot. The verdict returned at the inquest was "that Miss Money met her death by severe injuries brought about by a train, but the evidence was insufficient to show whether she fell or was thrown from a train," 16 Oct. 1905. The mystery is still unsolved.

MERTHYR-TYDVIL (Glamorganshire). Riots commenced here, 3 June, 1831, and continued for several days; many persons were killed and wounded. Population, 1903, 71,651. Incorporated 1905. See *Coal* (*Accidents*).

MERTON (Surrey). At an abbey here, the barons under Henry III., 23 Jan. 1236, held a parliament which enacted the Provisions of Merton, the most ancient body of laws next after Magna Charta. They were repealed in 1863; see *Bastards*. The statute of Merton also provides for the inclosure of common lands.

MERV, or Meru (the ancient *Antiochia Margiana*), a town of independent Turkestan, Central Asia. It flourished under the Seljuk Turks, especially under Sultan Alp Arslan; it was sacked by the Moguls in 1221; it became subject to Persia in 1510; to the emir of Bokhara in 1787; to the Turkomans in 1856, and to Russia 1883-4. Nearly 10,000 Turcomans die of malignant fever, March-Oct. 1896. See *Russia* and *Turkestan*.

MESMERISM. Frederick Anthony Mesmer, a German physician, of Merseburg, published his doctrines in 1766, contending, in a thesis on planetary influence, that the heavenly bodies diffused through the universe a subtle fluid which acts on the nervous system of animated beings. Quitting Vienna for Paris, in 1778, he gained numerous proselytes and much money by experiments with and without metallic plates, producing effects termed then "animal magnetism," now "hypnotism." A committee of physicians and philosophers investigated his pretensions, and Bailly, in a paper drawn up in 1784, exposed the futility of animal magnetism. Mesmerism excited attention again about 1848, when Miss Harriet Martineau and others announced their belief in it. In 1859, the Mesmeric Infirmary issued its tenth annual report, archbishop Whately being president, and the earl of Carlisle and Mr. Monckton Milnes (afterwards lord Houghton) among the vice-presidents. See *Animal Magnetism* and *Hypnotism*.

The "New Mesmerism" exhibited in Paris by Dr. Luys and others, which included the alleged externalization of sensations and transference of sensibility to inanimate objects, such as dolls, was well described in the *Times*, 28 Dec. 1892, and 5, 11 Jan. 1893, and by Mr. Ernest Hart in the *British Medical Journal* . . . . Jan. 1893

MESOPOTAMIA, the district between the rivers Tigris and Euphrates (*which see*, and *Aram*), successively held by Assyrians, Babylonians, Persians, Greeks, Romans, Arabs and Turks. Meso-

potamia is mentioned in Gen. xxiv. 10; Acts ii. 9, and other places.

MESSALIANS, a sect professing to adhere to the letter of the gospel, about 310, refused to work, quoting this passage, "Labour not for the food that perisheth."

MESSENIA (now *Maura-Matra*), in the Peloponnesus, an ancient kingdom. It had long sanguinary wars with Sparta. It was at first governed by kings; after its restoration to power in the Peloponnesus it formed an inferior republic, under the protection first of the Thebans, and afterwards of the Macedonians.

The *first* Messenian war began 743 B C ; was occasioned by violence offered to some Spartan women in a temple of devotion common to both nations, the king of Sparta being killed in his efforts to defend the females Eventually, Ithome was taken, and the Messenians became slaves to the conquerors . . . . . B C. 724
The *second* war, to throw off the Spartan yoke, commenced about 685, ending in the defeat of the Messenians, who fled to Sicily 668

MESSIAH, synonymous with Christ "the anointed," foretold by *Daniel* ix. 25, about 538 B.C. "We have found the Messias, which is, being interpreted, the Christ." *John* i. 41. "The Messiah," Handel's greatest oratorio, composed by him in twenty-three days (22 Aug.-14 Sept. 1741), was first performed at Dublin, 13 April, 1742, the receipts being given by him to the charities of that city.

MESSINA (Sicily), so named by the Samians, who seized this city, then called Zancle, 671 B.C. It was seized by the Mamertini (*which see*), about 281 B.C. It belonged for many ages to the Roman empire; was taken by the Saracens, about A.D. 829. *Priestley.* Roger the Norman took it from them by surprise, about 1072.

METALS. Tubal-Cain is mentioned as an "instructor of every artificer in brass and iron." (*Gen.* iv.) The Phœnicians had great skill in working metals. Bunsen and Kirchhoff's method of chomical analysis by means of the spectrum has added cæsium, rubidium, thallium, indium, gallium, and others to the known metals. See *Elements*, *Mines*, *Iron*, and the other metals. "Metallurgy," published by Dr. John Percy, 1861-80; he died 19 June, 1889. "Electro-Metallurgy," translated from the German of Dr. W. Borchers, with additions by Walter G. McMillan, published, 1897.

METAMORPHISTS in the 15th century affirmed that Christ's natural body, with which he ascended into heaven, was wholly deified.

METAPHYSICS, the science of abstract reasoning, or that which contemplates the existence of things without relation to matter. The term, literally denoting "after physics," originated from these words having been put at the head of certain essays of Aristotle, which follow his treatise on Physics. *Mackintosh.* Modern metaphysics arose in the 15th century—the period when an extraordinary impulse was given to the study of the human mind in Europe, commonly called the "revival of learning." Hobbes, Cudworth, S. T. Coleridge, Dugald Stuart, and sir W. Hamilton, were eminent British metaphysicians, and Descartes, Pascal, Kant, Schelling, and Fichte, foreign ones. See *Philosophy.*

METAURUS, a river in central Italy, where Hasdrubal, the brother of Hannibal, was defeated and slain, 207 B.C., when marching with abundant reinforcements. The Romans were led by Livius and Claudius Nero, the consuls. The latter commanded the head of Hasdrubal to be thrown into his brother's camp. The victory saved Rome.

METEMPSYCHOSIS, a doctrine attributed to Pythagoras, about 528 B.C., asserts the transmigration of the soul from one body to another. It is also ascribed to the Egyptians, who would eat no animal food lest they should devour the body into which the soul of a deceased friend had passed. They had also an idea that so long as the body of the deceased was kept entire, the soul would not transmigrate; and therefore embalmed the dead. See *Buddhism.*

METEOROGRAPH, an apparatus for the invention of which father Secchi of Rome received a prize at the Paris International Exhibition, July, 1867. It is self-acting, and registers the various changes of the atmosphere in the form of a diagram.

METEOROLOGY (from the Greek *meteōros*, aërial), the science which treats of the phenomena which have their origin in the air, such as rain, lightning, meteors, fogs, &c. The writings of Theophrastus, on meteorology, 3rd century B.C., were translated by Jas. G. Wood, edited by G. J. Symons, published 1894. Aristotle, Bacon, Boyle, and Franklin wrote on the subject.

Meteorological Society of the Palatinate, established 1780.
Meteorological Society of London, first met, 15 Oct. 1823.
John Dalton's essay on meteorology appeared in 1793
Luke Howard's work on the clouds appeared in 1802, and his "Barometrographia" in 1848 See *Clouds*
Sir W Reed published his work on the "law of storms" in 1838 The works of Daniell (1845), Kæmtz (1845), Muller (1847), and Buchan (1867) are esteemed.
The "British" Meteorological Society, established in 1850, chartered in 1866, became Royal, Oct. 1883. By the exertions of Mr. James Glaisher, long the secretary, the apparatus at Greenwich was erected; and meteorology has appeared in the "Greenwich Observations" since 1848 See *Balloon—Scientific Ascents.*
The Royal Meteorological Society's annual exhibitions began in 1880.
Meteorological observatories have been erected in all parts of the globe
The Meteorological department of the Board of Trade, established in 1855, under admiral Fitzroy, commenced the publication of reports in 1857. The admiral published his "Weather-Book" in 1863. His exertions are said to have overworked his brain; and on 30 April, 1865, he died by his own hand The Meteorological office issues apparatus and instruction books to captains of ships and established observatories in many places in the empire. It was handed over to the Royal Society in 1871, and endowed by Mr. J. P. Gassiot. Annual reports on ocean meteorology, weather telegraphy and climatology issued.
The Kew meteorological observatory given to the British Association in April, 1860 It was placed under the Meteorological council nominated by the Royal Society, but appointed by the treasury. R. H. Scott, secretary, July, 1877.

At the recommendation of M. Le Verrier and admiral Fitzroy, meteorological information, obtained by the telegraph from the principal places in the United Kingdom, has been transmitted daily to Paris, and thence to other parts of Europe since 1 Sept. 1860.

Storm-warnings first issued in Holland through M. Buys Ballot, 1860. His "law of the winds" points out the relation between the direction of the wind, and the atmospheric pressure.

Storm-warnings first sent to the coast by the Board of Trade, 6 Feb.; and first published 31 July, 1861; suspended, 7 Dec. 1866; reissued at Christmas, 1867, and have been since continued.

Daily international bulletin of the imperial observatory at Paris, under the direction of M. Le Verrier, first published in MS. 1 Jan. 1858, first issued to subscribers, 4 Nov. 1863. (This was the first chart with united maps.)

"*Daily weather charts*" first issued by the Meteorological Office, 1 Oct. (first prepared in MS. 3 Sept. 1860), 1872; "*Weekly Weather Report*" first published, 11 Feb. 1878.

"Weather Charts and Storm Warnings," by R. H. Scott, published, 1876 *et seq.*

Wrecks diminished in consequence, June 1876-7, 1805; 1879-81, 1891.

Observatory erected on Ben Nevis; Mr. R. T. Omond appointed director, 6 Sept.; opened 17 Oct. 1883. Closed through lack of funds, 1905.

A French academy of meteorology organised a successful balloon ascent, 9 Aug. 1879.

An observatory on Sonnblick Salzburg (10,177 feet high), opened about 1 Sept. 1886.

Daily forecasts for midland counties, 1886, 310. Absolute successes 247, absolute failures 26, and partial successes 36, announced *Times*, 7 Feb. 1887.

Weather plant (Abrus precatorius) exhibited by professor Nowack at Vienna; changes in the weather said to be foretold by alteration in the leaves attributed to electro-magnetism in 24 to 48 hours previously, Aug.-Sept. 1888. The plant is grown in the Botanical society's gardens, London. Many other plants possess this property (*W. Sowerby*), Sept. 1888. During the experiments made at the Jodrell laboratory, Kew, by Dr. Oliver and Herr Joseph Nowack in October, 1889, when many weather changes occurred, only one forecast was given by the weather plant, which therefore cannot be relied upon for meteorological purposes. Mr. J. F. Nowack maintains the success of his new system of forecasting atmospheric, etc., disturbances, by it, *Times*, 13 Dec. 1897.

The 13th annual exhibition of meteorological apparatus, London, opened 15 March, 1892.

State observatory established by prof. Assmann of Berlin on the Brocken, 1 Oct. 1895.

Observatory on Mt. Wellington, Tasmania, begun May, 1895.

Mr. G. J. Symons, eminent meteorologist (see *Rainfall*), dies 10 March, 1900.

Sir Cuthbert Peek, scientist and meteorologist, died, aged 46, 5 July, 1901.

Mr. Jas. Glaisher, eminent meteorologist and aëronaut, died, aged 93, 7 Feb. 1903.

International Meteorological Congresses, first at Vienna, 1873, have been held from time to time.

Treasury minute, dated 20 May, 1905, dealing with the constitution of the meteorological office, issued as a parliamentary paper (see *Times*, 22 June, *re* new constitution), 21 June, 1905.

METEORS, Luminous, include shooting stars, fire-balls, and falling stones or aërolites. They were described by Halley, Wallis, and others early in the 17th century. The periodicity of the star showers about the 10th of August (termed in the middle ages St. Lawrence's tears) was discovered separately by Quetelet, 1836, and by Herrick in 1837. The following are remarkable epochs for their annual return:—2 Jan.; 29 July; 3 and 9-12 Aug.; 14-16 Nov.; 11 Dec. *R. P. Greg.* See *August*.

The magnificent continuous star-shower of 14 Nov. 1866, had been predicted by professor Newton some time previously. A fine display occurred on the night of 13 Nov. 1868, in the United States. A similar phenomenon had been witnessed by Humboldt at Cumana (S. A.), 12 Nov. 1799; and by Dr. D. Olmsted, at Newhaven (U.S.), 13 Nov. 1833. They were well observed in Britain and Europe, 27 Nov. 1872; and in Southern and Western Europe, 27 Nov. 1885.

Aërolites, falling-stones, accompanying meteors, are found in our museums. They contain iron, nickel, and other minerals.

Explosion of an aërolite above Madrid, windows shattered, houses damaged, etc., 9.29 A.M. 10 Feb. 1896; another exploded, S. of Cyprus, 18 April, 1896.

Mr. Norman Lockyer (K.C.B. 1897), announces his theory, based on spectrum experiments, that all self-luminous bodies in the celestial spaces are composed of meteorites or masses of vapour produced by heat brought about by condensation of meteor swarms due to gravity; Royal Society, 17 Nov. 1887. A great meteor or fireball seen in England, 25 Jan. 1894.

Dr. G. Johnstone Stoney reported his studies of the November meteors, at the Royal Institution, London, 14 Feb. 1879, and 18 Feb. 1897.

The Leonid meteors well seen at Yerkes observatory, Wisconsin, U.S.N.A., 15 Nov. 1898.

Fall of meteorites at Mt. Zomba, 25 Jan. 1899.

The non-appearance of the November Leonids attributed to a change of orbit.—*Times*, 14 Nov. 1899; a fine meteor or fire-ball seen in the S. of England, 13 July, 1902.

A meteorite, about 10lb. in weight, fell at Crumlin, co. Antrim, 13 Sept. 1902.

METHOD (Greek, a way of transit), that which gives to knowledge its character. S. T. Coleridge's treatise on the science of method is prefixed to the first volume of the "Encyclopædia Metropolitana," 1845.

The most recent work on this subject is Professor Stanley Jevons' "Principles of Science: a Treatise on Logic and Scientific Method," 1874. "The powers of mind concerned in creation of science are discrimination, detection of identity, and retention."

METHODISTS, see *Wesleyans*.

METHUEN TREATY, a treaty for regulating the commerce between Great Britain and Portugal, made 27 Dec. 1703, concluded by Paul Methuen, our ambassador at Lisbon. It greatly favoured the importation of port wine into this country by lowering the duty, to the discouragement of French wines. It was abrogated in 1834.

METHYL, a colourless inodorous gas, a compound of hydrogen and carbon, obtained in the free state first by Frankland and Kolbe separately, in 1849.

METHYLATED SPIRITS. By an act passed in 1855 a mixture of spirits of wine with 10 per cent. of its bulk of wood-naphtha, or methylic alcohol, is allowed to be made duty free for use in the arts and manufactures, not less than 450 gallons being made at one time. In 1861 an act was passed permitting the methylated spirits to be retailed by licence.

METONIC CYCLE, a period of 19 years, or 6940 days, at the end of which the changes of the moon fall on the same days; see *Calippic Period*, *Golden Number*.

METRIC SYSTEM. Before the revolution there was no uniformity in French weights and measures. On 8 May, 1790, the constituent assembly charged the Academy of Sciences with the organisation of a better system. The committee named for the purpose by the academy included the names of Berthollet, Borda, Delambre, Lagrange, Laplace, Méchain, and Prony. Delambre and Méchain were charged with the measurement of an arc of the meridian between Dunkirk and Barcelona, and from their calculations the *mètre*, which is equal to a ten-millionth part of the distance between the poles and the

equator (3·2808 English feet) was made the unit of length and the base of the system by law on 7 April, 1795. The system was completed in 1799, and made by law the only legal one on 2 Nov. 1801. A decree on 12 Feb. accommodated the old measures to the new system; but on 4 July, 1837, it was decreed that after 1 Jan. 1840, the metric and decimal system in its primitive simplicity should be used in all business transactions. The example of France has been followed by the greater part of Europe, but not yet by Great Britain.

Unit of SURFACE, *centiare*=a square mètre=1·1960 English yard (a square décamètre or *are*=100 square mètres).
Unit of VOLUME or SOLIDITY, *stère*=a cubit mètre.
Unit of CAPACITY, *litre*=a cubic décimètre (or 10th of a mètre)=1·76077 English pint.
Unit of WEIGHT, *gramme*=weight of a cubic centimètre (the 100th part of a mètre) of distilled water=0·56438 English drachm.
Unit of MONEY, the *franc*, a piece of silver weighing 5 grammes.
The multiples of these units are expressed by Greek numerals (*deca-*, 10; *hekato-*, 100, *kilo-*, 1000; *myria-*, 10,000). The divisors are expressed by Latin numerals (*deci-*, 10; *centi-*, 100; *milli-*, 1000).

METRONOME, to regulate time in the performance of music, one patented 1816.

METROPOLIS OF GREAT BRITAIN includes the cities of London and Westminster, and the old boroughs of Southwark, Finsbury, Marylebone, Tower-Hamlets, Hackney, Lambeth, and Chelsea; great changes made by the re-distribution of seats act, 1885, 59 constituencies in all. The Metropolis Management Act, 18 & 19 Vict. c. 122, was passed in 1855; amended (by-laws) act passed, 1 Aug. 1899, 28 boroughs created; estimated gross value of property, 6 April, 1903, 49,184,021*l.*; ratable, 40,610,415*l.*; see *London*, and *London, County of*.

METROPOLIS ROADS ACT (passed in 1863) transferred the management of certain roads north of the Thames from the commissioners to the parishes, and abolished certain turnpikes and toll-bars

METROPOLIS WATER ACT, 1852, amended, 1871; another, royal assent 18 Dec. 1902, establishes the *Metropolitan Water Board* to acquire, manage, and carry on the undertakings of the Metropolitan water companies. Board consists of 66 members appointed by county councils and other authorities; 1st election, 1903; 1st chairman, sir R. Melville Beachcroft. Court of arbitration sat to decide the amount of purchase-money to be paid to the various companies for their undertakings. Companies claimed 60,000,000*l.*; arbitration committee awarded a total of 34,281,547*l.*

METROPOLITAN (from the Greek *metropolis*), a title given at the council of Nice, 325, to certain bishops who had jurisdiction over others in a province.

METROPOLITAN ASSOCIATION FOR IMPROVING THE DWELLINGS OF THE INDUSTRIOUS CLASSES. Founded 15 Sept. 1841; incorporated 16 Oct. 1845.

Capital originally 100,000*l.*; increased to 200,000*l.* (1884). Dividend not to exceed 5 per cent. Secretary, and chief originator, Mr. Charles Gatliff; offices, 118, Finsbury-circus. The late rt. hon. lord Claud Hamilton member 1845-84; chairman for 13 years.

METROPOLITAN BOARD OF WORKS was established by 18 & 19 Vict. c. 120 (1855) ("For the management of public works in which the metropolis has a common interest"), amended in 1862. It held its first meeting and elected Mr. (aftds. sir) John Thwaites as chairman, 22 Dec. 1855. In 1858, its powers were extended in order to effect the purification of the Thames by constructing a new main drainage for the metropolis. The board was authorised to raise a loan and levy 3*d.* in the pound on the property in the metropolis. It was also authorised to construct the Thames Embankment. In 1861 the board received nearly a million pounds, and expended 900,000*l.*; see *Sewage*, and *Thames*. Sir John Thwaites, the chairman, died 8 Aug. 1870, aged 55. Much discussion ensued respecting the appointment of his successor; Mr. Bruce, the home secretary, having intimated the probability of the office being abolished by parliament, with other changes, 11 Aug., Col. (aftds. sir) James Macnaghten McGarel Hogg (created baron Magheramorne, June, 1887), a member of the board, was

elected chairman for one year, 18 Nov. 1870; annually till 1889 (he died 27 June, 1890). The board was empowered to borrow money by acts passed 1869-87. Its powers extended over 117 square miles, and 3,266,287 persons in 1873. It was composed of delegates from various local boards, &c.

The board was abolished by the local government act of 1888, and its powers, duties, property, debts and liabilities transferred to the London county council, beginning 21 April, 1889; carried into effect by the local government board, 21 March, "
Final report of the commission issued . 4 May "

METROPOLITAN BUILDING ACTS, see *Building*.

METROPOLITAN CATTLE MARKET, inaugurated by the lord mayor and corporation on 13 July, 1855. It is situated in Copenhagen-fields, an elevated site north of London, occupying an area of about fifteen acres, larger by nine acres than Smithfield, and capable of containing 30,000 sheep, 6400 bullocks, 1400 calves, and 900 pigs. In the centre is a circular building, let to bankers and others having business connected with graziers and cattle-agents. A place is set apart for slaughtering animals, with approved appliances for purposes of health, by ventilation, sewerage, &c.; there is also a place for haystands. Sales commenced on Friday, 15 June, 1855.

METROPOLITAN COMMONS. Acts respecting them passed 1866, 1869, and 1878. See *Commons*.

METROPOLITAN DISTRICT ASYLUMS BOARD, constituted in 1867 under the Metropolitan Poor Law Act. It consists of 75 members, of which number 55 are elected by the London boards of guardians, and 18 nominated by the local government board. The board provides hospital accommodation for cases of infectious diseases, maintains imbecile asylums (see *Lunacy*), various institutions for defective and sick children, and an ambulance service for the whole of London. In 1868 the board proceeded to erect hospitals at Haverstock-hill, Caterham, &c. The asylum for idiots at Leavesden, near Watford, Herts, inaugurated 27 Sept. 1870; several others erected since. An act respecting the board passed in 1884.

The epidemic of fevers, especially scarlet, caused greatly increased demand for accommodation for patients, well met Sept. 1887–Jan. 1888. The spread of small-pox greatly checked.
Epidemic of small-pox, Aug. 1901, 945 cases in London hospitals: 28 Jan., 1,554; 1 April, 1,362, 579 . . . . . 12 July, 1902

METZ, a fortified city in Lorraine, annexed to the empire of Germany, 10 May, 1871. Population, 1890, 60,194; 1900, 58,424. It was the Roman Divodunum or Meti, capital of the Mediomatrici, a powerful Gaulish tribe, and afterwards of the kingdom of Austrasia, or Metz, in the 6th century. It was made a free imperial city, 985. It was besieged by Charles VII. of France for seven months in 1444, and was ransomed for 100,000 florins; was captured by Henry II., 10 April, 1552, and successfully defended by the duke of Guise against the emperor Charles V. with an army of 100,000 men, 31 Oct. 1552 to 15 Jan. 1553. Metz was ceded to France by the peace of Westphalia, 24 Oct. 1648, and was fortified by Vauban and Belleisle. On 28 July, 1870, the emperor Napoleon III. arrived at Metz and assumed the chief command. After the disastrous defeats at Woerth and Forbach, on 6 Aug. the whole French army (except the corps of MacMahon, De Failly, and Douay) was concentrated here, 10, 11 Aug., and by delay was hemmed in by the Germans. Marshal Bazaine assumed the chief command, 8 Aug. The emperor departed with the vanguard, which crossed the Moselle early on 14 Aug.

Bazaine was censured for not advancing on . . . . . 15 Aug. ,,

2. Battle of Vionville or Mars-la-Tour, gained by the 2nd German army under prince Frederick Charles, after twelve hours' fighting. By the unexpected unmasking of a mitrailleuse battery, Henry, prince of Reuss, and many German nobles were killed. The victory was at first claimed by the French. (This battle, the most sanguinary in the war hitherto, included a Balaclava charge of a German regiment of cavalry upon a French battery, by which it was decimated, but to which the victory was greatly due. Twice as many Germans were killed as at Koniggratz, the killed and wounded being estimated at 17,000. The French loss was said to have been equally great) . . . . . 16 Aug. ,,
Bazaine masses his troops for a decisive conflict, ... 17 Aug ,,

3. Battle of Rézonville or Gravelotte, gained by the combined 1st and 2nd German armies, commanded by the king in person, after twelve hours' fighting. "The most desperate struggle took place on the slopes over Gravelotte, which the Germans gained by nightfall, after repeated fatal charges, the fortune of the day being long in suspense. But the right of the French had been outflanked, they fell back fighting to the last, and retired under cover of Metz. The French are said to have lost 19,000; and the Germans, 25,000." (The carnage is considered to have been unexampled; a large number of French prisoners were made. The German army included Saxons and Hessians) . . . . . 18 Aug. ,,
Bazaine repulsed in a sortie at Courcelles, near Metz (he claimed a victory) . . . . . 26 Aug. ,,

MICHAELMAS, 29 Sept., the feast of St. Michael, the reputed guardian of the Roman Catholic church, under the title of "St. Michael and All Angels." Instituted, according to Butler, 487.

The custom of eating goose at Michaelmas has been erroneously attributed to Queen Elizabeth's eating of the bird at dinner on 29 Sept 1588, at the house of sir Neville Umfreyville, at the time she heard of the destruction of the Spanish Armada. The custom is of much older date, and is observed on the continent *Clavis Calendaria*.

MICHAEL'S MOUNT, ST. (Cornwall), is considered by some to be the Iktis of Diodorus Siculus, and an ancient resort of the tin merchants. St. Michael was said to have appeared on the mount, 495 or 710; and the place, thus reputed holy, became the seat of a body of monks, who received a charter from Edward the Confessor, 1044, and many privileges from pope Gregory VII., 1079.

MICROBES, see *Germ*.

MICROMETER, an astronomical instrument used to measure any small distances and the minuter objects in the heavens, such as the apparent diameters of the planets, &c., was invented by Wm. Gascoigne, who was killed at the battle of Marston-moor, 2 July, 1644. It was improved by Huyghens about 1652. Sir Joseph Whitworth made a machine to measure the millionth of an inch, about 1858; the measurement of the 30,000th of an inch is now common. Dr. Carpenter measured a filament, the breadth being the 200,000th part of an inch, 1879.

Dr. P. E. Shaw explains to the Royal society an electrical micrometer which, it is stated, can be made to measure the two-millionth of a millimètre, or the fifty-millionth of an inch. This measurement, the smallest yet made, was in connection with the movements of a telephone diaphragm. The measurement was effected by means of an electric current connected with the micrometer and telephone . . . July, 1905

MICROPHONE (Greek, *mikros*, little; *phone*, sound), a name given by Wheatstone, in 1827, to an instrument for rendering weak sounds audible by means of solid rods. The name was also given to an arrangement invented (in Dec. 1877) by professor D. E. Hughes (inventor of the type-writing telegraph, born in London 16 May, 1831, died 22 Jan. 1900), and shown to the Royal Society, 9 May, 1878.

MICROPHITE, a microscopic plant, especially parasitic; some physiologists consider bacteria and bacilli to be microphites, 1890.

MICROSCOPES, said to have been invented by Jansen, in Holland, about 1590; by Galileo, about 1610; by Fontana, in Italy, and by Drebbel, in Holland, about 1621. Those with double glasses were made at the period when the law of refraction was discovered, about 1624. Solar microscopes were invented by Dr. Hooke. In England great improvements were made in the microscope by Benjamin Martin (who invented and sold pocket microscopes about 1740), by Henry Baker, F.R.S., about 1763, and still greater during the 19th century by Wollaston, Ross, Jackson, Varley, Hugh Powell, and others. *Diamond microscopes* were made by Andrew Pritchard in 1824; and the properties of "test objects" to prove the qualities of microscopes, discovered by him and Goring in 1824-40. A *binocular microscope* (*i.e.*, for two eyes) was constructed by professor Riddell in 1851, and Wenham's binocular prism was made known in 1861. Nachet's *stereoscopic microscope*, 1867; Abbe's *orthoscopic* and *pseudoscopic*, 1881. Treatises on the microscope by J. Quekett (1848), by Dr. W. B. Carpenter (1856 *et seq.*; 8th edition, reconstructed and enlarged by Dr. Dallinger, 1901), and Griffith and Henfrey's "Micrographic Dictionary" (1856, 1875, and 1883), are valuable. The Microscopical Society of London was established 20 Dec. 1839, and the Quekett Microscopical Club, 1865. In 1865 Mr. H. Sorby exhibited his *spectrum microscope*, by which the millionth of a grain of blood was detected.

The new Ashe-Finlayson *comparascope*, an apparatus by means of which any two slides can be used simultaneously, the images of the slides being projected on to the eye-piece at the same moment, exhibited at the Royal Microscopical Society . . . . . 15 Feb 1905

MICROTOME, an instrument for cutting minute sections of organic tissue for the microscope, invented, 1885, by prof. Wm. Rutherford (who died, 21 Feb. 1899); improved by Dr. Paul Meyer and others.

MIDDLESEX, the metropolitan county of England, was the seat of the Trinobantes in the Roman province, Flavia Cæsariensis, and the Middel-Sexe, or Middle Saxons, in the kingdom of East-Sexne, or Essex. Lionel Cranfield was created earl of Middlesex, 16 Sept. 1622; succeeded by his sons, James, 1645-51; Lionel, 1651-74, when the title became extinct. Charles Sackville was made earl in 1675; and his son became duke of Dorset in 1720. Area of the county formerly 181,301 acres; population, 1891, 560,012. By the Local Government Act, 1888, which came into force in 1902, 31,484 acres (including South Hornsey) were given over to London, and 771 to Hertfordshire. Middlesex now has an area of 178,754 acres; population, 1901, 810,213.

Middlesex returns forty-eight M.P's. by act passed 25 June, 1885
The Middlesex county record society was established in 1884. It has issued four volumes containing session rolls, &c. (1549 *et seq*) 1888, 1892.
The earl of Strafford, lord lieutenant, president 1888
The Middlesex sessions now held at the Guildhall, Westminster.

MIDDLESEX HOSPITAL, London, patrons, H.M. the king and queen Alexandra; founded, 1745; incorporated, 1836. Foundation-stone of present building laid by the duke of Northumberland, 1755. The hospital (containing with its branches 406 beds) at one time formed an asylum for the French clergy and other refugees during the Huguenot persecution. It was the first hospital to make a speciality of cancer, a wing being built for the special treatment of cancer patients in 1897. The research laboratories, devoted entirely to the investigation of cancer, were opened in 1900. Since the foundation of the hospital the following additions have been made:—

Cancer charity, 1792; enlarged 1815, 1854, 1886, 1897.
Medical school, 1835; enlarged 1875, 1880, 1885, 1898.
Residential college, 1885.
Trained nurses' institute, 1886.
Nurses' home, 1869; enlarged 1878, 1904.
Convalescent home (Clacton-on-Sea), 1896.
Research and bacteriological laboratories, 1900; enlarged 1903 and 1904.
Electric and light department, 1901.
Miss Thorold, 30 years lady-superintendent of the hospital, retires . . . . . 1 Oct. 1905

MIDIAN, now **ARZ MADIAN**, N.W. Arabia; anciently held by the descendants of Midian, a son of Abraham. Having enticed the Israelites to idolatry, they were severely chastised, 1452 B.C. They invaded Canaan about 1249 B.C., and were thoroughly defeated by Gideon.

Capt. Richard F. Burton explored the ruined cities of Midian in 1877, and found the remains of ancient mines, many relics, and gold. An expedition, equipped by the khedive of Egypt, and placed under his command, started from Suez, 10 Dec. 1877, and returned 20 April, 1878. He brought home 25 tons of geological specimens, specimens of silver and copper ore, many coins and other antiquities, and photographs of the remains of ruined cities, &c

MIDLAND INSTITUTE, BIRMINGHAM, incorporated 1854.

MIDLAND RAILWAY STATION, St. Pancras, N. London, possessing the largest known roof in the world (245 feet 6 inches wide, and 698 feet long), was opened for traffic 1 Oct. 1868. The engineer was Mr. H. W. Barlow. The architect of the magnificent Gothic hotel was sir G. Gilbert Scott.

MIDWIFERY. Women were the only practitioners among the Hebrews and Egyptians. Hippocrates, in Greece, 460 B.C., is styled the father of midwifery, as well as of physic. It advanced under Celsus, who flourished A.D. 37, and of Galen, who lived 131. In England midwifery became a science about the period of the institution of the college of physicians, 10 Hen. VII. 1518. Dr. Harvey engaged in the practice of it, about 1603; Astruc affirms that madame de la Vallière, mistress of Louis XIV., in 1663, employed Julian Clement, a surgeon, with great secrecy. Midwives Act, royal assent, 31 July, 1902, enacts that any woman not certified under the act who, after 1 April, 1905, uses the name or title of midwife, shall be liable to a penalty not exceeding 5*l.*; and that after 1 April, 1910, no woman shall habitually and for gain attend women in childbirth otherwise than under the direction of a qualified medical practitioner, unless she be certified under this act; penalty 10*l.*

MILAN, Mediolanum, capital of the ancient Liguria, now Lombardy, is reputed to have been built by the Gauls, about 408 B.C. The cathedral, termed *duomo*, was built about 1385. Population, 1890, 414,551; 1900, 498,681.

MILETUS, a Greek city of Ionia, Asia Minor, founded about 1043 B.C. The Milesians defended themselves successfully, 623-612 B.C. During the war with Persia it was taken, 494, but restored, 449. Here Paul delivered his celebrated charge to the elders of the church of Ephesus, A.D. 60 (*Acts* xx.).

MILFORD HAVEN (S.W. Pembroke). The finest natural harbour in the kingdom. Here the earl of Richmond, afterwards Henry VII., landed on his way to encounter Richard III., whom he defeated at Bosworth, 1485. The packets from this port to Ireland, sailing to Waterford, were established in 1787. The dock-yard, established here in 1790, was removed higher up the haven to Pembroke in 1814. Milford made a bid for the American trade, which proved abortive. Now does an extensive business in fish.

MILITARY ASYLUM, ROYAL, at Chelsea, "for the children of the soldiers of the regular army." The first stone was laid by the duke of York, 19 June, 1801.

MILITARY LANDS ACT, passed 27 June, 1892; amended, 1897. See *Commons*.

MILITARY or MARTIAL LAW is built on no settled principle, but is entirely arbitrary, and, in truth, no law; but sometimes indulged, rather than allowed, as law. *Sir Matthew Hale.* It has been several times proclaimed in parts of these kingdoms, and in 1798 was almost general in Ireland, where it was also proclaimed in 1803. Military manœuvres act passed, 1897. Military works act passed, 1897; another, 1899. The king's regulations and orders promulgated, 1901.

MILITIA, the standing national force of these realms, is traced to king Alfred, who made all his subjects soldiers, 872-901. See *Army Defence*.

MILK. The type of food as containing all things needful for the development of the animal body. A process for its condensation was invented by Mr. Gail Borden, near New York, in 1849, for which he was awarded a medal at the Great Exhibition in 1851, when he erected factories. He invented meat biscuit, 1850. The Anglo-Swiss

* This militia act was consequent upon the then prevailing opinion of the necessity of strengthening our national defences against the possibility of French invasion. The act gave powers to raise a force not exceeding 80,000 men, of which number 50,000 were to be raised in 1852, and 30,000 in 1882; the quotas for each county or riding to be fixed by an order in council.

condensed milk company was established in 1866; and since then many other companies.

Typhoid fever is held to be propagated by milk; epidemics in various parts of the country have been traced to infected dairies. The first instance was in London . . . Aug., Sept. 1873

MILKY WAY (Galaxy) in the heavens. Juno is said by the Greek poets to have spilt the milk in the heavens after suckling Mercury or Hercules. Democritus (about 428 B.C.) taught that the *via lactea* consisted of stars, which Galileo (1610-42) proved by the telescope. See *Stars*, 1892.

MILLBANK PENITENTIARY, Westminster. The very unhealthy site was purchased of the Grosvenor family. The building, a modification of Jeremy Bentham's Panopticon (*which see*), first received convicts 27 June, 1816.

In consequence of many deaths during a great epidemic the convicts were placed in Woolwich hulks, 1822-3. On 16 June, 1843, a committee reported the penitentiary a failure. The system was abolished in parliament, and the building styled Millbank prison; made a military prison, 1870.

The buildings ordered to be pulled down and site sold, 1888.

It was finally closed 6 Nov. 1890.

Management of the site transferred to metropolitan board of works, by act passed in 1892.

Building taken down and blocks of artizans' dwellings erected by the London County Council, 1893.

The National Gallery of British Art, the Tate Gallery, built and presented to the nation by Sir Henry Tate (died 1899), 1897; enlarged 1899.

MILLENARIANS (or Chiliasts) suppose that the world will end at the expiration of the seven thousandth year from the creation; and that during a thousand years (millennium) Christ and the saints will reign upon the earth; see *Rev.* xx. The doctrine was very generally inculcated in the 2nd and 3rd centuries, by Papias, Justin Martyr and others.

MILLENARY PETITION, presented to king James on his accession, 1603, on behalf of nearly a thousand Puritan ministers against the "human rites and ceremonies" of the church of England.

MILL HILL SCHOOL, Hendon. See *Public Schools*.

MILLS. Moses forbade mill-stones to be taken in pawn, because it would be like taking a man's life to pledge. *Deut.* xxiv. 6. The hand-mill was in use among the Britons previously to the conquest by the Romans. The Romans introduced the water-mill. Cotton mills moved by water were erected by sir Richard Arkwright, at Cromford, Derbyshire. He died in 1792. See *Mechanics*. Mill-work exhibition at the Agricultural Hall, London, N. 10-18 May, 1881.

MILWAUKEE. A town in Wisconsin, North America, founded 1835. The New Hall hotel was burnt 4 A.M. 10 Jan. 1883, when about 109 persons perished. Great fire at the Union oil works; 600 buildings destroyed; estimated loss about 5,826,000 dollars, 28 Oct. 1892. Population, 1890, 204,486; 1900, 285,315.

MINCIO, a river of Lombardy. Here the Austrians were repulsed by the French under Brune, 25-27 Dec. 1800; and by Eugène Beauharnais, 8 Feb. 1814, near Valeggio.

MIND-CURE. A sect termed Christian Scientists in Boston, U.S, led by Mrs. M. B. G. Eddy, professes to cure bodily diseases by acting on the mind through the body, &c., 1866, *et seq.* See *Trials*, Dec. 1898. The sect increasing in Germany; 1,000,000 cases said to be cured in the United States within 25 years, reported, 6 May, 1902.

MINDEN (Prussia), **BATTLE OF**, 1 Aug. 1759, between the English, Hessians, and Hanoverians (under prince Ferdinand of Brunswick), and the French (under marshal De Contades), who were beaten and driven to the ramparts of Minden. Lord George Sackville (afterwards lord George Germain), who commanded the British and Hanoverian horse, for some disobedience of orders was tried by a court-martial on his return to England, found guilty, and dismissed, 22 April, 1760. He was afterwards restored to favour, and became secretary of state, 1776.

MINERALOGY, the science of minerals, is a branch of geology; see *Geology*, *Mines*, and *Crystallography*. It was not much studied by the ancients. George Agricola in the 16th century made the first attempt to treat it scientifically.

The study of mineralogy was advanced by Becker, Kircher, and Woodward in the 17th century.

MINERVA, see *Parthenon* and *Athens*.

MINES. Strabo and Tacitus enumerate gold and silver as among the products of Britain. The earliest instance of a claim to a mine royal being enforced occurs 47 Hen. III. 1262. It related to mines containing gold, together with copper, in Devonshire. In Edward I.'s reign, according to Mr. Ruding, the mines in Ireland, which produced silver, were supposed to be so rich that the king directed a writ for working them to Robert de Ufford, lord justice, 1276. The lead mines of Cardiganshire, from which silver has ever since been extracted, were discovered by sir Hugh Middleton in the reign of James I.; see *Coal*, and the various metals. Average depth of mines (1891) 400 yards. Deep mines: Ashton Moss colliery, near Manchester, 2,850 ft.; part 3,000 ft.; copper mine, Calumet, near lake Superior, U.S., 3,900 ft. (1890); silver-lead mine, Przibram in Bohemia, 3,432 ft. *Chambers' Encyclopædia*, 1891.

MINGRELIA, the ancient Colchis, mentioned in the legend of "Jason, the Argonauts, and the Golden Fleece." A province of Asiatic Russia, prince Nicolas having ceded his rights to the Czar in 1867. In 1887 the prince was spoken of as a candidate for the Bulgarian throne.

MINIATURE PAINTING was practised in England by Holbein, Isaac, and Peter Oliver, and others in the 16th century; by other eminent artists since. The new Society of Miniature Painters, president, Mr. Alyn-Williams, opened its first exhibition at 175, New Bond-street, London, 23 Sept. 1896. "The Society of Miniaturists," president, lord Ronald Gower, 1st exhibition, at the Grafton Galleries, London, 14 Nov. 1896. Sir Wm. Ross, 1794–1860, may be said to be the last miniaturist.

MINIE RIFLE, invented at Vincennes, about 1833, by M. Minié (born 1810). From a common soldier he raised himself to the rank of chef d'escadron. His rifle, considered to surpass all made previous to it, was adopted by the French, and, with modifications, by the British, 1852.

MINIMIZERS. A name given to certain writers who advocate the limitation of the sovereign power of the state as much as possible to the protection of life and property, which is styled by professor Huxley "administrative nihilism." They included W. von Humboldt, J. S. Mill (died 1873) (in his "Essay on Liberty"), and Mr. Herbert Spencer (died 1903) (in his "Political Institutions"), 1882.

MINIMS (from *minimi*, the least), an order of monks, founded by S. Francisco di Paolo (1416—1507), in Calabria, received their name, as professing themselves inferior to the Minorites (from *minor*, less); see *Franciscans*. St. Francis died in France in 1507; where he had established houses of his order.

MINISTERS, see *Administrations*.

MINISTERS in Scotland: church patronage was abolished in 1874.

MINNESINGERS, lyric German poets, of the 12th and 13th centuries, who sang of love and war to entertain knights and barons of the time. The *Meistersingers*, their successors, an incorporated fraternity in the 14th century, composed satirical ballads for the amusement of the citizens and lower classes. Hans Sachs, a shoemaker (1494-1576), a poet of the reformation, was for a time their dean. His works were published at Nuremberg, 1560. "Owleglass" and "Reynard the Fox," are attributed to the Meistersingers.

MINNESOTA, a western state of N. America, was organised as a territory, 3 March, 1849, and admitted into the union in 1858. On 17 Aug. 1862, the Sioux Indians commenced a series of outrages at Acton in Messler county, desolating the country and massacring above 500 persons, of both sexes, and of all ages. General Sibley beat the Indians in two battles and rescued many captives. Thirty-eight Indians were executed as assassins. Capital, St. Paul Area, 83,365 square miles; population, 1880, 780,773; 1900, 1,751,395.

MINORCA AND MAJORCA, the Balearic Isles (*which see*). Port Mahon in Minorca was captured by lieutenant-general Stanhope and sir John Leake in 1708, and was ceded to the British by the treaty of Utrecht in 1713. It was retaken by the Spanish and French in July, 1756, and admiral Byng fell a victim to public indignation for not relieving it; see *Byng*. It was restored to the British at the peace in 1763; taken 5 Feb. 1782; again captured by the British under general Stuart, without the loss of a man, 15 Nov. 1798; given up at the peace of Amiens, 25 March, 1802.

MINORITIES. In the new reform bill, passed 15 Aug. 1867, provision was made for the representation of minorities in constituencies with three members by limiting each elector to two votes. It was introduced as an amendment by lord Cairns

in the lords, 30 July, and accepted by the commons, Aug. 1867. The principle was adopted in a new constitution by the state of Illinois, U.S., July, 1870. See *Proportional Representation*.

MINSTER, or MONASTERIUM, a place occupied by monks; see *Westminster* and *York*.

MINSTRELS, originally pipers appointed by lords of manors to divert their copyholders while at work, owed their origin to the glee men or harpers of the Saxons, and continued till about 1560. John of Gaunt erected a court of minstrels at Tutbury in 1380. So late as the reign of Henry VIII. they intruded without ceremony into all companies, even at the houses of the nobility; but in Elizabeth's reign they were adjudged rogues and vagabonds (1597).

MINT. Athelstan enacted regulations for the government of the mint about 928. There were several provincial mints under the control of that of London. Henry I. is said to have instituted a mint at Winchester, 1125. Stow says the mint was kept by Italians, the English being ignorant of the art of coining, 7 Edw. I. 1278. The operators were formed into a corporation by the charter of king Edward III., in which condition it consisted of the warden, master, comptroller, assay-master, workers, coiners, and subordinates. The first entry of gold brought to the mint for coinage occurs in 18 Edw. III. 1343. Tin was coined by Charles II. 1684; and gun-metal and pewter by his successor James after his abdication. Sir Isaac Newton was warden, 1699-1727, during which time the debased coin was called in, and new issued at the loss of the government. Between 1806 and 1810, grants amounting to 262,000*l.* were made by parliament for the erection of the present mint, which was completed in 1810; it was injured by fire, 31 Oct. 1815. The new constitution of the mint, founded on the report of the hon. Wellesley Pole, took effect in 1817. Professor Thomas Graham, the master of the mint, died 16 Sept. 1869. By the Coinage Act, passed 4 April, 1870, the office was combined with that of the chancellor of the exchequer, the duties being transferred to the deputy-master (Sir C. W. Fremantle), K.C.B., 1 Jan. 1890; resigned, Sept. 1894; succeeded by Mr. Horace Seymour, made K.C.B. June, and died 25 June, 1902; rt. hon. W. E. Macartney appointed Jan. 1903. (Sir Wm. Roberts-Austen, chemist and assayer since 1870, died 22 Nov. 1902.) See *Coin*.

MINUS, see *Plus*.

MIRACLE PLAYS, see under *Drama*.

MIRIDITES, or MIRDITES, see *Turkey*, 1877.

MIRRORS. In ancient times mirrors were made of metal; those of the Jewish women of brass. Mirrors of silver were introduced by Praxiteles 4th *century* B.C. Mirrors or looking-glasses were made at Venice, A.D. 1300; and in England, at Lambeth, near London, in 1673. The improvements in manufacturing plate-glass, and that of very large size, have cheapened looking-glasses very much. Various methods of coating glass by a solution of silver, thus avoiding the use of mercury, so injurious to the health of the workmen, have been made known; by M. Petitjean in 1851; by M. Cimeg in 1861, and by Liebig and others.

MISSIONARY BISHOPS, see under *Bishops*.

MISSIONS,* see *Mark* xvi. 15. Among the Romanists, the religious orders of St. Dominic, St. Francis, St. Augustin, &c., have missions to the Levant and to America. Marco Polo is said to have introduced missionaries into China, 1275. The Jesuits have missions to China (*which see*) and to most other parts of the world. Among the Protestants, an early undertaking of this kind was a Danish mission, planned by Frederick IV. in 1706. The Society for the Propagation of the Gospel in foreign parts was established 1701, and the Moravian Brethren encouraged missions about 1732. The London Missionary Society held their first meeting, 4 Nov. 1794 (1st mission sent to the South Sea Islands in the *Duff*, 1796); centenary celebrated, 15 Jan. 1895. Most Christian sects now support missions. *British Contributions to Foreign Missions:* 1871, 855,742*l.* (in 1871-7, 6,977,586*l.*). Over 3,000,000*l.* spent in the world on missions in 1905.

Great congress of protestant missions in London; a large number of societies represented; the earl of Aberdeen president, 9-19 June, 1888.

Commander Allan Gardner, R.N., who left England in the *Ocean Queen* in Sept. 1850, on the Patagonian mission, with Mr. Williams, surgeon, Mr. Maidment, catechist, and four others, died on Picton Island, at the mouth of the Beagle Channel, to the south of Tierra del Fuego, having been starved to death; all his companions previously perished, 6 Sept. 1851.

M. Schoffler, a missionary to Cochin-China, was publicly executed at Son-Tay, by order of the grand mandarin, for preaching Christianity, such preaching being prohibited by the law of that country, 4 May, 1851.

MISSISSIPPI, a great river, N. America, explored by De Soto about 1541. Captain Glazier discovered its source, 1884. Its length 2,960 miles. The Mississippi trade was begun in England, in Nov. 1716. Law's Mississippi scheme in France, commenced about the same period, exploded in 1720; at which time the nominal capital is said to have amounted to 100,000,000*l.* The ruin of thousands soon followed. See *Law's Bubble*.

* MISSIONS, "a series of sermons, generally by a 'missioner,' or special preacher, often followed by confessions and communions" (a species of revivalism), were authorised in the metropolis by the bishops of London, Winchester, and Rochester, held 1869 and since.

MISSOLONGHI, a town in Greece, taken from the Turks, 1 Nov. 1821, and heroically and successfully defended against the Turks by Marco Botzaris, Oct. 1822—27 Jan. 1823. It was taken 22 April, 1826, after a long siege. Here Lord Byron died, 19 April, 1824. A statue of Byron was unveiled here, 6 Nov. 1881. It was surrendered to the Greeks in 1829.

MISSOURI, a south-western state in N. America, was settled in 1763, and admitted into the union, 10 Aug. 1821. It decided on neutrality in the conflict of 1861, but was invaded by both the confederate and federal forces in June of that year, and became one of the seats of war. Capital, Jefferson city; population, 1880, 2,168,380; 1890, 2,679,184; 1900, 3,106,665; see *United States*, 1861 *et seq.*—Great railway strike March, 1886. The Missouri river is 3,047 miles long. See *Storms*, 28 April, 1899.

MITCHELSTOWN, Cork, see *Ireland*, 9 Sept. 1887.

MITHRIDATE, a medical preparation in the form of an electuary, supposed to be an antidote to poison and the oldest compound known, is said to have been invented by Mithridates, king of Pontus, about 70 B.C.

MITHRIDATIC WAR, caused by the massacre of 80,000 Romans, by Mithridates VI., king of Pontus, 88 B.C., and remarkable for its duration, its many sanguinary battles, and the cruelties of its commanders. Mithridates having taken the consul Aquilius, made him ride on an ass through a great part of Asia, crying out as he rode, "I am Aquilius, consul of the Romans." He is said to have killed him by causing melted gold to be poured down his throat, in derision of his avarice, 85 B.C. Mithridates was defeated by Pompey, 66 B.C.; and committed suicide, 63 B.C.

MITRAILLEUSE, or **MITRAILLEUR**, a machine-gun in which 37 or more large-bored rifles are combined with breech-action, by means of which a shower of bullets may be rapidly projected by one man. It was invented in Belgium, and adopted by the French emperor soon after the Prusso-Austrian war in 1866, and was much used in the Franco-Prussian war in 1870. Its peculiar "dry, shrieking, terrible sound" was described in the bombardment of Saarbrück, 2 Aug. 1870. Modifications of the mitrailleuse have been made by Montigny and others. The Fosbery mitrailleuse was tried and approved at Shoeburyness, 11 Aug. 1870.—It is mentioned in *Grose's Military Antiquities* (1801) that in England, in 1625, a patent was granted to William Drummond for a machine composed of a number of muskets joined together, by the help of which two soldiers can oppose a hundred, and named, on account of its effect, "thunder carriage," or more usually, "fire carriage." An English mitrailleuse, a modification of the American gatling, containing 50 cartridges, was tried at Woolwich, 18 Jan. 1872; fifty of them were ordered to be made by Armstrong.

MITRE. The cleft cap or mitre was worn by the Jewish high-priest, 1491 B.C. It had on it a golden plate inscribed "HOLINESS TO THE LORD." *Exodus* xxxix. 28. The most ancient mitre that has the nearest resemblance to the present one is that upon the seal of the bishop of Laon, in the 10th century. *Fosbroke.* Anciently the cardinals wore mitres, but at the council of Lyons, in 1245, they were directed to wear hats.

MITYLENE, or **LESBOS**, Ægean Sea. Near here the Greeks defeated and nearly destroyed the Turkish fleet, 7 Oct. 1824.

MNEMONICS, artificial memory, was introduced by Simonides the younger, 477 B.C. *Arund. Marbles.* "Mnemonica" was published by John Willis in 1618; and the "Memoria Technica" of Dr. Grey first appeared in 1730. A system of mnemonics was announced in Germany in 1806-7.

MOABITES, descendants of Lot, a people living to the south-east of Judæa. They were frequently at war with the Israelites, and were subdued with divine help by Ehud about 1336, by David about 1040, and by Jehoshaphat, 895 B.C., but often harassed the Jews in the decay of their monarchy. The discovery of a stone with inscription in Phœnician characters, relating to Mesha, king of Moab, referred to in 2 *Kings*, iii., was announced in Jan. 1870, and impressions were exhibited soon after.

MÖCKERN (Prussia). Here the French army under Eugène Beauharnais were defeated by the Prussians under Yorck, 5 April, 1813; and here Blücher defeated the French, 16 Oct. 1813.

MODELS. The first were figures of living persons, and Dibutades, the Corinthian, is the reputed inventor of those in clay. His daughter, being about to be separated from her lover, traced his profile by his shadow on the wall; her father filled up the outline with clay, which he afterwards baked, and thus produced a figure of the object of her affection, giving rise to an art till then unknown, about 985 B.C.

A beautiful model of the new town of Edinburgh, before the building began, was formed in wood.
A model was made of a bridge over the Neva, of uncommon strength as well as elegance; and of the mountains of Switzerland, by general Pfiffer (1766-85).
M. Choffin's model of Paris also was remarkable for its precision.
Fine models of Gibraltar, Quebec, and other fortified places, are deposited in the Rotunda at Woolwich. See *Waxwork* and *Lodging-houses.*

MODENA (formerly Mutina), capital of the late duchy in Central Italy; was governed by the house of Este, from 1288 till 1796, when the last male of that house, the reigning duke Hercules III., was expelled by the French. By the treaty of Campo Formio, the Modenese possessions were incorporated with the Cisalpine republic, 1797, and with the kingdom of Italy, 1805. The archduke Francis of Este, son of the archduke Ferdinand of Austria, and of Mary, the heiress of the last duke, was restored in 1814. Modena, in accordance with the voting by universal suffrage, was annexed to Sardinia on 18 March, 1860. Population of the city, 1881, 31,053; 1901, 64,941; of the province, 1881, 279,254; 1901, 322,617.

GRAND DUKES.

1814. Francis IV. An invasion of his states by Murat was defeated, 11 April, 1815. He was expelled by his subjects in 1831, but was restored by the Austrians

1846. Francis V. (born 1 June, 1819) succeeded 21 Jan. His subjects rose against him soon after the Italian war broke out, in April, 1859 He fled to Verona, establishing a regency, 11 June; which was abolished, 13 June; Farina was appointed dictator, 27 July, a constituent assembly was immediately elected, which offered the duchy to the king of Sardinia, 15 Sept, who incorporated it with his dominions, 18 March, 1860 Francis died, 20 Nov. 1875.

MODERADOS. A political party in Spain, long headed by Ramon Maria Narvaez, duke of Valencia (who died 23 April, 1868), who opposed the Progresistas headed by Espartero and Prim. The party was reinforced by the favourers of Don Carlos, after his total defeat in 1876.

MODERATES, opponents of the Progressives (*which see*).

MODOC INDIANS (a few hundreds), dwelling in lands south of Oregon, were removed to other lands by the United States government. Not obtaining subsistence, they returned to their old possessions, and their able leader captain Jack defeated the troops sent to expel them, 17 Jan. 1873. During negotiations for a peaceful settlement, they decoyed the United States commissioners into an ambush (11 April), and massacred general Canby and about 40 others. Fighting took place, 15, 16 April, and the Indians retreated to almost impregnable positions. The troops were fired on, and suffered much loss, 27 April. The Indians were gradually surrounded. Jack and about twenty warriors held out desperately. Some surrendered, and he himself was captured, 1 June; tried, July, and executed 3 Oct. 1873.

MŒSIA (now Bosnia, Servia, and Bulgaria), was finally subdued by Augustus, 29 B.C. It was successfully invaded by the Goths, A.D. 250, who eventually settled here; see *Goths*.

MOGULS, see *Tartary*.

MOHACZ (Lower Hungary). Here Louis king of Hungary, defeated by the Turks under Solyman II. with the loss of 22,000 men, was suffocated by the fall of his horse in a muddy brook, 29 Aug. 1526. Here also prince Charles of Lorraine defeated the Turks, 12 Aug. 1687.

MOHAMMEDAN, see *Mahometanism*.

MOHAMMERAH, a Persian town near the Euphrates, captured, after two hours' cannonading, by sir James Outram, during the Persian war, 26 March, 1857. News of the peace arrived 4 April.

MOHILEV, or MOHILEF (Russia). Here the Russian army, under prince Bagration, was signally defeated by the French under marshal Davoust, prince of Eckmühl, 23 July, 1812.

MOHOCKS, ruffians, who went about London at night, wounding and disfiguring the men, and indecently exposing the women. One hundred pounds were offered by royal proclamation in 1712, for apprehending any one of them. *Northouck.*

The "scourers" of the seventeenth century resemble the Mohocks.

MOHURRUM, a Mahometan festival in honour of the prophet's nephews: at its celebration in Bombay, Feb. 1874, the Mahometans fiercely attacked the Parsees, and were quelled by the military.

MOKANNA (Hakim ben Allah), "The Veiled," prophet, founder of a sect in Khorassan in the eighth century. He pretended to be an incarnation of God, and therefore veiled his face, but really to conceal the loss of an eye. He rebelled against the calif Almahdi, was for a time successful, but was subdued in 780, when he and the remains of his followers took poison. He is the subject of a poem by Thos. Moore in "Lalla Rookh," 1817.

MOLDAVIA, see *Danubian Principalities*.

MOLINISTS, a Roman Catholic sect, followers of Louis Molina, a Jesuit, born 1535. He maintained the reconcilability of the doctrines of predestination and free will, 1588.

MOLLY MAGUIRE, the name of a secret society in Ireland in 1843, and of another society (originally Buckshot, about 1853) in mining districts, United States (*which see*), 1877. It ceased about March, 1879.

MOLOKANI, a sect in West Russia, said to date from the 16th century, who maintain primitive Christian doctrines and practices; well described by Mr. D. Mackenzie Wallace in his "Russia," published 1877. Dassajeff, a peasant woman, one of the sect, received by the empress dowager for her kind assistance rendered to her son, the Cesarevitch, at his death at Abbas Tuman, 10 July, reported, 31 July, 1899.

General exodus of the Molokani reported to be taking place in the Caucasus, due to the petty vexations inflicted on them by the local authorities, July, 1905.

MOLUCCAS, an archipelago in the Indian Ocean (the chief island, Amboyna), discovered by the Portuguese, about 1511, and held by them secretly until the arrival of the Spaniards, who claimed them, till 1529, when Charles V. yielded them to John III. for a large sum of money. The Dutch conquered them in 1607, and have held them ever since,—except from 1810 to 1814, when they were subject to the English. Earthquake at Amboina, the capital almost destroyed and 50 persons killed, 5 Jan. 1898.

MOLWITZ (in Prussian Silesia). Here the Prussians, commanded by Frederick II., obtained a great victory over the Imperialists, 10 April (O. S. 30 March), 1741.

MOLYBDENUM, a whitish, brittle, almost infusible metal. Scheele, in 1778, discovered molybdic acid in a mineral hitherto confounded with graphite. Hjelm, 1782, prepared the metal from molybdic acid; and in 1825 Berzelius described most of its chemical characters. *Gmelin.*

the coast. Terminus of Uganda railway. Population, 1904, 24,000. Kisawir, or Frere Town, is a thriving station of the Church Missionary society. See *Africa* (*British East*).

MONACHISM (from the Greek *monos*, alone). Catholic writers refer to the prophet Elijah, and the Nazarites mentioned in *Numbers*, ch. vi., as early examples. The first Christian ascetics appear to be derived from the Jewish sect of the Essenes, whose life was very austere, practising celibacy, &c. About the time of Constantine (306-22) numbers of these ascetics withdrew into the deserts, and were called *hermits*, *monks*, and *anchorets*;* of whom Paul, Anthony, and Pachomius were most celebrated. Simeon, the founder of the Stylitæ (or pillar saints), died 451. He is said to have lived on a pillar thirty years. St Benedict, the great reformer of western monachism, published his rules and established his monastery at Monte Casino, about 529. The Carthusians, Cistercians, &c., are varieties of Benedictines. In 964, by decree of king Edgar, all married priests were ineffectually ordered to be replaced by monks. Religious orders expelled from France, by decree, 29 March, 1880. Relieved of their vows by the Pope, 1881. See *Abbeys*, and *Benedictines*.

MONACO, a principality, N. Italy, held by the Genoese family Grimaldi since 968. By treaty on 2 Feb. 1861, the prince ceded the communes of Roquebrune and Mentone, the chief part of his dominions, to France, for 4,000,000 francs. The prince, Charles III., born 8 Dec. 1818, succeeded his father Florestan, 20 June 1856; died 10 Sept. 1889; was succeeded by Albert, born 13 Nov. 1848. He married, 1st, lady Mary Douglas-Hamilton, daughter of 11th duke of Hamilton; and 2nd, Oct. 1889, the duchesse de Richelieu. Heir, Prince Louis, born 12 July, 1870. A commercial convention between the prince and France, signed 9 Nov. 1865, was much discussed as tending towards the abolition of the French navigation laws. Petitions against Monte Carlo, the great gaming establishment, 1880-4; a 50 years' concession granted, reported, March, 1896. International sporting club opened, autumn 1903. Population, 1888, 13,304; 1901, 15,180.

MONETARY CONFERENCES, International, opened at Paris, 16 Aug. 1878; and 19 April, 1881; Cologne, 11-13 Oct. 1882; Paris, 21 July, adjourned, 5 Aug. 1885; the union continued till 1 Jan. 1887: conventions signed, 6 Nov., and 8 Dec. 1885. A congress was held at Paris 11 Sept. *et seq.*, 1889. See *Latin Union*. International monetary conference at Brussels, respecting bimetallism (*which see*), proposed by the United States, N.A.; 18 nations represented (sir Charles Fremantle, sir Wm. H. Houldsworth, M.P., Mr. Bertram Currie, Mr. Alfred Rothschild, and others, for Great Britain); opened by M. Beernaert, Belgian minister of finance, 22 Nov. 1892; conference adjourned to 13 May, 1893, 17 Dec. 1892. "International Monetary Conferences," by H. B. Russell, Aug. 1898.

MONEY is mentioned as a medium of commerce in *Genesis* xxiii., 1860 B.C., when Abraham purchased a field as a sepulchre for Sarah. The coinage of money is ascribed to the Lydians. Moneta was the name given to their silver by the Romans, it having been coined in the temple of Juno-Moneta, 269 B.C. Money was made of different metals, and even of leather and other articles, both in ancient and modern times. It was made of pasteboard by the Hollanders so late as 1574. The czar Nicholas struck coins in platinum. Parliamentary committee on money lending, meetings, T. W. Russell, chairman, July, 1897; Mr. John Kirkwood refused to answer certain questions, admonished at the bar of the commons, 16 July. Money-lending act (regulating the business of money-lenders) passed 8 Aug. 1900. See *Coin*; *Gold*; *Copper*; *Mint*; *Banks*, *Latin Union*, &c. For *Money Orders*, see *Post Office*.

MONEYERS travelled with our early kings, and coined money as required; see *Mint*.

MONITOR SHIPS, see *United States*. The American monitor, *Miantonomah*, arrived at Plymouth in June, 1866, and excited much attention.

MONK, see *Monachism*.

MONMOUTH, Monmouthshire, was a Roman station, afterwards a Saxon fortress. The ancient castle rebuilt by John, lord of Monmouth, 1257, became the property of John of Gaunt, and in it his grandson, Henry V., was born, 9 Aug., 1388. Monmouth was first incorporated in 1550. Visit of the duke and duchess of York, 29 Oct. 1900. Population, 1881, 6,111; 1891, 5,470; 1901, 5,095.

MONMOUTH'S REBELLION. James, duke of Monmouth (born at Rotterdam, 9 April, 1649), a natural son of Charles II. by Lucy Waters, was banished England for his connection with the Rye-house plot, in 1683. He invaded England at Lyme, 11 June, 1685; was proclaimed king at Taunton, 20 June; was defeated at Sedgmoor, near Bridgewater, 6 July; and beheaded on Tower-hill, 15 July.

MONOCHORD, a box of thin wood, with a bridge, over which is stretched a wire or chord, said to have been invented by Pythagoras, about 600 B.C.

MONOLITH, Greek for single stone; see *Obelisk*.

* The anchorites of the 12th, 13th, and 14th centuries must not be confounded with the anachorets and anchorets, or hermits. The former were confined to solitary cells; the latter permitted to go where they pleased.

MONOPHYSITES, see *Eutychians*.

MONOPOLIES were formerly so numerous in England that parliament petitioned against them, and many were abolished, about 1601-2. They were further suppressed by 21 Jas. I., 1624. Sir Giles Mompesson and sir Francis Mitchell were punished for their abuse of monopolies, 1621. In 1630, Charles I. established monopolies of soap, salt, leather, and other common things, to supply a revenue without the help of parliament. It was decreed that none should be in future created by royal patent, 16 Chas. I. 1640.

MONO-RAIL SYSTEM, see under *Railways*.

MONOTHELITES, heretics who affirmed that Jesus Christ had but one will, were favoured by the emperor Heraclius, 630; they merged into the Eutychians (*which see*).

MONROE DOCTRINE, a term applied to the determination expressed by James Monroe, president of the United States, in his message to the congress, 2 Dec. 1823, not to permit any European power to interfere with the concerns of any independent states of North or South America. This doctrine was referred to in 1859, 1865, 1895-96. A resolution strongly affirming the doctrine proposed by senator Davis to the senate, 20 Jan. 1896. The action of Great Britain and Germany in their dispute with Venezuela 1902-3 (see *Venezuela*) aroused considerable excitement in the United States as being contrary to the Monroe doctrine. See Capt. Mahan's article on the Monroe doctrine, *National Review*, Feb. 1903, and *Times*, 30 Jan. 1903.

President Roosevelt, speaking on the Monroe doctrine at Chautauqua (N.Y.), says: "The Monroe doctrine was meeting with an increasing recognition abroad because it had not been allowed to become fossilised, but had been adapted to meet the growing and changeful needs of America, which had shown that it was no less ready to recognise the obligations to foreign peoples than to insist upon its own rights" . . . . . 11 Aug. 1905

MONTANA, a territory of the United States, north America, formed out of Idaho; became a territory in 1864, and a state in 1889. Capital, Helena. Population in 1880, 39,159; 1890, 132,159; 1900, 243,329.

MONTANISTS, followers of Montanus, of Ardaba, in Mysia, about 171, who was reputed to have the gift of prophecy, and proclaimed himself the Comforter promised by Christ. He condemned second marriages as fornication, permitted the dissolution of marriage, forbade avoiding martyrdom, and ordered a severe fast of three lents. The eloquent father, Tertullian, joined the sect, 204.

MONT BLANC, in the French Alps, is the highest mountain in Europe, being 15,781 feet above the level of the sea. The summit was first reached by Jacques Balmat in June, 1786, and afterwards by H. B. Saussure, aided by Balmat, on 2 Aug. 1787. The summit was attained by Dr. Hamel (when three of his guides perished) in 1820, and by many other persons before and since. Accounts of the ascents of Mr. John Auldjo, Charles Fellows, (1827), and of professor Tyndall (1857-8) have been published; see *Alps*.

Herr Rothe and a guide killed by an avalanche 20 Aug. 1891. Accidents frequent.

MONTSERRAT, a W. India island, discovered by Columbus in 1493, and settled by the British in 1632. It has several times been taken by the French, but was secured to the British in 1783. Destructive floods, 75 deaths, reported, 4 Dec. 1896; see *Mansion house,* 1897. Terrific hurricane, 74 natives killed, see *West Indies,* 7 Aug.; great fire at Plymouth, reported, 23 Sept. 1899. Population, 1891, 11,762, 1901, 12,215. See *Leeward Isles.*

MONUMENT OF LONDON, built by sir Christopher Wren, 1671-7. The pedestal is forty feet high, and the edifice altogether 202 feet, that being the distance of its base from the spot where the fire which it commemorates commenced. It is the loftiest isolated column in the world. Its erection cost about 14,500*l.* The staircase is of

black marble, consisting of 345 steps. Fall of part of the stone coping, no one injured, 25 Sept. 1888; examined and repaired; re-opened 14 Jan. 1889. Of the four original inscriptions, three were Latin, and the following in English,—cut in 1681, obliterated by James II.; re-cut in the reign of William III.; and finally erased by order of the common council, 26 Jan. 1831. They produced Pope's indignant lines:—

"Where London's column, pointing at the skies,
Like a tall bully, lifts the head, and lies."

THIS PILLAR WAS SET VP IN PERPETVAL REMEMBRANCE OF THAT MOST DREADFUL BURNING OF THIS PROTESTANT CITY, BEGUN AND CARRYED ON BY Y^E TREACHERY AND MALICE OF Y^E POPISH FACTION, IN Y^E BEGINNING OF SEPTEM. IN Y^E YEAR OF OUR LORD 1666, IN ORDER TO Y^E CARRYING ON THEIR HORRID PLOT FOR EXTIRPATING Y^E PROTESTANT RELIGION AND OLD ENGLISH LIBERTY, AND Y^E INTRODUCING POPERY AND SLAVERY.

William Green, a weaver, fell from this monument, 25 June, 1750. A man named Thomas Craddock, a baker, precipitated himself from its summit, 7 July, 1780. Mr. Lyon Levy, a Jewish diamond merchant, of considerable respectability, threw himself from it, 18 Jan. 1810; as did subsequently three other persons: in consequence of which a fence was placed round the railing of the gallery in 1839.

MONZA, or *Monsa*, formerly capital of the kingdom of Lombardy, frequently besieged. The cathedral was founded in the sixth century. The iron crown of Italy (*which see*) was kept here till 1859. See *Italy*, Oct. 1891.

MOODKEE (India). Here, on 18 Dec. 1845, the Sikhs attacked the advanced guard of the British, commanded by general Gough, and were repulsed three miles, losing many men and fifteen pieces of cannon. Sir Robert Sale was mortally wounded. The battle preceded that of Ferozeshah (*which see*).

MOOLTAN (N. W. India), an ancient city, was stormed by Runjeet Sing, 1818. Here his son, Moolraj Sing, ruler of the Sikhs, treacherously murdered Mr. Vans Agnew and lieutenant Anderson, 21 April, 1848. Several conflicts took place between the British and the Sikhs, in which the latter were beaten, and Mooltan taken after a protracted siege, 2-22 Jan. 1849.

MOON. Opacity of the moon, and the true causes of lunar eclipses, taught by Thales, 640 B.C. Hipparchus made observations on the moon at Rhodes, 127 B.C. Posidonius accounted for the tides from the motion of the moon, and said that the moon borrows her light from the sun, 79 B.C. *Diog. Laert.*

MOORS, formerly the natives of Mauritania (*which see*), but afterwards the name given to the Numidians and others, and now applied to the natives of Morocco and the neighbourhood. They frequently rebelled against the Roman emperors, and assisted Genseric and the Vandals in their invasion of Africa, 429. They resisted for a time the progress of the Saracens or Arab Mahometans, but were overcome in 707, and in 1019 were by them introduced into Spain, where their arms were long victorious. In 1063 they were defeated in Sicily by Roger Guiscard. The Moorish kingdom of Grenada was set up in 1237, and lasted till 1492, when it fell before Ferdinand V. of Castile, mainly owing to internal discord. The expulsion of the Moors from Spain was decreed by Charles V., but not fully carried into effect till 1609, when the bigotry of Philip III. inflicted this great injury to his country. About 1518 the Moors established the piratical states of Algiers and Tunis (*which see*). In the history of Spain, the Arabs and Moors must not be confounded.

MOPLAHS, industrious fanatical Mahometans in Malabar, E. Indies, gave trouble by their attacks on Hindoos and the British, especially in 1845; an outbreak was suppressed about 15 Sept. 1873.

MORAL INSTRUCTION LEAGUE, formally instituted at a meeting in St. Martin's town hall, London, 7 Dec. 1897, under the presidency of Mr. J. Allanston Picton, a member of the first school board for London. Members' first general meeting held 26 Jan. 1898, when a constitution was adopted. The object of the league is "to introduce systematic non-theological moral instruction into all schools and to make the formation of character the chief object of school life." The following authorities have, to Aug. 1905, made provision, or have decided to make provision, for systematic moral instruction (in addition to the Scripture lessons) in their schools:—Birmingham, Leicester, Bradford, Monmouthshire, Durham County, Burton-on-Trent, Colne, Bexhill-on-Sea, Shipley, Barry, Cheshire, Derbyshire, West Riding of Yorkshire, Mansfield, Gloucester, Margate, Ripon, Ebbw Vale, Sheffield, Huddersfield, Brighouse, and Hanley. Offices of the league, 19, Buckingham-street, Strand, W.C.

MORAL PHILOSOPHY, the science of ethics, defined as the knowledge of our duty, and the art of being virtuous and happy. Socrates (about 430 B.C.) is regarded as the father of ancient, and Grotius (about 1623) the father of modern moral philosophy; see *Ethics* and *Philosophy*.

MORAT (Switzerland), where Charles the Bold of Burgundy was completely defeated by the Swiss, 22 June, 1476. A monument, constructed of the bones of the vanquished, was destroyed by the French in 1798, and a stone column erected. 400th anniversary kept, 1876.

MORAVIA, an Austrian province, occupied by the Slavonians about 548, and conquered by the Avars and Bohemians, who submitted to Charlemagne. About 1000 it was subdued by Boleslas of Poland, but recovered by Ulrich of Bohemia in 1030. After various changes, Moravia and Bohemia were amalgamated into the Austrian dominions in 1526. Moravia was invaded by the Prussians in 1866, and they established their head-quarters at Brünn, the capital, 13 July. The demand of the Moravians for home rule was resisted Oct. 1871. Strike of 30,000 coal miners at Ostrau, and rioting suppressed by military, 16, 17 April, 1890. Population in 1890, 2,276,870; 1900, 2,435,081.

MORAVIANS, or **UNITED BRETHREN**, said to have been part of the Hussites, who withdrew into Moravia in the 15th century; but the brethren assert that their sect was derived from the Greek church in the 9th century. In 1722 they formed a settlement (called *Herrnhut*, the watch of the Lord) on the estate of count Zinzendorf. Their church consisted of 500 persons in 1727. They were introduced into England by count Zinzendorf about 1738; he died at Chelsea in June, 1760. In 1851 they had thirty-two chapels in England. They are zealous missionaries, and founded settlements in foreign parts, about 1732. London Association founded, 1817. Mr. Thos. Morton, a British merchant, who died 11 Sept. 1897, bequeathed a large sum, conditionally, to the Moravians.

MORETON BAY (New S. Wales). The colony founded here in 1859 has since been named *Queensland* (*which see*).

MORGANATIC* MARRIAGES, between a man of superior and a woman of inferior rank, in which it is stipulated that the latter and her children shall not enjoy the rank or inherit the possessions of the former. The children are legitimate. Such marriages are frequently contracted in Germany by royalty and the higher nobility. It has been asserted that George I. was thus married to the duchess of Kendal; George IV., when prince of Wales, to Mrs. Fitzherbert, "the lass of Richmond-hill"; the duke of Sussex to lady Cecilia Underwood; Frederic VI. of Denmark to the countess of Danner, 7 Aug. 1850; prince Alexander of Hesse to the countess Julie von Hauke, 1851, from which sprang the Battenberg family, and several Austrian princes; more recently the grand duke Paul of Russia with Mme. Pistolkors, reported, 2 Dec. 1902. The Royal Marriage Act, 12 Geo. III., chap. ii., "reduces to a position somewhat like that of morganatic unions every marriage in the royal family of Great Britain not previously approved by the sovereign under the great seal, provided the prince entering upon it is under 25 years of age, and every such marriage of a prince above 25 years of age which is disapproved by parliament." The family of the late duke of Cambridge (died 17 Mar. 1904), who married Miss Farebrother, an actress (died 1900), bear the name of FitzGeorge.

* Said to be derived from *Morgengabe*, the gift of a husband of a limited part of his property to such a bride on the morning after the marriage.

MORGARTEN (Switzerland). 1300 Swiss engaged 20,000 Austrians, commanded by the duke Leopold, whom they completely defeated, 15 Nov. 1315, upon the heights of Morgarten, overlooking the defile through which the enemy was to enter their territory from Zug.

MORICE DANCE, an ancient dance peculiar to some of the country parts of England, and, it is said, also to Scotland: it was performed before James I. in Herefordshire.

MORIER INCIDENT, see *Prussia*, 1889.

MORMONS (calling themselves the Church of Jesus Christ of *the* LATTER-DAY SAINTS). This sect derives its origin from Joseph Smith, born at Sharon, Vermont, 23 Dec. 1805, called the Prophet, who announced in 1823, at Palmyra, New York, that he had had a vision of the angel Moroni. In 1827 he announced that he found the book of Mormon, written on gold plates in hieroglyphics. This book was said, by the opponents of the Mormons, to have been written, about 1812, by a clergyman named Solomon Spaulding, as a religious romance in imitation of the scripture style; this is denied by the Mormons, and the discovery of the MS. of that romance by president Fairchild, of Oberlin college, in 1884, supports the Mormons' contention. The distinguishing characteristics of the sect are its belief in a continuous divine revelation through the inspired medium of the prophet at the head of their church, the practice of polygamy, and a complete hierarchial organization, which comprises two priesthoods, the "Melchizedek," or high priesthood, and the "Aaronic or Levitical," the lesser priesthood which ministers in temporal matters. The "First Presidency," composed of the president of the whole church and two counsellors, is the supreme authority. The Mormons command the payment of tithes, and encourage labour. Missionaries are propagating these doctrines in Europe, Australasia, Africa, China, Japan, South America, and other countries. See Hepworth Dixon's "Spiritual Wives"; J. H. Kennedy's "Early Days of Mormonism"; H. H. Bancroft's "History of Utah."

MORPHIA, an alkaloid, discovered in opium by Sertürner, in 1803.

MORPHOLOGY (Greek, *morphe*, form), the science of form and structure, as distinguished from physiology, studied in the 19th century, by Goethe, Gegenbaur, Haeckel, Huxley, and others.

MORRIS DANCE, see *Morice*.

MORTALITY TABLES have been frequently compiled. The first by Halley, astronomer-royal, 1693; the Northampton tables (for 1735-80), by Dr. Price; the Carlisle tables (for 1780-87), by Dr. Hailsham; the Equitable table by Davies, 1825; the Institute of Actuaries' table, 1869; Dr. Sprague's tables, 1882; see *Insurance, Annuities*, and *Bills of Mortality*.

MORTARS, a short gun with a large bore, and close chamber, for throwing bombs; said to have been used at Naples in 1435, and first made in England in 1543. The mortar left by Soult at Cadiz in Spain was fixed in St. James's-park in Aug. 1816. On 19 Oct. 1857, a colossal mortar, constructed by Mr. Robert Mallet, was tried at Woolwich; with a charge of 70 lbs. it threw a shell weighing 2550 lbs. 1½ mile horizontally, and about ¾ mile in height.

MORTELLA TOWERS, see *Martello*.

MORTIMER'S CROSS (Herefordshire). The earl of Pembroke and the Lancastrians were here severely defeated by the young duke of York, afterwards Edward IV., 2 Feb. 1461. He assumed the throne as Edward IV. in March following.

MORTMAIN ACTS (*mort main*, dead hand). When the survey of all the land in England was made by William I., 1085-6, the whole was found to amount to 62,215 knights' fees, of which the church then possessed 28,015, to which additions were afterwards made, till the 7th of Edward I., 1279, when the statute of mortmain was passed, from a fear that the estates of the church might

grow too bulky. By this act it was made unlawful to give any estates to the church without the king's leave; and this act, by a supplemental provision, was made to reach all lay-fraternities, or corporations, in the 15th of Richard II., 1391. Mortmain being such a state of possession as makes property inalienable, it is said to be in a dead hand. Several statutes have been passed on this subject; legacies by mortmain were especially restricted by the 9th Geo II., c. 36 (1736). Law consolidated and amended 1888; 1891, 1892.

MOSAIC WORK (the Roman *opus tessellatum*), is of Asiatic origin, and is probably referred to in *Esther*, ch. i. 6, about 519 B.C. It had attained to great excellence in Greece, in the time of Alexander and his successors, when Sosos of Pergamus, the most renowned Mosaic artist of antiquity, flourished. He acquired great fame by his accurate representation of an "unswept floor after a feast." The Romans also excelled in Mosaic work, as evidenced by the innumerable specimens preserved. Byzantine Mosaics date from the 4th century after Christ. The art was revived in Italy by Tafi, Gaddi, Cimabue, and Giotto, who designed Mosaics, and introduced a higher style in the 13th century. In the 16th century Titian and Veronese also designed subjects for this art. The practice of copying paintings in Mosaics came into vogue in the 17th century; and there is now a workshop in the Vatican where chemical science is employed in the production of colours, and where 20,000 different tints are kept. In 1861, Dr. Salviati of Venice had established his manufacture of "Enamel-mosaics," and in July, 1864, he fixed a large enamel Mosaic picture in one of the spandrils under the dome of St. Paul's cathedral, London. He also executed commissions for queen Victoria and other persons. He died Feb. 1890, aged 74. See *Paul's, St.*, 1896.

MOSANDRIUM. See *Philippium.*

MOSCOW, the ancient capital of Russia, was founded, it is said, by Dolgorouki, about 1147. The occupation of the south of Russia by the Mongols, in 1235, led to Moscow becoming the capital, and beginning with Jaroslav II., 1238, its princes became the reigning dynasty. In 1325, the metropolitan of Central Russia moved his seat to Moscow, which is regarded as a holy city by the Russians. The city continued to grow in area and political influence, and Ivan III. (1462–1505) assumed the title of Czar of all Russia. Peter the Great, in 1703, founded St. Petersburg, which became the capital of the empire, but Moscow is still regarded by the peasantry as the real capital. The city has suffered greatly from fire, it having been burned nearly to the ground, 1547; it was taken and burned by the khan of the Crimea, 1571; other disastrous fires, 1739, 1748, 1753, and 1812 (see *infra*). Since the last date Moscow has been largely rebuilt. The centre of the city is the Kremlin or Kreml "citadel," which stands on a height, 100 ft. above the river Moskwa, on which Moscow is situated, and is surrounded by a stone wall. Among the notable buildings within the Kremlin are the old palaces of the czars, the imperial palace, built 1849, the new palace, Orushenaya, containing the most valuable Russian antiquities; the cathedral of the Assumption, founded 1326, rebuilt 1475–79; the cathedral of St. Michael, built 1333, restored 1505, in which are interred the czars to the Ivan Alexievitch, brother of Peter the Great; the cathedral of the Annunciation, founded 1489, rebuilt 1553, formerly the private chapel of the czars; the Voznesenski monastery, dating from 1393, where all the czarinas are buried; the Ivan Veliki tower, 209 ft. high, with a gilded dome, and having at its foot the Kolokoi "king of bells," weighing over 192 tons, the largest bell in the world; the Hall of the Synod; the arsenal, and other buildings. Outside the Kremlin are the cathedral of St. Basil, 1554; the imperial university, founded by the empress Catherine, 1755, with a library of some 200,000 volumes, and a museum; the public museum, 1861; the foundling hospital, erected 1764; the Golitzyn museum, 1865; the observatory, and many monasteries, educational and scientific institutions for which Moscow is noted. The city ranks next to St. Petersburg as an industrial centre, and is the first commercial mart in Russia. Population, 1885, 753,469; 1897, 988,610; 1900, 1,023,817.

MÖSKIRCH (Baden). Here the Austrians were defeated by Moreau and the French, 5 May, 1800.

MOSQUE, a Mahometan house of prayer. Fine examples exist in Spain, India, and other countries. The dome and porticos are leading features. After the capture of Constantinople in 1453 by Mahomet II., the church of St. Sophia was transformed into a mosque, see *Sophia, St.* A mosque was erected in England in 1889; see under *Mahometanism.*

MOSQUITO COAST (Central America). Part included in republic of Nicaragua. The Indians inhabiting this coast were long under the protection of the British, who held Belize and a group of islands in the bay of Honduras. The jealousy of the United States long existed on this subject. In April, 1850, the two governments covenanted not "to occupy, or fortify, or colonise,

or assume, or exercise any dominion over any part of Central America." In 1855 the United States charged the British government with an infraction of the treaty; on which the latter agreed to cede the disputed territory to the republic of Honduras with some reservation.* The matter was finally settled in 1859.

MOSS-TROOPERS, desperate plunderers, and lawless soldiers, secreting themselves in the mosses on the borders of Scotland. Many severe laws were enacted against them, but they were not extirpated till the 18th century.

MOTETTS, short pieces of church music, some of which are dated about the end of the 13th century. Good motetts were written between 1430 and 1480; and very fine ones in the 16th and 17th centuries. The "Motett Society," for the publication of these works, was founded in 1847, by Wm. Dyce.

MOTION. On 13 Nov. 1873, professor Sylvester described to the London Mathematical Society a machine for converting spherical into rectilinear, and other motions, and for producing perfectly parallel motion, the discovery of M. Peaucellier, a French engineer officer, about 1867. See *Kinematics.*

MOTOR-BOATS. The construction of motor-boats, initiated by the builders of motor-cars, is now (1905) rapidly increasing, and is being brought to a high state of perfection. Specially constructed hulls are built and furnished with powerful engines up to 150 h.p. A high rate of speed has been attained, *La Rapière III.*, a French boat, 25 ft. long, performing 22·66 knots (26·08 miles) an hour. International races are now held annually. The British admiralty, during the naval and military manœuvres of 1904, used motor-boats for scouting purposes with successful results.

Successful experiment carried out with the *Pioneer*, one of the largest of the Scotch type of fishing boats, 75 ft. long, 22 ft. beam, 80 tons displacement, equipped with a motor of the "Daw" type, burning ordinary paraffin, and developing 24 h.p. . . . . 3 July, 1904

MOURNING FOR THE DEAD. The Israelites neither washed nor anointed themselves during the time of mourning, which for a friend lasted seven days; upon extraordinary occasions a month or more. The Greeks and Romans fasted. White was used in mourning for the imperial family at Constantinople, 323. The ordinary colour for mourning in Europe is black; in China, white; in Turkey, violet; in Ethiopia, brown; it was white in Spain until 1498. Anne of Brittany, the queen of two successive kings of France, mourned in black, instead of the then practice of wearing white, on the death of her first husband, Charles VIII., 7 April, 1488. *Hénault.*

MOUSQUETAIRES or MUSKETEERS, horse-soldiers under the old French *régime*, raised by Louis XIII., 1622. This corps was considered a military school for the French nobility. It was disbanded in 1646, but was restored in 1657. A second company was created in 1660, and formed cardinal Mazarin's guard. *Hénault.* The Mousquetaires were abolished in 1775. Dumas, in his well-known "Three Musketeers," gives an interesting description of these corps.

MOZAMBIQUE, chief of the Portuguese territories, E. Africa, was visited by Vasco da Gama, 1498; conquered by the Portuguese under Tristan da Cunha and Albuquerque, 1506; a settlement was established, 1508. Capital, Mozambique, on an islet.

* St. Juan del Norte (Greytown) was held by the British on behalf of the Mosquitoes till the American adventurers, under col. Kinney, took possession of it in Sept. 1855. He joined Walker; and on 10 Feb 1856, their associate, Rivas, the president, claimed and annexed the Mosquito territory to Nicaragua.

MUCKER (*hypocrites*), a German sect; see *Ebelians* and *Brazil*, 1874.

MUGGLETONIANS, so called from Ludowic Muggleton, a tailor, known about 1641, prominent about 1650; convicted of blasphemy, Jan. 1676; died, 1697. He and John Reeve affirmed that God the Father, leaving the government of heaven to Elias, came down and suffered death in a human form. They asserted that they were the two last witnesses of God which should appear before the end of the world, *Rev.* xi. 3. This sect existed, 1850.

MÜHLBERG, on the Elbe, Prussia. Here the German protestants were defeated by the emperor Charles V., 24 April, 1547, and John Frederick, elector of Saxony, was taken prisoner.

MÜHLDORF (Bavaria). Near this place Frederick, duke of Austria, was defeated and taken prisoner by Louis of Bavaria, 28 Sept. 1322.

MUKDEN, BATTLE OF, 1–10 March, 1905. See *Russo-Japanese War*.

MULE, a spinning machine invented in 1779, by Samuel Crompton, born at Bolton, Lancashire, in 1753; named, from Crompton's residence, *Hall-in-the-wood-wheel;* and *muslin-wheel*, from its giving birth to the British muslin and cambric manufacture; and *mule*, from its combining the advantages of Hargreave's spinning jenny, and Arkwright's adaptation. It is stated that Crompton at the time knew nothing of the latter. He did not patent his invention, but gave it up in 1780 to the public. It produced yarn treble the fineness and very much softer than any ever before produced in England. Parliament voted him 5000*l.* in 1812. Mr. Roberts invented the *self-acting mule* in 1825.

MÜLHAUSEN (in Alsace-Lorraine), an imperial city, under Rodolph of Hapsburg; joined the Swiss confederation in 1515; annexed to France in 1798; conquered and annexed to Germany, 1870-1. The calico manufacture was introduced in 1746. Population, 1890, 76,968; 1900, 89,012.

MUMMIES (from the Coptic *mum*, bitumen, gum, resin); see *Embalming*. The mummies in the British Museum, with other Egyptian antiquities, were placed there about 1803 and since. Mr. Alex. Gordon, in 1737, published an essay on three Egyptian mummies, one of which was brought to England in 1722 by capt. Wm. Lethieullier; two others came in 1734, one of which was retained by Dr. Mead, the other was given to the College of Physicians. In 1834, Mr. T. J. Pettigrew published a "History of Egyptian Mummies." The discovery of about 39 mummies of kings, priests, and other eminent persons in sarcophagi at Renneh, near Thebes, Upper Egypt, was announced in Aug. 1881, supposed to be of the 21st dynasty, about 1100 B.C. See *Thebes*, 1904–5.

MÜNSTER (capital of Westphalia, Prussia). The bishopric, said to have been founded by Charlemagne, 780, was secularised in 1802; seized by the French, 1806; part of the duchy of Berg, 1809; annexed to France, 1810; ceded to Prussia, 1815. The Anabaptists, under John of Leyden, the king of Münster, held the city in 1534-5. Here were signed the preliminaries of the treaty of Westphalia (*which see*), or Münster, Jan. 1647; definitively signed 24 Oct. 1648. The academy of Münster raised to the *status* of a university, July, 1902. Population, 1890, 49,344.—**MUNSTER**, the southern province of Ireland, an ancient kingdom. See *Ireland*, 1014. In 1568 a commission was issued for its government by a president and council, and new colonies were founded in 1588.

MURCIA, a province, formerly a kingdom, N. E. Spain, was subdued by the Moors, 713; by Ferdinand of Castile, 1240; and divided between Castile and Arragon, 1305. Population, 1887: province, 491,436; city, 98,538; city, 1897, 110,000.

Murcia, the capital, was sacked by the French under Sebastiani, 23 April, 1810. It was inundated by the Segura, after a violent storm, 15-17 Oct., 1879, when about 1000 persons perished.

MURDER, the highest offence against the law of God. (*Genesis* ix. 6, 2348 B.C.) A court of Ephetæ was established by Demophoön of Athens for the trial of murder, 1179 B.C. The Persians did not punish the first offence. In England, during a period of the heptarchy, murder was punished by fines only. So late as Henry VIII.'s time the crime was compounded for in Wales. Murderers were allowed benefit of clergy in 1503. Aggravated murder, or *petit treason* (a distinction now abolished), happened in three ways: by a servant killing his master, a wife her husband, and an ecclesiastical person his superior, stat. 25 Edw. III. 1350. The enactments relating to this crime are very numerous, and its wilful commission has been rarely pardoned by our sovereigns. The act whereby the murderer should be executed on the day next but one after his conviction, was repealed, 1836; see *Assassinations*, *Executions*, *Trials*; also *London*, *1872*, *Bravo*, *Burton*, *Euston*, *Ratcliffe*, *Road*, *Richmond*, *Harley Street*, *Whitechapel*, *Poisoning*; *Railways*, 1864, 1881, and 1905; *Slough*, *Melbourne*, *Mêrstham Tunnel Mystery*, 1905. MUSEUM, originally a quarter of the palace of Alexandria, like the Prytaneum of Athens, where eminent learned men were maintained by the public. The foundation is attributed to Ptolemy Philadelphus, who here placed his library about 280 B.C. Besides the British Museum, Soane's Museum, and the Museum of Geology (*which see*), there are very many others in London. The opening of public museums and galleries on Sunday was long advocated in parliament (see *Sunday*); agreed to by resolution for London (178—97), 10 March,

1896. Urban authorities authorised to provide museums and gymnasiums, by act passed 3 July, 1891.

MUSIC.* The origin of music is lost in antiquity; among civilised peoples it is probably to be traced to the ancient Egyptian priests, who employed this art in their religious rites and ceremonies. From the Egyptians the Greeks and Romans derived their knowledge of music. The ancient Hebrews probably took with them into Palestine some of the songs they had learned in Egypt. The hymns used in the temple formed the basis of the melodies of the early Christian church, and from these hymns was formulated the first authoritative musical system. St. Ambrose, abp. of Milan, 374, and Gregory the Great (pope, 590), may be regarded as the fathers of western church music. Isidore, bp. of Seville, 601, mentions harmony, in the modern sense of the word, in his "Sententiæ de Musica." Guido Arentino (died 1050), gave the names *ut* (*do*), *re*, *mi*, *fa*, *sol*, *la*, to the notes now universally used; *si* was subsequently added by Le Maire. The foundation of counterpoint was laid by Johannes Ockenheim, or Okeghem (1420–1513), and his pupil, Josquin des Prés (1450–1521); this art attained its perfection under Orlando di Lasso and Palestrina (the pupil of Claude Gondimel (1510–72), the founder of the Roman school), at the end of the 16th century. The compositions of Monteverde (1568–1643) mark the rise of the new school of harmony, which gradually spread throughout Europe, including among its masters Bach and Handel. The aria was introduced by Alessandro Scarlatti (1659–1725), the founder of the Neapolitan school. Opera seria had its inception about 1580 by the Florence Academy, a group of amateurs living in Florence, who met at the house of count Bardi, a Florentine nobleman, with the object of promoting the closer union of poetry and music by the revival of the musical declamation of the ancient Greeks. The French grand opera school was founded, late in the 17th century, by J. B Zully (1633–87), who composed many operas, ballets, occasional pieces and some church music. Since the middle of the 18th century Germany has held the highest place in music; its many exponents including Beethoven, Weber, Sphor, and Mendelssohn. The later German school had its origin in the 19th century, and claims as its starting-point Beethoven's ninth symphony, in which music and poetry form a perfect whole; Wagner and Litz, "tone poets," have been the chief exponents of this school, "the music of the future." Among the composers of sonatas and allied works are Beethoven, Mozart, Haydn, Schubert, Chopin, Schumann, Mendelssohn, Brahms, Liszt, and Dvorák. Constanzo Festa, whose *Te Deum* has been sung on the election of every pope since his time, was one of the creators of the madrigal. Prior to 1600, the chief music in England was masses, ballads, and madrigals, but dramatic music was much cultivated from that time. About the end of James I.'s reign, a music professorship was founded in the university of Oxford by Dr. Wm. Hychin; and the year 1710 was distinguished by the arrival in England of George Frederick Handel. Mozart came to England in 1763; Joseph Haydn in 1791; and Carl Maria von Weber in 1825. The publication of the excellent "Dictionary of Music and Musicians," edited by Mr. (aft. Sir) George Grove, begun Jan. 1878, was completed in 1890; he died, 28 May, 1900.

Monthly Musical Record published, 1871 *et seq.*

MUSICAL NOTES, &c. See *Gamut*. The first six are said to have been invented by Guy Aretino, a Benedictine monk of Arezzo, about 1025. *Blair*. The notes at present used were perfected in 1338. Counterpoint was brought to perfection by Palestrina about 1555. Gafforio of Lodi read lectures on musical composition in the 15th century, and they effected great improvement in the science. The Italian style of composition was introduced into these countries about 1616.

The MUSICAL PITCH was settled in France in 1859. The middle A to be 870 simple or 435 double vibrations in a second; but through error of measurement the fork made gave (A) 439 double vibrations (C, 522). At a meeting on the subject, held at the Society of Arts, on 23 Nov. 1860, the concert pitch of C was recommended to be 528 vibrations in a second, but the fork made by Mr. J. H. Griesbach gives 539⅓ vibrations. Mr. Hullah adopted 512 vibrations.

A lower pitch was adopted at concerts in London in Jan. 1869. 528 vibrations for C adopted for performances at the international exhibition of 1872, at a meeting, 20 Jan. 1872.

[Handel's tuning-fork, 1740, was 495; the Philharmonic Society's, 1813-43, was 515.]

Mr. A. J Ellis's elaborate "History of Musical Pitch" is published in "Journal of the Society of Arts," 5 March, 1880, and separately.

Sir G. Macfarren and a meeting agree to French normal diapason, 20 June; agreed to by international conference at Vienna, about 17 Nov. 1885; adopted by the Philharmonic society, Aug 1895.

MUSICAL FESTIVALS IN ENGLAND. Dr. Bysse, chancellor of Hereford, about 1724, proposed to the members of the choirs a collection at the cathedral door after morning service, when forty guineas were collected and appropriated to charitable purposes. It was then agreed to hold festivals at Hereford, Gloucester, and Worcester, in rotation annually. Until the year 1753, the festival lasted only two days; it was then extended at Hereford to three evenings; and at Gloucester, in 1757, to three mornings, for the purpose of introducing Handel's "Messiah," which was warmly received, and has been performed annually ever since. Musical festivals on a great scale are now annually held at various cathedrals in England; Chester, 21 July, 1897; see *Handel* and *Crystal Palace*.

"*Sons of the Clergy*" annual musical performances at St. Paul's began 1709.

MUSICAL FESTIVALS. Several were held on the continent in the 18th century; for Haydn at Vienna, 1808-1811; others at Erfurt 1811, Cologne 1821, and frequently since.

Study of music greatly increased by the efforts and teaching of John Hullah since 1840 *et seq.*

The Tonic *sol-fa* system, in which the letters *d*, *r*, *m*, *f*, *s*, *l*, *t*, (for *do*, *re*, *mi*, *fa*, *so*, *la*, *ti*, or *si*) are used instead of notes, was invented by Miss Glover, of Norwich, and improved by rev. John Curwen, about 1841; he died 1880.

The Tonic Sol-fa Association founded 1853; the college established 1862; jubilee celebrated at St. Paul's, 7 July; Crystal Palace, 18 July, 1891.

* Pythagoras (about 555 B.C.) maintained that the motions of the twelve spheres must produce delightful sounds, inaudible to mortal ears, which he called "the music of the spheres." St. Cecilia, said to have enticed an angel from the celestial regions by her melody, is termed the patroness of music. She died in the second century.

MUSICAL PIRACY first commenced in 1896, when popular copyright songs were printed by unauthorised persons, and sold in the streets at twopence per sheet. Music publishers sustained heavy losses, and in 1902 piracy having assumed such enormous proportions the Musical Copyright Association was formed by the

publishers. As a result of their efforts a bill was passed in the 1902 session of parliament—the Musical Copyright (summary proceedings) Act, 1902. This bill was, to an extent, inoperative, because whilst it enabled publishers to seize pirated music it was shorn of its two most important provisions—the penalty and the search warrant clauses. In 1903 a bill to amend the 1902 act passed the lords, but was blocked in the commons by Mr. Caldwell, and on December 15, 1903, a committee was appointed by the home secretary to inquire into the subject of music piracy. As a result another bill was drafted, but was "talked out" of the house of commons by Mr. Caldwell, who was a member of the committee. A further effort to legislate on the subject was made in 1905, but again it met with failure. At the end of that year a man named Willetts, known as the "King of the Pirates," and others, were arrested and charged with conspiracy to print and publish copyright music. It was given in evidence that millions of copies of pirated music had been seized by the police, and in the end Willetts was convicted and sentenced to nine months' imprisonment. Others received lighter sentences.

MUSICAL GLASSES, see under *Harmonic*, and *Copophone*.

MUSICAL ARCS, invented by Mr. Duddell, by means of an arrangement of electric currents by which a musical note that can be altered to any pitch is obtained and a tune played—*Nature*, 20 Dec. 1900; 4 April, 1901.

MUSIC HALLS. A public hall or building devoted to variety entertainments. Originally "free and easies" attached to licensed houses. Some still exist in the north of England, but in London and other towns they have completely disappeared. In the last 20 years the tone of the entertainments and the character of the audiences have much improved. A large number of halls are owned by Moss's Empires, Ltd. (capital 1,060,000*l.*), being a combination of the halls built and owned by Mr. H. E. Moss (knt. 1905), Mr. Oswald Stoll and Mr. Thornton, also by Mr. Thomas Barrasford, the Macnaghten Circuit and Livermore Bros.

MUSKETS, see *Firearms*.

MUSKETRY SCHOOLS at Hythe and Fleetwood were established in 1854 under major-general C. C. Hay. He resigned in 1867. The school at Fleetwood was closed the same year.

MUSLIN, a fine cotton cloth, so called, it is said, from having a downy nap on its surface, resembling moss (French, *mousse*); according to others, because it was first brought from Moussol, in India. Muslins were first worn in England in 1670. *Anderson.* By means of the *Mule* (*which see*), British much superseded India muslins.

MUTA (Syria). Here Mahomet and his followers defeated the Christians in his first conflict with them, 629.

MUTE. A prisoner is said to *stand mute*, when being arraigned for treason or felony, he either makes no answer, or answers foreign to the purpose. Until 1741, persons refusing to plead were subjected to torture by pressure.

Walter Calverly, esq., of Calverly in Yorkshire, having murdered two of his children, and stabbed his wife in a fit of jealousy, being arraigned for his crime at York assizes, stood mute, and was thereupon pressed to death in the castle, a large iron weight being placed upon his breast, 5 Aug. 1605. *Stow.*

Major Strangeway suffered death in a similar manner at Newgate for the murder of his brother-in-law, Mr. Fussell, 1657.

Judgment was awarded against mutes, as if they were convicted or had confessed, by 12 Geo. III. 1772.

A man refusing to plead was condemned and executed at the Old Bailey on a charge of murder, 1778; and another on a charge of burglary at Wells, 1792.

An act passed by which the court is directed to enter a plea of "not guilty" when the prisoner will not plead, 1827.

MUTINA (now Modena), N. Italy. Here Mark Antony, after defeating the consul Pansa, was himself beaten with great loss by Hirtius the other consul, and fled to Gaul, 27 April, 43 B.C.

MUTINIES, BRITISH. The mutiny throughout the fleet at Portsmouth for an advance of wages, April, 1797. It subsided on a promise from the Admiralty, which not being quickly fulfilled, occasioned a second mutiny on board the *London* man-

of-war; admiral Colpoys and his captain were put into confinement for ordering the marines to fire, whereby some lives were lost. The mutiny subsided 10 May, 1797, when an act was passed to raise the wages, and the king pardoned the mutineers.

Mutiny of the Bounty, 28 April, 1789; see *Bounty*.

Mutiny at the Nore, which blocked up the trade of the Thames, broke out on 27 May, 1797, and subsided 13 June, 1797, when the principal mutineers were put in irons, and several executed (including the ringleader, who had assumed the name of rear-admiral Richard Parker), 30 June, at Sheerness.

Mutiny of the *Danae* frigate; the crew carried the ship into Brest harbour, 27 March, 1800.

Mutiny on board admiral Mitchell's fleet at Bantry Bay, Dec. 1801, and January following (see *Bantry Bay*).

Mutiny at Malta, began 4 April, 1807, and ended on the 12th, when the mutineers (chiefly Greeks and Corsicans) blew themselves up by setting fire to a large magazine, consisting of between 400 and 500 barrels of gunpowder.

Mutiny on the *Flowery Land*, bound from London to Singapore; John Lyons and six foreign sailors murdered the captain and others, 10 Sept. 1863; Tiffin, a sailor, separated from the rest, gave information; seven were tried and five executed, 14–22 Feb. 1864.

Mutiny on the *Lennie*, British ship, bound for America, captain and two mates murdered by foreign seamen, 31 Oct. 1875. Van Hoydek, steward, managed to get the vessel to the Isle of Rhé; 11 men seized and conveyed to London, tried, 4 convicted, 4 May; executed, 23 May, 1876.

Mutiny on the *Caswell*, Glasgow barque, capt. G. Best, 4 Jan., on way home from Valparaiso, captain and 3 men killed; mutineers overcome by others, some killed; vessel brought to Queenstown, 13 May. Christos Baumbos sentenced to death. 31 July, executed at Cork, 25 Aug 1876. Giuseppe Pistoria executed at Cork, 25 Aug. 1879.

Mutiny in 19th Hussars, Curragh camp, Dublin; through discontent with officers on account of extra duty, 8 Sept.; 75 arrested; court martial; sentenced to penal servitude, 2 for 5 years, 2 for 6 years, 1 for 7 years, 1 for 8 years, 14 Nov. 1877.

Mutiny of 3 American sailors on the *Leicester Castle*, British ship, 300 mi. off Pitcairn island, capt. Peattie wounded, and Mr. Nixon, mate, killed; the mutineers escaped on a raft, unheard of since, 2 Sept. 1902; 7 men murdered on the *Veronica*, 7 Dec. 1902; see *Trials*, May, 1903.

For *Indian Mutinies*, see *Madras*, 1806, and *India*, 1857. See also *Russia*, 1905.

MUTINY ACT (1 & 2 Will. and Mary, c. 5), for the discipline, regulation, and payment of the army, &c., was passed 12 April, 1689, and has since been re-enacted annually.

A parliamentary commission reported in favour of consolidating and simplifying military law, by combining the mutiny act and articles of war in a new act to be passed annually, &c., July, 1878, called the Army (Annual) Act. See under *Army*, 1879 and 1881.

MYCALE (Ionia, Asia Minor), **BATTLE OF**, fought between the Greeks (under Leotychides, the king of Sparta, and Xantippus the Athenian) and the Persians, 22 Sept. 479 B.C.; the day on which Mardonius was defeated and slain at Platæa by Pausanias. The Persians (about 100,000 men), who had just returned from the unsuccessful expedition of Xerxes in Greece, were completely defeated, thousands of them slaughtered, and their camp burnt. The Greeks sailed back to Samos with an immense booty.

MYCENÆ, a division of the kingdom of Argives, in the Peloponnesus. It stood about fifty stadia from Argos, and flourished till the invasion of the Heraclidæ. Early history mythical.

MYLÆ, a bay of Sicily, where the Romans, under their consul Duilius, gained their first naval victory over the Carthaginians, and took fifty of their ships, 260 B.C. Here also Agrippa defeated the fleet of Sextus Pompeius, 36 B.C.

MYSORE (S. India), was made a flourishing kingdom by Hyder Ali, who dethroned the reigning sovereign in 1761, and by his son, Tippoo Sahib, who considerably harassed the English. Tippoo was chastised by them in 1792, and on 4 May, 1799, his capital, Seringapatam, was taken by assault, and himself slain. Tippoo's last surviving son, Gholam Mahomet, a British pensioner, died at Calcutta, 11 Aug. 1872. The English established a prince of the old royal family as maharajah of part of Mysore in 1799; being without an heir he was permitted to adopt a child of four years of age, maharajah Chamarajendra Wodeyar Bahadur, in Aug. 1867; who succeeded him at his death, 27 March, 1868, and assumed the government in May, 1881; an able, beneficent ruler; died, 27 Dec. 1894; succeeded by his son, Krishnaraja Wadyar Bahadur, aged nine (his mother regent), 1 Feb. 1895; formally installed by lord Curzon, viceroy, 8 Aug. 1902. Population, in 1881, 4,186 188; in 1891, 4,859,760; 1901, 5,538,482. Agricultural banks formed in 1895.

Sir Sheshadri Iyer, an eminent and progressive statesman, who built up the gold and other industries, and whose "prudent and far-sighted measures" averted famine, &c., died, 13 Sept. 1901.

MYSTERIES, derived from the Greek *mysterion*, a mystery or revealed secret. The *Sacred* mysteries is a term applied to the doctrines of Christianity, called the "mystery of godliness," 1 *Tim.* iii. 16, as opposed to the "mystery of iniquity," 2 *Thess.* ii. 7. The Holy Eucharist is also termed the sacred mysteries. The *Profane* mysteries were the secret ceremonies performed by a select few in honour of some deity. From the Egyptian mysteries of Isis and Osiris sprang those of Bacchus and Ceres among the Greeks. The Eleusinian mysteries were introduced at Athens by Eumolpus, 1356 B.C.—**MYSTERY PLAYS**; see *Drama*.

MYSTICS, a name given to those theologians who, in addition to the obvious meaning of the Holy Scriptures, assert that there are interpretations to be discovered by means of an emanation of the Divine Wisdom, by which the soul is enlightened and purified; for which purpose they advocate seclusion for contemplation and asceticism.

Mysticism taught at Alexandria by Clemens, Pantænus, Origen, and others, who mingled Christianity and Platonism, 2nd and 3rd centuries.

Much promoted by the works of the pseudo-Dionysius ("The Mystic Theology," &c), 6th century.

Introduced into the Western empire, 9th century.

Eminent mediæval mystics (opposed by the schoolmen), Master Eckhart (1251-1329); John Tauler of Strasburg, where he acted heroically during the plague, termed the "black death" (1290-1361); Henry Suso (1300-65). They aimed at a more spiritual religion than Romanism; but their followers were charged with immorality, pantheism, communism, and maintaining private inspiration.

Jacob Böhme or Behmen, the German mystic, published his "Aurora" (an alleged divine revelation) 1612; died, 18 Nov. 1624.

For modern mystics, see *Quakers*, *Quietists*, *Hutchinsonians*, and *Swedenborgians*.

MYTHOLOGY (Greek *mythos*, fable), the traditions respecting the gods and early history of any people. For the Egyptian mythology, see *Egypt*. Consult E. B. Tylor's "Early History of Mankind" and "Primitive Culture"; A. Lang's "Custom and Myth;" and Roscher's "Lexikon der Mythologie."

The chief Hindu gods are Brahma the creator, Vishnu, the preserver, and Siva the destroyer, but there have been many changes in the Hindu Pantheon.

N.

NAAS (E. Ireland). Here a desperate engagement took place between a body of royal forces and the insurgent Irish, 24 May, 1798, during the rebellion. The latter were defeated with the loss of 300 killed and many wounded.

NABONASSAR, ERA OF, received its name from the prince of Babylon, under whose reign astronomical studies were much advanced in Chaldæa. The years contain 365 days each, without intercalation. The first day of the era was Wednesday (said, in mistake, to be Thursday, in *L'Art de Vérifier les Dates*), 26 Feb. 747 B.C.—3967, Julian period. To find the Julian year on which the year of Nabonassar begins, subtract the year, if before Christ, from 748; if after Christ, add to it 747.

NACHOD (Bohemia). At this place the Prussians, under their crown prince, defeated the Austrians, after a severe conflict, 27 June, 1866. The Prussian Uhlans vanquished the Austrian cavalry.

NACOLEA (Phrygia). Near here the usurper Procopius was defeated, and soon afterwards slain by the emperor Valens, 366.

NAFELS (Switzerland). Here an Austrian army was defeated by a small body of Swiss, 1388.

NÂGA, the name in Hindu mythology of deified serpents, whose king, Sesha, is the sacred serpent of the god Vishnu.

NAGA HILLS MASSACRE, see *India*, 1875.

NAGASAKI, a city and port of Japan, on the west coast of the island of Kiusiu, with an excellent harbour famous for its beauty. For over 200 years Nagasaki was the only port of Japan in communication with other countries. From 1637 to 1859 Dutch traders were compelled to reside in their factory at Deshima, near the head of the inlet forming the harbour. Nagasaki was one of the 5 ports opened 1859 to the British and Americans. In 1869 it, with 7 other ports, was opened to foreign nations. There is a fine dockyard at Nagasaki, and 8 miles seaward, on an island, is situated the great Takashima coal mine, which gives importance to Nagasaki as a coaling station. Roman Catholic and Protestant missions are strongly represented in the city and its neighbourhood.

NAG'S HEAD STORY. Matthew Parker was consecrated archbishop of Canterbury at Lambeth, 17 Dec. 1559, by bishops Barlow, Coverdale, Scory, and Hodgkin. For forty-five years after, the Romish writers asserted that Parker and others had been ordained in an abnormal fashion by Scory at the Nag's Head Tavern, Cheapside. This fiction was refuted by Burnet, and is rejected by Roman Catholic authorities, such as Lingard.

NAHUM, FESTIVAL OF. Nahum, the seventh of the twelve minor prophets, about 713 B.C.; the festival is kept by the Eastern church on 1 December.

NAISSUS (Mœsia). The Goths were defeated near here with great slaughter by the emperor Claudius II., 269.

NAJARA or **NAVARRETE** (N. Spain). At Logroño, near these places, Edward the Black Prince defeated Henry de Trastamara, and re-established Peter the Cruel on the throne of Castile, 3 April, 1367.

NAMES. A Roman citizen had generally three names; *prænomen*, denoting the individual; *nomen*, the gens or clan; *cognomen*, the branch of the clan: sometimes he had the *agnomen* (*e.g.*, Publius Cornelius Scipio Africanus). The popes change their names on their exaltation to the pontificate, "a custom introduced by pope Sergius, whose name till then was Swine-snout," 687. *Platina.* Onuphrius (followed by most of the modern authorities), refers it to John XII., 956; stating that it was done in imitation of SS. Peter and Paul, who were first called Simon and Saul. In France the name given at baptism was sometimes changed. The two sons of Henry II. of France were christened Alexander and Hercules; at their confirmation these names were changed to Henry and Francis. Monks and nuns, at their entrance into monasteries, assume new names. See *Surnames.* Miss Yonge's "History of Christian Names," published 1863 (new edition 1884). M. A. Lower's "Patronymica Britannica," 1860.

NAMUR, in Belgium, was made a county in 932; taken by the French, 1 July, 1692; by William of England, 4 Aug. 1695; ceded to the house of Austria by the peace of Utrecht, and garrisoned by the Dutch as a barrier town of the United Provinces in 1715. The city of Namur was ceded to Austria, 1713; taken by the French in 1746, but was restored in 1749. In 1782, the emperor Joseph expelled the Dutch garrison. In 1792 it was again taken by the French, who were compelled to evacuate it in 1793; regained 1794; delivered up to the allies, 1814; assigned to Belgium, 1831. It was a site of a severe conflict in June, 1815, between the Prussians and the French under Grouchy, when retreating after the battle of Waterloo. Population, 1890, 29,794; 1900, 32,223.

NANCY (N.E. France), an ancient city, capital of Lorraine, in the 13th century. After taking Nancy, 29 Nov. 1475, and losing it, 5 Oct. 1476, Charles the Bold of Burgundy was defeated beneath its walls, and slain by the duke of Lorraine and the Swiss, 5 Jan. 1477; see *Lorraine.* Nancy was embellished by Stanislas, ex-king of Poland, who resided and died here Feb. 1766. It was captured by Blücher, Jan. 1814, and during the Franco-Prussian War, on the retreat of MacMahon's army, and expecting the German army, surrendered to four Uhlans, 12 Aug. 1870. It was restored at the peace. Population in 1901, 102,463.

Prof. Bleicher, eminent scientist, murdered by M. Four a chemist, who afterwards committed suicide, 8 June, 1901.

Grand fêtes; visits of president Carnot and the grand duke Constantine of Russia, 5–7 June, 1892.

NANKIN, said to have been made the central capital of China, 420. It was the court of the Ming dynasty from 1369 till Yung-lo removed it to Pekin in 1410. On 4 Aug. 1842, the British ships arrived at Nankin, and peace was made. The rebel

Two-pings took it on 19, 20 March, 1853. It was retaptured by the Imperialists, 19 July, 1864, and found to be in a very desolate condition. Estimated population, 1,000,000.

NANTES (W. France), formerly capital of the Namnetes. The edict in favour of the Protestants issued here by Henry IV., 13 April, 1598, was revoked by Louis XIV., 22 Oct. 1685 (bicentenary celebration, 22 Oct. 1885). Awful cruelties were committed here by the republican Carrier, Oct.-Nov. 1793; see *Drowning*. Population in 1886, 127,482; 1891, 121,054; 1901, 128,349.

NAPHTHA, a clear combustible rock oil, known to the Greeks, called "oil of Media," and thought to have been an ingredient in the Greek fire (*which see*). A rich spring struck near Berdiansk, Russia, Oct. 1899; wells found in cis-Caucasia, Aug. 1903. See *Petroleum*.

NAPIER'S BONES, see *Logarithms*.

NAPLES, formerly the continental division and seat of government of the kingdom of the Two Sicilies, began with a Greek colony named Parthenope (about 1000 B.C.), which was afterwards divided into Palæopolis (the *old*) and Neapolis (the *new* city); from the latter the present name is derived. The colony was conquered by the Romans in the Samnite war, 326 B.C. Naples, after resisting the power of the Lombards, Franks, and Germans, was subjugated by the Normans under Roger Guiscard, king of Sicily, A.D. 1131. Few countries have had so many political changes, and cruel and despotic rulers, or suffered so much by convulsions of nature, such as earthquakes, volcanic eruptions, &c. The eldest son of the king of Italy is styled prince of Naples. In 1856, the population of the kingdom of Naples was 6,886,030, of Sicily 2,231,020; total, 9,117,050. It now forms part of the revived kingdom of Italy. Population of the province in 1901, 1,135,906; of the city in 1901, 563,751.

NATIONAL ASSEMBLY, FRENCH. Upon the proposition of the abbé Siéyès, the states-general of France constituted themselves the National Assembly, 17 June, 1789. On the 20th the hall of this new assembly was shut by order of the king; upon which the deputies of the *tiers état* repaired to the *Jeu de Paume*, or Tennis-court, and swore not to dissolve until they had digested a constitution for France. On the 22nd they met at the church at St. Louis. This assembly abolished the state religion, annulled monastic vows, divided France into departments, sold the national domains, established a national bank, issued assignats, and dissolved itself 21 Sept. 1792; see *National Convention*. In 1848 the legislature was again termed the National Assembly. It met 4 May, and a new constitution was proclaimed, 12 Nov. A new constitution was once more proclaimed by Louis Napoleon in Jan. 1852, after dissolving the National Assembly, 2 Dec. 1851. The present French National Assembly was elected 8 Feb., and met 12 Feb. 1871; new constitution adopted, 25 Feb. 1875; see *France*.

NATIONAL ASSEMBLY, GERMAN, see *Germany*, 1848.

NATIONAL ASSOCIATIONS. One was formed in 1584, headed by the earl of Leicester, to protect queen Elizabeth from assassination, in consequence of the discovery of various plots. Another was proposed in the house of commons, in Feb. 1696, by sir Rowland Gwyn, for the defence of the person and government of William III. soon after the discovery of the assassination plot (*which see*). The members of both houses of parliament and the majority of the male population joined it immediately; all persons holding office under government were required to be members; see *Aid to Sick and Wounded, Artillery, Arts, Colonies, Education, Employers, Farmers, Social Science, Tuberculosis*, and *Volunteers*.

NATIONAL ASSOCIATION FOR THE EMPLOYMENT OF RESERVE AND DISCHARGED SOLDIERS. 11,068 men found permanent employment. Headquarters—119, Victoria-street, S.W. Annual meeting, 13 June, 1904.

NATIONAL BENEVOLENT INSTITUTION, established 1812, incorporated 1859. Pensions are granted to decayed gentry, and to professional people, teachers, and others in reduced circumstances.

NATIONAL CONVENTION OF FRANCE, constituted in the hall of the Tuileries 17 Sept., and formally opened 21 Sept. 1792, when M. Grégoire, at the head of the National Assembly, announced that that assembly had ceased its functions. It was then decreed, "That the citizens named by the French people to form the National Convention, being met to the number of 371, after having verified their powers, declare that the National Convention is constituted." This convention continued until a new constitution was organised, and the executive directory was installed at the Little Luxembourg, 1 Nov. 1795; see *Directory*. The chartists (*which see*) in England formed a national convention in 1839.

NATIONAL COUNCIL OF THE EVANGELICAL FREE CHURCHES, popularly known as "The Free Church Council," originated in an article by dr. Guinness Rogers to the *Methodist Times*, 20 Feb. 1890. The idea of the article, for the federation of the nonconformist bodies to promote their common interests, took practical shape, and the first free church congress was held at Manchester, 7 Nov. 1892. The second congress took place at Leeds, March, 1894, when it was determined that each congress should have an official president, dr. Berry being the first elected to hold that office. Since that date the congress has been held annually. The objects of the national council are "to facilitate intercourse and co-operation among the evangelical free churches; to assist in the organization of local councils; to encourage devotional fellowship and mutual counsel concerning the spiritual life and religious activities of the churches; to advocate the New Testament doctrine of the church, and to defend the rights of the associated churches; to promote the application of the law of Christ in every relation of human life." Among prominent past and present leaders of the movement have been and are dr. Clifford, rev. F. B. Meyer, the late dr. Guinness Rogers, the late rev. H. Price Hughes, dr. Munro Gibson, dr. Fairbairn, rev. J. Scott Lidgett (president 1906-7), rev. T. Law (the secretary), the late dr. Dale, the late dr. Parker, the late dr. Berry, dr. Townsend, dr. A. Maclaren, Messrs. G. Cadbury, R. W. Perks, M.P., Evan Spicer, J. Rutherford, and other prominent nonconformists. In addition to social organizations, "free church lectures" on the history and principles of nonconformity are given. The free church council has taken a very active part in the nonconformist agitation against the education act of 1902, and that for London 1903, and also in the passive resistance movement (*which see*). NATIONAL DEBT. In 1693 an excise act was passed, granting duties for carrying on the war with France; the act also secured certain recompenses and advantages to such persons as should collectively advance 1,000,000*l.* for the same purpose; this sum was speedily subscribed. The permanent debt began by the establishment of the Bank of England in 1694, mainly through the exertions of Charles Montague, afterwards earl of Halifax, under the condition of its lending money to the government on interest, the repayment of the principal not to be demanded. The rapid growth of the debt was mainly caused by foreign wars, and its reduction was continually demanded. See *Stocks, Sinking Fund*, and *Local Loans*. NATIONAL GALLERY, LONDON, began with the purchase, by the British government, of the Angerstein collection of 38 pictures, for 57,000*l*., in 1824. The first exhibition of them took place in Pall-mall, on 10 May, 1824. Sir G. Beaumont (1826), Mr. Holwell Carr (1831), and many other gentlemen, as well as the British Institution, contributed many fine pictures ; and the collection has been since greatly augmented by gifts and purchases. The present edifice in Trafalgar-square, designed by Mr. Wilkins, was completed and opened 9 April, 1838. In July, 1857, a commission appointed to consider the propriety of removing the pictures reported in favour of their remaining in their present locality ; and in 1860, 15,000*l*. were voted to be expended in adapting the central part of the building to exhibition purposes. On 11 May, 1861, the National Gallery was reopened after having been closed eight months, during which time great improvements were made in the internal arrangements. On 19 June, 1865, the house of commons voted 20,000*l*. to buy land to enlarge the building, and an act for this purpose was passed 15 July, 1866. NATIONAL GUARD OF FRANCE was instituted by the Committee of Safety at Paris on 13 July, 1789 (the day before the destruction of the Bastille), to maintain order and defend the public liberty. Its first colours were blue and red, to which white was added, when its formation was approved by the king. Its action was soon paralysed by the revolution, and it ceased altogether under the consulate and empire. It was revived by Napoleon in 1814, and maintained by Louis XVIII., but was broken up by Charles X., after a tumultuous review in 1827. It was revived in 1830, and helped to place Louis Philippe on the throne. In 1848 its reconstitution and its enlargement from 80,000 to 100,000 men led to the frightful conflict of June, 1848. Its constitution was entirely changed in Jan. 1852, when it was subjected entirely to the control of the government. Formerly it had many privileges, such as choosing its own officers, &c. In consequence of the defection of part of the National Guard and the incompetency of the rest during the outbreak in Paris in 1871, its gradual abolition was decreed by the national assembly at Versailles (488-154), 24 Aug. 1871. The peaceful disarmament began in September. National guards established in Spain, Naples, and other countries, during the nineteenth century.

NATIVITY. There are three festivals in the Roman and Greek churches, under this name. The Nativity of Christ, also observed by the protestants, on 25 Dec. (see *Christmas*); the Nativity of the Virgin Mary, not observed by the protestants at all. Pope Sergius I., about 690, established the latter, but it was not generally received in France and Germany till about 1000; nor by the eastern Christians till the 12th century. The festival of the nativity of St. John the Baptist, 24 June, Midsummer-day, is said to have been instituted in 488.

NATURAL HISTORY was studied by Solomon, 1014 B.C. (1 *Kings* iv. 33); Aristotle (384-322 B.C.); by Theophrastus (394-297 B.C.); and by Pliny (23-79 A.D.); see *Botany, Zoology, British Museum*, &c.

NATURAL PHILOSOPHY, see *Philosophy.*

NATURAL SELECTION, see *Species.*

NATURALIZATION is defined to be "the making a foreigner or alien a denizen or freeman of any kingdom or city, and so becoming, as it were, both a subject and a native of a king or country that by nature he did not belong to." The first act of naturalization passed in 1437; and various similar enactments were made in most of the reigns from that time; several of them special acts relating to individuals. An act for the naturalization of the Jews passed May, 1753, but was repealed in 1754, on the petition of all the cities in England; see *Jews*, for the privileges since granted them. The act for the naturalization of prince Albert passed 3 Vict., 7 Feb. 1840. A committee to inquire into the naturalization laws, appointed May, 1868, earl of Clarendon chairman, met 25 Oct. 1868; reported about Feb. 1869; and new acts for this purpose were passed 12 May, 1870, and 25 July, 1872. In 1870 there were about 9500 Americans in England, and about 2,500,000 British subjects in the United States of America. By the new act the latter were enabled to renounce their allegiance; and by the convention signed 3 Feb. 1871, the nationality of British subjects was made dependent on choice and not on birth. Naturalization (abroad) act passed, 6 July, 1895.

Committee on naturalization's report issued, with suggestions, see *Times* leader, 3 Oct. 1901.

NATURALISM, a realistic style in literature, mainly introduced by Balzac, 1829 *et seq.* "Naturalism" is now defined as the knowledge of phenomena, and the laws by which they are connected, but nothing more. Some writers combine with naturalism, agnosticism, positivism, and empiricism (*which see*).

"Naturalism and Agnosticism," the Gifford lectures, 1896-8, 2 vols., by prof. James Ward, published 1899, in which he opposes the mechanical view of nature, viz. *naturalism*, and insists upon the recognition of mind as the animating principle.

Edmond and Jules de Goncourt published "Medical and Physiological Novels," 1846 *et seq.*

Emile Zola, in his "Rougon-Macquart" series, 1871 *et seq.*, portrayed deformed and diseased rather than true nature. A dramatised form of his "Assommoir," entitled "Drink," had a long run in London in 1879, and is (1906) still played at intervals.

NATURE, a weekly illustrated journal of science, first appeared 4 Nov. 1869; editor, Mr. (afterwards sir) Joseph Norman Lockyer, F.R.S. Mr. Alex. Macmillan, one of the founders, born 1818, died 25 Jan. 1896.

La Nature (founded and edited by M. Gaston Tissandier, died Sept. 1899; see *Balloons*) appeared in 1892.

NATURE PRINTING. This process consists in impressing objects, such as plants, mosses, feathers, &c., into plates of metal, causing these objects, as it were, to engrave themselves; and afterwards taking casts or copies fit for printing from. Kniphoff, of Erfurt, between 1728 and 1757, produced his *Herbarium vivum* by pressing the plants themselves (previously inked) on paper; the impressions being afterwards coloured by hand. In 1833, Peter Kyhl, of Copenhagen, made use of steel rollers and lead plates. In 1842 Mr. Taylor printed lace. In 1847 Mr. Twining printed ferns, grasses, and plants; and in the same year Dr. Branson suggested the application of electrotyping to the impressions. In 1849, professor Leydolt, of Vienna, by the able assistance of Mr. Andrew Worring, obtained impressions of agates and fossils. The first practical application of this process is in Von Heufler's work on the mosses of Arpasch, in Transylvania; the second (the *first* in this country) in "The Ferns of Great Britain and Ireland," edited by Dr. Lindley, the illustrations to which were prepared under the superintendence of Mr. Henry Bradbury in 1855-56, who also in 1859-60 printed "The British Sea-weeds," edited by W. G. Johnstone and Alex. Croall. The process was applied to butterflies by Joseph Merrin of Gloucester, in 1864.

NAUTICAL ALMANAC, first published in 1767, edited by Dr. Neville Maskelyne, astronomer royal; the new and improved series began in 1834. Dr. John Russell Hind (died 1895), for many years superintendent, was succeeded by Dr. A. M. W. Downing, Jan. 1892.

NAUVOO, Illinois, N. America a city of the Mormonites (*which see*); founded 1840; left 1848.

NAVAL AND MILITARY ADMINISTRATION, royal commission appointed consisting of lord Hartington, lord R. Churchill, lord Revelstoke, Mr. (afterwards sir) Campbell-Bannerman, Mr. Ismay, general Brackenbury, admiral sir F. Richards, sir R. Temple, and Mr. W. H. Smith, 7 June, 1888.

First report, containing various recommendations with evidence, issued 20 March, 1890.

Mr. E. Stanhope, the war secretary, reports the proposal for the establishment of a council within the cabinet, for naval and military affairs, to decide on questions between the two departments, also to establish a war office council and a promotion board, 3 July, 1890.

The "Naval and military council," the duke of Devonshire president (cabinet ministers), established in 1895.

NAVAL ANNUAL, a valuable publication, begun by lord Brassey in 1886; continued by his son, Mr. T. A. Brassey, in 1896; Mr. John Leyland, 1900.

NAVAL ARCHITECTS' INSTITUTION was established in Jan. 1860. Annual international sessions are held; a meeting at Paris, lord Brassey, president, 11 June, 1895: at Hamburg, 9 June; Berlin, 10 June *et seq.* (the emperor present 11 June), 1896; London, 6 July, 1897; a German society, founded in 1898, met in Berlin, the emperor present; 18, 19 Nov. 1901.

NAVAL ARCHITECTURE. A scientific committee of fifteen appointed to consider the state of naval architecture and the requirements of naval warfare; 6 naval officers, 9 scientific men; lord Dufferin chairman; about 19 Dec. 1870. A royal school of naval architecture, established at South Kensington in 1864, merged into the Royal Naval College, Greenwich

NAVAL ARTILLERY VOLUNTEER FORCE, ROYAL, established by act passed 5 Aug. 1873.

On March 22, 1889, a proposal to utilise these volunteers who are stationed at various ports was made in the house of lords.

NAVAL ASYLUM, ROYAL, begun at Paddington in 1801, was transferred to Greenwich in 1807. The interior of the central portion of the building was commenced in 1613 by Anne, queen of James I., and completed in 1635 by queen Henrietta-Maria, whose arms still adorn the ceiling of the room in which her son Charles II. was born, 1630.

* Includes one-fifth of a sum of 11,500,000*l.*, which was a special grant sanctioned in 1897 for new construction to be spread over a period of five years. The details of this expenditure have not been published.

† These figures include sums provided under the Naval Defence Act of 1889 and the Naval Works Acts, 1895-1903 inclusive. The figures relating to the years 1901-4 also include the annuities in repayment of capital expenditure under the Naval Works Acts, namely—1901, 122,255*l.*; 1902, 297,895*l.*; 1903, 502,010*l.*; 1904, 634,738*l.*

The figures for France, Russia, Germany, Japan, and America are taken from the estimates of the respective countries, information as to actual expenditure not being available. The estimated expenditure for Great Britain is, therefore, given to enable a comparison to be made.

NAVAL WORKS ACT (at home and abroad), relating to docks, ports, passed 31 March, 1896; estimated cost, docks, 3,979,000*l.* 1896. Other acts passed 1897, 1899, and 1903.

NAVARINO (S. W. Greece), settled by the Arabs 6th century; taken by the Turks, 1500; by Venetians, 1686; by Turks, 1718; by Greeks, 1821; by Turks, 1825. Near here, on 20 Oct. 1827, the combined fleets of England, France, and Russia, under command of admiral Codrington, nearly destroyed the Turkish and Egyptian fleet. More than thirty ships, many of them four-deckers, were blown up or burnt, chiefly by the Turks themselves, to prevent their falling into the hands of their enemies. This destruction of the Turkish naval power was characterised by the duke of Wellington as an "untoward event." The port is also called Navarine.

NAVARRE, now a province of Spain, formed a part of the Roman dominions, and was conquered from the Saracens by Charlemagne, 778. His descendants appointed governors, one of whom, Garcias Ximenes, took the title of king in 857. In 1076, king Sancho IV. was poisoned, and Sancho Ramorez of Aragon seized Navarre. In 1134, Navarre became again independent under Garcias Ramorez IV. In 1234, Thibault, count of Champagne, nephew of Sancho VII., became sovereign of Navarre; and in 1284, by the marriage of the heiress Jane with Philip IV. le Bel, Navarre was united to France.

SOVEREIGNS OF NAVARRE.

1274. Jane I. and (1284) Philip-le-Bel of France.
1305 Louis X. Hutin of France.
1316. Philip V. the Long, of France.
1322. Charles I the Fair, IV of France
328. Jane II (daughter of Jane I.), and her husband Philip d'Evreux.
1349. Charles II., the Bad.
1387 Charles III, the Noble
1425. Blanche, his daughter, and her husband, John of Aragon.
1441. John II., alone, who became king of Aragon, in 1458 He endeavoured to obtain the crown of Castile also.
1479. Eleanor de Foix, his daughter.
„ Francis Phœbus de Foix, her son.
1483. Catherine (his sister) and her husband John d'Albret. Ferdinand of Aragon conquers and annexes all Navarre south of the Pyrenees, 1512

LOWER NAVARRE (in France).

1516. Henry d'Albret.
1555. Jane d'Albret and her husband Anthony de Bourbon, who died 1562.
1572. Henry III. who became in 1589 king of France (Henry IV.), to which Lower Navarre was formally united in 1609.

Note.—The first turbine-driven man-of-war (the third-class cruiser *Amethyst*) constructed (2 torpedo-boat destroyers, the *Velox* and *Eden*, had previously been built) for the British navy was launched at Elswick yard, Newcastle-on-Tyne, 5 Nov. 1903. See *Turbine*.

NAVIGATION began with the Egyptians and Phœnicians. The first laws of navigation originated with the Rhodians. The first account we have of any considerable voyage is that of the Phœnicians sailing round Africa.

NAVIGATION LAWS. A code of maritime laws is attributed to Richard I. of England, said to have been decreed at the isle of Oleron, 1194, and further enactments were made by Richard II. in 1381.—In Oct. 1651, the parliament passed an act entitled "Goods from foreign parts, by whom to be imported," the principles of which were affirmed by 12 Charles II. c. 18, "an act for the encouraging and increasing of shipping and navigation" (1660). The latter act restricts the importation and exportation of goods from or to Asia, Africa, or America, to English ships, of which the masters and three-fourths of the mariners are to be English. This was followed by many acts of similar tenor; which were consolidated by 3 & 4 Will. IV. c. 54 (1833). These acts were in the whole or in part repealed by the act "to amend the laws in force for the encouragement of British shipping and navigation" (passed 12 & 13 Vict. c. 29, 26 June, 1849, after much opposition), and which came into operation 1 Jan. 1850. The steam navigation act passed 14 & 15 Vict. c. 79, 1851, came into operation 1 Jan. 1852. The act regulating the navigation of the river Thames was passed in 1786.—In Feb. 1865 the emperor recommended the modification of the French navigation laws; in Feb. 1872, new restrictions were laid upon foreign ships, chiefly affecting British.

NAVIGATORS (or Navvies). These helpers in the construction of railways probably derived their name (about 1830) from formerly making the inland navigation in Lincolnshire, &c., and are doubtfully said to be descendants of the original Dutch canal labourers. Navvy Mission Society (new) met at Lambeth palace, 7 May, 1880. A "steam navvy" suitable for working in sand, gravel, or heavy clay, made by Messrs. Ruston, Proctor & Co., of Lincoln, 1878.

NAVAL SALUTE TO THE BRITISH FLAG began in Alfred's reign, and though sometimes disputed, may be said to have been continued ever since. The Dutch agreed to strike to the English colours in the British seas, in 1673. The honour of the flag salute at sea was also formally assented to by France in 1704, although it had been long previously exacted by England; see *Flag* and *Salutes at Sea*.

NAVAL UNIFORMS. The first notice of the establishment of a uniform in the British naval service, which we have met with, occurs in the *Jacobite's Journal* of 5 March, 1748, under the head of "Domestic News," in these terms:—"An order is said to be issued, requiring all his majesty's sea-officers, from the admiral down to the midshipman, to wear a uniformity of clothing, for which purpose pattern coats for dress suits and frocks for each rank of officers are lodged at the Navy-office, and at the several dockyards for their inspection." This is corroborated by the *Gazette* of 13 July, 1757, when the first alteration in the uniform took place, and in which a reference is made to the order of 1748, alluded to in the journal above mentioned, and which in fact is the year when a naval uniform was first established. James I. had indeed granted, by warrant of 6 April, 1609, to six of his principal masters of the navy, "liverie coats of fine red cloth." The warrant is stated to have been drawn *verbatim* from one signed by queen Elizabeth, but which had not been acted upon by reason of her death. This curious document is in the British Museum; but king James's limited red livery is supposed to have been soon discontinued.—*Quarterly Review.* An act respecting them was passed in 1894.

NAVY PAY OFFICE, organised in 1644, was abolished in 1836, when the army and navy pay departments were consolidated in the Paymaster General's office.

NAVY LIST was first officially compiled by John Finlaison, the celebrated actuary, and published monthly in 1814 *et seq.*; Lean's "Royal Navy List" is published quarterly.

NAVAL REVIEWS. Queen Victoria reviewed the fleet at Spithead, near Portsmouth, 11 Aug. 1853, again, March, 1854, before it sailed to the Baltic, at the commencement of the Russian war, and again, at Portsmouth, on the conclusion of peace, in the presence of the parliament, &c. The fleet extended in an unbroken line of 5 miles, and consisted of upwards of 300 men-of-war, carrying 3800 guns, and manned by 40,000 seamen. There were about 100,000 spectators, 23 April, 1856.

A grand naval review (15 great wooden ships, 15 iron-plated, 16 gun-vessels and boats), was held at Spithead (queen Victoria, the sultan, and the viceroy of Egypt present), 17 July, 1867; another at Spithead before the shah of Persia, 23 June, 1873. another at Spithead by queen Victoria (10 broadside ships, 8 turret ships, &c.), 3 Aug. 1878; another at Portsmouth, queen Victoria and colonial visitors present (at the expense of the officers), 23 July, 1886.

Grand unexampled naval review (jubilee) by queen Victoria at Spithead, 23 July, 1887; 135 vessels of all kinds, including 26 ironclads, 20,200 officers and men; one man died through the bursting of a saluting gun. DIAMOND JUBILEE review at Spithead; the prince of Wales, the royal family, and foreign visitors present: 165 British warships in 4 lines, 5 miles in length, between Portsmouth and the Isle of Wight; outside them, 2 lines of foreign warships, and special merchant vessels with guests; illuminations, &c. at night, 26 June, 1897.

CORONATION REVIEW, Spithead, 16 Aug. 1902 The fleet assembled on 28 June, but owing to the illness of the king the review was postponed There were present 20 battle-ships, 24 cruisers, 15 torpedo-gunboats, 32 torpedo-destroyers, 5 training-ships, and 7 brigs, in all 103 vessels, exclusive of yachts, torpedo-boats, and special-service vessels. For the review on 28 June the following foreign men-of-war assembled:—Germany, 1 vessel; Russia, 1; France, 1; Spain, 1; Portugal, 1; Sweden and Norway, 2; Denmark, 1; Holland, 1; Greece, 1; Italy, 1; United States, 1; Japan, 2; Chili, 1; and the Argentine Republic, 1; only those belonging to Japan, Italy, and Portugal remained for the review on the 16 Aug. The review by the king passed off successfully.

NAVAL VOLUNTEERS (or *Reserve*). By 16 & 17 Vict. c. 73 (1853), the admiralty were empowered to raise a body of sea-faring men to be called the "Naval Coast Volunteers," not to exceed 10,000, for the defence of the coast, and for actual service if required. In 1859, acts were passed to enable the admiralty to raise a number of men, not exceeding 30,000, as a reserve force of seamen, to be called the "Royal Naval Volunteers." In November following, the admiralty issued a statement of the "qualifications, advantages, and obligations" of this reserve. The enrolment commenced on 1 Jan. 1860. The engagement is for five years, and the volunteers are entitled to a pension when incapacitated after the expiration of the term. At the prospect of war with the United States in Dec. 1861, a great number of seamen at Hartlepool, Dundee, London, Aberdeen, &c., offered their services. About 24,000 men, in 1896; 29,500 in 1905. Naval Reserve act passed, 14 Aug. 1896. Naval Forces act, 1903, increased the number of men of the reserve, and authorised short service in the navy and the completion of 7 years in the reserve. Royal Fleet Reserve, total 12,759. Naval Volunteers Reserve act, 22 July, 1902. By this act the naval volunteers are subject to all regulations made with regard to them by the admiralty; if called out for active service they are liable to serve either ashore or afloat. Strength in 1905 about 3,500.

First enrolled body of Royal Naval Volunteers inspected, about 18 Jan. 1873.

THE NAVY RECORDS SOCIETY, established to promote the writing of a new adequate naval history of England, and the publication of books relating to the subject; first general meeting at the R. United Service Institution, 4 July, 1893; annual meetings.

THE NAVY LEAGUE, established in 1894, to secure, as a primary object of the national policy, "the command of the sea," and to spread valuable information by means of publications, lectures, &c.; the late adm. sir Geoffrey Hornby, first president. No. 1 of the journal published July, 1895; appeal to the colonies for support responded to by the Cape, *Times* leader, 12 Oct. 1895; Mr. Wyatt, envoy, leaves for Canada, Sept. 1902; annual meetings.

NAVY OF FRANCE. It is first mentioned in history, 728, when, like that of England at an early period, it consisted of galleys; in this year the French defeated the Frisian fleet. The French fleet was almost annihilated by Edward III. at the battle of Sluys, 24 June, 1340. It was considerably improved under Louis XIV. at the instance of his minister Colbert, about 1697. The French navy was in its splendour about 1781; became greatly reduced in the wars with England; see *Naval Battles.* It was greatly increased by the emperor Napoleon III., and in 1859 consisted of 51 ships of the line (14 sailing vessels and 37 steamers), and 398 other vessels, in all 449; including vessels building, converting, or ordered to be built. The new French iron-clad frigate *Gloire*, constructed by M. Dupuy de Lôme, launched in 1860, was generally considered as successful. The *Solferino* and *Magenta* were launched in June, 1861; other iron vessels since. The *Magenta* was destroyed by fire, 6 killed, 31 Aug. 1875. The *Devastation*, a great iron-clad, launched at Lorient, 19 Aug. 1879. The Supreme Navy Council was created by decree, 6 Dec. 1889. Navy league, founded 12 May, 1899. See *Navies* (*Foreign*).

NAZARENE, a name given to Jesus Christ, and his disciples; but afterwards to a sect who rejected the doctrine of Christ's divinity in the first century. A sect named Nazarenes, resembling the Society of Friends in Britain, became prominent in Hungary in the autumn of 1867.

NEBULÆ, the luminous cloudlike mist visible to the naked eye in some constellations, such as Orion, in others only by powerful telescope; much studied by astronomers, and formerly considered to be clusters of stars. Halley gave a list of 6 nebulæ, with a theory, in 1716. Messier, in 1784, gave 103. Sir Wm. Herschel discovered more than 2,500, and sir John Herschel more than 2,000; 7,840 known up to 1887; Dr. Dreyer's index catalogue gives 1,529, published total, 9,369, 1895. Nebulæ proper are classified as annular, elliptic, spiral, planetary, and nebulous. Their spectrum consists usually of a few bright lines indicative of their gaseous structure.

The *Nebular Hypothesis* put forth by Laplace in his "Systeme du Monde," 1796, supposed that the solar system was evolved mechanically from a vast diffused revolving nebula, and that nebulæ were the early stages in the formation of planets and their satellites, by cooling, condensation, and contraction. This theory was adopted by sir William Herschel, and though at first opposed, is now generally accepted in a modified form. Mr. Lassell scrutinized the dumbbell nebula in Orion, and reported that the bright parts did not appear to be stars, Oct. 1860. Dr. Wm. Huggins reported his analyses of certain nebulæ by their spectra, and believed them to be gaseous, 1865.

For sir Norman Lockyer's theory see under *Meteors*, 17 Nov. 1887.

Prof. Max Wolf, of Heidelberg, discovered a fine cluster in *Coma Berenices*, April, 1901.

NECROMANCERS, see *Magic*.

NECTARINE, the *Amygdalus Persica*, originally came from Persia about 1562. Previously, presents of nectarines were frequently sent to the court of England from the Netherlands; and Catherine, queen of Henry VIII., distributed them among her friends.

NEEDLES. "The making of Spanish needles was first taught in England by Elias Crowse, a German, about the eighth year of queen Elizabeth, and in Queen Mary's time there was a negro who made fine Spanish needles in Cheapside, but would never teach his art to any."—*Stow.* The manufacture was greatly improved at Whitechapel, London; Redditch, in Gloucestershire, and Hathersage, in Derbyshire. An exhibition of ancient needlework was formed at South Kensington Museum in 1873. Royal school of art (started 1872); new building erected at cost of 52,000*l.* (10,000*l.* from Mr. Edw. Stern). Opened by the princess of Wales, 29 April, 1903.

NEEDLE-GUN (*Zündnadelgewehr*), a musket invented by J. N. Dreyse of Sœmmerda, about 1827, and made a breech-loader in 1836, which was adopted by the Prussian general Manteuffel about 1846. It was found to be a most effective weapon in the war with Denmark in 1864, and in that with Austria in 1866. The ignition of the charge is produced by a fine steel rod or needle being pressed through the cartridge. The principle is claimed for James Whitley, of Dublin, 1823; Abraham Mosar, 1831; and John Hanson, of Huddersfield, 1843.

NEPAUL (N. India) was conquered by the Ghoorkas, 1768, who made treaties with the British, 1791 and 1801; but frequently made incursions; and in consequence war with them commenced 1 Nov. 1814; terminated 27 April, 1815. A treaty of peace was signed between the parties, 2 Dec. 1815. War was renewed through an infraction of the treaty by the Nepaulese, Jan. 1816; and after several contests, unfavourable to the Nepaulese, the former treaty was ratified, 15 March, 1816. An extraordinary embassy from the king of Nepaul to the

queen of Great Britain arrived in England, landing at Southampton, 25 May, and remained till Aug. 1850; it consisted of the Nepaulese prince, Jung Bahadoor, and his suite, to whom many honours were paid. He supported the English during the Indian mutiny in 1857. The prince of Wales was honourably received in Nepaul, 12 Feb. 1876.

NEPHALIA, sacrifices of sobriety among the Greeks, when they offered mead instead of wine to the sun and moon, to the nymphs, to Aurora, and to Venus; and burnt any wood but that of the vine, fig-tree, and mulberry-tree, esteemed symbols of drunkenness, 613 B.C.

NEPHOSCOPE (*nephos*, Greek, a cloud). An apparatus for measuring the velocity of clouds, invented by Karl Braun, and reported to the Academy of Sciences, Paris, 27 July, 1868.

NEPTUNE, a primary planet, first observed on 23 Sept. 1846, by Dr. Galle, at Berlin, in consequence of a letter from M. Le Verrier, who had conjectured from the anomalous movements of Uranus that a distant planet might exist nearly in the position where Neptune was situated. Calculations to the same effect had been previously made by Mr J. Couch Adams, of Cambridge; but unfortunate delays occurred in their publication, and also of professor Challis's consequent discovery of the planet. The Royal Society of London awarded its gold medal to both astronomers as equals in the theoretical discovery. A satellite of Neptune was discovered by Mr. Lassell on 10 Oct. following. Neptune is said to have been seen by Lalande, and thought to be a fixed star. The Greek god Poseidon became the Roman Neptune. Prof. J. C. Adams died 21 Jan. 1892; his "Papers" published March, 1897.

NEPTUNIUM, a metal discovered in tantalite, from Connecticut, by R. Herrmann in 1877; not generally admitted by chemists.

NERVES. Our knowledge of the nature and functions of the nervous system has been greatly enlarged by the researches and experiments of physiologists during the 19th century. NESTORIANS, the followers of Nestorius, bishop of Constantinople (428-431), who is represented as a heretic. He was opposed by Eutyches; see *Eutychians*.

1. He rejected the error of those who said Christ was a mere man, as Ebion, Paul of Samosata Photinus. 2. He maintained that the Word was united to the humanity in Christ Jesus, and that this union was most intimate and strict. 3 He held that these two natures made one Christ, one Son, one Person; only made up of two natures. 4. And this one Person may have either divine or human properties attributed to Him.

NEUFCHATEL, a canton in Switzerland, formerly a lordship, afterwards a principality. The first known lord was Ulric de Fenis, about 1032, whose descendants ruled till 1373, after which by marriages it frequently changed governors. On the death of the duchesse de Nemours, the last of the Longuevilles, in 1707, there were many claimants; among them our William III. He and the allies however gave it to Frederick I. of Prussia with the title of prince. In 1806 the principality was ceded to France, and Napoleon bestowed it on his general Berthier, who held it till 1814, when it fell to the disposal of the allies. They restored the king of Prussia with the title of prince with certain rights and privileges; but constituted it a part of the Swiss confederation. Population: 1888, canton, 108,153; city, 16,261; 1901, canton, 125,804; city, 20,916.

After an unsuccessful attempt in 1831, the inhabitants repudiated their allegiance to Prussia, and proclaimed Neufchatel a free and independent member of the Swiss confederation 1848

The king of Prussia protested against this; and a protocol was signed between England, France, and Austria, recognising his claims 1852

Some of his adherents, headed by the count de Fourtalès, broke out into insurrection against the republican authorities, who, however, quickly subdued and imprisoned them, with the intention of bringing them to trial . . . . . Sept. 1856

War threatened by the king of Prussia, and great energy and determination manifested by the Swiss. On the intervention of the English and French governments, a treaty was signed by which the king of Prussia virtually renounced his claims, on receiving a pecuniary compensation, which he eventually gave up. He retains the title of prince of Neufchatel, without any political rights, 11 June, 1857

The prisoners of Sept. 1856 were released without trial, 18 Jan. ,,

NEUSTRIA or **WEST FRANCE**, a kingdom allotted to Clotaire by his father Clovis, at his death in 511. His descendant, Charlemagne, became sole king of France in 771. It was conquered by the Northmen and hence named Normandy, (*which see*).

NEUTRALITY LAWS. A commission, in a report issued in May, 1868, recommended changes. An act to make better provision for the preservation of neutrality was passed 9 Aug. 1870. John P. McDiarmid apprehended, for breach of neutrality laws, at Bow-street, 28 Oct. 1870.

NEUTRAL POWERS. By the treaty of Paris, signed by the representatives of Great Britain, France, Austria, Russia, Prussia, Turkey, and Sardinia, on 16 April, 1856, it was determined that privateering should be abolished; that neutrals might carry an enemy's goods not contraband of war; that neutral goods not contraband were free even under an enemy's flag, and that blockades to be binding must be effective. The president of the United States acceded to these provisions in 1861. NEW ENGLAND (N. America). The first settlement made in 1607, was named New England by captain Smith, in 1614. A band of 102 Puritans, now termed the "Pilgrim Fathers" (with 28 women), arrived here in the *May Flower*, and founded the settlement on Plymouth Rock, 25 Dec. 1620, which was named New Plymouth. This was the nucleus of Massachusetts, from whence were gradually developed New Hampshire, Vermont, Connecticut, and Rhode Island. In 1643 these settlements formed the first American confederation, a defensive union, with a constitution based on the Mosaic law, governed by a religious aristocracy, which lasted till 1693. Maine was made an independent state in 1820.

NEW FOREST (Hampshire), was made ("afforested") by William the Conqueror, 1079-85. It is said that the whole country, for thirty miles in compass, was laid waste. William Rufus was killed in this forest by an arrow shot by Walter Tyrrel, that accidentally glanced against a tree, 2 Aug. 1100, the site of which is now pointed out by a triangular stone. The New Forest Deer Removal act was passed 14 & 15 Vict. c. 76, 7 Aug. 1851. Agitation for the preservation of this forest, autumn, 1870. In accordance with an act passed in 1877, the forest is now managed by a court of Verderers as a public pleasure ground, and cattle farm. New Forest (sale of lands for public purposes) act passed, 24 July, 1902. See *Forests.*

NEWFOUNDLAND (N. America), said to have been discovered by John Cabot, who called it *Prima Vista*, 24 June, 1497. It was formally taken possession of by sir Humphry Gilbert, 1583. In the reign of Elizabeth other nations had the advantage of the English in the fishery. In 1577 there were 100 fishing vessels from Spain, 50 from Portugal, 150 from France, and only 15, but of larger size, from England.—*Hakluyt.* But the English fishery in some years afterwards (1625) had increased so much that the ports of Devonshire alone employed 150 ships, which sold their fish in Spain, Portugal, and Italy. The sovereignty of England was recognised in 1713, by the treaty of Utrecht, certain rights on the "French shores" being reserved for France. Newfoundland obtained the privilege of a colonial legislature in 1832; and the bishopric was established in 1839. Population, 1884, 197,335; 1901, 220,249. Capital, St. John's; population, 1905, 29,594. Appalling fire at St. John's, a great portion of the town destroyed, the loss estimated at 1,000,000*l.* sterling, 9 June, 1846. On 14 Jan. 1857, a convention was concluded between the English and French governments, confirming certain French privileges of fishery in exchange for others. The English colonists were dissatisfied with this convention. Newfoundland refused union with the dominion of Canada, March, 1869; a railway from St. John's to St. George's bay, proposed by the colonial government Aug. 1878. Governor, sir G. Wm. des Vœux, Feb. 1886; sir J. Terence N. O'Brien, Nov. 1888; sir H. H. Murray, Sept. 1895; sir Henry McCallum, 1899; sir Cavendish Boyle, Jan. 1901; sir Wm. MacGregor, July, 1904. NEWGATE, London.

The PRISON derived its name from the gate, to which was attached a small prison, gradually enlarged. One was erected in 1086 by the bishop of London. It was used as a prison for persons of rank as early as 1218; but was rebuilt about two centuries afterwards by the executors of sir Richard Whittington, whose statue with a cat stood in the niche till the time of its demolition by the great fire of London, in 1666. It was then reconstructed; but becoming an accumulation of misery and inconvenience, was pulled down and rebuilt between 1778 and 1780. During the riots in 1780, the interior was destroyed by fire, but shortly afterwards restored. In 1857 the interior was pulled down to be re-erected on a plan adapted to the reformatory system. Newgate was disused as an ordinary prison, 31 Dec. 1881. Building demolished 1902–3. Sale of fittings and relics

NEW LANARK (W. Scotland). A manufacturing village founded by David Dale, 1783. Here his son-in-law, Robert Owen, endeavoured to establish socialism in 1801; and here the first infant school was set up, 1815.

"NEW LEARNING," a term applied to the revival of the study of the Bible and the Greek and Latin classics, in their original tongues, in the 15th and 16th centuries, which conduced greatly to the Reformation. See *Humanism*.

NEWMARKET (Cambridgeshire), renowned for its horse-races. It is first mentioned in 1227; and probably derived its name from the market then recently established. James I. erected a hunting seat here, called the king's house, to which Charles I. was taken as a prisoner in 1647, when the parliament army was quartered in the neighbouring village of Konnet. Charles II., who was fond of racing, built a stand-house for the sake of the diversion, about 1667,* and from that period races have been annual to the present time; and many extraordinary races have been run; see *Races*. Population, 1881, 5,093; 1891, 6,213; 1901, 19,065.

NEW MEXICO (N. America), ceded to the United States in 1848, and organised as a territory, 9 Sept. 1850. Capital, Santa Fé. Precious metals are found in almost every part of the territory. Population, 1880, 119,565; 1890, 153,593; 1900, 195,310.

NEWNHAM COLLEGE, see *Girton*.

NEW ORLEANS, capital of Louisiana, N. America (*which see*), founded in 1717, under the regency of the duke of Orleans. In 1788, seven-eighths of the city were destroyed by fire. The British attacked New Orleans in Dec. 1814, and were repulsed with great loss by the Americans under general Jackson, 8 Jan. 1815; the British general, sir Edward Pakenham, was killed. New Orleans was surrendered to the Federals in April, 1862. The strong feeling of the inhabitants in favour of the Confederates and against the Federals induced general B. Butler to rule them with military rigour, occasionally degenerating into brutal tyranny, especially towards females, May to October, 1862. He was replaced by general Banks, 16 Dec. 1862. Sanguinary riots, due to agitators, begun 30 July, 1866, only suppressed by martial law—about 40 persons, white and coloured, were killed, and about 160 wounded; similar riots occurred, 24 Oct. 1868, and often since Population in 1880, 216,090; in 1890, 158,019; 1900, 300,000.

New Orleans.—John McEnery elected governor of Louisiana by the southern whites, 4 Nov. 1872; but W. P. Kellogg, elected by the coloured people and their white friends, was recognised by the Federal government. To defend themselves against tyranny, the southerns formed the "white league," and collected arms, which they refused to surrender on demand on 15 Sept. 1874. They deposed Kellogg at New Orleans after some resistance, and established McEnery as governor, but submitted to the president's proclamation; and Kellogg was restored 18 Sept.

CHARTIST RIOTS.—About 10,000 chartists (*which see*), from the neighbouring mines, armed with guns, pikes, &c., arrived at Newport, 4 Nov. 1839. They divided themselves into two bodies—one, under the command of Mr John Frost, an ex-magistrate, proceeded down the principal street, whilst the other, headed by his son, took the direction of Stow-hill They met in front of the Westgate hotel, where the magistrates were assembled with about 30 soldiers of the 45th regiment, and several special constables. The rioters broke the windows and fired on the inmates, by which the mayor, Mr. (afterwards sir Thomas) Phillips, and several other persons were wounded. The soldiers returned the fire, and dispersed the mob, which fled, leaving about 20 dead, and others wounded. A detachment of the 10th royal hussars arrived from Bristol, and the town became tranquil.

* During the races, on 22 March, 1683, Newmarket was nearly destroyed by an accidental fire, which occasioned the hasty departure of the company then assembled, including the king, the queen, the duke of York, the royal attendants, and many of the nobility; and to this disaster historians have ascribed the failure of the Rye house plot, the object of which was said to be the assassination of the king and his brother on the road from Newmarket to London, if the period of their journey had not been thus anticipated; see *Rye House Plot*.

NEW RIVER, for the supply of London with water, was begun 1609, and finished in 1613, when the projector, Hugh Myddelton, a London goldsmith, was knighted by James I.—*Strype*. This artificial river, which rises in Hertfordshire,* and which, with its windings, then forty-eight miles long, was brought to London, and opened 29 Sept. 1613. So little was the benefit of it understood, that for above thirty years the seventy-two shares (equally divided into *King's* and *Adventurers'*), netted only 5*l.* apiece. Reported failure of crops and prevalence of fever, Aug. 1881; more favourable reports, Sept. 1883.

NEWRY (N. Ireland). In the rebellion of 1641, Newry was reduced to a ruinous condition; it was surprised by sir Con. Magenis, but was retaken by lord Conway. After the Restoration the town was rebuilt. It was burnt by the duke of Berwick when fleeing from Schomberg and the English army, and only the castle and a few houses escaped, 1689. Serious rioting, 15 July, 1902. Population, 1901, 13,121.

* Myddelton turned the first sod at Chadwell, a spring rising at the foot of a hill near Ware, 19 April, 1609; the water issued out of a deep hole, and combined with another spring, Amwell; forming a river about 20 feet wide: he died poor, 10 Dec. 1631.

NEW SOUTH WALES, the principal colony of Australia on the eastern coast, was explored and taken possession of and named by captain Cook in 1770. At his recommendation a convict colony was first formed here. Captain Arthur Phillip, the first governor, arrived at Botany Bay with 800 convicts, 20 Jan. 1788; but he subsequently preferred Sydney, about seven miles distant from the head of Port Jackson, as a more eligible situation for the capital. Gold was discovered in 1851. A new constitution was granted in 1855 (18 & 19 Vict. c. 54). The Intercolonial Exhibition was opened at Sydney, by the governor-general lord Belmore, 30 Aug. 1870. It consisted of two departments, agricultural and non-agricultural. A conference of delegates from the Australian colonies met at Sydney in Jan. 1873, to deliberate on a customs' union, postal and railway arrangements, &c. The ministry introduced a free trade budget near the end of the year. Industrial exhibition opened by the governor, 11 April, 1874. NEWSPAPER PROVINCIAL SOCIETY, established in 1836, became the Newspaper Society in 1889; see *Press Association*.

NEWSPAPERS. The Roman *Acta Diurna* were issued, it is said, 691 B.C. In modern times, a *Gazetta*, which derived its name from its price, a small coin, was published in Venice (about 1536). The *Gazette de France*, now existing, first appeared in April, 1631, edited by Renaudot, a physician. It was patronised by the king, Louis XIII., who wrote one article for it, and by Richelieu. The first real newspaper published in England* was established by sir Roger L'Estrange, in 1663: it was entitled the *Public Intelligencer*, and continued nearly three years, when it ceased, on the appearance of the *Gazette*. In the reign of James I., 1622, appeared the *London Weekly Courant;* and in the year 1642 (the period of the civil war) were printed a variety of publications, certainly in no respect entitled to the name of newspapers. See *Fourth Estate*. The following are the titles of some of them:—

England's Memorable Accidents.
The Kingdom's Intelligencer.

* Some copies of a publication are in existence called *The English Mercury*, professing to come out under the authority of queen Elizabeth, in 1588, the period of the Spanish Armada. The researches of Mr. T. Watts, of the British Museum proved these to be forgeries, executed about 1766. The full title of No. 50 is "*The English Mercurie*, published by authoritie, for the prevention of false reports, imprinted by Christopher Barker, her highness's printer, No. 50." It describes the Spanish Armada, giving "A journall of what passed since the 21st of this month, between her majestie's fleet and that of Spayne, transmitted by the Lord Highe Admiral, to the Lordes of council."

The Diurnal of Certain Passages in Parliament.
The Mercurius Aulicus.
The Scotch Intelligencer.
The Parliament's Scout.
The Parliament's Scout's Discovery, or certain Information.
The Mercurius Civicus, or London's Intelligencer.
The Country's Complaint, &c.
The Weekly Accounts.
Mercurius Britannicus.

A paper called the *London Gazette*,* published 22 Aug. 1642. The *London Gazette* of the existing series, published first at Oxford, the Court being there on account of the plague, 7 Nov. 1665, and afterwards at London, 5 Feb. 1666. A valuable index (1830–1883), compiled by Alex. Pulling for council of law reporting, published Nov. 1885.

Printing of newspapers and pamphlets prohibited, 31 Chas. II. 1680. *Salmon's Chron.*

The regular newspapers commenced on the abolition of the censorship of the press, in 1695.

Daily Courant said to have been first published in 1702.

The stamp duty imposed 1711

Sunday Newspapers began with *The British Gazette and Sunday Monitor*, 26 March, 1780; followed by the *Observer*, 1791; *Bell's Messenger*, 1796; *Weekly Dispatch*, 1801, &c. London ed. of *New York Herald*, 1889.

A penny charged for every sheet, and a halfpenny for every half sheet.

The duty made 1*d.* or 4*l.* 1*s.* 8*d.* the 1,000. . 1761

The duty raised to 1½*d.* in 1776; to 2*d.* in 1789; to 2½*d.* in 1794; to 3½*d.* in 1797; to 4*d.* in . . 1815

Reduced to 1*d.*, and ½*d.* for a supplement in . 1836

Abolished, the compulsory stamp being retained only for postal purposes 1855

This also ceased . . . . . 30 Sept. 1870

ROYAL NEWSPAPER PRESS FUND, established 1864, chartered 1890.

NEW STYLE. Pope Gregory XIII., in order to rectify the errors of the current calendar, published a new one, in which ten days were omitted—5 Oct. 1582, becoming 15 Oct. The new style was adopted in France, Italy, Spain, Denmark, Holland, Flanders, Portugal, in 1582, in Germany in 1584, in Switzerland in 1583 and 1584, in Hungary in 1587, in Scotland in 1600, and in England in 1751. In 1752 eleven days were left out of the calendar—3 Sept. being reckoned as 14 Sept. The difference between the old and new style up to 1699 was 10 days; after 1700, 11 days; after 1800, 12 days; after 1900, 13 days. In Russia, Greece, and throughout the East, the old style is still retained. 1 Jan. 1905, was O.S. 14 Jan. See *Calendar*.

NEW TESTAMENT, see *Bible*.

NEWTONIAN PHILOSOPHY, the doctrines respecting gravitation, &c., taught by sir Isaac Newton in his "Principia," published in 1687; see *Gravitation*. He was born 25 Dec., 1642; became master of the mint, 1699; president of the Royal Society, 1703; and died 20 March, 1727. A statue of him in marble by Roubiliac was set up at Trinity College, Cambridge, 14 July, 1755, and one in bronze by Theed, at Grantham, 21 Sept. 1858, when lord Brougham delivered a discourse on the life and works of Newton. The latter statue cost 1600*l.*, a sum obtained by public subscription.

NEWTOWNBARRY RIOT (S.E. Ireland). At a seizure of stock for tithes, a conflict ensued here between the yeomanry and the people, when thirty-five persons were killed or wounded, 18 June, 1831. The jury at the inquest were unable to agree on a verdict.

NEWTOWN-BUTLER (N. Ireland). On 30 July, 1689, the Enniskilleners under Gustavus Hamilton thoroughly defeated the adherents of

James II. commanded by general Macarty, taking him prisoner with his artillery, arms, and baggage.

NEW YEAR'S DAY, &c. The beginning of the Jewish year was changed and the passover instituted, 1491 B.C. A feast is said to have been instituted by Numa, and dedicated to Janus (who presided over the new year), 1 Jan. 713 B.C.

On this day the Romans sacrificed to Janus a cake of sifted meal, with salt, incense, and wine: and all the mechanics began something of their art of trade; the men of letters did the same, as to books, poems, &c.; and the consuls, though chosen before, took the chair and entered upon their office this day. Nonius Marcellus refers the origin of NEW-YEAR'S GIFTS among the Romans to Titus Tatius, king of the Sabines, who having considered as a good omen a present of some branches cut in a wood consecrated to Strenia, the goddess of strength, which he received on the first day of the new year, authorised the custom afterwards, and gave these gifts the name of Strenæ, 747 B.C.

NEW YORK, the "empire state" of the United States of N. America, is said to have been discovered by Verrazano, a Florentine in the French service, about 1524, and rediscovered by Hudson, an Englishman in the Dutch service, in 1609, and settled by the Dutch in 1614, the CITY being named Manhattan and New Amsterdam; but the English under colonel Nichols dispossessed them and the Swedes, 27 Aug. 1664, and changed its name, the king, Charles II., having given the territory to his brother, the duke of York. Population of the city, in 1860, 805,651; in 1870, 942,292; in 1880, 1,206,299; in 1890, 1,515,301; of the state in 1880, 5,082,871; in 1890, 5,997,853; 1900, 7,268,894; of Albany, the state capital, in 1880, 90,758; in 1890, 94,923; of Brooklyn, in 1880, 566,663; in 1890, 806,343; of Buffalo, in 1880, 155,134; in 1890, 255,664. Brooklyn with other towns consolidated with New York to form a single city under one government; bill passed 27 Feb. 1894. Population, greater New York, in 1900, 3,444,675.

The city confirmed to England by the peace of Breda . . . . . 24 Aug. 1667
Taken by the Dutch, and named New Orange, 1673; surrendered 1674

NEY'S EXECUTION. Ney, duke of Elchingen, prince of the Moskwa, and one of the most valiant of the marshals of France, was shot as a traitor, 7 Dec. 1815. On 7 Dec. 1853, his statue was erected on the spot where he fell.

After the abdication of Napoleon I., 5 April, 1814, Ney took the oath of allegiance to the king, Louis XVIII. On Napoleon's return to France from Elba, he marched against him; but his troops deserting, he regarded the cause of the Bourbons as lost, and opened the invader's way to Paris, March, 1815. Ney led the attack of the French at Waterloo, where he fought in the midst of the fray, his clothes pierced with bullet-holes, five horses having been shot under him; night and defeat obliged him to flee. Though included in the decree of 24 July, 1815, which guaranteed the safety of all Frenchmen, he was sought out, and on 5 Aug. taken at the castle of a friend at Urillac, and brought to trial before the Chamber of Peers, 4 Dec. The 12th article of the capitulation of Paris, fixing a general amnesty, was quoted in his favour in vain.

NEZIB, Syria. Here Ibrahim and the Egyptians defeated the Turks, 24 June, 1839.

NIAGARA (N. America). At the head of this river, on the western shore, is Fort Erie, which was taken by the English, 24 July, 1759. It was abandoned in the war with the United States, 27 May, 1813, but was retaken, 19 Dec. following. A suspension bridge of a single span of 820 feet over the Niagara, connecting the railways of Canada and New York, was opened in March, 1855. It is elevated 18 feet on the Canadian, and 28 feet on the American side; superseded by a great new steel arch bridge, last panel fitted, 28, 29 March, 1897, a great engineering feat, constructed by the Pennsylvanian steel company for the Canadian and New York incorporations. There are at present four bridges crossing the river.

About eighteen miles below Fort Erie are the remarkable falls. The river is here 740 yards wide; the half-mile immediately above the cataracts is a rapid, in which the water falls 58 feet; it is then thrown, with astonishing grandeur, down a stupendous precipice of 150 feet perpendicular, in three distinct and collateral sheets; and, in a rapid that extends to the distance of nine miles below, falls nearly as much more. The river then flows in a deep channel till it enters lake Ontario, at Fort Niagara.

The falls visited by the prince of Wales, Sept 1860.

Blondin crossed the falls on a tight-rope, 30 June *et seq* to 2 Sept. 1859; and again in 1860.

Mr. Carlisle D. Graham, after long preparation, said to have "shot Niagara (rapids) in a barrel" 25 Aug. 1889.

Mr. Dixon crosses Niagara river below the falls on a wire rope, 6 Sept. 1890.

An international commission (president, sir Wm. Thomson, afterwards lord Kelvin) was appointed to consider the best method for utilizing 125,000 horse-power of the force of the Niagara falls, which is computed to be about 4,500,000 horse-power. Prizes were given by the Cataract company to the authors of various projects 9 Feb. 1891.

In the *Times* of 8 June, 1892, professor George Forbes, who was engaged in the undertaking, reported that the engineering works were nearly completed, and that the electrical arrangements by which the vast force was to be transmitted, were begun.

The force is to be used in factories, in lighting Niagara Falls city, and in working railways. In 1892 the work was carried on by the Niagara Falls Power company.

The great power house completed, 5,000 horse-power dynamos constructed by the Westinghouse company, reported Dec. 1894.

Receipt of 15,000 horse-power from the Niagara works at Buffalo, 26 miles distant, midnight, Sunday, 15 Nov. 1896.

Prof. Forbes introduces further developments with success, reported, 24 Aug. 1899; 100,000 horse power in 1902.

NIBELUNGENOT or **NIBELUNGEN-LIED** a popular German epic of the 12th century, composed of various ancient mythical poems, termed sagas, which, according to the poet Wm. Morris, should be to our race what Homer was to the Greeks.

The first critical edition, by K. Lachmann, appeared 1826 and 1846. The best translation in modern German, by Simrock, 1827; a useful edition, with translation and glossary, by L. Braunfels, 1846; in English, by W. N. Lettsom, 2nd ed. 1874

Richard Wagner's musical dramas, "The Ring of the Nibelungen," are based on this poem: the persons include the great Northern gods and goddesses, the giants, the dwarfs, and the daughters of the Rhine (see under *Music*)

NICÆA, see *Nice.*

NICARAGUA, a state in Central America (*which see*). The present constitution was established 19 Aug. 1858. At the commencement of 1855 it was greatly disturbed by two political parties: that of the president, Chamorro, who held Granada, the capital, and that of the democratic chief, Castellon, who held Leon. The latter invited Walker, the filibuster, to his assistance, who in a short time became sole dictator of the state.* By

* William Walker was born at Tennessee, in the United States, where he became successively doctor, lawyer, and journalist, and afterwards gold-seeker in California, whence he was invited to Nicaragua by Castellon, with the promise of 52,000 acres of land, on condition of bringing with him a band of adventurers to sustain the revolutionary cause. Walker accepted the terms, and on 28 June landed at Realejo with 58 men. He increased his forces at Leon, and soon after attacked the town of Rivas, where he was repulsed with loss. He then joined col. Kinney, who had occupied and governed Grey Town, 6 Sept. On 13 Oct. Walker captured Granada by surprise when in a defenceless state, shot Mayorga, one of the ministers, and established a rule of terror. By intervention of the American consul he made peace with the general of the state army, Corral, but shot him on 7 Nov., on finding him corresponding with fugitives at Costa Rica. Walker at first was only general-in-chief; but on Rivas, whom he had made president, deserting him, he became sole dictator. On 14 May, 1856, his envoy Vijil was recognised by the president of the United States, whence also he obtained reinforcements during his retention of power. Costa Rica

The united efforts of the confederated states the filibusters were all expelled in May, 1857. On 1 May, 1858, Nicaragua and Costa Rica appealed to the great European powers for protection. Nicaragua railway, a transit route between the Pacific and Atlantic, proposed, and company formed Nov. 1866. President T. Martinez elected, 1859 and 1863; Fernando Guzman, elected 1 March, 1867; Vicente Quadra elected 1 Feb. 1871; Pedro Joaquin Chamorro, 1 Feb. 1875; Joaquin Zavala, 1 March, 1879; dr. Adam Cardenas, Jan. 1883; señor Carazo, 16 Dec. 1886 (died 1899), dr. Sacaza 1889; señor Zelaya, elected, 1893; re-elected (1902-6), 1901. Population 4,000,000 (about).

Louis Napoleon, afterwards emperor, proposed the making a ship canal by the lake Nicaragua from the Atlantic to the Pacific, between 1842-4; the government of Nicaragua proposed it in 1846; colonel Childs made a survey in 1851; a company was chartered for 85 years, and conventions were signed, but the capitalists declined their support.

The scheme was revived in Feb. 1875. See *Panama* and *Loans*.

Treaty by which the United States may construct a canal (Menscall's plan) from San Juan (Grey Town) on the Caribbean sea to Brito, on the Pacific, with equal powers; contrary to the Bulwer Clayton treaty, *which see*, about 16 Dec. 1884; rejected by the United States legislature, 30 Jan 1885.

The senate and house pass the Nicaragua canal bill, 7 Feb. 1889.

The construction of a breakwater at Grey Town begun June, 1889.

The construction of the Nicaragua canal begun 22 Oct. 1889; the bill for it abandoned by the U.S.A. senate, 27 Feb. 1891.

declared war against him, 28 Feb 1856, the other states of central America soon followed the example, and a sanguinary struggle ensued, lasting till May, 1857. On 25 Nov. 1856, Walker totally burnt Granada, being unable to defend it, and removed the seat of government to Rivas. This place he surrendered to gen Mora on 1 May, 1857, on the intervention of capt. Davis, of the *St. Mary's*, U.S., himself, his staff, and 260 men were conveyed in that vessel to New Orleans, where they were received with great enthusiasm. On 25 Nov, 1857, he again invaded Nicaragua, landing at Punta Arenas with 400 men; but on 6 Dec. was compelled to surrender to capt. Paulding, U.S., and was conveyed to New York. He escaped punishment by *nolle prosequi* (2 June, 1858): but capt. Paulding was tried for exceeding orders, and blamed—yet rewarded by president Buchanan. On 5 Aug. 1860, Walker landed near Truxillo, Honduras, and took the fort on the 6th. On the 7th he proclaimed that he made war on the government, not on the people of Honduras. On being summoned to surrender his booty by capt. Salmon, R.N., of the *Icarus*, he refused, and fled. He was pursued, caught, given up to the Honduras government, tried, and shot (12 Sept.). His followers were dismissed. Grey Town was surrendered to Nicaragua in 1860.

NICE or NICÆA, a town in Bithynia, Asia Minor, N. W. Antigonus gave it the name Antigoneia, which Lysimachus changed to Nicæa, the name of his wife. It became the residence of the kings of Bithynia about 208 B.C. At the battle of Nice, A.D. 194, the emperor Severus defeated his rival, Pescennius Niger, who was again defeated at Issus, and soon after taken prisoner and put to death. The first general council was held here 19 June to 25 Aug. 325, which adopted the NICENE CREED and condemned the Arians. It was attended by 318 bishops from divers parts, who settled both the doctrine of the Trinity and the time for observing Easter. An addition was made to the creed, 381; was rejected, 431. See *Filioque*. When the Crusaders took Constantinople, and established a Latin empire there in 1204, the Greek emperors removed to Nice and reigned there till 1261, when they returned to Constantinople; see *Eastern Empire*. Nice was taken by the Ottoman Turks in 1330.

NICE (S.E. France) was the seat of a colony from Massilia, now Marseilles, and formed part of the Roman empire. In the middle ages it was subject to Genoa, and suffered from the frequent wars, being taken and retaken by the imperialists and

French. It was taken by the Austrians under Melas, 1800; seized and annexed to France 1792; restored to Sardinia in 1814. Nice was again annexed to France in virtue of the treaty of 24 March, 1860; the people having voted nearly unanimously for this change by universal suffrage. The French troops entered 1 April, and definite possession was taken 14 June following. Garibaldi, a native, vehemently protested against this annexation. Population, 1901, 125,099.

NICOLAITANES, a sect mentioned in *Rev.* ii. 6, 15, said to have sprung from Nicolas, one of the first seven deacons (*Acts* vi.), and to have advocated a community of wives, and to have denied the divinity of Christ.

NICOMEDIA, the metropolis of Bithynia, Asia Minor, N.W., founded by king Nicomedes I., 264 B.C., on the remains of Astacus; destroyed by an earthquake, A.D. 115; and restored by the emperor Adrian, 124. The Roman emperors frequently resided here during their eastern wars. Here Diocletian resigned the purple, 305; and Constantine died at his villa in its neighbourhood, 337. It surrendered to the Seljukian Turks, 1078; and to Orchan and the Ottoman Turks in 1338.

NICOPOLIS, on the Danube, Bulgaria, founded by Trajan. Here was fought a battle between the allied Christian powers under Sigismund, king of Hungary, afterwards emperor, and the Turks under Bajazet; said to have been the first battle between the Turks and Christians, the latter were defeated, losing 20,000 slain, and as many wounded and prisoners, 28 Sept. 1396. Nicopolis was taken by the Russians after a severe conflict (2 pashas, about 6000 men, 2 monitors, and 40 guns were captured), 15, 16 July, 1877.

NIELLO-WORK, believed to have been produced by rubbing a mixture of silver, lead, copper, sulphur, and borax into engravings on silver, &c., an art known to the ancients, was practised in the middle ages, and said to have given to Maso Finiguerra the idea of engraving upon copper, about 1460.

NIL DARPAN, see *India*, June, 1861.

NILE (Egypt). The longest river in Africa, formerly considered to have its rise in what were termed "the mountains of the moon." The travels of Bruce were undertaken to discover the source of the Nile. He set out from England in June, 1768; on the 14th of November, 1770, discovered the source of the Blue Nile in lake Tana, and returned home in 1773. The Nile overflows regularly every year, from about the 15th of June to the 17th of September, when, having given fertility to the land, it begins to decrease. The first Nilometer (a pillar) is said to have been set up by Osirtasen III., a king of the XII. dynasty, 2,300 B.C. One was set up by Solyman the Caliph, 715 A.D. In 1829, the inundations of the Nile rose to 26 instead of 22, by which 30,000 people were drowned and immense property lost. Mr. Petherick set out early in 1861 to explore the country at the source of the Nile. For other discoveries, see *Africa* 1863 *et seq.* A bridge over the Nile (above 1300 feet) at Cairo, was completed by a French company, Aug. 1872. For the discoveries of Speke, Grant, and Baker, see *Victoria Nyanza, &c.*

Mr. H. M. Stanley, in his book, "Darkest Africa," published June, 1890, expressed his opinion that the newly-discovered lake Albert Edward Nyanza, at the head of the Semliki river which is fed by the snows of the mighty Ruivenzori range (possibly the mountains of the moon mentioned by Ptolemy the geographer in the 2nd century A.D.), is the real source of the Nile.

The *barrage* works of the Nile, consisting of two great dams or weirs for irrigation, and the conveyance of boats by means of locks, constructed under the direction of Mouget Bey, a Frenchman, 1843-61; were unsuccessful and eventually neglected.

NINEVEH, the capital of the Assyrian empire (see *Assyria*), founded by Ashur about 2245 B.C. The empire fell when Nebuchadnezzar captured

Nineveh 606 B.C. The discoveries of Layard and others since 1839, in the neighbourhood of Mosul, at Koyunjik, the site of the ancient Nineveh, and other places, have in a manner disinterred and re-peopled a city which for centuries had ceased to figure on the page of history. Botta commenced his explorations at Khorsabad in 1843, and published his great work "Monuments de Ninive," 1849-50. In 1848 Mr. (after sir, K.C.B.) Austen Henry Layard, published his "Nineveh and its Remains," and in 1853 his "Discoveries," in his second visit in 1849-50. He was born 5 March, 1817, and died 5 July, 1894. *See Gladstone*, 1868, ambassador at Constantinople, 1877-80. Mr. Hormuzd Rassam, in 1854, discovered an ancient palace. Mr. George Smith described his excavations and their results in 1873-4, in "Assyrian Discoveries," 1875. He died at Aleppo, 19 Aug. 1876. See *Assyria*. Mr. Rassam, appointed his successor, among other valuable discoveries at Balawât, nine miles N.E. of Nimroud, and at Koyunjik, &c., found a bronze monument with inscriptions recording the names, title, genealogy, and exploits of king Assur-nazir-pal (B.C. 885-860), builder of the palaces and temples of Kalakh, the capital of the middle Assyrian empire. Mr. Rassam arrived in London with collections, Dec. 1882.

The forms, features, costume, religion, modes of warfare, and ceremonial customs of its inhabitants stand before us as distinct as those of a living people; and by help of the sculptures and their cuneiform inscriptions, the researches of the learned have increased the knowledge of Assyrian history. Among the sculptures that enrich the British Museum may be mentioned the winged bull and lion, and numerous hunting and battle pieces; and the bas-relief of the eagle-headed human figure, presumed to be a representation of the Assyrian god Nisroch (from *Nisr*, an *eagle* or *hawk*), whom Sennacherib was in the act of worshipping when he was assassinated by his two sons, about 710 B.C. 2 *Kings* XIX. 37.

NIOBIUM, a rare metal, discovered by Hatchett in columbite, a black earth, and named columbium, 1801. It was pronounced to be identical with tantalum (or tantalium) by Wollaston; but was rediscovered by H. Rose in 1846, and named niobium.

NIRVANA. see *Buddhism*.

NISBET or NESBET (Northumberland). Here a battle was fought between the English and Scotch armies, the latter greatly disproportioned in strength to the former. Several thousands of the Scots were slain upon the field and in the pursuit, 7 May, 1402.

NISI PRIUS ("unless before"), words in a writ summoning a person to be tried at Westminster, *unless* the judges should come to hold their assizes in the place where he is. Judges sit in Middlesex by virtue of 18 Eliz. c. 12 (1576).

NISMES (Nimes), S. France, was the flourishing Roman colony, Nemausus. Its noble amphitheatre was injured by the English in 1417. The inhabitants embraced Protestantism, and suffered much persecution in consequence, and Nismes has frequently been the scene of religious and political contests. The treaty termed the Pacification of Nismes (14 July, 1629) gave religious toleration for a time to the Huguenots.

NITRE, see *Saltpetre*.

NITRIC ACID, a compound of nitrogen and oxygen, formerly called *aqua fortis*, is said to have been first obtained in a separate state by Raymond Lully, an alchemist, about 1287; but we are indebted to Cavendish, Priestley, and Lavoisier for our present knowledge of its properties. H. Cavendish demonstrated the nature of this acid in 1785 *Nitrous acid* was discovered by Scheele about 1774. *Nitrous gas* was accidentally discovered by dr. Hales, *Nitrous oxide gas* (laughing gas) was discovered by dr. Priestley in 1776. The use of this gas as an anæsthetic, recommended by H. Davey in 1800, was begun in America (by Mr. Wells, a dentist), 1844; in Paris, 1866; in London, 31 March, 1868, ingenious apparatus having been invented for its application.

NITROGEN or AZOTE (from the Greek *a*, no, and *zaō* or *zō*, I live), an irrespirable elementary gas, and an important element in food, discovered by Rutherford about 1772. Before 1777, Scheele separated the oxygen of the air from the nitrogen, and almost simultaneously with Lavoisier discovered that the atmosphere is a mixture of these two gases. Nitrogen combined with hydrogen forms the volatile alkali ammonia, so freely given off by decomposing animal and vegetable bodies. See *Air*, 1894. Prof. Hermann Hellriegel (born 1831) demonstrated in 1886 the power of leguminous plants to fix free nitrogen through the agency of microbes in their root nodules whereby the soil is much enriched. Clover gives up to the soil that which wheat requires. He died 24 Sept. 1895.

NITRO-GLYCERINE (also called NITROLEUM), an intensely explosive amber-like fluid, discovered by Sobrero in 1847, is produced by adding glycerine (in successive small quantities) to a mixture of one part of nitric acid and two parts of sulphuric acid. Alfred Nobel, a Swede, first attempted its application as an explosive agent in 1864. It has caused several most disastrous accidents, with great loss of life. In attempting to bury some nitro-glycerine in the town moor at Newcastle-on-Tyne, 17 Dec. 1867, an explosion took place, and seven persons lost their lives, including Mr. Mawson, the sheriff, and Mr. Bryson, town surveyor; see *Dynamite*. Mr. Alfred Nobel's nitro-glycerine manufactory, near Stockholm, blown up; 15 persons killed, many injured, 10 June, 1868. An act prohibiting its importation for a time, and regulating its transmission, was passed in 1869, and repealed by the Explosives act of 1875. Secret manufacture discovered, see *Birmingham*, 1883.

NIZAM, see *Hyderabad*.

NOBEL BEQUEST. Dr. Alfred Nobel, a Swede, died 1896 (see *Nitro-Glycerine*, *Blasting Gelatine*, and *Dynamite*), left a large sum of which the interest was to be awarded annually by a board of control at Stockholm in prizes each of the value of about 8,000*l.* to those who in the previous year should have rendered the greatest service to mankind, in inventions or discoveries in physical sciences, chemistry, physiology or medicine, literary work, and the cause of international brotherhood, in the suppression or reduction of standing armies, or the founding of Peace congresses. Regulations for the competition issued, Oct. 1900. The Peace prize of 150,000 kronen divided between M. Henri Dunant (Swiss) and M. Frédéric Passy (French); 200,000f. each to M. Sully Prudhomme, French poet, for literature; to Dr. Behring, of Halle, for medicine; prof. van't Hoff of Berlin, for chemistry; and prof Röntgen of Munich, for physics. The distribution took place at Stockholm, the crown prince and others present, 10 Dec. 1901. The Peace prize awarded to Mr. William Randall Cremer, M.P., for his work on behalf of inter-

national arbitration; the four Nobel prizes were given to prof. Henri Becquerel of Paris, divided with M. and Mdme. Curie also of Paris, for physics; to prof. Arrhenius of Stockholm for chemistry; to prof. Finsen, of Copenhagen for medicine, and to M. Bjornstjerne Björnsen, of Christiania, for literature, 11 Dec. 1903. *Noebel Institutes* are in process of establishment to carry out scientific investigation on the lines of the above scheme of the founder.

The Nobel committee of the society of authors, formed for the purpose of recommending English candidates for the literature prize; first meeting held in London, Dr. Richard Garnett in the chair (lord Avebury elected permanent chairman), 14 Jan. 1902

NOBILITY. The Goths, after they had seized a part of Europe, rewarded their heroes with titles of honour, to distinguish them from the common people. The right of peerage seems to have been at first territorial. Patents to persons having no estate were first granted by Philip the Fair of France, 1095. George Neville, duke of Bedford (son of John, marquis of Montague), ennobled in 1470, was degraded from the peerage by parliament, on account of his utter want of property, 19 Edw. IV., 1478. Noblemen's privileges were restrained in June, 1773; see *Lords*, and the various orders of the nobility.

In 1845 a statistical writer said that there were 500,000 nobles in Russia, 239,000 in Austria; in Spain (in 1780), 470,000, in France (before 1790) 360,000 (of whom 4,120 were of the *ancienne noblesse*); in the United Kingdom, 1,631 with transmissible titles (dukes to baronets).

NOBILITY OF FRANCE preceded that of England. On 18 June, 1790, the National Assembly decreed that hereditary nobility could not exist in a free state; that the titles of dukes, counts, marquises, knights, barons, excellencies, abbots, and others be abolished; that all citizens take their family names; liveries and armorial bearings also to be abolished. The records of the nobility, 600 volumes, were burnt at the foot of the statue of Louis XIV., 25 June, 1792. A new nobility was created by the emperor Napoleon I., 1808. The hereditary peerage was abolished 27 Dec. 1831; re-instituted by Napoleon III., 1852.

NOBLE, an English gold coin (value 6*s.* 8*d.*), first struck in the reign of Edward III., 1343 or 1344, said to have derived its name from the excellence of the metal of which it was composed.

NOCTURNE, a name given by John Field (who died 1837) to a new and very pleasing musical composition. He was followed very successfully by Chopin, who died, 1849. The term was adopted by Mr. Whistler, the artist, for his night pieces, in which he began with line, form, and colour, 1877-8.

"NOLUMUS LEGES ANGLIÆ MUTARI," see *Bastards*, and *Merton*.

NOMINALISTS (or **CONCEPTUALISTS**), a scholastic sect, opposed to the Realists, maintain that general ideas have no existence outside our minds, and only exist by the names we give them. The founder of the sect, Jean Roscellin, a canon of Compiègne, was condemned by a council at Soissons, 1092, but the controversy was revived in the 12th century. Among the Nominalists are reckoned Abelard, St. Thomas Aquinas (partially), Occam, Hobbes, Locke, Berkeley, and Dugald Stewart. The Realists assert that general ideas are real things with positive existence.

NON-CONFORMISTS. The Protestants in England are divided into conformists and non-conformists; or, churchmen and dissenters. The first place of meeting of the latter, in England, was established at Wandsworth, near London, 20 Nov. 1572. The name of non-conformists was taken by the Puritans when the Act of Uniformity came into operation on 24 Aug. 1662 (termed "Black Bartholomew's day"), when 2000 ministers of the established religion resigned, not choosing to conform to the statute passed "for the uniformity of public prayers and administration of the sacraments;" see *Puritans*, and *Dissenters*. The laws against them were relaxed by the Toleration act, 24 May, 1689.—The *Nonconformist* newspaper (edited by Mr. Edward Miall, aft. M.P., who died 29 April, 1881) first appeared 14 April, 1841.

Three large bodies in England, Congregationalists (or Independents), Baptists, Wesleyan Methodists, 8 others of considerable importance, Presbyterians, Unitarians, Society of Friends (Quakers), Salvation Army and 4 Wesleyan bodies; Primitive Methodists, Methodist (New Connexion), United Methodist Free Churches, and Bible Christians in 1905.

NONES, in the Roman calendar, were the fifth day of each month, excepting March, May, July, and October, when the nones fell on the seventh day.

NON-JURORS considered James II. to have been unjustly deposed, and refused to swear allegiance to William III. in 1689. Among them were Sancroft, archbishop of Canterbury; Ken, bishop of Bath and Wells, and the bishops of Ely, Gloucester, Norwich, and Peterborough, and many of the clergy, who were deprived 1 Feb. 1691. Non-jurors were subjected to double taxation, and obliged to register their estates, May, 1723. They formed a separate communion, which existed till the beginning of the present century.

NON NOBIS, DOMINE! ("Not unto us, O Lord!" &c., *Psalm* cxv. 1), a musical canon, sung as a grace at public feasts, was composed by W. Birde in 1618.

NON-RESISTANCE OATH (containing a declaration that it is unlawful to take arms against the king upon any pretence whatever), enforced by the Corporation act, 1661, was repealed in 1719.

NOOTKA SOUND (Vancouver's Island), discovered by captain Cook in 1778, and settled by the British in 1786, when a few British merchants in the East Indies formed a settlement to supply the Chinese market with furs; but the Spaniards in 1789 captured two English vessels and took possession of the settlement. The British ministry demanded reparation, and the affair was amicably terminated by a convention, and a free commerce was confirmed to England in 1790.

"NO-POPERY RIOTS," see *Gordon*. The cry was revived against the Catholic emancipation bill, 1829. The Anti-popery association petitioned against the election of Mr. Alderman Knill, R.C., as lord mayor of London, Oct. 1892.

NORDLINGEN (Bavaria). Here the Swedes under count Horn were defeated by the Austrians,

27 Aug. 1634; and the Austrians and allies by Swedes in 1645.

NORE MUTINY, see *Mutinies*.

NORFOLK ISLAND (Pacific Ocean), discovered in 1774, by captain Cook, who found it uninhabited, except by birds. The settlement was made by a detachment from Port Jackson under governor Phillip, in 1788, in Sydney bay, on the south side of the island. This was at one time the severest penal colony of Great Britain. The island was abandoned in 1809, but re-occupied as a penal settlement in 1825, penal settlement removed in 1855. The descendants of the mutineers of the *Bounty* were removed to it in June, 1856, from *Pitcairn's Island* (*which see*). Visited by lord Hampden, transferred to New South Wales and endowed with a new constitution, 1896. Population, 1901, 827.

NORMAL SCHOOLS (from *norma*, a rule). One for the instruction of teachers, established at Paris by a law, 30 Oct. 1794, opened 20 Jan. 1795, under the direction of La Place, La Harpe, Hauy, and other eminent men, was soon closed. Another, established by Napoleon in 1808, was closed in 1822. The plan was revived in 1826, and has been developed in England and other countries. See *Science and Art*.

NORMANDY (N. France), part of Neustria, a kingdom founded by Clovis in 511 for his son Clotaire, which, after various changes, was united to France by Charles the Bald in 837. From the beginning of the 9th century it was continually devastated by the Scandinavians, termed Northmen or Normans, to purchase repose from whose irruptions Charles the Simple of France ceded the duchy to their leader Rollo, 905. Rollo, the first duke, held it as a fief of the crown of France, and several of his successors after him, until William, the seventh duke, acquired England, in 1066. It remained a province of England till the reign of king John, 1204, when it was conquered by Philip Augustus and reunited to France. It was re-conquered by Henry V., 1418, and held by England partially till 1450. The English still possess the islands on the coast, of which Jersey and Guernsey are the principal.

NORTHALLERTON (Yorkshire). Near here was fought the "battle of the Standard," where the English totally defeated the Scotch armies, 22 Aug. 1138. The archbishop of York brought forth a consecrated standard on a carriage at the moment when they were hotly pressed by the invaders, headed by king David.

NORTH AMERICA, see *America*, *United States*, *Indians*, *Canada*, &c.

NORTH AMERICAN REVIEW began at Boston, U.S., in 1815, as a rival of the Edinburgh and Quarterly Reviews. It was published at first every second month; in 1818, quarterly; in 1879, monthly, at New York.

NORTHAMPTON was burnt by the Danes in 1010. Here Henry III. proposed to found a university in 1260, and held a parliament in 1269. On 10 July, 1460, a conflict took place between the duke of York and Henry VI. of England, in which the king was defeated, and made prisoner (the second time) after a sanguinary fight which took place in the meadows below the town. Northampton was ravaged by the plague in 1637. It was seized and fortified by the parliamentary forces in 1642. A fire nearly destroyed the town, 3 Sept. 1675. Riots here because Mr. C. Bradlaugh was not elected M.P., 6 Oct. 1874, were suppressed by the military. Population, 1881, 51,881; 1891, 61,016; 1901, 87,021.

NORTH-EAST AND -WEST PASSAGES.

The attempt to discover a north-west passage was made by a Portuguese named Corte Real, about 1500. In 1585, a company was formed in London called the "Fellowship for the discovery of the North-West Passage." From 1743 to 1818 parliament offered 20,000*l.* for this discovery. In 1818 the reward was modified by proposing that 5000*l.* should be paid when either 110°, 120°, or 130° W. long. should be passed; one of which payments was made to sir E. Parry. For their labours in the voyages enumerated in the *list below*, Parry, Franklin, Ross, Back, Richardson, M'Clure, Nares, and McClintock were knighted.

* In 1830 he discovered Boothia Felix: on 1 June, 1831, his nephew, com. James Clark Ross, discovered the north magnetic pole, in 70° 5′ 17″ N. lat., and 96° 46′ 45″ W. long.

† Capt. M'Clure sailed in the *Investigator* in company with com. Collinson in the *Enterprise* in search of sir John Franklin, 20 Jan. 1850. On 6 Sept. he discovered high land, which he named Baring's land; on the 9th, other land, which he named after prince Albert; on the 30th the ship was frozen in. Entertaining a strong conviction that the waters in which the *Investigator* then lay communicated with Barrow's straits, he set out on 20 Oct., with a few men in his sledge, to test his views. On 26 Oct. he reached Point Russell (73 31′ N. lat., 114° 24′ W. long.), where from an elevation of 600 feet he saw Parry or Melville Sound beneath them. The strait connecting the Atlantic and Pacific Oceans he named after the prince of Wales. The *Investigator* was the first ship which traversed the Polar sea from Behring's straits to Behring island. Intelligence of this discovery was brought to England by com Inglefield, and the Admiralty chart was published 14 Oct. 1853. Capt. M'Clure returned to England, Sept. 1854. In 1855, 5000*l.* were paid to capt. (afterwards sir Robert) M'Clure, and 3000*l.* were distributed among the officers and crew. On 30 Jan. 1855, the Admiralty notified that the Arctic medal would be given to all persons engaged in the expeditions from 1818 to 1855.

NORTH SEA, INTERNATIONAL COMMISSION OF INQUIRY. The proposal of the tsar that the dispute between Great Britain and Russia arising out of the North Sea outrage (see *England*, 22 Oct., 1904, *et seq.*) should be submitted to an international commission of

inquiry on the basis of the Hague convention, was accepted by the British government, 28 Oct. The members comprising the commission were: vice-adm. sir L. Beaumont (Gt. Britain), vice-adm. Dubassoff (Russia), rear-adm. Davis (United States), adm. baron von Spaun (Austria-Hungary), adm. Fournier (France). The first meeting of the commission was held in Paris, 22 Nov., when adm. Fournier was elected president. Final sitting held 25 Feb., 1905, report of the commission read by adm. Fournier. The majority of the commissioners were unable to determine on what object the ships fired, but the commissioners unanimously recognised that the trawlers committed no hostile act, and the majority were of opinion that as there was no torpedo boat either among the trawlers or on the spot, the fire opened by adm. Rozhdestvensky was not justifiable. The firing on the starboard side seemed to the majority of the commissioners to have lasted longer than appeared necessary. The commissioners recognised that there was at the close of the firing sufficient uncertainty as to the danger incurred by the ships to decide the admiral to proceed on his way; but the majority regret that he did not inform the authorities, when passing through the Straits of Dover, that the trawlers required assistance. In closing their report the commissioners declared that their appreciations formulated therein were not in their spirit of a nature to cast any discredit either on the military value or the sentiments of humanity of admiral Rozhdestvensky and of the *personnel* of his squadron. Count Benckendorff, Russian ambassador, paid to lord Lansdowne, 9 March, 1905, the sum of 65,000*l.*, the amount of the indemnity due to the Hull fishermen, assessed by adm. sir Cyprian Bridge and Mr. Butler Aspinall, appointed by the Board of Trade to inquire into the matter of compensation. NORWICH, BISHOPRIC OF, originally East Anglia; the first bishop was Felix, a Burgundian, sent to convert the East Anglians about 630. The see was divided into two distinct bishoprics—Elmham, in Norfolk, and Dunwich, in Suffolk, about 673. Both sees suffered extremely from the Danish invasions, insomuch that after the death of St. Humbert, they lay vacant for a hundred years. At last the see of Elmham was revived, and Dunwich was united to it; but Arfastus removed the seat to Thetford, where it continued till Herbert Losinga removed it to Norwich, 1094. This see has given to the church of Rome two saints; and to the nation five lord chancellors. It was valued in the king's books at 899*l.* 18*s.* 7½*d.* per annum. Present income, 4500*l.*; see *Bishoprics*.

RECENT BISHOPS OF NORWICH.

1790. George Horne; died 17 Jan. 1792.
1792. Charles Manners Sutton; translated to Canterbury, 1 Feb. 1805.
1805. Henry Bathurst; died 5 April, 1837. He was a strenuous supporter of catholic emancipation, and for a long time the only liberal bishop in the house of peers.
1837. Edward Stanley; died 6 Sept. 1849.
1849. Samuel Hinds; resigned 1857.
1857. Hon John T. Pelham, May; resigned, March, 1893; died, 1 May, 1894
1893. John Sheepshanks, March.

NOTABLES, French assemblies of nobles, bishops, knights, and lawyers. An assembly of the notables was convened by the duke of Guise, 20 Aug. 1560, and by other statesmen. Calonne, the minister of Louis XVI., summoned one which met on 22 Feb. 1787, on account of the deranged state of the king's finances, and again in 1788, when he opened his plan: but as any reform militated too much against private interest to be adopted, Calonne was dismissed, and soon after retired to England. Louis having lost his confidential minister, De Vergennes, by death, called De Brienne, an ecclesiastic, to his councils. The notables were re-assembled on 6 Nov. 1788. In the end, the states-general were convoked 5 Dec.; and from this assembly sprang the national assembly (*which see*). The notables were dismissed by the king, 12 Dec. 1788.—The *Spanish notables* assembled and met Napoleon (conformably with a decree issued by him commanding their attendance), at Bayonne, 25 May, 1808.

NOTARIES PUBLIC, said to have been appointed by the primitive fathers of the Christian church, to collect the acts or memoirs of the lives of the martyrs in the 1st century.—*Du Fresnoy*. This office was afterwards changed to a legal employment, to attest deeds and writings, so as to establish their authenticity in any other country. A statute to regulate public notaries was passed in 1801, and statutes on the subject have been enacted since.

"NOTES AND QUERIES," a medium of intercommunication for literary men and general readers, founded and edited by W. J. Thoms; first published on 3 Nov. 1849.

NOTRE DAME, the cathedral at Paris, was founded in 1163, completed 1257. It narrowly escaped destruction by the communists, May, 1871. It was beautifully and judiciously restored, at a cost of about 250,000*l.*, under the superintendence of Viollet-le-Duc, 1866 *et seq.*

NOTTINGHAM (Saxon, Snotingaham), created a city, June, 1897. The castle here was defended by the Danes against king Alfred, and his brother Ethelred, who retook it, 868. It was rebuilt by William I. 1068; and ultimately became a strong fortress. See *Population*.

NOVARA (N.W. Italy). Near this town the Austrian marshal Radetzky totally defeated the king Charles Albert and the Sardinian army, 23 March, 1849. The contest began at 10 A.M. and lasted till late in the evening; the Austrians lost 396 killed, and had about 1,850 wounded; the Sardinians lost between 3,000 and 4,000 men, 27 cannons, and 3,000 prisoners. The king soon after abdicated in favour of his son Victor Emmanuel.

NOVA SCOTIA (N. America), was discovered by Cabot, 1497; visited by Verrazzani, 1524, and named Acadia; settled in 1622, by the Scotch under sir William Alexander, in the reign of James I. of England, from whom it received the name of Nova Scotia. Since its first settlement it has more than once changed proprietors, and was not confirmed to England till the peace of Utrecht, in 1713. It was taken in 1745 and 1758; but was again confirmed to England in 1763. Nova Scotia was divided into two provinces in 1784, and was erected into a bishopric in Aug. 1787. King's College, Windsor, was founded in 1788; see *Baronets*. Gold was found in Nova Scotia in 1861. By an act passed 29 March, 1867, Nova Scotia and New Brunswick were united with Canada for legislative purposes. On the agitation for secession Mr. John Bright presented a petition in the commons 15 May; his motion for a royal commission of inquiry negatived 16 June, 1868. The agitation soon subsided. NUBIA, the ancient Æthiopia *supra Ægyptum*, said to have been the seat of the kingdom of the Meroë, received its name from a tribe named Nubæ or Nubatæ. The Christian kingdom, with Dongola, the capital, lasted till the 14th century, when it was broken up into Mahometan principalities. It is now subject to the viceroy of Egypt, having been conquered by Ibrahim Pacha in 1822.

NUCLEUS THEORY IN CHEMISTRY, see *Compound Radicles*.

NUISANCES REMOVAL ACT, passed 1848; amended 1849; see *Sanitary Legislation*.

NUITS. A small fortified town, near Dijon, in Burgundy, N.E. France, chartered in 1212; frequently captured and ravaged, specially in 1569, 1576, and 1636. It was taken by the Badenese under Von Werder, 18 Dec. 1870, after five hours' conflict, in which above 1,000 French are said to have been killed and wounded, and 700 prisoners taken. The German loss was also heavy. A depôt of arms and ammunition was gained by the victors.

NUMANTINE WAR. The war between the Romans and the Celtiberians (Celts who possessed the country near the Iber, now the Ebro) began, 153 B.C., on account of the latter having given refuge to their allies the Sigidians, who had been defeated by the Romans. Numantia, an unprotected city, withstood a long siege, in which the army of Scipio Africanus, 60,000 men, was opposed by no more than 4,000 men able to bear arms. The Numantines fed upon horse-flesh, and their own dead, and then drew lots to kill one another. At length they set fire to their houses, and destroyed themselves, so that not one remained to adorn the triumph of the conqueror, 133 B.C.

NUMIDIA (N. Africa), the seat of the war of the Romans with Jugurtha, which began 111 B.C., and ended with his subjugation and captivity, 106. The last king, Juba, joined Cato and was killed at the battle of Thapsus, 46 B.C., when Numidia became a Roman province; see *Mauritania*.

NUMISMATICS, the science of coins and medals, an important adjunct to the study of history. In this country Evelyn (1697), Addison (1726), and Pinkerton (1789), published works on medals. Pellerin's "Recueil des Médailles," 9 vols. 4to (1762). Ruding's *Annals* is the great work on British coinage (new edition, 1840).—The Numismatic Society in London was founded by Dr. John Lee in 1836. It publishes the *Numismatic Chronicle*.—Mr. Yonge Akerman's Numismatic Manual (1840) is a useful introduction to the science. Foreign works are numerous.

NUNCIO, an envoy from the pope of Rome to catholic states. The pope deputed a nuncio to the Irish rebels in 1645. The arrival in London of a nuncio, and his admission to an audience by James II., July, 1687, is stated to have hastened the Revolution.

NUNNERY. The first founded is said to have been that to which the sister of St. Anthony retired at the close of the 3rd century The first founded in France, near Poictiers, by St. Marcellina, sister to St. Martin, 360.—*Du Fresnoy*. The first in England was at Folkestone, in Kent, by Eadbald, or Edbald, king of Kent, 630.—*Dugdale;* see *Abbeys* and *Monachism*. The nuns were expelled from their convents in Germany, in July, 1785; in France, in Jan. 1790. In Feb. 1801, monastic establishments were abolished in Naples, compensation being made to the inmates. Owing to the French anti-congregation law many French nuns settled in England, 1902 *et seq*. For memorable instances of the fortitude of nuns, see *Acre*, and *Coldingham*.

NUREMBERG, a free imperial German city in 1219. In 1522, the diet here demanded ecclesiastical reforms and a general council, and in 1532 secured religious liberty to the Protestants. It was annexed to Bavaria in 1805. Albert Dürer was born here in 1471. Population, 1896, 142,403; 1900, 261,022.

NURSES, their qualifications were greatly raised during the 19th century by the influence of Florence Nightingale and the viscountess Strangford, who died 24 March, 1887; both ladies rendered eminent services to the sick and wounded in the Russo-Turkish wars. Institution of Nursing Sisters founded 1840, and many others since. See *Nightingale Fund* and *John, St.*

Mr. (afterwards sir) Henry C. Burdett in Oct. 1887, proposed a scheme for the establishment of the National Pension Fund Royal 1890, for nurses and hospital officials. In Jan. 1888 Messrs. Gibbs, Hambro, J. S. Morgan and Rothschild presented 20,000*l.* towards its foundation; incorporated Feb. 1888; 22,500*l.* presented about 27 Oct. 1895, 5,000*l.* raised by subscription, presented 1 Jan. 1897. ODOMETER (from the Greek *hodos*, way, and *metron*, measure), see *Pedometer*.

ODONTOLOGY (from the Greek *odontes*, teeth), the science of the teeth, may be said to have really begun with the researches of professor Richard Owen, who in 1839 made the first definite announcement of the organic connection between the vascular and vital soft parts of the frame and the hard substance of a tooth. His comprehensive work, "Odontography" (illustrated with beautiful plates), was published 1840-45. The Odontological Society was established 1856.

ODRYSÆ, a people of Thrace. Their king Teres retained his independence of the Persians, 508 B.C. Sitalces, his son, enlarged his dominions, and in 429, aided Amyntas against Perdiccas II., of Macedon, with an army of 150,000 men. Sitalces, killed in battle with the Triballi, 424, was succeeded by Seuthes, who reigned prosperously; Cotys, another king (382-353), disputed the possession of the Thracian Chersonesus with Athens. After 9 or 10 years' warfare, Philip II. of Macedon reduced the Odrysæ to tributaries, and founded Philippopolis and other colonies, 343. The Romans, after their conquest of Macedon, favoured the Odrysæ, and in 42 their king Sadales bequeathed his territories to the Romans. The Odrysæ, turbulent subjects, and often chastised, were finally incorporated into the empire by Vespasian, about A.D. 70.

ODYL, the name given in 1845 by baron von Reichenbach to a so-called new "imponderable, or influence," said to be developed by magnets, crystals, the human body, heat, electricity, chemical action, and the whole material universe. The odylic force is said to give rise to luminous phenomena, visible to certain sensitive persons only. The baron's "Researches on Magnetism, &c., in relation to the Vital Force," translated by Dr. Gregory, were published in 1850. Emanuel Swedenborg (died 1772) described similar phenomena.

OIL was used for burning in lamps as early as the epoch of Abraham, about 1921 B.C. It was the custom of the Jews to anoint with oil persons appointed to high offices, as the priests and kings, *Psalm* cxxxiii. 2; 1 *Sam.* x. 1; xvi. 13. The fact that oil, if passed through red-hot iron pipes, will be resolved into a combustible gas, was long known to chemists; and after the process of lighting by coal-gas was made apparent, Messrs. Taylor and Martineau contrived apparatus for producing oil-gas on a large scale, 1815.—Oil Springs; see *Petroleum*. Oil Frescos; see under *Painting*.

OLD BELIEVERS, a Russian sect, said to number about 12,000,000, originated in a revolt against the cruelties of the patriarch Nicon, whom they named Anti-Christ, 1654. They profess to adhere to the old reading of the Sclavonian sacred books, which have been superseded by the present Russian church. The czar Alexander II. granted liberty of worship to the sect in 1879.

OLD CATHOLICS, the name assumed in Germany by the members of the Roman Catholic church opposed to the dogma of papal infallibility, headed by professor Döllinger of Munich (see *Councils*, 18 July, 1870). After three days' conference at Munich, Sept. 1871, they decided to set up independent worship, first meeting in a church given them by the town council of Munich. The abbé Michaud began a similar movement in Paris in Feb. 1872. Dr. Döllinger preached in favour of union with the church of England, March, 1872. Père Hyacinthe (Charles Loyson), president of the party at Rome, issued a programme, respecting the Vatican decrees, recognising ecclesiastical authorities, demanding reform, yet opposing schism, about 5 May, 1872. The bishops of Lincoln (Wordsworth) and Ely (Browne) and the dean of Westminster (Dr. Stanley), by invitation, attended the conference at Cologne, and delivered addresses, 20-22 Sept. 1872. The Old Catholics elected their first bishop, Dr. Joseph Reinkens, 1 June, 1873, who was recognised by the emperor and other powers.

OLIBANUM, a kind of gum obtained from various species of *Boswellia* found growing on the limestone rocks of Somaliland and in Southern Arabia. It is identical with the *thus* of the Romans, and is largely used as incense, and a considerable trade in this product is carried on at Aden. Large quantities of olibanum are used in India.

OLIVES are named in the earliest accounts of Egypt and Greece. They were first planted in Italy about 562 B.C. The olive has been cultivated in England since 1648 A.D.; the Cape olive since 1730. From the olive is obtained *oleic acid*, a colourless, oily fluid, and in its combined forms is used in medicine, and in soap manufacture.

MOUNT OF OLIVES, also named *Mount Olivet*, a ridge of rocks situated east of Jerusalem, from which it is separated by the valley of Jehoshaphat. Here Titus encamped when he besieged Jerusalem 70 A.D. The Mount is chiefly associated with the life of our Lord; here, according to tradition, the angels appeared to the disciples after the resurrection. Christ taught His disciples the Lord's prayer; and here he wept over Jerusalem. On the summit of the central peak is built the Church of the Ascension, the site of an earlier church erected by St. Helena.

OLMÜTZ, the ancient capital of Moravia. Here the emperor Ferdinand abdicated, on behalf of his nephew, Francis Joseph, 2 Dec. 1848; and here the latter promulgated a new constitution, 4 March, 1849. A conference was held here, 29 Nov. 1850, under the czar Nicholas, when the difficulties between Austria and Prussia respecting the affairs of Hesse-Cassel were arranged.

OLTENITZA. A Turkish force having crossed the Danube, under Omar Pacha, established themselves at Oltenitza, in spite of the vigorous attacks of the Russians, who were repulsed with loss, 2 and 3 Nov. 1853. On the 4th a desperate attempt to dislodge the Turks by general Danneberg with 9000 men, was defeated with great loss.

OLYMPIADS, the era of the Greeks, from 1 July, 776 B.C., the year in which Corœbus was successful at the Olympic games. This era was reckoned by periods of four years, each period being called an Olympiad, and in marking a date the year and Olympiad were both mentioned. The computation of Olympiads ceased with the 305th, A.D. 440.

OLYMPIC GAMES, so famous among the Greeks, traditionally said to have been instituted in honour of Jupiter by the Idæi Dactyli, 1453 B.C., or by Pelops, 1307 B.C., revived by Iphitus, 884 B.C., were held at intervals of four years, on the banks of the Alpheus, near Olympia, in the Peloponnesus, now the Morea, to exercise the youth in five kinds of combats; the conquerors being highly honoured. The prize contended for was a crown made of a kind of wild olive, appropriated to this use. The festival was abolished by Theodosius, A.D. 394. In 1858 M. Zappas, a wealthy Peloponnesian, gave funds to re-establish these games, under the auspices of the queen of Greece.

The revival of the games every four years at some European capital was decided on at an international congress at Paris in 1894. First to be at Athens in 1896; second at Paris in 1900.
Preliminary contests to select champions held in the ancient stadium, capable of seating 50,000 persons, renovated by M. Averoff of Alexandria (died 27 July, 1899) (80,000*l.*), the king and family present (129 foreign athletes to compete), 21, 22 March, 1896

S. Robertson, recited, several addresses presented, 15 April, ,,

OLYMPIEUM (near Peloponnesus), the great temple of Jupiter, erected by Libon, of Elis, about 450, at the charge of the Eleans, after their conquest of the country. For this temple Phidias made the colossal statue of the god, in gold and ivory, 437-433 B.C.

The German explorations by Messrs. Hirschfeld and Bötticher, planned by prof Ernst Curtius, the historian, began in Oct. 1875. Torsos and other relics were found. Above 904 objects in marble, many coins, bronzes, inscriptions, &c., found, 1875-8. Explorations closed, Nov. 1880.

OLYNTHUS, a city, N. Greece. To resist the predominance of Sparta, it formed a league with other cities, which was subdued in war, 382-379 B.C. It resisted Philip of Macedon, 350 B.C., by whom it was destroyed, 347. Demosthenes delivered three orations on its behalf, 349.

OMAHA, the principal city of Nebraska, situated on the river Missouri, which is spanned by a bridge 2,750 ft. in length. Founded in 1854, the city has rapidly developed, and is now (1903) one of the most prosperous of the cities of the Eastern States. Omaha contains many handsome public buildings and churches. Manufactures and industries of various kinds are carried on, the most important being its large silver-smelting works, said to be the largest in the world, and its pork-packing business, third only in importance to that of Chicago. A large trade in grain is also carried on. Population 1860, 1,902; 1880, 30,518; 1890, 140,452.

OMAN, an independent Mahommetan state, S.E. Arabia, ruled by a sultan. Population 1,500,000 (about); capital Muscat, *which see*.

OMENS, see *Augury*. Alexander the Great and Mithridates the Great are said to have studied omens. At the birth of the latter, 131 B.C., there were seen for seventy days together, two splendid comets; and this omen, we are told, directed all the actions of Mithridates throughout his life.—*Justin*.

OMER, ST., N.E. France. At this town in 1592, the eminent Jesuit, father Parsons, founded a seminary for the education of English and Irish Roman Catholics, in which there were 50 pupils in 1594. The Seminary was suppressed in 1762, and the masters and pupils migrated successively to Bruges, Liége, and in 1794 to England, by invitation. The seminary of St. Omer was much referred to during the trials connected with Oates's plot in 1678. See *Stonyhurst*.

OMLADINA, an Austrian political society composed of Slav students, journalists, and working men; about 800 members, divided into groups, with officers, was formed at Vienna in 1890, to promote the federation of the empire, with equal rights for all classes. See *Austria*, 1894.

OMMIADES, a dynasty of Mahometan caliphs, beginning with Moawiyah, of whom fourteen reigned in Arabia, 661-750; and eighteen at Cordova, in Spain, 755-1031. Their favourite colour was green.

OMNIBUS (from *omnibus*, Latin "for all"). The idea of such conveyances is ascribed to Pascal, about 1662, when similar carriages were started, but soon discontinued. They were revived in Paris about 11 April, 1828; and introduced into London by a coach proprietor named Shillibeer. The first omnibus started from Paddington to the Bank of England on Saturday, 4 July, 1829. Regulations were made respecting omnibuses by 16 & 17 Vict. c. 33 (1853). See *Cabriolets* and *Hackney Coaches*. The London Omnibus Company was established in Jan. 1856. The saloon omnibuses ran in 1857-60. In Sept. 1865, it was stated that there were then running about 620 omnibuses belonging to the General Omnibus Company, and 450 belonging to private proprietors; in 1867, about 1050 omnibuses, with 13,000 drivers and conductors.—*Sir R. Mayne*. In 1873 about 1,400 omnibuses; 1891, 2,415; 1893, 2,366; 1896, 3,001; 1902, 4,200. Dividend, Aug. 1878, 12½ per cent.; 1903, 7 per cent. An *omnibus bill*, one which deals with many topics.

The London Road Car Company registered 1 Jan. 1883.
The number of omnibuses greatly increased, daily additions with cheap fares, some 1*d.* and ½*d.* 1889-92.
Strike of the men employed by the General Omnibus and Road Car Companies, claiming a twelve hours' day, 7 June; closed by concessions, 13 June, 1891.
The Workers' co-operative omnibus company formed; new omnibuses ordered, 30 Dec. 1891.
First motor omnibus service started by Messrs. Tilling, from Peckham to Oxford Circus in 1904; many others since.

OMNIMETER, a surveying apparatus (combining the theodolite and level, and comprising a telescope and microscope), invented by Eckhold, a German engineer, to supersede chain measuring; announced Sept. 1869.

BANK POUND NOTES issued by the Bank of England, 4 March, 1797, withdrawn for England, re-issued for a short time, 16 Dec. 1825.

Mr. Gresham's proposal in 1891 to issue one pound notes to increase the reserve of gold at the Bank of England was much discussed, and at a meeting of the London chamber of commerce the consideration of the question was defarred (51 to 14), 21 Jan. 1892.

OPEN SPACES ACT (METROPOLITAN), 40 & 41 Vict. c. 35 (1877), authorises the Metropolitan Board of Works and the corporation of London to acquire open spaces for the benefit of the public. Acts consolidated in 1887. Another act, 29 June, 1893, see *Commons*. About 220 open spaces, 1902.

OPERA, originated with the Greeks; the earliest librettos were by Sophocles and Æschylus, such as the *Agamemnon* and *Antigone*; a band of lyres and flutes constituted the orchestra; the dialogues were musically declaimed, and the choruses sung to the best music of the time. This was the germ of all later developments. *Grove.*

Adam de la Hale, a Trouvère, "le Bossu d'Arras," born 1240, composed the first comic opera, *Li Gieus* (Le Jeu) *de Robin et de Marion*. *Le Ballet comique de la Royne*, composed by Beaulieu and Salmon, was performed before Henri III. in 1581.

ITALIAN OPERA began with Cavaliere's *Il Satiro* (1590); Orazio Vecchi's *L'Amfiparnasso*, printed at Venice, 1594; Peri's *Dafne* (1597), libretto by Rinuccini; their *Euridice* was performed at Florence on the marriage of Henry IV. of France with Maria de' Medici in 1600. Monteverde's *Arianna* was produced in 1607; *Orfeo*, 1608; full score published at Venice in 1609. Perrin's *Pomone*, with music by Cambert, was performed in Paris in 1669; Lulli's *Atys*, 1676, etc.

Johann Theile's *Adam und Eva* was performed in Germany at Hamburg in 1678, and Reinhard Keiser, founder of the great German school, produced over 100 operas there: *Basilius*, 1693; *Circe*, 1734. Scarlatti produced 109 operas, followed by Stradella, Caldara, and Lotti, 1680 *et seq.* N. Logroscino and Piccini developed the opera buffa, 1700-70. Handel wrote 42 operas; *Almira*, 1705; *Roderigo*, 1706; *Rinaldo*, brought out at the Haymarket, 1711; *Radamisto*, 1720, etc. J. A. Hasse produced many operas at Dresden. Gluck, a great reformer, composed *Orfeo ed Euridice*, 1762; *Alceste*, 1767; *Iphigénie en Aulide*, 1774; *Iphigénie en Tauride*, 1779. Franco Leoni's *L'Oracolo*, 1905.

OPERA IN ENGLAND grew out of the *masque*. Henry Purcell was the first to change the masque into the opera. He wrote *Dido and Æneas* (1680), *King Arthur* (1691), *Bonduca* (1695), and many other complete operas, besides numerous dramatic compositions. By the exertions of Mr. Carl Rosa (Rosé) and the company formed by him, since 1875 (termed Royal, 1892) performances of English opera have been greatly promoted in England. The company was joined by Mr. (aft. sir) Augustus Harris in April, 1889, and obtained the command of Drury Lane in addition to Covent Garden and the Prince of Wales's.—Carl Rosa died, aged 46, 30 April, 1889, much lamented. OPERA COMIQUE, a new theatre, 299, Strand, opened 29 Oct. 1870, by Mdlle Déjazet and a French company. Demolished for Strand improvements, 1904. The French *opéra comique* began 1715; destroyed by fire, about 131 persons perish, 25, 26 May, 1887, see *Paris*.

OPERA-HOUSE, THE ITALIAN, or QUEEN'S, or (since 1901) HIS MAJESTY'S THEATRE. The original building is generally supposed to have been constructed by sir John Vanbrugh, though Mr. Pennant attributes it to sir Christopher Wren. It was built as "the queen's (afterwards changed to king's) theatre," opened 9 April, 1705; and burnt down 17 June, 1789. The foundation of the new theatre was laid 3 April, 1790; and the house was opened 22 Sept. 1791, on an improved plan; a new exterior was erected in 1820, from designs by Mr. Nash, *relievo* by Mr. Budd, 1821. This theatre was totally destroyed by fire on the night of 6-7 Dec. 1867. The loss of the lessee, Mr. Mapleson, was about 12,000*l.*, and that of Mdlle. Titiens was valued at 2000*l.*; rebuilt, but internal arrangements not completed. Moody and Sankey's revival meetings were held here, 12 April, 31 May, 1875. The new house was opened for Italian opera by Mr. Mapleson, 28 April, 1877; see *Theatres*. The house was pulled down in 1892–3.—The ENGLISH OPERA (or Lyceum) was opened 15 June, 1816. It was entirely destroyed by fire 16 Feb. 1830. The new English Opera-house, or Lyceum, was erected from designs by Mr. S. Beazley, and opened in July, 1834; see *Theatres and National Opera-house*.

OPHICLEIDE, the keyed bassoon, said to have been invented by Frichot, a Frenchman, in London, between 1791 and 1800.

OPHTHALMIA, general term for disease of the eye.

Ophthalmic hospitals were founded in London, 1804, 1823, and since. The Ophthalmological Society of Great Britain was founded in 1880 mainly by sir W. Bowman, the first president. He died 29 March, 1892, as the greatly advanced ophthalmic surgery.

OPHTHALMOSCOPE, an apparatus for inspecting the interior of the eye, invented by professor Helmholtz, in 1851.

OPIUM, the juice of the white poppy, was known to the ancients, its cultivation being mentioned by Homer, and its medicinal use by Hippocrates. It is largely cultivated in British India, and was introduced into China by our merchants, which led eventually to the war of 1839, the importation being forbidden by the Chinese government. The revenue derived from opium by the Indian government in 1862 was about 7,850,000*l.*; in 1874, 8,000,000*l.*; in 1880, about 10,500,000*l.*, but it has since declined. Laudanum, a preparation of opium: was employed early in the 17th century. A number of alkaloids have been discovered in opium: narcotine by Derosne, and morphia by Sertürner, in 1803.

The Chinese government derives a large revenue from the duty on imported opium which was fixed by the treaty of 1858. The plant is now largely grown in China.
Sir Joseph Pease's resolution condemning the cultivation of opium in India, the traffic in the drug, and the revenue, was adopted by the house of commons (160–130), 10 April, 1891; this caused much excitement in India.
Mr. Webb's resolution for appointing a royal commission against the opium revenue negatived by the commons (184–105), 30 June, 1893.
Royal commission appointed, July; president, lord Brassey; first meeting, 7 Sept.; at Calcutta, 28 Nov. 1893; two sections sat at Indore, Bombay, and other places, Feb. 1894; in their report the commissioners do not recommend the prohibition of the growth and manufacture of opium, but suggest increased state supervision, April, 1895. The report accepted by the Imperial government.

OPORTO (W. Portugal), the ancient *Calle*, one of the most impregnable cities in Europe. After being held at various times by the Goths and Moors, Oporto was finally acquired by the christians 1092. Oporto is the mart of Portuguese wine known as "Port." A chartered company for the regulation of the port-wine trade was established in 1756. The French, under marshal Soult, were surprised here by lord Wellington, and defeated in an action fought 12 May, 1809. The Miguelites besieged Oporto, and were repulsed by the Pedroites, with considerable loss, 19 Sept. 1832. The Oporto wine company was abolished in 1834, but re-established by a royal decree, 7 April, 1838. An international exhibition was opened here by the king, 18 Sept. 1865. Population, 1890, 138,860; 1900, 172,421; see *Portugal*.

The Baquet theatre burnt; panic; about 100 lives lost; 20 March, 1888.

OPTIC NERVES are said to have been discovered by N. Varoli, a surgeon and physician of Bologna, about 1538.—*Nouv. Dict.*

OPTIMISM (from *optimus*, the best), the doctrine that everything which happens is for the best, in opposition to Pessimism (from *pessimus*, the worst). The germ of optimism is to be found in Plato, and in St. Augustin, and other fathers; and has been especially propounded by Malebranche and Leibnitz, and adopted by Pope, Bolingbroke, Rousseau, and others. Optimism as expressed in the term, "the best of all possible worlds," is ridiculed by Voltaire (1694-1778) in his "Candide." See *Pessimism*.

"**OPTION**," a term given at the time to the permission given to the inhabitants of Alsace and Lorraine by the German government to choose, before 30 Sept. 1872, whether they would quit their country or become German subjects. Great numbers emigrated into the French territories. The "option" of archbishops respecting their claims on a benefice becoming void on the creation or translation of a bishop, was abolished in 1845. A Stock Exchange term, meaning the liberty to sell or buy stock in a time bargain at a stated price.

ORACLES, a term applied to revelations made by God to man. They were given to the Jews at the Mercy-seat in the tabernacle; see *Exod.* xxv. 18-22. The Holy Scriptures are the Christian "oracles," *Rom.* iii. 2; 1 *Pet.* iv. 11. King Ahaziah sent to consult the oracle of Baalzebub at Ekron about 896 B.C. The Greeks consulted especially the oracles of Jupiter and Apollo (see *Dodona* and *Delphi*); and the Italians those of Faunus, Fortune, and Mars.

ORAN, Algeria (N. Africa), a Moorish city several times captured by the Spaniards; definitively occupied by the French in 1831, who have since added docks, &c.

ORANGE, a principality in S.E. France, formerly a lordship in the 9th or 10th century. It was ruled by four houses successively: that of Giraud Adhemar (to 1174); of Baux (1182 to 1393); of Chalons (to 1530); and of Nassau (1530 to 1713); see *Nassau*. Philibert the Great, prince of Orange, the last of the house of Chalons, having been wronged by Francis I. of France, entered the service of the emperor Charles V., to whom he rendered great services by his military talents. He was killed at the siege of Florence, 3 Aug. 1530. He was succeeded by his nephew-in-law, René of Nassau; see *princes of Orange* under *Holland*. The eldest son of the king of Holland is styled the prince of Orange, although the principality was ceded to France in 1713. See *Arausio*.

ORANGE RIVER COLONY, formerly the Orange Free State (annexed by Gt. Britain, 28 May, 1900). Previous to its annexation it was a republic in South Africa, founded by Boers from Cape Colony in 1836. The British government proclaimed its authority over this territory on 3 Feb. 1848, but declared it independent 23 Feb. 1854. A constitution proclaimed, 10 April, 1854; revised, 1866 and 1879. The able president, sir John Henry Brand, first elected, 1863, died, 14 July, 1888. ORANGEMEN. The "Battle of the Diamond," 21 Sept. 1795 (see *Diamond*), and the treachery experienced by the Protestants on that occasion, convinced them they would become an easy prey to the Roman Catholics, from their small numbers, unless they associated for their defence, and consequently the Orange Society was formed in 1795. The first Orange lodge was formed in Armagh;

societies of Orangemen already existed. An Orange lodge was formed in Dublin; the members issued a declaration of their principles (the maintenance of church and state under the house of Brunswick) in Jan. 1798. After 1813 Orangeism declined; but revived again in 1827, when the duke of Cumberland became grand-master; and it is stated that in 1836 there were 145,000 Orangemen in England, and 125,000 in Ireland. After a parliamentary inquiry Orange clubs were broken up in conformity with resolutions of the house of commons; but were revived in 1845—1889. In Oct. 1857, the lord chancellor of Ireland ordered that justices of the peace should not belong to Orange clubs. The Orangemen in Canada were greatly excited during the visit of the prince of Wales in Sept. 1860. Mr. Wm. Johnston, a grand-master, convicted of violating the Party Processions act, was elected M.P. for Belfast, Nov. 1869. See *Belfast*. The Orangemen vigorously oppose the home rule movement, see *Ulster*, 1892-3.

ORANGES. The sweet, or China orange, was first brought into Europe from China by the Portuguese, in 1547; and it is asserted that the identical tree, whence all the European orange-trees of this sort were produced, is still preserved at Lisbon, in the gardens of one of its nobility. Orange-trees were first brought to England, and planted, with little success, in 1595; they are said to have been planted at Beddington park, near Croydon, Surrey. The duty on imported oranges was repealed in 1860.

ORATOR HENLEY. An eccentric English gentleman of some talents, in 1726, opened his "oratory," a kind of chapel, in Newport-market, London, where he gave lectures on theological topics on Sundays, and on other subjects on Wednesdays, every week. Novelty procured him many hearers; but he was too imprudent to gain any permanent advantage. He removed his oratory to Clare-market, and sank into obscurity previously to his death, in 1756.

ORATORIANS (from the Latin *orare*, to pray), a regular order of priests established by St. Philip Neri, about 1564, and so called from the oratory of St. Jerome, at Rome, where they prayed. They had a foundation in France, commenced by Guillaume Gibieuf and Pierre de Berulle (afterwards cardinal), 1612, approved by pope Paul V. 1613.—The rev. Frederick Faber and others, as "Fathers of the Oratory," established themselves first in King William-street, Strand, London, in 1848, and afterwards at Brompton.

ORATORIO, a sacred musical composition, the subject of it being generally taken from the Scriptures. The origin of our oratorios (so named from having been first performed in an oratory) is ascribed to St. Philip Neri, about 1550. The first true oratorio, Emilio del Cavaliere's "Rappresentazione," was performed at Rome in 1600. He was followed by Giovanni Carissimi, Alessandro Scarlatti, &c. Bach's "Passion Music," the "St. Matthew," was produced at Leipzig on Good Friday, 1729; see *Passion-Week*. Handel composed 17 English oratorios: his first, "Esther," was performed at the Haymarket theatre, 2 May, 1732. "Israel in Egypt" was produced in 1738, and the "Messiah" in 1741; Haydn's "Creation" in 1798; Beethoven's "Mount of Olives," 1803; Spohr's "Last Judgment" (properly "Last Things"), 1826; Mendelssohn's "St. Paul" in 1836, and "Elijah" in 1846; Costa's "Eli," 1865; "Naaman," 1864; W. Bennett's "Woman of Samaria," 1867"; Macfarren's "John the Baptist," 1873; Sullivan's "Prodigal Son," 1869; "Light of the World," 1873; "Martyr of Antioch," 1880, &c. Latterly the name has been modified, e.g. *Dramatic Oratorio*, such as Mackenzie's "Rose of Sharon;" Hubert Parry's "Judith," "Job," "King Saul" (1894), &c. *Sacred Trilogy*, Gounod's "Redemption," Berlioz's "Childhood of Christ;" Elgar's "The Apostles," Pts. I. and II. 1903; or, again, as a form of *Dramatic Cantata*, as Schumann's "Paradise and the Peri," Sullivan's "Golden Legend," Mackenzie's "Dream of Jubal."

ORCHIDS, a natural order of plants of a very peculiar organization, recently much cultivated. In 1880 a great establishment for their cultivation was set up at St. Albans by Mr. Sander, "the orchid king," patronised by the Rothschilds, who introduced him to queen Victoria at Waddesdon Manor, 14 May, 1890. The orchids at Blenheim sold for about 5,250*l.*, 19–23 Dec. 1892.

ORCHOMENUS, a small Greek state in Bœotia, was destroyed by the Thebans, 367 B.C.; restored by Philip II. of Macedon, 354; and given up by him to Thebes, 346.

ORDEAL was known among the Greeks and Jews (*Num.* v. 2). It was introduced into England by the Saxons. A prisoner who pleaded not guilty might choose whether he would put himself for trial upon God and his country, by twelve men, as at this day, or upon God only. The trial by ordeal was abolished in 1218.

ORDER OF THE CORPORATE REUNION, virtually a new episcopal church, said to arise out of the Christian Unity Association (*which see*). It proposed to form four stations, (Canterbury, York, Caerleon, and St. Andrews), with rectors and provincials; announced 11 Sept. 1877.

ORDERS, see *Knighthood*.

ORDERS IN COUNCIL were issued by the British government 7 Jan. and 11 Nov. 1807, prohibiting trade with the ports occupied by the French, being reprisals for Napoleon's *Berlin* and *Milan decrees* (see *Continental System*). They greatly checked the progress of manufactures in this country, and caused much distress and smuggling. They were repealed in regard to America, 18 June, 1812. The action under these orders led to the disastrous war with the United States in 1812-15.

ORDINANCES, see *Ordonnances*, *Self-Denying Ordinances*.

ORDINATION of ministers in the Christian church began with Christ and His apostles: see *Mark* iii. 14, and *Acts* vi. and xiv. 23. In England in 1549 a new form of ordination of ministers was ordered to be prepared by a committee of six prelates and six divines.

ORDNANCE OFFICE. Before the invention of guns, this office was supplied by officers under the following names: the bowyer, the fletcher, the bowbyer, the galeater, or purveyor of helmets, the armourer, and the keeper of the tents. Henry VIII. placed it under the management of a master-general, a lieutenant, surveyor, &c. The master-general was chosen from among the first generals in the service of the sovereign. The appointment was formerly for life; but since the reformation was held *durante bene placito*, and not unfrequently by a cabinet minister.—*Beatson*. The present [illegible]

[illegible] were revoked 25 May, 1855, and its duties vested in the minister of war, lord Panmure. The last master-general was lord Fitzroy-Somerset, afterwards lord Raglan. The revival of the office recommended by the Ordnance Commission (see under *Army*, 1886).

ORDNANCE SURVEY. The trigonometrical survey of England was commenced by gen. Roy, in 1784, continued by col. Colby, and completed by col. (aft. sir Henry) James in 1856. The publication of the maps (scale 7 inches to a mile), commenced in 1819, under the direction of col. Mudge, and was completed in 1862; a large part of these maps have been coloured geologically. The survey of Ireland (6 inches to a mile) has been completed and published; that of Scotland, completed Nov. 1882. By the Survey act, passed 12 May, 1870, the ordnance survey was transferred to the Board of Works, and by an act passed in 1889, to the Board of Agriculture, beginning 1 April, 1890. Directors, lieut.-gen. John Cameron, succeeded sir Henry James in 1875, died 30 June, 1878; col. A. C. Cooke; col. R. H. Stotherd, 1885; col. Farquharson (K.C.B. 1899); col. Duncan Johnston, 1901; col. R. C. Hellard, 1905. In 1892 several sets of maps were in course of publication or preparation. The Ordnance Survey maps having been considered deficient, a departmental committee was appointed in April, 1892, and met during the year; sir John Dorington, M.P., chairman. Report, with recommendations, presented to the Board of Agriculture, 31 Dec. 1892; published, 6 March, 1893. New maps issued, May, 1902; survey sections sent to S. Africa, spring, 1902; 4-inch and 1-inch maps revised, issued, Aug. 1902; others issued 1903. Pocket maps of many of the sections, scale 1 in. and ½ in. to a mile, are published at a cheap rate. Annual report to 31 March, 1905, states that a great advance has been made towards the completion of the small maps, and good progress made with the large scale maps. The outline and hill editions, 1 in. scale, have been completed for the whole of the United Kingdom, and the coloured edition completed for England and Wales, and begun for Scotland; about three-quarters of the coloured map of Ireland completed. The 2-mile map drawing of England and Wales completed. Drawing for Scotland begun. The 10-mile map, coloured edition, has been published for the whole of Great Britain, and will be issued for Ireland. The 1-1,000,000 scale map completed and published in colour for the whole of the United Kingdom. The maps to illustrate the official history of the South African war, and those to illustrate the report of the London Traffic Commission, in progress.

New departure made 1903-4, with consent of the treasury, to supply schools who desire it with specially printed ordnance survey maps at a very low price. A considerable number of such maps were supplied in 1904-5. Specimens of the principal maps have also prepared for hanging up in public buildings. These maps have been hung up at all post-offices at which they can be ordered, and at nearly 700 other post-offices.

ORDONNANCES, the laws enacted by the [illegible] kings of France previous to 1789. They began with "In the name of the king," and ended with "such is our good pleasure." The first in [illegible] is dated 1287 (Philip IV.) The publication of these "ordonnances," ordered by Louis XIV., [illegible] in progress. The "ordonnances" of [illegible] promulgated 26 July, 1830, led to the [illegible]

OREGON TERRITORY (N. America), is said to have been visited by Drake in 1579. Lieut. Broughton took possession of part of it for Great Britain in 1792. In 1810 a settlement named Astoria, was founded by a New York Company. Oregon was occupied by the English in 1814, but was claimed by the United States government, to whom the greater part was ceded, after much negotiation, by the treaty of 12 June, 1846. Oregon was made a territory in 1848, and admitted as a state, Feb. 1859. Capital, Salem. Population, 1880, 174,768; 1890, 313,767; 1900, 413,536.

ORGAN, a development of the pandean pipes; the "*organ*" in *Gen.* iv. 21 should be translated *pipe*. The invention is attributed to Ctesibius, a barber of Alexandria, about 250 B.C.; and to Archimedes, about 220 B.C. The organ was brought to Europe from the Greek empire, and was applied to religious devotions in churches, about A.D. 657. —*Bellarmine*. Organs were used in the western churches by pope Vitalianus, in 658.—*Ammonius*. It is affirmed that the organ was known in France in the time of Louis I., 815, when one was constructed by an Italian priest. The organ at Haarlem is one of the largest in Europe; it has 60 stops and 8000 pipes. At Seville is one with 110 stops and 5300 pipes. The organ at Amsterdam has a set of pipes that imitate a chorus of human voices. Of the organs in ENGLAND that at St. George's Hall, Liverpool, by Mr. Willis, was the largest; next in order that at York minster, and that in the music-hall, Birmingham. In London, the largest was, perhaps that of Spitalfields church; and that in Christ Church was nearly as extensive. The erection of the famous Temple organ was competed for by Schmidt and Harris; after long disputes, the question was referred to vote, and Mr. Jefferies, afterwards chief justice, gave the casting vote in favour of Schmidt (called Father Smith), about 1682. A monster organ was erected in the Crystal Palace, Sydenham, in June, 1857. The organ, by Willis, at the Royal Albert Hall, was said to be the largest in the world; 1871. A larger proposed for a cathedral in Long Island, North America, 1880. A noble organ (by Bryceson), with many appliances, opened in the hall, Primrose-hill-road, London, N., Jan. 1876; see *Westminster Abbey*, 1895.

Barrel organs are said to have been first made early in the 18th century. The finest was the *Apollonicon* (*which see*).

ORGANIC SYNTHESIS, see *Chemistry*.

ORIEL COLLEGE (Oxford), founded in 1326, by Adam de Brome, archdeacon of Stow, and almoner to king Edward II. This college derives its name from a tenement called *l'Oriole*, on the site of which the building stands.

ORIENTAL INSTITUTE, Woking, Surrey, founded by dr. G. W. Leitner, the distinguished Orientalist (died, aged 68, 22 March, 1899; see *Panjaub*), for the training of young Indians, in 1884. A mosque was erected here, Aug. 1889.

ORIENTALISTS. The first International Congress of these scholars was held at Paris, 1 Sept. 1873, M. Léon de Rosny, the founder, president; the second Congress met at the Royal Institution, in London, 14-19 Sept. 1874, dr. S. Birch president; the third Congress met at St. Petersburg, 1 Sept. 1876; the fourth at Florence, Sept. 1878; the fifth met at Berlin, 12-17 Sept. 1881, M. Dittman president; the sixth at Leyden, 10 Sept. 1883; the seventh, Vienna, 27 Sept. 1886; eighth, Stockholm, president king Oscar II., 2-7 Sept. 1889; independent, London, 1-10 Sept. 1891; ninth in London, 5-12 Sept. 1892; tenth, Geneva, 4 Sept. 1894; eleventh, Paris, 6 Sept. 1897; twelfth, Rome, 4-15 Oct. 1899; thirteenth, Hamburg, 5 Sept. 1902. See *Asiatic Societies.*

ORIENTAL STUDIES; Professor Max Müller, in the presence of the prince of Wales, at the Royal Institution, gave a discourse to inaugurate the establishment of a school for modern oriental studies by the Imperial Institute, in union with University College and King's College, London 11 Jan. 1890

ORIENTATION, the setting of the chancel of a church so that it points to the east. This custom is followed in the churches of England, and those of northern Europe, but is not strictly adhered to in Italy and the South. St. Peter's, at Rome, has its choir pointing to the west.

ORIFLAMME, see *Auriflamma.*

ORIGENISTS pretended to draw their opinions from the writings of Origen, who lived 185-253. They maintained that Christ was the son of God in no other way than by adoption and grace; that souls were created before the bodies; that the sun, moon, stars, and the waters that are under the firmament, have souls; that the torments of the damned shall have an end, and that the fallen angels shall, after a time, be restored to their first condition. They were condemned by councils, and the reading of Origen's work was forbidden.—*Burke.* These doctrines were condemned by the council of Constantinople in 553.

"ORIGIN OF SPECIES, BY MEANS OF NATURAL SELECTION," by Charles Robert Darwin, F.R.S., first published, 24 Nov. 1859. He was born 12 Feb. 1809, died 19 April, 1882. See *Species.*

ORISSA, an ancient kingdom of India, now a province of N.W. Bengal, conquered by Clive in 1755, and nearly all acquired by the company in 1765. It suffered much by famine in 1770, and 1792-3, and more especially from the end of 1865 to Nov. 1866, when it is said about 750,000 persons perished. The government and officials were censured for neglect and want of forethought. It is also said that during a hurricane in Oct. 1836, 22,500 persons were drowned.

ORKNEY AND SHETLAND ISLES (North of Scotland), were conquered by Magnus III. of Norway, 1099, and were ceded to James III. as the dowry of his wife Margaret, in 1469. The Orkneys were the ancient Orcades; united with Shetland, they now form one of the Scotch counties. The bishopric of Orkney, founded by St. Servanus early in the 5th century, some affirm by St. Colm, ended with the abolition of episcopacy in Scotland, about 1689; see *Bishops in Scotland.* Orkney and Zetland small piers and harbours act passed, 14 Aug. 1896.

ORLEANS (a city in central France), formerly *Aurelianum;* gave title to a kingdom, 491, and afterwards to a duchy, usually held by one of the royal family. Attila the Hun, besieging it, was defeated by Aetius and his allies, 451. It was besieged by the English under earls of Salisbury and Suffolk, 12 Oct. 1428, bravely defended by Gaucour (as its fall would have ruined the cause of Charles VI. king of France), and relieved by the heroism of Joan of Arc, afterwards surnamed the Maid of Orleans, 29 April, 1429, and the siege was raised 8 May; see *Joan of Arc.* (The 439th anniversary was celebrated 10 May, 1868; the emperor and empress being present.) During the siege of Orleans, Feb. 1563, the duke of Guise was assassinated.

After nine hours' severe fighting, Orleans captured by the Germans, under general Von der Tann. More than 4000 prisoners were taken. The loss on both sides was heavy. About 35,000 on each side were engaged The city was made to pay a war contribution of 60,000*l* . . 11 Oct. 1870

ORNITHOLOGY, see *Birds*.

ORNITHORHYNCHUS, the duck-billed platypus, or water-mole, a singular compound of the mammal and the bird, a native of Australia, was first described by Dr. Shaw, in 1819.

OROQUIETA, Navarre, N. Spain. Here don Carlos, calling himself king Carlos VII., grandson of don Carlos, brother of Ferdinand VII., commanding about 4000 men, was suddenly attacked by general Moriones with about 2000, and defeated after a short conflict, 4 May, 1872. He fled, leaving 757 prisoners and 38 dead.

ORPHAN-HOUSES. The emperor Trajan first formed establishments for this purpose. Pliny relates in his Panegyric that he had caused 5000 free-born children to be sought out and educated, about A.D. 105. Orphan houses properly so called are mentioned for the first time in the laws of the emperor Justinian. At the court of Byzantium the office of inspector of orphans, *orphanotrophos*, was so honourable that it was held by the brother of the emperor Michael IV. in the 11th century; see *Foundling Hospitals*.

ORPHEONISTS, see *Crystal Palace*, 1860.

ORRERY, a planetary machine to illustrate and explain the motions of the heavenly bodies, appears to have been coeval with the clepsydra. Ptolemy devised the circles and epicycles that distinguish his system about 130. The planetry-clock of Fînée was begun 1553. The planetarium of De Rheita was formed about 1650. The planetarium, now termed the Orrery, it is said, was constructed by Rowley, after a pattern devised by the clock-maker, George Graham, at the expense of Charles Boyle, earl of Orrery, about 1715. A large "planetarium" was constructed by the rev. Wm. Pearson, for the Royal Institution, London, about 1803. An excellent planetarium, constructed in London by signor N. Perini, was exhibited in Dec. 1879.

ORSINI'S PLOT against the emperor Napoleon III.; see *France*, Jan. 1858.

ORTHES or **ORTHEZ** (S. France), once capital of the principality of Bearn. Near it the British and Spanish armies, commanded by Wellington, defeated the French, under Soult, 27 Feb. 1814. The battle of Toulouse soon followed.

OSBORNE HOUSE (Isle of Wight), was purchased by queen Victoria in 1845, and rebuilt by Mr. Cubitt. She died here, 22 Jan. 1901, and left the house and estate under her will to the king, who gave it to the nation, to be used as an army and navy convalescent home (for officers), 9 Aug. 1902; Osborne estate bill passed, 15 Dec. 1902. Royal Naval College, opened by king Edward VII., 4 Aug. 1903. The training colleges at Osborne and Dartmouth made part of the Portsmouth command, 1 Sept. 1905.

OSMIUM, one of the heaviest known metals, discovered in platinum ore by Tennant in 1803.

OSNABURG (N. Germany), made the seat of a bishopric, by Charlemagne, near the end of the 8th century. After the treaty of Westphalia in 1648, the bishop was a Roman Catholic and Protestant alternately, the latter being chosen from the house of Brunswick. Frederick, duke of York, the last bishop, resigned in 1803, when the lands were annexed to Hanover.

... (S. Ireland), BISHOPRIC OF, ... planted at Saiger, about 402; translated ... Aghaboe, in Upper Ossory, in 1052; and to ... many about the end of the reign of Henry II. ... was united to Ferns and Leighlin in 1835.

OSTEND (Belgium). Now a fashionable summer resort. An important sea-port in the ... century, was destroyed by the sea 1334, rebuilt and walled by Philip the Good, the Duke of Burgundy, 1445; sustained a siege by the Spaniards, from July, 1601, to Sept. 1604, when it honourably capitulated. On the death of Charles II., of Spain, the French seized Ostend; but in 1706, after the battle of Ramillies, it was retaken by the allies. It was again taken by the French in 1745, but restored in 1748. In 1756, the French garrisoned this town for the empress-queen Maria Theresa. In 1792, the French once more took Ostend, which they evacuated in 1793, but regained in 1794. The English destroyed the works of the Bruges canal; but the wind shifting before they could re-embark, they surrendered to the French, 19 May, 1798. The Ostend East India company, established 1723, was dissolved 1731. Riotous attacks on British fishermen landing fish quelled with bloodshed; intervention of the king; peace restored 23-30 Aug. 1887. Population, 1890, 24,712; 1900, 39,541.

OSTIA, a Roman port, at the mouth of the Tiber, said to have been founded by Ancus Martius about 627 B.C.

OSTRACISM (from the Greek *ostrakon*, a potsherd or shell), a mode of proscription at Athens, is said to have been first introduced by the tyrant Hippias; others ascribe it to Cleisthenes, about 510 B.C. The people wrote the names of those whom they most suspected upon small shells; these they put in an urn or box and presented to the senate. Upon a scrutiny, he whose name was oftenest written was sentenced by the council to be banished from his altar and hearth. 6000 votes were required. Aristides, noted for his justice, and Miltiades, for his victories, were thus ostracized. The custom was abolished by ironically proscribing Hyperbolus, a mean person, about 338 B.C.

OSTRICH (the *struthios* of the ancients), a native of Africa (see *Job* XXXIX. 14). Ostriches were hatched and reared at San Donato, near Florence, 1859-60; and at Tresco abbey, the seat of Augustus Smith, in the Scilly isles, 1866.

OSTROGOTHS, or EASTERN GOTHS, were distinguished from the Visigoths (Western Goths) about 330. After ravaging eastern Europe, Thrace, &c., their great leader, Theodoric, established a kingdom in Italy, which lasted from 493 to 553; see *Italy*.

OSTROLENKA (Poland). Near here the French defeated the Prussians, 16 Feb. 1807. In another battle here between the Poles and Russians the slaughter was immense, but the Poles remained masters of the field, 26 May, 1831.

OTAGO, see *New Zealand*, 1848, 1861, 1866.

OTAHEITE, or TAHITI, an island in the S. Pacific Ocean, seen by Byron in 1765, and visited in 1767 by captain Wallis, who called it George the Third Island. Captain Cook came hither in 1768 to observe the transit of Venus; sailed round the whole island in a boat, and stayed three months; he visited it twice afterwards. See *Cook*. Omai, a native of this island, was brought to England by Cook, and carried back in his [illegible] 1799, king Pomare ceded the district of [illegible] some English missionaries. Queen Pomare [illegible] compelled to put herself under the protection of France, 9 Sept. 1843. She retracted, and [illegible] and the neighbouring islands were taken possession of by admiral Dupetit-Thouars in the name of the French king, Nov. 1843. The French imprisoned Mr. Prichard, the English consul, 5 March, 1844, but the act was censured in France.

Queen Pomare IV., born, 23 Feb. 1813; succeeded her brother, Pomare III., in Jan. 1827; died 17 Sept. 1877, having reigned 50 years. By consent of her successor the island was formally annexed to France, 29 June, 1880. The queen arrived at Paris, 27 Feb. 1884.

Long rebellion in Raiatea and Huahine islands put down; the queen exiled by the French, reported, 10 April, 1897.

Rurutu and Tubuai islands annexed to France, 21 Aug. 1900.

OUDENARDE (Belgium). Here the English and allies under the duke of Marlborough and prince Eugène thoroughly defeated the French besiegers, 11 July, 1708.

OULART (S.E. Ireland). Here 5000 Irish insurgents attacked the king's troops, in small numbers, 27 May, 1798. The North Cork militia, after great feats of bravery, were cut to pieces, five men only escaping.—*Musgrave.*

OUNCE (from *uncia*), the sixteenth part of the pound avoirdupois, and twelfth of the pound troy. Its precise weight was fixed by Henry III., who decreed that an English ounce should be 640 dry grains of wheat; that twelve of these ounces should be a pound; and that eight pounds should be a gallon of wine, 1233.

OURIQUE (Portugal), where Alfonso, count or duke of Portugal, is said to have encountered five Saracen kings and a great army of Moors, 25 July, 1139, and signally defeated them; and then to have been hailed the first king. Lisbon, the capital, was taken, and he soon after was crowned.

OUTLAW, one deprived of the benefit of the law, and out of the sovereign's protection; a punishment for such as being called in law do contemptuously refuse to appear. In the reign of Edward III. all the judges agreed that none but the sheriff only having lawful warrant therefor, should put to death any man outlawed.—*Cowel.* Outlawry in civil proceedings was abolished by 42 & 43 Vict. c. 59, 15 Aug. 1879.

OUZEL GALLEY SOCIETY. In 1700, the case of the *Ouzel Galley*, a ship in the port of Dublin, created great legal perplexity, and was referred to an arbitration of merchants, whose prompt decision was highly approved. This led to the foundation of the society in 1705.

OVATION, an inferior triumph which the Romans allowed those generals of their army whose victories were not considerable. Publius Posthumius Tubertus was the first who was decreed an ovation, 503 B.C. A sheep (*ovis*) was offered by the general instead of a bull.

OXUS (the Persian and Turkish ... local name, Amou Daryá), a river of Central Asia supposed to have changed its course before ... A.D., and to have resumed its ancient bed in ... The Oxus navigated as far as Faizabad ... (Afghan frontier) by the Russians under ... Baturin; reported, 11 Dec. 1894.

OXYGEN, a gas (named from the Greek ... sharp, as being generally found in acids), is the most abundant of all substances, constituting about one-third of the solid earth, and forming about nine-tenths of water and one-fifth of the atmosphere. It was first separated from red oxide of mercury by Priestley, 1 Aug. 1774, and by Scheele, who was ignorant of Priestley's discovery, in 1775. It is a supporter of animal life (in respiration), and of combustion. An oxygen gas company was announced in Dec. 1864; its object being the cheap manufacture of oxygen for its application to the production of perfect combustion in lamps, stoves, furnaces, &c. It is now largely produced with about 5 per cent. of inert nitrogen by the Brin method from atmospheric air (1893). Oxygen was liquefied by Raoul Pictet at Geneva (pressure 320 atmospheres, temp. 140° below zero Cent.), 22 Dec. 1877. See *Ozone.*

Professor Dewar obtained 2 cubic centimètres (⅓ of a fluid oz.) of liquid oxygen by means of liquid ethylene (the illuminating part of coal gas), temp. 140° below zero Cent. (by Wroblewski and Olszewski's method) at the Royal Institution, London, in the presence of the prince and princess of Wales, 26 June, 1884. He exhibited for the first time some solid oxygen in the form of snow (temperature −200° Cent. = −400° Fahr.), produced by placing liquid oxygen in a partial vacuum, at the Royal Institution 27 May, 1886.

Professor Dewar exhibited between 300 to 400 centimètres liquid oxygen at the Faraday Centenary, 26 June, 1891. The feeble magnetism of oxygen, demonstrated by Faraday, was shown by Professor Dewar to be greatly increased when reduced to the liquid state by a temperature of 180° below zero centigrade; announced 10 Dec. 1891. Some liquid oxygen placed in the magnetic field sprang to the poles and adhered to them till evaporated; this was publicly exhibited by the professor at the Royal Institution 10 June, 1892. Several pints of liquid oxygen and liquid air were then produced in the presence of the audience.

At a meeting of the Royal institution, 20 Jan. 1893, prof. Dewar exhibited some of the remarkable properties of liquid oxygen and air, and he showed how the liquid state could be maintained longer by surrounding it with a very high vacuum. Prof. Dewar reported to the Royal society that he had obtained solid air in the form of ice, a mysterious body, 9 March, 1893. Further researches reported, 22 Jan. 1895.

Prof. Dewar was awarded the Rumford medal of the Royal society in 1894.

A statue of Priestley, by F. J. Williamson, at Birmingham, was unveiled by professor T. H. Huxley, 1 Aug. 1874, the centenary of the discovery of oxygen. It was also celebrated at Northumberland, Pennsylvania, where he was buried, Feb. 1804. The following telegram was sent 31 July: "The brethren at the dinner to the brethren at the home of Priestley send greetings on this centennial anniversary of the birth of chemistry."

A method of obtaining oxygen from air, devised and patented by M. Margis, of Paris. The principle is that of dialysis, or diffusion under pressure, through *Gas* (liquefaction).

By the explosion of a cylinder of compressed ... the carrier was killed, 23 March, 1899.

Oxonian Home, 2, Pitt-ery square, London; founded for the treatment of ulcers and wounds by oxygen gas, about 1895; the oxygen is supposed to turn the toxins or poisons secreted by certain micro-organisms into oxy-toxins or antidotes; continued success reported, 10 May, 1899.

OYER AND TERMINER, a commission directed to the judges of the courts, by virtue whereof they have power to *hear and determine* treasons, felonies, &c., 1285.

O YES! A corruption of the French *oyez*, hear ye! The ancient term still used by a public crier and by the usher of courts of justice to enjoin silence and attention.

OYSTER (the Latin *Ostrea edulis*). British oysters are celebrated by the Roman satirist Juvenal (Sat. iv. 140) about 100. The robbery of oyster-beds is prohibited by 7 & 8 Geo. IV. c. 29 (1827). In 1858 M. Coste commenced rearing oysters in great numbers on the coast of Brittany, and his plan has been found successful.

An act for promoting the cultivation of oysters in the United Kingdom, passed . . Aug. 1866
One for the preservation of oyster fisheries 3 May, 1867
Certain restrictions of the Oyster Fisheries act, 1862, removed by the Fisheries act . . . 1868
The fisheries (oyster, crab, and lobster) act forbids the sale of deep-sea oysters between 15 June and 4 August; and the sale of others, between 14 May and 4 August; passed . . . . 10 Aug. 1877
Professor Huxley at the Royal Institution asserts the uselessness of restrictions and a close time for oysters, and the uncertainty of culture, 11 May, 1883
Artificial breeding greatly promoted by professor Brooks of Baltimore (who discovered non-hermaphrodite), lieutenant Winslow, U.S., and M. Bouchen-Brandely, announced . . . June, 1884
Act for the cultivation of oysters in Ireland passed ,,
Dean of Winchester and other guests at a banquet poisoned by eating oysters, contaminated by sewage. The dean subsequently died . 22 Dec. 1902
Typhoid epidemic in Hampshire, occasioned by consumption of Emsworth oysters (see *Times*, 11 July, 1903) . . . . Dec. 1902–Jan. 1903
Committee representing the oyster trade to consider the contamination of oysters by sewage, pass various resolutions . . . . 5 Jan. ,,
Oysters, about 1830 the commonest of food, are now becoming scarcer and scarcer, although their reproduction is about a million-fold. A committee recommend a close time for dredging, viz. 1 May to 1 Sept., deep-sea fishing to be restricted, as at present, from 15 June to 15 Aug.; no oyster to be sold under 2½ inches in diameter. The Whitstable beds in 1873 are said to have produced about 79,564,000 oysters; value about 55,140*l*.
American and Portuguese oysters are now largely imported.
Oysters successfully cultivated at Arcachon, near Bordeaux, 1889.

OZOKERIT, a mineral hydro-carbon found in Moldavia and Wallachia. From it is distilled a substance suitable for making candles, introduced in the autumn of 1871.

OZONE (from the Greek *ozein*, to yield an odour), was discovered by Schönbein, of Basel, in 1840, when experimenting with the then newly-invented battery of sir Wm. Grove, and was recognised by him successively as a minute constituent of the oxygen gas resulting from the electrolysis of water effected by a current of high tension; of air or oxygen through which electric discharges have taken place; and of air in which moist phosphorus has been undergoing slow oxidation.

Marignac determined the action of ozone on various substances to be due to their oxidation . . 1845
Ozonometers constructed 1858
M. Schönbein announced his discovery of another modification of oxygen, which he termed *antozone*, hitherto found only in the compound state (in peroxides of sodium, potassium, &c.) . . 1859
The French Academy of Sciences appointed a committee of eminent philosophers to inquire into the nature and relations of ozone . 4 Dec. 1865
Andrews and Tait demonstrated ozone to be a condensed form of oxygen . . . . 1860, ,,
This further established by Soret and Brodie, by quantitative reactions. (Odling suggested and Brodie proved ozone to be 3 parts of oxygen compressed into the space of 2) 1872
Ozone, generated by a current produced by Wilde's magneto-electric machine, employed to bleach sugar, by Edward Beane's patent . . Aug. 1868
Liquefied by Hautefeuille and Chappuis . Oct. 1880
Other properties since discovered . . . 1881-4
The inhalation of ozone recommended as a remedy for phthisis; the institution at St. Raphael on the Mediterranean opened for the purpose; reported Dec. 1891
M. Emile Andreoli's system for the commercial production of ozone economically carried on by Messrs. Allen & Hanbury in London . July, 1893
M. Otto, in Paris, discovers the means of purifying water by ozone; reported . . . 6 Feb. 1902
Radium reported to possess the property of converting oxygen into ozone 1903

PACIFICATION, Edicts of, the name usually given to the edicts of toleration granted by the French kings to the protestants; see *Ghent.*

First edict, by Charles IX., permitting the exercise of the reformed religion near all the cities and towns in the realm . . . . Jan. 1562
The reformed worship permitted in the houses of lords justiciaries, and certain other persons, March, 1563
These edicts revoked, and all Protestant ministers ordered to quit France in fifteen days . . . 1568
Edict, allowing lords and others to have service in their houses, and granting public service in certain towns 1570
[In Aug. 1572, the same monarch authorised the massacre of St. Bartholomew (see *Bartholomew*).]
Edict of Pacification by Henry III., April; revoked, Dec. 1576; renewed for six years . Oct. 1577
[Several edicts were published against the protestants after the six years expired.]
Edict of Henry IV., renewing that of Oct. 1577 . 1591
Edict of Nantes (*which see*), by Henry IV., 13 April, 1598
Pacification of Nismes (*which see*) . . 14 July, 1629

PACIFIC ISLANDERS. See *Kidnapping Acts.*

PACIFIC OCEAN, the largest of the five oceans of the globe. It was first discovered in 1513 by Vasco Nûnez de Balboa, and received its name from Magellan in 1521. Sir Francis Drake was the first Englishman who sailed upon it in 1577. The Santa Cruz and Duff islands annexed by Gt. Britain, June, 1898; Wake island, by U.S.A., Dec. 1898; 14 others annexed by Gt. Britain, Dec. 1900; 3 more, May, 1903. See *Magellan; Steam,* 1851; *Wrecks,* 1856; *Kidnapping Acts; Panamá.*

PACIFIC CABLE. See *Electric city.* Bill passed 6 Aug. 1901; amended, 7 Aug. 1902.

PACIFIC RAILWAY, North America, from Omaha city, Missouri, to Sacramento, California, 1700 miles, opened 12 May, 1869. For new Pacific railway, see *Canada,* 1881 *et seq.* By means of this railway, the China and Japan mails were conveyed from Yokohama to London in 25 days; received 13 May, 1891.

PADDINGTON, a parliamentary borough, West London, returning two members; municipal borough by London Government act, 1899 (10 aldermen, 60 councillors). Population, 145,977, 1901. St. Mary's Church, Paddington-green, the old parish church, erected on the site of an ancient church, consecrated 1791; St. James's Church erected 1845, and made the parish church. On Paddington-green, now with the old churchyard converted into a public garden, stands a statue of Mrs. Siddons, the famous actress, whose remains are interred in the churchyard of St. Mary's. In the same burial ground are interred Haydon, the artist; Collins, the painter; and Nollekens, the sculptor. The Paddington canal was opened 10 July, 1801. The Lock hospital, established in 1737, was removed to its present site from Grosvenor-place in 1848.

PADLOCKS are said to have been invented by Boschär at Nuremberg, 1540, but are mentioned much earlier.

PADUA, the Roman Patavium, in Venetia, N. Italy, said to have been founded by Antenor, soon after the fall of Troy. It flourished under the Romans. Patavian Latin was considered very corrupt, and is traced in Livy, a native of Padua. After being an independent republic, and a member of the Lombard league, Padua was ruled by the Carrara family from 1318 with a short interruption till 1405, when it was seized by the Venetians. The university was founded about 1220. It was closed through disturbances, 1848-50.

PAGANS, the heathen, worshippers of idols, not agreeing in any set form or points of belief. See *Idols.* Constantine's nephew, Julian, attempted their restoration, 361; but Paganism was renounced by the Roman senate in 388, and finally overthrown in the reign of Theodosius the younger, about 391.

PAHANG, see *Straits Settlements.*

PAI MARIRE, a name given to the dogmas of the Hau-hau sect; see *New Zealand,* 1865.

PAINS AND PENALTIES, certain bills passed by the legislature to punish state offenders; see *Queen Caroline.*

PAISLEY, a borough, W. Scotland, the Roman Vanduara, and grew out of the priory of Paisley, founded 1160–4 by Walter Stewart, made an abbey about 1220; burnt by the English 1307, rebuilt 15th century. Made a burgh of barony 1488 and a Parliamentary borough 1832. Since 1805 Paisley silk and cotton shawls have been celebrated. Statue of Burns unveiled by the earl of Rosebery, 26 Sept. 1896. Serious fires, 55,000*l.* damage, 7 April, 1903. See *Population*.

PALÆOGRAPHY, the science which deals with ancient manuscripts, their decipherment, [illegible]

origin, and authenticity; distinguished from *Epigraphy*, which treats of writings on hard substances as stone or metal. The oldest existing MSS., written on sheets of papyrus, have been found in the tombs of Egypt. The most important is the *Papyrus Prisse*, found in a tomb of the XIth dynasty; stated to be the oldest book in the world. Papyrus rolls, chiefly parts of the Book of the Dead, are numerous. The chief ancient MSS. which have been preserved are those written on parchment or vellum. See *Diplomatics*, *Writing*. Palæographical society founded 1873, dissolved, 1 July, 1895. M. Léon Gautier, eminent palæographer, born 1832, died Aug. 1897.

PALÆOLOGI, a family which reigned as emperors of the east from 1260 to 1453. George Palæologus raised Alexius Comnenus to the throne in 1081, and thereby founded his own family. Andrew, the last Palæologus, son of Thomas, ruler of the Morea, after the overthrow of his father, became a Mahometan at Constantinople about 1533. A person who called himself John Anthony Palæologus Lascaris died at Turin, Sept. 1874. His claims were doubted.

PALÆONTOLOGY (from the Greek *palaios*, ancient, and *onta*, beings), treats of the evidences of organic beings in the earth's strata. It combines biology and geology (*which see*). Wm. Buckland, Cuvier, Mantell, Agassiz, Owen, Edward Forbes, Cope, Marsh, and Blainville, all of the 19th century, may be reckoned as fathers of this science. The Palæontographical society, which publishes elaborate monographs of British organic remains, was founded in 1847. The journal "Palæontographica" (German) began 1851. Professor Owen's "Palæontology" was published in 1860. "Nearly 40,000 species of animals and plants have been added to the Systema Naturæ by palæontological research." *Huxley*. See *Man*, and works on Palæontology by Nicholson, Zittel, Steinmann, and Döderlein.

PALAIS ROYAL, Paris, originally Palais Cardinal, built for cardinal Richelieu by Lemercier, 1620-36, received its present name when occupied by Louis XIII., to whom the cardinal gave it shortly before his death in 1642. Louis XIV., in 1692, gave it to his nephew Philippe, duke of Orleans, and it became the residence of his successors. It was confiscated by the republic in 1793, after the execution of Philippe Egalité. Louis Philippe resided in it, 1814-31. It suffered much injury at the revolution in 1848. Under the second empire it became the residence of prince Jerome and his son Napoleon. The buildings were much injured by fire by the communists, 24 May, 1871.

PALATINATE OF THE RHINE, one of the seven ancient electorates of Germany. It was long united to Bavaria, but was separated in 1294.—Frederic V., the elector palatine in 1610, married in 1613 Elizabeth, the daughter of James I. of England, and thus was an ancestor of queen Victoria; see *Hanover*. In 1619 he was elected king of Bohemia, but lost all by his defeat by the Austrians at Prague in 1620. The Palatinate was horribly ravaged by Tilly in 1622, and by the French in 1688. Several thousands of the ruined peasantry were sent to America by the British government and people. The elector palatine, Charles Theodore, inherited Bavaria in 1778; since when the two electorates have been united; see *Bavaria*

PALATINE. William the conqueror made his nephew, Hugh De Abrincis, count palatine of Chester with the title of earl, about 1070. Edward III. created the palatine of Lancaster, 1339; see *Lancaster, duchy of*. The bishopric of Durham also made county palatine. There is also mention made of the county palatine of Hexham, in 33 Henry VIII. c. 10, which then belonged to the archbishop of York, but by the 14th of Elizabeth it was dissolved, and made part of the county of Northumberland. The palatinate jurisdiction of Durham was separated from the diocese, and vested in the crown, 6 Will. IV. c. 19, 21 June, 1836.

PALE, the name given to the part of Ireland colonised by the English—viz., parts of the counties of Louth, Dublin, Meath, and Kildare. Anglo-Irish rulers were termed lords of the pale. Their arbitrary exactions led to a royal commission of inquiry in 1537. The defection of the lords of the pale in 1641 was followed by a general insurrection, and the royal cause was ruined in 1647. In 1652 Ireland was committed to the rule of four commissioners.

PALERMO (N. W. Sicily), the ancient Panormus. It has been held by the Carthaginians, 415 B.C.; taken by the Romans, 254 B.C.; by the Saracens, A.D. 832; and by the Normans, 1072. Here Roger II. was crowned king of Sicily, 1130. Palermo was the scene of the Sicilian Vespers (*which see*), 30 March, 1282. It suffered from earthquake in 1726 and 1740. The king Ferdinand resided at Palermo from 1806 to 1815, while Naples was ruled by Joseph Bonaparte and Joachim Murat. It revolted against the tyranny of Ferdinand II. 12 Jan. 1848. It was attacked by general Filangieri, 29 March, 1849, and surrendered on 14 May. It was taken by Garibaldi, 6 June, 1860. An insurrection against the abolition of the monastic establishments broke out in Palermo on 13 Sept. 1866, and was suppressed by the royal troops with much bloodshed; order was restored by 22 Sept. Population, 1890, 267,416; 1901, 310,352.

PALESTINE, the name given by [illegible] (*Exodus* xv., 14) and other ancient writers, to a broad strip of land on the east coast of the Mediterranean Sea, which originally included Philistia, but was afterwards limited to the part termed the land of Canaan or Israel, Judea, and the Holy Land; see *Jews*. After being several times conquered by the Saracens, and retaken from the 7th to the 10th century, and after being the scene of the wars of the Crusades (*which see*), and other conflicts, Palestine was united to the Ottoman empire by Selim I. in 1516. See *Bible* (note), *Holy Places*, and *Syria*.

PALESTRO (N. Italy). Here the Sardinians defeated the Austrians, 30, 31 May, 1859.

PALIMPSEST (from the Greek, *palin*, again; and *psao*, I efface), parchments written on after the previous writing had been partially effaced. Cardinal Mai, by removing the second writing in some MSS., recovered the original. This was the case with Cicero's "De Republica," published by Mai in 1821. It had been covered by a treatise of Lactantius.

PALL, PALLIUM, in the Roman Church an ensign of dignity of a strictly personal character conferred by the pope upon archbishops. It consists of a narrow band of pure white wool, taken from two lambs, which annually, on the feast of St. Agnes, are brought to the church of St. John Lateran, and after being blessed are presented to the pope; the wool is afterwards made up into pallia by a community of nuns. The pallium, which is worn around the shoulders, is ornamented with four purple crosses, and its form is indicated in the arms of the archbishop of Canterbury. By a decretal of pope Gregory XI. (about 1370), no archbishop could call a council, bless the chrism, consecrate churches, ordain a clerk, or consecrate a bishop, till he had received his pall from the see of Rome. The pall was first worn by an Irish archbishop in 1152, when Gelasius was recognised as primate of all Ireland. The late cardinal Vaughan was invested with the pallium in the pro-cathedral, Kensington—the first occasion of its investiture in England since the time of cardinal Pole. Archbishop Bourne, the new archbishop of Westminster, receives the pallium from pope Pius X. at Rome, 12 Nov. 1903.

PALLADIUM, the statue of Pallas, said to have fallen from heaven near the tent of Ilus, as he was building Ilium, which the oracle of Apollo declared should never be taken so long as the Palladium was found within its walls. The Greeks are said to have obtained it by craft during the Trojan war, 1184 B.C.; but some writers assert, another statue was taken, and that the real Palladium was conveyed from Troy to Italy by Æneas, 1183 B.C., and preserved by the Romans with the greatest secrecy in the temple of Vesta.—**PALLADIUM** is a rare metal, discovered in platinum ore by Dr. Wollaston, in 1803.

PALLAS, a minor planet, was discovered by Olbers, at Bremen, 28 March, 1802.

PALLISER'S CHILLED SHOT, see *Cannon*.

PALL MALL, a street near St. James's palace, London, is named from a French game at ball (*pale-mail*, being a wooden mallet), resembling the modern croquet, having been played there about 1600, and introduced into England about 1660. Among eminent inhabitants were Nell Gwyn and Dr. Thomas Sydenham. The **PALL MALL GAZETTE**, a daily (evening) independent political and literary journal, first appeared 7 Feb. 1865, and was edited by Mr. Frederick Greenwood till 1 May, 1880, when it became a liberal paper, edited by Mr. John Morley, who retired 25 Aug. 1883. Price 2*d*. reduced to 1*d*. 2 Jan. 1882. The paper became again conservative, Dec. 1892.

Nos. 6, 7, 8, 9 July, 1885, contained Mr. Stead's statements respecting offences against young women and children. Greatly disproved on investigation. See *Trials*, Oct.–Nov. 1885.

PALMA TROPHY, see *Volunteers*.

PALMERSTON ADMINISTRATION.* The resignation of the Aberdeen administration was announced 1 Feb. 1855, but nearly all its members returned to office soon after under lord Palmerston, lord Derby and lord John Russell having each in vain endeavoured to form an administration. On 22 Feb. Mr. Gladstone, sir James Graham, and Mr. Sidney Herbert resigned on account of the Sebastopol inquiry. Lord John Russell resigned 13 July. Lord Canning was appointed governor-general of India, 4 July, 1855. This cabinet resigned 20 Feb. 1858, in consequence of a vote of censure upon it for introducing the Foreign Conspiracy bill, and was succeeded by the Derby administration (*which see*).

PALMERSTON'S ACT for abatement of smoke nuisance (16 & 17 Vict. c. 128), 20 Aug. 1853.

PALMISTRY, or CHIROMANCY, the art of studying the lines in the palm, to discover the character and fortunes of a person, practised in ancient India and Greece. The subject was noticed by Aristotle, Pliny, Paracelsus, Albertus Magnus, and Cardan. A work by Johann Hartlieb was published in Augsburg, 1475. M. le capitaine Arpentigny and M. Adrien Desbarrolles are chief modern authorities. A. R. Craig's "Book of the Hand" (1867), L. Cotton's "Palmistry" (1890). Dr. F. Galton published his study of "Finger Prints," 1893. See *Fortune Telling*. Sophia Robson, *alias* "Minerva," professor of palmistry, fined £50 for pretending to tell fortunes, 15 Feb. 1895; Zuleika Cavalier, fined 25*l.*, 6 April, 1900; others fined, 8, 18 Jan. 1901.

PALM-SUNDAY. When Christ made his entry into Jerusalem, multitudes of the people who were come to the feast of the Passover, took branches of the palm-tree, and went forth to meet him, 33. It is usual, in some countries, to carry palms on the Sunday before Easter, hence called Palm-Sunday. In many parts of Great Britain Palm-Sunday is known as "Flowering-Sunday" from the fact that the graves of departed relatives are decorated with flowers and wreaths on this day.

PALMYRA (Syria) was supposed to have been the Tadmor in the wilderness built by Solomon, but was manifestly Grecian. The brilliant part of the history of Palmyra was under Odenatus and his queen Zenobia. At the death of Odenatus, Zenobia assumed the title of queen of the East, in 267. Aurelian defeated her at Bœsa, in 272, and made her captive, 273, and killed Longinus, the philosopher, her friend. Palmyra is now inhabited by a few Arab families. The ruins were visited in 1751, by Mr. Wood, who published an account of them in 1753. The ... "Palmyra and Zenobia" in 1895.

PAMPELUNA (N. E. Spain, taken by the French on their invasion of Spain), was invested by the British, between whom and the French obstinate conflicts took place, 27 and 29 July, 1813. It surrendered to the British, 31 Oct. in that year. Population, 1887, 26,663.

PAMPHLETS. Their first appearance amongst us is generally thought to have been in opposition to the church of Rome. Those who were first convinced of the reasonableness of the "new learning," as it was then called, propagated their opinions in small pieces, cheaply printed, and (what was then of great importance) easily concealed. Political pamphlets began in Edward VI.'s time, and were very numerous in the 17th and 18th centuries (by De Foe, Swift, Steele, and others).

Paul Louis Courier wrote "Simple Discours" and other pamphlets against the priests and nobles after the restoration of the Bourbons, 1815. His "Pamphlet des Pamphlets," defending the pamphleteer (published 1824), probably led to his murder, 10 April, 1825.
Large collections are in the libraries of the British Museum and the Royal and London Institutions.
Certain enactments respecting pamphlets removed by act passed July, 1869.

PANOPTICON OF SCIENCE AND ART, in Leicester-square, erected in 1852-3 for a chartered company, by Mr. T. H. Lewis, the architect; was opened in 1854 for lectures, musical performances, &c. It had a very large electrical machine, battery, &c. The speculation did not succeed; the building was sold in 1857, and in March, 1858, was opened for concerts and horsemanship, and called the Alhambra (*which see*).

Jeremy Bentham's book "Panopticon, or the Inspection House," an establishment in which persons may be kept under inspection, published 1791; see *Millbank*.

PANORAMAS, invented by Robert Barker, are bird's-eye views painted round the wall of a circular building. In 1788 he exhibited at Edinburgh a view of that city, the first picture of the kind. He then commenced similar exhibitions in London in 1789, having adopted the name "*Pano-*

rama," and was ultimately enabled to build commodious premises in Leicester-square for that purpose. Panoramas were exhibited on the continent by himself and his associate, Robt. Fulton. M. Thuyer, having bought the invention from Fulton, exhibited panoramas in Paris about 1796. See *Colosseum*. (Barker died in April, 1806.) J. P. Loutherbourg, a painter, termed the panoramist, invented the "Eidophusikon," natural phenomena represented by moving pictures, exhibited at Lisle-street, Leicester-square, 3 April, 1781. "This was certainly not a panorama." *Dr. Rimbault.*

PANORMUS, see *Palermo.*

PANTAGRAPH (from the Greek *panta*, all things, and *graphein*, to write, and incorrectly termed *Pentagraph*), an instrument for copying, reducing, or enlarging plans, &c., invented by Christopher Scheiner, about 1603; improved by professor Wallace, and called "Eidograph," about 1821.

PANTECHNICON, Motcombe-street, Knightsbridge, London, W., erected by Seth Smith, as a receptacle for paintings, jewellery, furniture, carriages, &c., 1830; was destroyed by fire 13—14 Feb. 1874, when much property was lost: re-built, 1874. See also *Fires*, 11 Sept. 1902.

PANTHAYS, Mahometans in the Chinese province, Yunan, became independent under a sultan, during the Tae-ping revolt, 1851-64. After its suppression, the Panthays, after a severe struggle, were also subdued. Their capital, Talifoo, was captured, and its inhabitants cruelly massacred in Feb. 1873. The Panthays sent an embassy to England in 1872, without effect. Sultan Suleiman committed suicide.

PANTHEISM, the formula of which is "everything is God, and God is one," was especially taught by Xenophanes, who died 500 B.C. The doctrine is attributed to Spinoza, Kant, Fichte, and other modern philosophers. Amalric of Chartres, censured for holding the doctrine, recanted 13th century. He is said to have asserted that "all is God, and God is all."

PANTHEON, at Rome, a circular temple built by Agrippa, the son-in-law of Augustus, 27 B.C. It had niches in the wall, where the image or representation of a particular god was set up; the gates brass, the beams covered with gilt brass, and the roof covered with silver. Pope Boniface III. dedicated it to the Virgin Mary and all the saints, by the name of S. Maria della Rotunda, or "ad Martyres," A.D. 608.*—The PANTHEON IN LONDON was erected by subscription, and opened 27 Jan. 1772; formed into an opera house; burned down 14 Jan. 1792; rebuilt for masquerades in 1795; opened as theatre, 1812; made a bazaar in 1834. The bazaar was closed in 1867, and the premises taken by Gilbey and Co., wine merchants, who lent the south part for a temporary church.

PANTHEON, Paris, a magnificent building founded by Louis XV. in pursuance of a vow, dedicated to Ste. Geneviève; built by Soufflot, 1757-90; named Pantheon and decreed to be a mausoleum for eminent men, 1791; made a church, 1806; named Ste. Geneviève, 1821; re-named Pantheon, 1831; again a church, Nov. 1852; again secularised, 27 May, 1885; received the remains of Victor Hugo, 1 June, 1885. The remains of Voltaire and Rousseau found there by a commission, 18 Dec. 1897.

PANTOGEN, see *Atomic Theory.*

* Victor Emmanuel, first king of united Italy, was buried here 17 Jan. 1878; also king Humbert, 9 Aug. 1900

PANTOMIMES were representations by gestures and attitudes among the Greeks, and were introduced on the Roman stage by Pylades and Bathyllus, 22 B.C. Comic masques were introduced here from Italy about 1700. The first regular English pantomime is said to have been "Harlequin executed," produced by John Rich at the Lincoln's-inn-fields theatre, 26 Dec. 1717. Joseph Grimaldi (1779-1837) was a most eminent clown.

"PAPAL AGGRESSION." In a consistory holden in Rome, 30 Sept. 1850, the pope (Pius IX.) named fourteen new cardinals, of whom four only were Italians. Among them was Dr. Nicholas Wiseman, vicar-apostolic of the London district, who was at the same time nominated lord archbishop of Westminster.

A pastoral letter from Dr. Wiseman read in all the Roman catholic chapels of his see (all England parcelled out into Romish dioceses) . . 27 Oct. "
The answer of the bishop of London (Dr. Blomfield) to a memorial from the protestant clergy of Westminster, against a Romish hierarchy in this country, was followed by the "Durham" letter from lord John Russell, then chief minister of the crown, to the bishop of Durham, in which he severely censured, not only the papal aggression, but also the proceedings of the tractarian clergy of the Church of England . . . 4 Nov. "
Immediately from every quarter of England addresses poured in to queen Victoria, calling upon her and the government to resist the usurpation: 6700 addresses, it is said, had been voted from nearly as many meetings up to . 31 Dec. "
Dr. Briggs, created Roman catholic bishop of Beverley, was enthroned in St. George's chapel at York, 13 Feb. 1852
Dr. Browne, created bishop of Clifton, and Dr. Burgess, bishop of Shrewsbury: both consecrated in St. George's cathedral, Southwark 27 July, "
The Ecclesiastical Titles act, 14 & 15 Vict. c. 60, prohibited the constitution of bishops of pretended provinces under a penalty of 100*l.* Aug. "
It was not acted upon, and was repealed 24 July, 1871

PAPAL INFALLIBILITY. This dogma, maintained by one party in the Roman church, tolerated by another, and utterly rejected by a third, was adopted and promulgated at the general council at Rome 18 July, 1870, a great many bishops having withdrawn. The dogma was inculcated by the false decretals of Isidore and others, but not adopted by the council of Trent; see *Councils XXI.* Professor Döllinger, the historian, was excommunicated at Munich for rejecting this dogma, 18 April, 1871: he was made a D.C.L. at Oxford about 16 June following; see *Old Catholics.* The doctrine was strenuously attacked by Mr. W. E. Gladstone, in his pamphlet, "The Vatican Decrees," Nov. 1874.

PAPAL STATES, see *Rome*, and *Popes.*

PAPER, see *Papyrus.* Paper was probably made in Egypt, and centuries before the Christian era. It was made of cotton about 600 A.D.; and of rags about 1300.* White coarse paper was made

* Mr. Joseph Hunter (in the *Archæologia*, xxxvii.) states that the earliest paper which he had seen was a MS. account-book, dated 1302, probably of Bordeaux manufacture. He gives engravings of manufacturers' marks, French and English, the dates of which range from 1330 to 1431. He also gives an extract from a work by Bartholus, a writer of the middle of the 14th century, in which mention is made of a paper manufactory in the Marches of Ancona. At the end of Wynkin de Worde's edition of Bartholomæus De Proprietatibus Rerum, 1495, its thin paper, *made by John Tate in England*, is commended.

...manufacture, a German, at Dartford, ... Elis. 1580; and there paper mills ... *Stow.* Paper for writing and printing manufactured in England, and an act passed to encourage it, 2 Will. III. 1690; before this time we paid for these articles to France and Holland 100,000*l.* annually. The French refugees taught our people; we had made coarse brown paper almost exclusively, until they came among us; we made white paper first in 1690. *Anderson.* Paper-making by a machine was suggested by Nicolas Robert, who sold his model to Didot, the great printer, who brought it to England, and, conjointly with Fourdriniers, perfected the machinery. The latter obtained a patent for paper-making machinery in 1801; and for manufacturing paper of any indefinite length in 1807. The machinery was improved by Bryan Donkin. A sheet of paper, 73,200 feet long, and 4 feet wide, was made at Whitehall-mills, Derbyshire, in 1830; and one 42,000 feet long, and 6 feet 3 inches wide, was made at Colyton in Devon in 1860. Esparto, a Spanish grass, first imported in 1857, has been largely employed in the paper manufacture since 1861. In 1866 wood was largely manufactured into paper at Philadelphia; and at the Paris exhibition, 1867, fine specimens of wood-paper were shown; see *Parchment* (note). Wood pulp now principally used in the manufacture of paper for newspapers. The paper duty, imposed in 1694 (producing about 1,400,000*l.* annually), after having been the subject of agitation for several years, was repealed in 1861. Hop-stalks said to be used for paper-making in France, 1873.

Paper-mills in Great Britain, 1877, about 385 (England, 300; Scotland, 65; Ireland, 20); annual produce about 360,000 tons; value, 16,000,000*l.* Great increase since.
Paper-exhibition at Berlin, Aug. 1878: contained not only great varieties of paper, but a paper house, tables, chairs, carpets, barrels, boats, &c..
Paper pianoforte exhibited, soft tone, July, 1885.
Textiles largely made of paper in America, 1887.
Causes of the deterioration of paper, investigated by a committee of the Soc. of Arts, Sept. *et seq.* 1897, report in their journal, 20 May, 1898.

PAPER-HANGINGS, &c. Stamped paper for this purpose was first made in Spain and Holland about 1555. Made of velvet and floss, for hanging apartments, about 1620. The manufacture of this kind of paper rapidly improved in this country during the present century. — PAPER SACKS have been made in America; and paper tubing for water and gas, made by M. Jalloureau of Paris, was shown in 1860.

PAPER-MONEY, *see Banks and Greenbacks.*

PAPIER MACHÉ. This manufacture (of paper-pulp combined with gum and sometimes with china clay) has existed for above a century. Martin, a German snuff-box maker, is said to have learnt the art from one Lefevre about 1740. It was taken up by Baskerville, the printer at Birmingham, and soon spread over that district. Papier maché is now largely employed in ornamenting the interior of buildings, &c.

PAPIN'S DIGESTER (*see Steam*), invented about 1681. Denis Papin, a French philosopher, assisted Boyle in his experiments about 1676.

PARCHMENT, invented for writing books by Eumenes (sometimes by Attalus), of Pergamus, the founder of the celebrated library at Pergamus, formed on the model of the Alexandrian, about 190 B.C. Parchment-books from this time were those most used, and the most valuable as well as oldest in the world are written on the skins of goats. It should be mentioned that the Persians and others are said to have written all their records on skins long before Eumenes' time. Parchment superseded by paper of a special kind for grants of probate, Dec. 1900.

Parchment paper (or vegetable parchment) was invented and patented in 1857, by Mr. W. E. Gaine, C.E., who discovered, that when paper is exposed to a mixture of two parts of concentrated sulphuric acid and one part of water for no longer time than is required to dissolve through the fluid, it is immediately converted into a strong tough skin-like material. It must be instantly washed with water. Its great strength points out many applications of this material, *e.g.*, maps, sketches and account-books, and drawing-paper. In 1899 it appeared that a similar invention had been made in Paris by Figuier and Poumarède in 1846.

PARDONS. General pardons were proclaimed at coronations: first by Edward III. in 1327. The king's power of pardoning is said to be derived *a lege suæ dignitatis*; and no other person has power to remit treason or felonies, stat. 27 Hen. VIII. 1535. *Blackstone.* A pardon cannot follow an impeachment of the house of commons: stat. Will. III. 1700.

PARENTS' NATIONAL EDUCATIONAL UNION, established to enlighten and assist parents in the discharge of their important duties in the training of their children, founded by Miss Mason; annual meetings, the earl of Meath president, held in London, 27 June, 1895 *et seq.*

PARGA, a city in European Turkey: retained its civic independence under the protection of Venice till 1797, when that state was conquered by the French. It resisted various attempts to capture it; and in 1806 was garrisoned by Russians. It was given up to the French in 1807; taken by the English, 22 March, 1814; surrendered to the Turks, 1817; and abandoned by above 3000 of its inhabitants, who retired to the Ionian Isles, May, 1819.

PARIS (formerly *Lutetia Parisiorum*), the capital of France, situated on the river Seine, which cuts it into two unequal parts, the strongest being towards the north, and in which are three islands, *la ville* (*the city*), the *île St. Louis*, and the *île Louviers*. In the time of Julius Cæsar, Lutetia comprised the *city* only. It was greatly improved by the emperor Julian, who made it his residence while he governed Gaul, 355 to 361. It became successively the capital of the kingdoms of Paris, Soissons, and Neustria, and eventually of all the kingdom. Many ecclesiastical councils were held at Paris, 360-1528. The representative of the house of Orleans is styled count of Paris. Population of Paris in 1856, 1,178,262; in 1876, 1,988,806; in 1881, 2,269,023; in 1891, 2,424,705; in 1901, 2,714,068. PARISHES. Their boundaries in England are said to have been fixed by Honorius, archbishop of Canterbury, 636, or by Alfred about 890. They were enlarged, and the number of parishes was consequently reduced in the 15th century, when there were 10,000. Parish registers were commenced in 1538. Acts were passed in 1844 and 1850 by which new parishes may be formed out of too extensive ones; acts amended in 1869. The appointment of parish constables was made unnecessary by an act passed Aug. 1872. See *Registers*, and *Benefices*. Number of ecclesiastical parishes or districts in 1893, 1,400. By the Local Government act, passed 5 March, 1894, *Parish and District Councils* were appointed for rural parishes of 300 inhabitants or upwards, with suitable arrangements, to consist of from 5 to 15 members (women eligible) annually elected, on 15 April; 1st election in 7,142 parishes, 4 Dec. *et seq.* 1894. Parish councils were established in Scotland by the Local Government act of 1894. Parish registers of several counties are now published by the Parish Register Society, 1897. Parish councillors (tenure of office) act passed, 20 June, 1899.

PARKS. The Romans attached parks to their villas. Fulvius Lupinus, Pompey, and Mæcenas, among others, had large parks. In England, the first great park of which particular mention is made was that of Woodstock, formed by Henry I., 1125; Queen Caroline, consort of George II., inquired, it is said, of the first Mr. Pitt (afterwards earl of Chatham), how much it would cost to shut up the parks as private grounds. He replied, "Three crowns, your majesty." The design was never afterwards entertained. III. 1265. *Dugdale's Summons to Parliament, edit.* 1685; see *Commons* and *Lords.* The power and jurisdiction of parliament are so transcendent and absolute, that it cannot be confined, either for causes or persons, within any bounds. It hath sovereign and uncontrollable authority in making and repealing laws. It can regulate or new-model the succession to the crown (as was done in the reigns of Henry VIII. and William III.). It can alter and establish the religion of the country, as was done in the reigns of Henry VIII., Edward VI., Mary, and Elizabeth. *Sir Edward Coke.** The ninth edition of May's "Practical Treatise on Parliament" was published in 1883; tenth edition, with many changes by Sir Richard Palgrave, published Dec. 1893. * Termed the "Palace of Westminster." The first contract for the embankment of the river was taken in 1862 by Messrs. Lee; this embankment, faced with granite, is 886 feet in length, and projected into the river is nearly with the inner side of the third pier of old Westminster bridge. Sir Charles Barry (born 1795, died 1860) was the architect of the sumptuous pile of buildings raised since 1840. The whole stands on a bed of concrete twelve feet thick; to the east it has a front of about 1000 feet, and covers an area of nine statute acres. It contains 1200 apartments, 100 staircases, and two miles of passages or corridors. The great Victoria tower at the south-west extremity is 346 feet in height, and towers of less magnitude crown other portions of the building. The great clock in the clock tower was built 1839 by the firm of Dent from the designs of the late lord Grimthorpe. The cost was 4,080*l.*, the bells increasing the total to 8,000*l.* The dials are 22½ ft. in diameter; hour hands 9 ft. long; minute hands 14 ft.; distance between each minute on the dials 1¼ ins. The only larger dial in the world is at Moulin chaumin—40 ft. wide; but there is no minute-hand, which makes an enormous difference in the power required to wind the clock. The clock regulates its commute to Greenwich by electricity every day. The average error is under a second a day. In the recess of 1894-5 extensive alterations were made in the house and private rooms to promote the comfort of the members and public.

PARLIAMENT OF IRELAND, it is said, began with conferences of the English settlers on the hill of Tara, in 1173. Writs for knights of the shire were issued in 1295. The Irish parliament met last on 2 Aug. 1800; the bill for the union having passed.

PARLIAMENT OF SCOTLAND consisted of barons, prelates, and abbots, and occasionally of burgesses. A great national council was held at Scone by John Balliol, 9 Feb. 1292; and by Robert Bruce at Cambuskenneth, in 1326. A house of commons was never formed in Scotland. The parliament of Scotland sanctioned the act of union on 16 Jan. 1707, and met for the last time on 22 April, same year.

The parliament hall, Edinburgh castle, erected by James I., in 1434, was thoroughly and judiciously restored by M. Hippolyte Blanc, at the expense of the late Mr. Nelson and family. The hall was re-opened, Feb. 1891. The undertaking was greatly promoted by the investigations of lords Napier and Ettrick, major Gore Booth, and Mr. R. Chambers.

PARLIAMENT OF PARIS was instituted by Philip Augustus II., 1190, and was made the chief court of justice in France by Philip IV.; at his suggestion it revoked a bull of pope Boniface VIII., 1302. It was suppressed by Louis XV., 1771; restored by Louis XVI., 1774; demanded a meeting of the states-general in 1787; and was suspended by the national assembly, 3 Nov. 1789; see *Commune*.

PARLIAMENTARY AND MUNICIPAL REGISTRATION ACTS (41 & 42 Vict. c. 26), passed 22 July, 1878.

118th to 128th sitting: Sir Henry James' address for the *Times* . . . . 31 Oct.–22 Nov. ,,

The report of the commissioners was laid before parliament, 13 Feb. 1890. The following is an abridgment of their conclusions:—I. That the respondent members of parliament collectively were not guilty of conspiring for the absolute independence of Ireland as a separate nation, but that some of them (Messrs. M Harris, Dillon, W. O'Brien, W. Redmond, O'Connor, J. Condon, and J. J. O'Kelly), together with Mr. Davitt, established the Land League mainly for that purpose. II. That the respondents [44] did conspire to promote agrarian agitation, the non-payment of rents, and the expulsion of the landlords (styled the English garrison). III. That they acquitted Mr. Parnell and others of the charge of insincerity in their denunciations of the Phœnix Park murders, and affirmed the fac-simile letter to be a forgery. IV. They found that the respondents did disseminate the *Irish World* and other newspapers, intending to incite to sedition and other crimes. V. That the charges of incitement to crime, except by intimidation, and of payments for that purpose, were not proved. VI. They found that the respondents did not denounce the system of intimidation, though they knew its effects; and VII. That they defended persons charged with agrarian crime, and supported their families, but it was not proved that they subscribed for testimonials for, or were intimately associated with, notorious criminals, or aided their escape by payments. VIII. That they found that the respondents made payments to

compensate persons injured in the commission of crime. IX. That the respondents did invite and obtain the assurance and co-operation of the Physical Force Party in America, including the Clan-na-Gael, and did not repudiate the action of that party.

[Certain allegations against Mr. Parnell were declared not proved.]

The report adopted with thanks, by the commons, after 7 days' debate, 3–11 March; by the lords (without a division), 21 March, 1890. Mr. Gladstone's amendment rejected by 339 to 268.

Parnell *v.* Walter and another, for libel, Queen's bench division, justices Denman and Wills; damages claimed, 100,000*l.*; 40*s.* paid into court, 11 Jan. Verdict for the plaintiff, by consent, 5000*l.* damages . . . . . 3 Feb. 1890

[The publication voted not a breach of privilege by the commons (260—212), 11 Feb. 1890.]

In consequence of the issue of the divorce suit, capt. O'Shea, Mrs. O'Shea, and Mr. C. S. Parnell, 15–17 Nov. 1890, Mr. Parnell was requested by Mr. W. E. Gladstone and other English liberals to retire from the chairmanship of the Irish party. He declined, and issued a manifesto to the people of Ireland, giving an account of private conferences with Mr. Gladstone and Mr. John Morley, 29 Nov. The Irish R.C. bishops demanded Mr. Parnell's retirement, 3 Dec. After a week's angry discussion in the commons' committee-room No. 15, the Irish party divided; Mr. Justin M'Carthy, the vice-chairman, was elected chairman by 44 members; Mr. Parnell continuing chairman with 26 followers, 6 Dec. PAROCHIAL CHARITIES COMMISSION, see *London*, 1878, and under *Charities*, 1883.

PARRICIDE. There was no law against it in Athens or Rome, such a crime not being supposed possible. About 172 B.C., L. Ostius having killed his father, the Romans scourged the parricide; sewed him up in a leathern sack made air-tight, with a live dog, a cock, a viper, and an ape, and thus cast him into the sea. Miss Blandy was executed at Oxford for the murder of her father, April, 1752; see *Trials*, March, 1890.

PARSEES or GUEBRES, the followers of Zaradusht, called by the Greeks Zoroaster, who is doubtfully said to have lived before sixth century B.C. (see *Magi*), dwelt in Persia till 638, when, at the battle of Kadseah, their army was decimated by the Arabs, and the monarchy annihilated at the battle of Náhávend in 641. Many submitted to the conquerors, but others fled to India, and their descendants still reside at Bombay (where they are termed Parsees). Sir Jamsetjee Jejeebhoy, the 3rd baronet, was elected president of the community there, July, 1877. Mr. Dadabhai Naoroji, a Parsee merchant, was for several years professor of Gujerati at University college, London. He was nominated as M.P. for the Holborn district, but not elected, 1886: elected 6 July, 1892, for Central Finsbury; visits Bombay, Dec. 1893. "History of the Parsis," by Dosabhai Framji Karaka, published, 1884. See *Bombay*. A Parsee fire temple at Bombay was consecrated, Nov. 1891.

Cooverbai, an eminent scholar, promoter of native female education, the mother of Mr. M. M. Bhownaggree, M.P. for N.E. Bethnal-green (1895), died, aged 65, at Bombay, 6 Feb 1896.

Death of Bai Motlibai Wadia, great benefactress to Bombay, aged 87, 15 June, 1897.

Sir Dinshaw Manockjee Petit, a noble benefactor, died at Bombay, aged 78, 5 May, 1901.

"PARTANT POUR LA SYRIE," popular French song; words by comte Alexandre de Laborde; music by Hortense Beauharnais, wife of Louis Bonaparte, king of Holland, about 1809. The music became very popular after her son became emperor, in 1852, as Napoleon III.

PARTHENON (from Greek *parthenos*, virgin), a temple at Athens dedicated to Minerva, erected about 442 B.C. In it Phidias placed his renowned statue of that goddess, 438 B.C. The roof was destroyed by the Venetians in 1687. Ruinous state of the building through earthquakes, described *Times*, 14 Aug. 1897. "The Parthenon" published by Mr. James Fergusson in 1883. See *Elgin Marbles*.

PARTHENOPEAN REPUBLIC was established by the French at Naples (anciently called Parthenope), 23 Jan. 1799, and overthrown in June same year.

PARTHIA (Asia). The Parthians were originally a tribe of Scythians, who, being exiled, as their name implies, from their own country, settled near Hyrcania. Arsaces laid the foundation of an empire which ultimately extended over a large part of Asia, 250 B.C.; the Parthians were never wholly subdued by the Romans. The last king, Artabanus V., was killed, A.D. 226; and his territories were annexed to the new kingdom of Persia founded by Artaxerxes, who had revolted against Parthia.

PARTICULARISTS. The name given to those Germans who desire the maintenance of the independence of the German states, and oppose their absorption into the empire. M. Gasser, one of them, failed in an attempt to form a ministry in Bavaria, Sept. 1872. Particularism revived during the election in 1893.

PARTITION ACT, relating to the division of property sold by direction of the court of chancery, passed 25 June, 1688.

PARTITION TREATIES. The first treaty between England and Holland for regulating the Spanish succession (declaring the elector of Bavaria next heir, and ceding provinces to France) was signed 19 Aug. 1698; and the second (between

France, England, and Holland, declaring the archduke Charles presumptive heir of the Spanish monarchy, Joseph Ferdinand having died in 1699), 13 March, 1700. Treaty for the partition of Poland; the first was a secret convention between Russia and Prussia, 17 Feb. 1772; the second between the same powers and Austria, 5 Aug. same year; the third was between Russia, Austria, and Prussia, 24 Oct. 1795.

PARTNERSHIP. The laws respecting it were amended in 1863 and 1890; see *Limited Liability*.

PARTY, see *Processions*.

PASIGRAPHY (from Greek, *pasi*, for all): a system which professes to teach people to communicate with each other by means of numbers which convey the same ideas in all languages. A society for this purpose was established at Munich; and the president, Anton Bachmaier, published a dictionary and grammar for German, French, and English, 1868–71; 4334 mental conceptions may be thus communicated.

PASQUINADES. Small satirical poems obtained this name about 1533.

At the stall of a cobbler named Pasquin, at Rome, idle persons used to assemble to listen to his sallies, to relate anecdotes, and rail at the passers-by. After the cobbler's death, his name was given to a statue to which lampoons were affixed.

PASSAROWITZ TREATY, concluded 21 July, 1718, between Germany and Venice, and the Turks, by which the house of Austria ceded certain commercial rights, and obtained from Turkey the Temeswar, Belgrade, and part of Bosnia, Servia, and Wallachia. The Turks gained the Morea.

PASSAU (Germany), **TREATY OF,** whereby religious freedom was established, was ratified between the emperor Charles V. and the protestant princes of Germany, 31 July, 1552. In 1662 the cathedral and great part of Passau were consumed by fire.

PASSENGERS—by public vehicles, are protected by 1 & 2 Will. IV. c. 22 (1831), 1 & 2 Vict. c. 79 (1838), and 16 & 17 Vict. c. 33 (1853); another act was passed in 1889. Mr. Cleghorn, under whom the front seat on the near side of one of the general omnibus company's carriages had given way, recovered 400*l.* damages against the company, in a verdict by consent, in the Queen's bench, 10 Dec. 1856. The Ships' Passenger act, 18 & 19 Vict. c. 119, passed in 1855, was amended in 1863; see *Campbell's Act*, and under *Railways*.

PASSIONISTS, a congregation of clerks of the holy cross, founded by St. Paul of the Cross, who died 1775, and was canonized by the pope 1867. A home was set up in England in 1841, and others since. The monastery, Highgate, London, N., solemnly blessed by cardinal Manning, and opened, 16 July, 1876.

PASSION PLAY, see *Drama*.

PASSION-WEEK, the name given since the Reformation to the week preceding Easter, was formerly applied to the fortnight. Archbishop Laud says the two weeks were so called "for a thousand years together," and refers to an epistle, by Ignatius, in the 1st century, in which the practice is said to have been "observed by all." The week preceding Easter is termed "Holy Week," the previous week "Passion Week."

PASSION-MUSIC: Gregory Nazianzen (A.D. 390-390) is said to have first set forth the history of the Passion in a dramatic form.

Guidetti, in 1586, published music for this subject, which has been treated since by many composers.

J. S. Bach's great "Passion Musik," first performed on Good Friday, 1729, has been revived with great success in this country, beginning with that "according to St. Matthew," 6 April, 1854.

PASSIVE RESISTANCE, the term used by the opponents of the Education act, 1902, in justification of their action in refusing to pay the rate levied for education on the alleged ground that the act gives an unfair advantage to the schools of the established church, and to its doctrinal teaching in the supported schools. Early in the spring of 1903 many nonconformists in London and the provinces refusing, as they stated, on conscientious grounds to pay the rate their goods were seized and sold. Much agitation has resulted and still (1905) continues, see *Education Acts* 1902, 1903.

Summonses issued to end of 1905: in London, 3,939; in the provinces, 51,145; distress sales in London, 69; in the provinces, 2,163; leagues, 647; imprisonments, once, 168; twice, 42; thrice, 13; four times, 6; five times, 3.

The case of Headland *v.* Coster and Lamb, heard (1905) on appeal before the master of the rolls, and lords justices Stirling and Mathew, established that the scale of costs under the act 57 Geo. III., c. 93, still applied to a distress for rates, and had not been repealed by 12 & 13 Vict., c. 14, Distress for Rates act, 1849.

PASSMORE EDWARDS' SETTLEMENT, Tavistock-square, St. Pancras, founded by Mr. Passmore Edwards with a gift of 15,000*l.*, the duke of Bedford 1500*l.*, to promote education, &c., partially used since 9 Oct. 1897; opened by Mr. John Morley, 12 Feb. 1898. See *Libraries*.

The Passmore Edwards-hall, built for the London university school of economics (Mr. Passmore Edwards gave 11,000*l.*, lord Rothschild 5000*l.*; site granted by the London County Council) in Clare market, Strand; opened by Lord Rosebery . . . . . 29 May, 1902

PASSOVER, the most solemn festival of the Jews, instituted 1491 B.C. (*Exodus* xii.) in commemoration of their coming out of Egypt; because the night before their departure, the destroying angel, who put to death the firstborn of the Egyptians, *passed over* the houses of the Hebrews without entering them; the door posts being marked with the blood of the Paschal Lamb killed the evening before. The passover was celebrated in the new temple, 18 April, 515 B.C. *Usher*.

PASSPORT SYSTEM forbids subjects to quit one country or enter another without the consent of the sovereign thereof. In 1858 the system was somewhat changed in this country, and the stamp duty on passports was reduced from 5*s.* to 6*d.* Passports were abolished in Norway in 1859; in Sweden in 1860; and (with regard to British subjects) in France, 16 Dec. 1860; in Italy, 26 June, 1862; in Portugal, 23 Jan. 1863; and are falling into disuse in other countries. The passport system was *established* in the United States on 19 Aug. 1861. The passport system, revived in France on account of the war, 1 Aug. 1870, was abolished by M. Thiers, 10 April, 1872, in compliance with the wish of the British government.

PASTEUR INSTITUTE, Paris, see under *Hydrophobia*. The remains of M. Pasteur (died 28 Sept. 1895) transferred from Notre Dame to a crypt in the institute, 26 Dec. 1896.

Monument to the memory of M. Pasteur, erected in the Place Breteuil, unveiled by president Loubet . . . . . 16 July, 1904

PASTEL, a roll of paste made of different colours ground with gum water, used as a crayon. Pastel painting has been recently much practised on the continent. The Society of British Pastellists, president sir Coutts Lindsay, first exhibited at the Grosvenor gallery, 18 Oct. 1890. Its members included Mr. Watts, Mr. Orchardson, and other eminent artists. Another started, exhibition at the Royal institute, Piccadilly, opened, 4 Feb. 1899.

PASTON LETTERS, the correspondence of a Norfolk family, 1422–83, giving a picture of social life in England, were edited by sir John Fenn, and published in five volumes, quarto, 1787–1823. Their authenticity was questioned Sept. 1865, but was satisfactorily vindicated by a committee of the Society of Antiquaries in May, 1866. Part of the MS. was soon after purchased by the trustees of the British Museum. The publication of a new edition, by James Gairdner, with additional letters, 1872–5. The MS. of the second series with other letters was found in 1875, by Mr. Frere, of Roydon Hall, near Diss, Norfolk. The MS. of the first series, long lost from the Royal Library, found in the library of col. Geo. Tomline at Orwell Park, who died 25 Aug. 1889; announced April, 1890.

PATAY (France), where Joan of Arc, the maid of Orleans, was present, when the earl of Richemonte signally defeated the English, 18 June, 1429. Talbot was taken prisoner, and the valiant Fastolfe was forced to flee. In consequence, Charles VII. of France entered Rheims in triumph, and was crowned 17 July, following year, Joan of Arc assisting in the ceremony in full armour, and holding the sword of state, see *Joan of Arc*.

PATENTS (from *pateo*, I lie open), licences and authorities granted by the king. Patents are said to have been granted for titles of nobility in 1344, by Edward III. They were first granted for the exclusive privilege of printing books, in 1591. The property and right of inventors in arts and manufactures were secured by letters patent by an act passed in 1623. The later laws regulating patents are very numerous; among them are 5 & 6 Will. IV. c. 83 (1835), and 15 & 16 Vict. c. 83 (1852). By the latter COMMISSIONERS OF PATENTS were appointed, viz., the lord chancellor, the master of the rolls, the attorney-general for England and Ireland, the lord advocate, and the solicitors-general for England, Scotland, and Ireland. In 1853, a journal was published under their authority, and indexes of patents, from March, 1617, to the present time. Specifications of patents may be consulted by the public at the Patent office, 25, Southampton-buildings, where the library, free to all, affords every facility to readers, and contains all the official publications, specifications, &c., of British and foreign patents; also text-books and technological journals. A museum containing models, portraits, &c., was established in 1859 at South Kensington, mainly by the exertions of Mr. Bennet Woodcroft. Official journal published weekly.

The "Illustrated Official Journal," combining six others, published Jan. 1889.

An international congress for the protection of patents met at Vienna, Aug. 1873; at Paris, 6 March, 1883.

Patent Design and Trade Marks Act, 46 & 47 Vict. c. 57, passed 25 Aug. 1883, began 1 Jan. 1884; amended 24 Dec. 1888. It greatly relieved patentees by lessening fees, &c. Other acts, 1886, 1901, 1902, which amends the law relating to the examination of applications for patents, and also that relating to compulsory licences. Sect. 1, which came into effect 1 Jan. 1905, provides for an official investigation in respect of each application for a patent in connection with which a complete specification has been filed.

In 1864, the alleged defalcations of Mr. Edmunds, a clerk in the patent office and an official of the house of lords, led to his retirement. He obtained a pension of 800*l*., which was taken from him by a vote of the house of lords on 9 May, 1865. Much litigation ensued. In an action against Mr. Gladstone, the prime minister, and others, for a libel, Mr Edmunds was non-suited, 21, 22 June, 1872; and he failed in actions against several newspapers for printing a treasury minute. His appeal to the house of lords failed 16 June, 1873.

17,110 applications for patents in 1884; 16,101 in 1885; 17,162 in 1886; 18,051 in 1887; 19,103 in 1888; 21,008 1889; 22,888, 1891; 24,169, 1892; 25,123, 1893; 25,386, 1894; 30,194, 1896; 30,958, 1897; 27,649, 1898; 25,800, 1899; 23,924, 1900; 28,976, 1902; 29,678, 1904.

Royal commission to enquire into the law relating to letters patent appointed 1862; Mr. Hindmarch's report issued 1864. In pursuance of recommendations for the formation of a roll of patent agents, the Institute of Patent Agents was registered 1882, chartered 1891. It has given much attention to legislation respecting patents.

New Patent Office facing Staple-inn, completed in 1897. Patent Law Amendment bill passed, 1 Dec. 1902.

PATENT MEDICINES: received for stamps, year 1883-4, 159,238*l*.; 1904-5, 331,439*l*.

PATHOLOGY, the science of disease, much studied with experiments in the 19th and present century, and said to be advanced by vivisection. Wilks and Moxon, Wagner, Cornil and Ranvier, Payne, Hamilton, Virchow ("Cellular Pathology," 1856; he died 5 Sept. 1902), Koch. Pasteur (died 1895), and Lister, eminent pathologists. The Pathological society in London was founded, 1846.

Prof. D. J. Hamilton's *Text-book of Pathology* published, 1894.

PATRIARCHS (a name given to Abraham, Isaac, Jacob, and his sons). The ecclesiastical historian Socrates gives this title to the chiefs of Christian dioceses, about 440. It was first conferred on the five grand sees of Rome, Constantinople, Alexandria, Antioch, and Jerusalem. The Latin church had no patriarchs till the 6th century. The first founders or heads of religious orders are called patriarchs.

Nectarius, bishop of Constantinople, as *ex-officio* chief of the Eastern bishops, was nominated patriarch of Constantinople at the second general council of Constantinople, 9 July, 381. This led the way to the schism between the Eastern and Western churches.

PATRICIANS, the highest citizens or aristocracy of Rome; their authority began with the city itself; see *Rome*.

PATRICK'S CATHEDRAL, ST. (Dublin), was founded in 1190 by archbishop Comyn, on the site of an old church. The cathedral was dese-

orated in 1546, and used as a law court; restored 1553. After renovation by the munificence of the late sir Benjamin Lee Guinness, it was re-opened 24 Feb. 1865. Several persons killed by the falling of a flying buttress, 14 Sept. 1882. See *Dublin*.

PATRONAGE OF LIVINGS by Laymen in England is very ancient; in *Scotland* was opposed by the books of discipline 1560 and 1578, abolished 1649, restored 1660. The system led to the disruption of the established church, and the foundation of the free church, 18 May, 1843. The abolition of lay patronage was earnestly advocated by the authorities of the established church in March, 1870, and the duke of Argyll volunteered to resign his patronage in May. Of 1109 livings 319 belonged to the crown, and about 600 to private persons. An act (37 & 38 Vict. c. 82) for abolishing patronage in Scotland, brought in by the duke of Richmond, 18 May, passed, 7 Aug. 1874. In England a church patronage bill (to check sales and give rights to parishioners, &c.), introduced by the archbp. of Canterbury, 13 May, 1886; a bill passed by the lords, 1 April, 1887; another bill read third time, 2 May, 1893; another bill passed committee in the lords, 1895; dropped. See *Benefices*.

PAULIANISTS or **PAULINIANS**, followers of Paul bishop of Samosata, afterwards patriarch of Antioch, 260, who are said to have denied Christ's divinity and the trinity; he was excommunicated 269 by a council at Antioch.

PAULICIANS, a sect of Christian reformers, arose about 652. Although they were severely persecuted, they spread over Asia Minor, in the 9th century, and finally settled at Montford, in Italy, where they were attacked by the bishop of Milan in 1028. Severe decrees against them were made in 1163, and they gradually dispersed; very probably sowing the seeds of the great reformation of the 16th century.

PAUL JONES, a Scotchman, born 1742; died at Paris, 1792. He commanded an American privateer during the American war, and made daring depredations on British commerce. He pillaged the house of lord Selkirk, near Kirkcudbright, and at Whitehaven burnt shipping in the harbour, April 1778 The Dutch permitted Paul Jones to enter their ports with two British ships of war which he had taken, and which the stadtholder peremptorily refused to deliver up, 1779.

His remains discovered in Paris and removed to the United States by a squadron of U.S. warships under the command of r.-adm. C. D. Sigsbee (see *France*). 500 marines escort the body from Paris to Cherbourg, 7 July, 1905.

PAUL'S CROSS, ST. (London), which stood at the north side of the cathedral, was a pulpit formed of wood, mounted upon steps of stone, and covered with lead, from which the most eminent divines were appointed to preach every Sunday in the forenoon. To this place the court, the mayor, the aldermen, and principal citizens used to resort. It was in use as early as 1259, and was appropriated not only to preaching, but to political and ecclesiastical discourses, &c. The cross was demolished in 1643, by order of the parliament.

Mr. Henry C. Richards, K.C., M.P. for East Finsbury, 1895–1905; died 1 June, 1905; left 3,000*l.* for the erection of a new cross on the site of the old cross.

PAUL'S SCHOOL, ST., was endowed in 1512 by John Colet, dean of St. Paul's, for 153 boys "of every nation, country, and class," in memory of the number of fishes taken by Peter (*John* xxi. 11). The first schoolhouse was burnt in 1666; the second, by Wren, was taken down in 1824, and another building erected by George Smith. William Lilly was the first master, and his grammar is still used by the school. *Tombs.* The claim of the Mercers' company to be owners instead of trustees of Colet's estate was set aside by the vice chancellor, 11 Feb. 1870. The school ordered to be removed to West Kensington; site bought, June, 1878. New building designed by Mr. Waterhouse opened by lord Selborne, 23 April, 1884. The number of scholars has been increased. New schemes for the management of the school were issued by the charity commissioners, 1876, 1879, and 1893; after much discussion and opposition a scheme was sent to the committee of council of education for approval, May, 1894; finally modified, July, 1894; new arrangement, Feb. 1899; further arrangement, 16 June, 1900, under which scheme it is now governed.

June, 1901.
Mr. T. Scrutton, manager, sued Miss Helen Taylor, and obtained 1000*l.* for damages; the charges were withdrawn . . . . . 30 [illegible]

PAUPERS, see *Poor.*

PAVAN, Pavane, or Paving, was a [illegible] of the 16th and 17th centuries, sometimes accompanied by singing.

PAVEMENT. The Carthaginians are said to have been the first who paved their towns with stones. The Romans, in the time of Augustus, had pavement in many of their streets; the Appian way, a paved road, was constructed 312 B.C. In England there were few paved streets before Henry VII.'s reign. London was first paved about 1533. It was paved with flagstones between 1815 and 1825; see *Wood Pavement*. Asphalte has been much used since 1869. Wood reported to be the best for road paving in London, May, 1876, and is now (1905) extensively used for paving the leading thoroughfares in London, and other cities and large towns.

Tarred macadam, as a new and durable pavement at Hamilton, Ontario, reported successful, Nov. 1900

PAVIA (N. Italy), the ancient *Ticinum* or *Papia*. Its university, founded by Charlemagne, is said to be the oldest in Europe. Pavia was built by the Gauls, who were driven out by the Romans, and these in their turn were expelled by the Goths: in 568 it was taken by the Lombards, and became the capital of their kingdom. In the 12th century it was erected into a republic, but soon after was subjected to Milan and followed its fortunes. On 24 Feb. 1525, a battle was fought near here between the French and the Imperialists, when the former were defeated, and their king, Francis I., after fighting with heroic valour, and killing seven men with his own hand, was at last obliged to surrender himself a prisoner. It was long asserted that Francis wrote to his mother, Louisa of Savoy, regent of the kingdom during his absence, saying, *Tout est perdu, madame, fors l'honneur* (All is lost, madam, except honour). The words are now said to have been, *L'honneur et la vie qui est sauluë.*

PAWNBROKING. The Roman emperors lent money upon land. The origin of borrowing money by means of pledges deposited with lenders is referred to Perugia, in Italy, about 1462. The institutions were termed *monti di pietà* (*which see*). Soon afterwards it is said that the bishop of Winchester established a system of lending on pledges, but without interest. The business of pawnbrokers was regulated in 1756, and licences issued in 1783. The rate of interest on pledges was fixed in 1800. In London there were, in 1851, 334 pawnbrokers; and in England, exclusively of London, 1127; the number is increasing more than in proportion to the population. In 1860 an act was passed enabling pawnbrokers to charge a half-penny for every ticket describing things pledged for a sum under 5*s*. The acts relating to pawnbrokers were amended in 1856, 1859, 1860. The law was consolidated in the pawnbrokers' act passed 10 Aug. 1872.

PAX, a small tablet, generally silver, termed, *tabula pacis* or *osculatorium*, kissed by the Roman Catholic priests and laity; substituted for the primeval kiss of peace in the early church. The pax is said to have been introduced about the 12th century.

PAYMASTER-GENERAL. In 1836 the army and navy pay departments were consolidated into the paymaster-general's office, sometimes held by a cabinet minister.

PEACE. A temple was dedicated to peace by Vespasian, 75; see *Fireworks*, *Treaties*, *Justices*, &c.—"PEACE OF RELIGION" (between catholics and protestants) was signed at Augsburg, 15 Sept. 1555.

A PEACE SOCIETY, founded 1816, for the promotion of universal peace; holds annual meetings; proposed amalgamation with the International Arbitration and Peace association (founded by Mr. Lewis Appleton in 1880), Dec. 1884. The association divided in May, 1886, when the British arbitration association was founded by Mr. Appleton. A congress of the friends of peace, from all parts of the world, commenced its sittings at Paris, 22 Aug. 1849. It met in London at Exeter hall, 30 Oct. following; and at Frankfort, in St. Paul's church, 22 Aug. 1850, at Birmingham, 28 Nov. 1850, and at Exeter hall, 22 July, 1851. Many meetings and international congresses since.
Mr. Bright and Mr. Cobden were among the most conspicuous members of the society. A deputation from the Peace society, consisting of Messrs. J. Sturge, A. Pease, and another quaker friend, stated their views to the emperor of Russia at St. Petersburg, at an interview granted them in Feb. 1854

PEACHES are said to have been introduced into this country from Persia about 1562.

PEARLS, mentioned *Job* xxviii. 18. M. Réaumur, in 1717, alleged that pearls are formed like other stones in animals. An ancient pearl was valued by Pliny at 80,000*l*. sterling. One which was brought in 1574 to Philip II., of the size of a pigeon's egg, was valued at 14,400 ducats. A pearl named the *Incomparable*, spoken of by De Boote, weighed thirty carats, equal to five pennyweights, and was about the size of a muscadine pear. The pearl mentioned by Tavernier, as being in possession of the emperor of Persia, was purchased of an Arab in 1633, and is valued at a sum equal to 110,400*l*.

PEAT, see *Bogs*. A peat coal and charcoal company, established in 1873, when coal was 41*s*. a ton.

"PECULIAR PEOPLE," a small sect founded in London by Wm. Bridges and Jas. Banyard in 1838; chief seat Essex. Two members, Thomas and Maryanne Wagstaffe, were tried and acquitted of manslaughter, 29 Jan. 1868. They had neglected getting medical assistance for their sick child, and depended on the efficacy of their elders' prayers and anointing it with oil (*James* v. 14). Many cases of healing by these means are asserted. On 8 May, 1872, a father was convicted for neglecting to get medical advice for his child who died of small pox; and the sect agreed to modify their practice. Establishments for healing diseases by prayer exist in Germany.

At another trial, Thomas Hines was acquitted, in accordance with the opinion of the court; Baron Pigott held that the case did not amount to criminal neglect because the prisoner had not called in a doctor to his sick child, 19 Aug. 1874, similar cases since; 1875-6.
John Robert Downes (for neglect respecting scarlet fever) sentenced to 3 months' imprisonment 21 Sept., 1876.
Thos. Senior sentenced to 4 months' imprisonment for manslaughter of his infant child, 15 Dec. 1898; similar cases since.

PEDESTRIANISM. Euchidas, a citizen of Platæa, is said to have gone from thence to Delphi to bring the sacred fire. This he obtained, and returned with it the same day before sunset, having travelled 125 English miles. No sooner had he saluted his fellow citizens, and delivered the fire, than he fell dead at their feet. After the battle of Marathon, a soldier was sent from the field to announce the victory at Athens. Exhausted with fatigue, and bleeding from his wounds, he cried out, "Rejoice, we are conquerors!" and immediately expired.

Foster Powel, the English pedestrian, performed many astonishing journeys on foot. His expedition from London to York and back again, in 1788, is said to have been completed in 140 hours.
Captain Barclay, for a wager (on which many thousands of pounds depended), walked 1000 miles in 1000 successive hours, each mile in each hour, in forty-two days and nights (less 8 hours). His task was accomplished on 10 July, 1809.
Thomas Standen, aged 60, of Salehurst, walked 1100 miles in 1100 hours (1 mile in 1 hour), finished, July, 1811
Richard Manks, a native of Warwickshire, undertook (in imitation of captain Barclay) to walk 1000 miles in 1000 hours: the place chosen was the Barrack-tavern cricket ground, in Sheffield; he commenced on Monday, 17 June, 1850, and completed the 1000 miles, 29 July following, winning a considerable sum.
On 7 Oct. 1861, a 12 miles foot-race was held, when Levett, the champion of England, ran 7 miles in 37 minutes 27 seconds; Deerfoot, a Seneca Indian, ran 12 miles in 65 minutes 5 seconds; and Mills ran 10 miles in 54 minutes 10 seconds, other races followed.
On 11 May, 1863, Deerfoot was beaten by White, who ran 10 miles in 52 minutes 14 seconds

PEDLARS, see *Hawkers*. The Pedlars act passed, Aug. 1871.

PEDOMETER AND ODOMETER, apparatus for measuring the distance traversed by a walker or carriage.

Odometers, or road-measurers, are said to have been known in the 15th century; and improvements in them were made in England by Butterfield, about 1678, and by Meynier, in France about 1724
Wm. Grayson's odometer, or road-measurer, to be attached to carriages, was patented . 1 Dec. 1851
Ralph Gouts' *pedometer* for indicating the steps taken by a walker, was patented . 4 Nov. 1799
Wm. Payne's pedometer for the waistcoat pocket, patented . . . . . 15 Feb. 1832
Other improvements since.

PEEL ACTS. Among the most important were the Bank acts of 1819 and 1844; the acts amending the criminal laws, 1827; dividing parishes into districts, 1843, and the act repealing the corn laws in 1846.

PEEL ADMINISTRATIONS.* The FIRST succeeded the Melbourne administration, which was broken up on the retirement of lord Althorp, the chancellor of the exchequer, in Nov. 1834. Sir R. Peel, then in Italy, was summoned home, the duke of Wellington holding the seals of office in the interim. They both resigned in April, 1835. In May, 1841, sir R. Peel carried a vote of want of confidence in the Melbourne cabinet, but did not take office; and in Sept. of that year, he became again premier. He lost the support of the conservative party by obtaining the repeal of the corn laws, and resigned 29 June, 1846.

FIRST ADMINISTRATION (Dec. 1834).

Sir Robert Peel, *first lord of the treasury* and *chancellor of the exchequer*.
Lord Lyndhurst, *lord chancellor*.
Earl of Rosslyn, *lord president*.
Lord Wharncliffe, *privy seal*.
Henry Goulburn, duke of Wellington, and earl of Aberdeen, *home, foreign*, and *colonial secretaries of state*.
Earl De Grey, *first lord of the admiralty*
Lord Ellenborough and Alexander Baring, *board of control* and *trade*
Sir Edward Knatchbull, *paymaster of the forces*.
J. C. Herries, *secretary of war*.
Sir George Murray, *master-general of the ordnance, &c.*

SECOND ADMINISTRATION (Sept. 1841).

Sir Robert Peel, *first minister*.
Duke of Wellington in the cabinet without office, *a/c. commander-in-chief*.
Lord Lyndhurst, *lord chancellor*.
Lord Wharncliffe, *lord president*.
Duke of Buckingham, *lord privy seal* (succeeded by duke of Buccleuch).
Sir James Graham, earl of Aberdeen, and lord Stanley, *home, foreign*, and *colonial secretaries*.
Henry Goulburn, *chancellor of the exchequer*.
Earl of Haddington, *first lord of the admiralty*.

* Sir Robert Peel was born 5 Feb. 1788; entered parliament in 1809; became under-secretary of the colonies in 1811, chief secretary for Ireland in 1812; M.P. for Oxford in 1818 (when he resigned his office); secretary for home department in 1822; resigned office and reappointed in 1827; resigned again in 1830; became premier in 1834 and 1841 (*see above*). He was thrown from his horse 29 June, and died 2 July, 1850. He greatly relaxed the severity of our criminal code in 1827 *et seq.*, established the new police, and carried the catholic emancipation bill in 1829, and the repeal of the corn laws in 1846. Statues have been erected to him—at Salford, in 1852; at Tamworth, Leeds, Bury, and Manchester, in 1853; and in London and Birmingham in 1855.

Earl of Ripon, *board of trade* (succeeded by W. E. Gladstone).
Lord Ellenborough, *India board* (succeeded by lord Fitzgerald; succeeded by earl of Ripon).
Sir Henry Hardinge, sir Edward Knatchbull, sir George Murray, &c.
[Terminated 29 June, 1846, by sir Robert's resignation.]

PEELITES, a name given to gentlemen, whigs and tories, who adhered to sir Robert Peel, after his defeat by the conservative party, on account of his free-trade measures carried in 1846. The principal were Henry Goulburn, W. E. Gladstone, Sidney (afterwards lord) Herbert, sir James Graham, Edward Cardwell, sir George Clerk, lord Lincoln (afterwards duke of Newcastle), and lords Canning and Elgin, and others. Several of them became members of the Palmerston and Aberdeen administrations (*which see*).

PEEL PICTURES. The family collection (70) were purchased for the National gallery for 75,000*l.* 1871.

PEEP-O'-DAY-BOYS, insurgents in Ireland, who visited the houses of their antagonists at break of day, in search of arms. They first appeared 4 July, 1784, and were long the terror of the country; see *Defenders*.

PEERESSES of the United Kingdom (*in their own right*): 7 in 1885, countess of Cromartie (duchess of Sutherland), baronesses Berkeley, Berners, Burdett-Coutts, Le Despencer, Willoughby D'Eresby, Bolsover, 11 in 1905: viscountess Hambleden and baronesses Berkeley, Berners, Burdett-Coutts, Beaumont (a minor), Macdonald of Earnscliffe, Fauconberg and Conyers (countess of Yarborough); Cromartie (countess); Dorchester; Clifton (a minor); Darcy de Knayth (countess of Powis), title called out of abeyance, 1903.

PEERS, see *Lords* and *Genealogy*.

PEGU, a province of the Burmese empire, discovered by the Portuguese in 1520. Pegu, the capital, was taken by major Cotton, with 300 men, in June, 1852, without loss; and afterwards abandoned. It was again occupied by the Burmese and strongly fortified, with a garrison of 4000 men. It was recaptured by general Godwin with 1200 men and two guns, in two hours, with the loss of six killed and thirty-two wounded. The province was annexed to our Indian possessions, by proclamation, 20 Dec. 1852, and has since prospered. In Feb. 1862, it was united with Arracan and Tenasserim as British Burmah.

PEIHO, see *China*, 1859, 1860.

PEISHWA, the prime minister of the Mahrattas, seized the sovereign power and settled at Poonah, 1749. The title was abolished in 1818.

PEIWAR PASS (Kotul), in the Khoorum valley, Afghanistan. Here general (afterwards Lord) Roberts, with the 72nd highlanders and the Ghoorkas, defeated the Afghans, 2 Dec. 1878. Major Anderson and capt. Kelso were killed, and about 80 men were killed and wounded. Enemy lost heavily.

PEKIN, the capital of China, was built by Kachilai-Khan, grandson of Genghis-Khan, about 1267. Here was held the court of the Mongol or Yuen dynasty, 1280 to 1368. In 1369, Hung-wu, of the Ming dynasty, removed to Nankin, which was the capital till Yung-lo removed his court to Pekin in 1410; and by him and his successors the city was enlarged, fortified, and beautified. It was visited by lord Macartney, Sept. 1793; surrendered to the allied English and French armies, 12 Oct. 1860; and evacuated by them 5 Nov., after peace had been signed 24 Oct. It was described as being in a very desolate state, and the inhabitants scattered and indigent. English and French representatives were settled at Pekin, March, 1861. Preliminary peace with France concluded here, 5 April, 1885. The famous temple or altar of heaven burnt 18 Sept. 1889. Population (estimated) 1,000,000.

SIEGE AND HEROIC DEFENCE OF THE LEGATIONS: see *China*, 20 June–14 Aug. 1900; a memorial in front of the British legation unveiled. 14 Sept. 1901

PELAGIANS, followers of Pelagius, a Briton, appeared at Rome about 400. Their doctrines were condemned by councils at Jerusalem, Carthage, and other places, 415, 530. They maintained:—

1 That Adam was by nature mortal, and whether he had sinned or not would certainly have died. 2 That the consequences of Adam's sin were confined to his own person. 3 That new-born infants are in the same condition with Adam before the fall. 4 That the law qualified men for the kingdom of heaven, and was founded upon equal promises with the gospel. 5. That the general resurrection of the dead does not follow in virtue of Christ's resurrection.

PELASGI, the primitive inhabitants of Asia Minor, Greece, and Italy, appear to have belonged to the Indo-Germanic race. They were in Greece about 1900 B.C., and in Italy about 1600 B.C. They have been termed Tyrrheni, Sicani or Siculi, Apuli, &c. From the Pelasgi came the Dorians, Æolians, and Ionians; all three being Hellenes or Greeks. The Pelasgi appear not to have had the art of writing, but have left numerous architectural remains; they were probably a wealthy, powerful and intelligent people.

PELÉE, MONT, see *Earthquakes*.

PELEW ISLANDS (N. Pacific Ocean), discovered by the Spaniards in the 17th century. The East India company's packet *Antelope*, captain Wilson, was wrecked here in 1783. The king, Abba Thulle, allowed captain Wilson to bring prince Le Boo, his son, to England, where he arrived in 1784, and died of the small-pox soon after. The East India company erected a monument over his grave in Rotherhithe churchyard.

PELHAM ADMINISTRATION. Mr. H. Pelham replaced the earl of Wilmington as premier, 25 Aug. 1743; see *Wilmington*. In Nov. 1744, the following ministry was formed (termed "the broad bottom administration," because it comprehended a grand coalition of the parties). It was dissolved by the death of Mr. Pelham, 6 March, 1754.

Henry Pelham, *first lord of the treasury* and *chancellor of the exchequer*.
Lord Hardwicke, *lord chancellor*.
Duke of Dorset, *president of the council*.
Earl Gower, *lord privy seal*.
Duke of Newcastle and the earl of Harrington, *secretaries of state*.
Duke of Montagu, *master-general of the ordnance*.
Duke of Bedford, *first lord of the admiralty*.
Duke of Grafton, *lord chamberlain*.
Duke of Richmond, *master of the horse*.
Duke of Argyll, *keeper of the great seal of Scotland*.
Marquis of Tweeddale, *secretary of state for Scotland*.
All of the cabinet.
The duke of Devonshire and duke of Bolton were *not* of the cabinet.

PELLS (from *pellis*, skin), receipts on parchment rolls deposited in the court of exchequer.

By an act passed in 1834, the office of clerk of the pells was abolished, and a comptroller-general appointed. "Pell records," or "issues of the exchequer," or payments made out of his revenue by James I., were published by the government in 1836.

PELOPIUM, see *Niobium*.

PELOPONNESUS (the island of Pelops), a peninsula, S. Greece, termed Morea in the 13th century, said to have been settled by Pelops about 1283 B.C. PELOPONNESIAN WAR continued for twenty-seven years between the Athenians and the people of the Peloponnesus, with their respective allies, and is the most famous of the wars of Greece. It began by an attempt of the Bœotians to surprise Platæa, 431 B.C., on 7 May, and ended 404 by the taking of Athens by the Lacedæmonians.

PELOTA. The national ball game of the Basques, but, like the Basques themselves and their language, the origin is unknown. It is extensively played in Spain as well as the Basque provinces, and also in South America and Mexico. Pelota somewhat resembles racquets. Its distinctive feature is the *chistera* or basket, which takes the place of the racquet, a sickle-shaped, wickerwork instrument, 2 ft. long on the outer curve, and 4 or 5 in. wide, with a flange on each side of the inner curve, converting it into a curved scoop; the *chistera* is strapped firmly to the right wrist of the player, enabling him to send the ball with terrific speed against the wall of the court. The qualities of pace and endurance, combined with accuracy and skill, are essential to the game. Introduced into England by the Winter Club, Olympia, London, 4 Jan. 1906.

PELUSIUM (now *Tineh*), formerly Sin, the key of Egypt. Here, in 525 B.C., Psammeticus III. was defeated by Cambyses, the Persian, who thereby obtained possession of the kingdom. Pelusium surrendered to Alexander, 333; was taken by the Persians, 309; by Antiochus, 173; by Augustus, 30 B.C.; and after a protracted resistance by Amrou, the Saracen, A.D. 638.

PEMBROKE (S. Wales). A county palatine till 1536. The royal dockyard at Milford was moved to Pembroke in 1814. PEMBROKE COLLEGE and HALL, see under *Oxford* and *Cambridge*. Population, 1881, 14,156; 1891, 14,978; 1901, 15,853.

PENAL LAWS, see *Criminal Laws* and *Roman Catholics*. *Penal Servitude* was substituted for transportation by acts passed in 1853 and 1857, and amended in 1864. A penal servitude commission appointed, 22 Jan. 1878.

First session of the International Penal Law union opened at Brussels	7 Aug. 1889
The Penal Servitude acts, 1853 *et seq.* combined by act passed	5 Aug. 1891

PENANCE, a sacrament in the Roman church, arose out of the practice of auricular confession (*which see*). The council of Trent, in its 14th session (1551), decreed that every one is accursed who shall affirm that this sacrament was not instituted by Christ.

PENANG, or PRINCE OF WALES'S ISLAND, was given up to the East India company in 1786, by captain F. Light, who received it as a marriage portion with the daughter of the king of Keddah. After several changes it became one of the Straits Settlements (*which see*).

PENDULUMS. The isochronous property of the pendulum is said to have been applied to clocks by Galileo about 1639, and by Richard Harris about 1641. Christian Huyghens claimed this discovery, 1658. See *Clocks*. George Graham invented the compensating pendulum, 1715. Experiments were made to determine the density of the earth by pendulums by Mr. (aft. sir) G. B. Airy (aftds. astronomer-royal), and others, in a mine in Cornwall, in 1826 and 1828; and at Horton colliery 1854. In 1851, M. Foucault demonstrated the rotation of the earth by the motion of a pendulum.

PENGE MYSTERY, Surrey, see *Trials*, Sept. 1877.

PENINSULAR COMPANY, see *Steam*, 1837-40.

PENINSULAR WAR, see under *Spain*, 1808-14.

Wellington computed that he lost 36,000 men in this war—killed, prisoners, deserters, &c.

PENITENTIARIES. The London Female Penitentiary, Pentonville-road, was established in 1807; and the British Penitent Female Refuge at Cambridge heath, Hackney, in 1829. The Church Penitentiary association, founded 1851; many others since. International penitentiary congresses held, first in London, 1872, at other capitals since. See *Millbank*.

PENITENTS, see *Magdalens*. The Penitents of the name of Jesus in Spain were a congregation of persons who had led a licentious life, formed about 1550. The penitents of Orvieto were formed into an order of nuns about 1662.

PENNSYLVANIA (N. America), the first state in the Union in regard to mineral wealth. The settlement by the Swedes here in 1643, was taken by the Dutch in 1655, and acquired by the British in 1664. Pennsylvania was granted by Charles II. to the duke of York, 1664; and it was sold to the Penn family, 1681. Pennsylvania was afterwards purchased from the Indians by the celebrated William Penn (son of admiral Penn), who went out from England with a number of colonists; from which period the settlement gradually increased. Mr. Penn granted a charter in May, 1701, but the emigrants from the Low Countries refused it, and separated themselves from the province of Pennsylvania. They afterwards had their own assembly, in which the governor of Pennsylvania presided. This state adopted an independent constitution in 1787, and established the present in 1790. Capital, Harrisburg; principal cities, Philadelphia and Pittsburg (which see). It was strongly unionist during the civil war, 1861-5; see *United States of America* and *Petroleum*. For strikes see *United States*, 1877, 1882. Population in 1860, 2,906,370; in 1880, 4,282,891; 1890, 5,258,014; 1900, 6,302,115.

Several days' violent storms and heavy rain in the Alleghanies swelled the rivers, and caused the overflow of the lakes, May, 1889. At 5 p.m. 31 May, the South Fork reservoir, a lake about 4 miles square, burst the huge dam, and a mass of water rushed down the South Fork, four miles, by the deep circuitous Conemaugh valley, to its junction with the Conemaugh river, driving all before it. For a distance of about 12 miles round Johnstown the flood swept out towns and villages, destroying all the bridges, railways, and factories. South Fork, Johnstown, Cambria city, Morrelville, Sheridan, and other flourishing towns were completely blotted out. A great mass of floating wreckage, which was stopped by a stone railway bridge at Johnstown, took fire; above five hundred persons, who were hurled on the burning mass, perished. Estimated death-roll 6,000.

The most energetic measures were taken by the government, by several states, and by the railway companies for the relief of the sufferers, and for averting imminent famine and pestilence. Robbers of the dead and living were lynched by a vigilance committee. Troops were sent to maintain order, liberal subscriptions were begun in London, Paris, and other places, June.

It is stated that the dam had previously given visible signs of its being in a very insecure condition, and had not been properly constructed. Several towns and villages submerged, June; many bridges swept away; above 150 deaths reported.

Panic in a theatre at Johnstown, 10 persons killed, many injured . . . . . 10 Dec. 1889

At Hartford coal-pit, Ashley, Wyoming valley, 28 men were entombed and 26 perished by a cave-in and explosion . . . . . 15 May, 1890

By an explosion in the Frick mine, ten miles from Mount Pleasant, 151 out of 160 men perished . . . . . 27 Jan. 1891

Riotous strikes in the Pennsylvania coke district, much destruction of property, reported 30 March; desperate fight, 9 men killed, 2 April; 1000 soldiers maintaining order, 3 April; rioting renewed with desperate fights . . about 22 April, ,,

A train containing 75 men thrown off the line while rushing through a burning forest near Condersport, Potter county; 5 men killed, many injured . . . . . about 12 May, ,,

After heavy rains, when the rivers had become torrents, early on 5 June, a cloud burst over the Pittsburg oil regions, causing great inundations. At Titusville the tanks of oil and distilled benzine were upset and were ignited by lightning and the city was fired. A flaming stream with floating wreckage carried all before it, destroying the bridges. Explosions followed, causing a panic, and the people fled to the hills, women and children being trampled on during the rush. The fiery river reached Oil city, 18 miles distant, and a large part of it was reduced to ashes or submerged. About 150 persons were either drowned or burnt at Titusville, and about 200 missing. The loss of property at the two cities was estimated at 3,000,000 dollars; large sums were subscribed for the relief of the sufferers, 6 June *et seq.* 1892

PENNY. The ancient silver penny was the first silver coin struck in England, and the only one current among the Anglo-Saxons. The penny until the reign of Edward I. was struck with a cross, so deeply indented that it might be easily parted into two for halfpence, and into four for farthings, and hence these names. Copper penny and two-penny pieces were coined by Boulton and Watt, at Soho, Birmingham, in 1797, and were accounted the finest of our copper currency; see *Coins, &c.*—PENNY-POST; see *Post-office.*—THE PENNY CYCLOPÆDIA in 1833 (supplements in 1846 and 1858). The PENNY RECEIPT stamp was appointed in 1853 (postage stamps authorised to be used for receipts after 1 June, 1881), and in 1858 a penny stamp was directed to be placed on bankers' cheques.—PENNY BANKS (in 1861 about 200) were established about 1850. They have become numerous, and in 1878 were authorised to invest their funds.—PENNY READINGS, for the working classes, became general in 1859. Carpenter's "Penny Readings," published in 1865-7. PENTAMETER VERSE (five feet), first used about the 7th century B.C.; see *Elegy*.

PENTATEUCH. The name (Greek *pentateuchos*, whence Pentateuch) was applied by Origin, one of the greatest of the Greek fathers (185-254), to the first five books of the Old Testament, of which Moses was the traditional author; Joshua is by modern critics included among these earlier writings, the six books being styled the *Hexateuch*. The authorship of the Pentateuch by Moses, and of the book bearing the name of Joshua, was, until the 19th century, generally accepted by the Christian Church. Modern criticism, although differing on the questions of age and structure, is unanimous in the opinion that the Pentateuch is composed from documents of various dates and authorship. Discrepancies, as in the double narrative of the Creation (Gen. i.-ii. 4, and Gen. ii. 5 *et seq.*), the statement (Gen xxxvi. 31) that "these are the kings that reigned over the land of Edom before there reigned any king over the children of Israel," passages reflecting the prophetic mode of thought of the prophetic writings, and those indicating the interests and ideas of the priesthood, led to the inference that the Pentateuch was compiled from various sources. This found expression in the views of some mediæval Jewish scholars, as Ibn Ezra; of Roman Catholics, as Andreas du Maes (16th cent.), and by philosophers, as Spinoza (17th cent.). Jean Astruc, a Belgian physician (1753), may be regarded as the pioneer of modern criticism on the subject. He distinguished two great sources—A the Elohist, and B the Jehovist, and 10 smaller writings; the compilation of these he attributed, however, to Moses. (His hypothesis was introduced into Germany by Eichhorn). Investigations of the documents and hypotheses founded on them were carried on by Eichhorn, Ilgen, Geddes, De Wette, Bleek, Delitzsch, Ewald, Schrader, Hupfeld, Kuenen, Wellhausen, and other scholars, giving rise to the "Older Document Hypothesis," the "Fragment Hypothesis," the "Supplement Hypothesis," the "Crystallization Hypothesis," and the "Modern Document Hypothesis," which regards the Pentateuch as composed of 4 principal elements: P the Priestly Code, the older Elohist (the *Grundschrift* of Wellhausen); E the second Elohist; J the Jahwist, and D the Deuteronomist, designed by some critics A, B, C, D respectively. Scholars differ as to the relative age of the Jahwist and Elohist documents. The Deuteronomist, who composed the law-book found in the reign of Josiah, king of Judah, 621 B.C., is third in point of time; the Priestly Code is regarded as the latest of these writings, and is post-exilic. *See* Kuenen's "Historico-critical Inquiry into the Origin and Composition of the Hexateuch," Driver's "Literature of the Old Testament," G. A. Smith's "Modern Criticism and the Preaching of the Old Testament," Cheyne's "Founders of Old Testament Criticism," Wellhausen's "De Komposition des Hexateuchs."

PENTECOST signifies the fiftieth, and is the solemn festival of the Jews, called also "the feast of weeks," because it was celebrated fifty days, or seven weeks after the feast of the Passover, 1491 B.C. (*Lev.* xxiii. 15; *Exod.* xxxiv. 22); see *Whitsuntide*.

PERIPLUS. The voyage of Hanno, the Carthaginian navigator, about the third century B.C. His account of his travels, written in the Punic language, was translated into Greek; an English translation, edited by Falconer, in London, 1797.

PERJURY. The early Romans threw the offender headlong from the Tarpeian precipice; and the Greeks set a mark of infamy upon him. After the empire became Christian, any one who swore falsely upon the Gospels, was to have his tongue cut out. The canons of the primitive church enjoined eleven years' penance; and in some states the false swearer became liable to the punishment he charged upon the innocent. In England perjury was punished with the pillory, fine, and imprisonment, 1562. By the Abolition of Oaths bill, persons making a false declaration are deemed guilty of a misdemeanor; Act 5 & 6 Will. IV. cc. 60 and 61, 9 Sept. 1835; a perjury bill was read a second time, 2 April, 1895. Perhaps the greatest perjurer in modern times was Titus Oates; see *Oates.* A woman named Alice Grey was convicted of many perjuries in 1856. See *Trials,* 1873 *et seq.*

PERUGIA, a city of central Italy; as Perousia, anciently one of the Etruscan confederation. It allied itself with the Samnites, but was ruined by two defeats by the Romans, 309 and 295 B.C. It was taken by Octavius Cæsar from the adherents of Antony; many of whom were immolated on altars by their victor, 41. Leo X. took Perugia from the rival families Oddi and Baglioni, in A.D. 1520. An insurrection here against the pope was put down by the Swiss with great cruelty, 20 June, 1859. Perugia was taken by the Sardinian general Fanti, in Sept. 1860, when the cruel papal general Schmidt and 1600 men were made prisoners.

PERUKE or WIG. The ancients used false hair, but the peruke was first worn in France and Italy about 1620; and introduced into England about 1660, and prevailed more or less till about 1810.

It is said that bishop Blomfield (of London), in 1830, obtained permission for the bishops to discontinue wearing their wigs in parliament, of which they gradually availed themselves.

PERUVIAN BARK, see *Jesuits' Bark*.

PESCHIERA, a strong Austrian fortress, on an island in the Mincio, near the Lago di Garda, N. Italy. It has been frequently taken by siege:—by the French, 1796; by the Austrians and Russians, 1799; by the French again, 1801; given up by them, 1814; taken by the Sardinians, May, 1848; retaken by Radetsky, March, 1849. The Sardinians were preparing to besiege it in July, 1859, when peace was made. It was given up to the Italians, 9 Oct. 1866; see *Quadrilateral*.

PESSIMISM (from *pessimus*, the worst), the opposite doctrine to *optimism* (which see). Mr. James Sully's "Pessimism, a History and a Criticism," was published in 1877. Arthur Schopenhauer (1788-1860), an eminent pessimist, says, "All life is effort, all effort is painful, the pains of life must predominate."

PESTALOZZIAN SYSTEM of education was devised by John Henry Pestalozzi, born at Zurich in Switzerland, in 1746, died 17 Feb. 1827. In 1775 he turned his farm into a school for educating poor children in reading, writing, and working; but he did not succeed. In 1798 he established an orphan school where he began with the mutual instruc-

tion, or monitorial system, since adopted by Lancaster; but his school was soon after turned into a hospital for the Austrian army. In 1802, in conjunction with Fellenberg, he established his school at Hofwyl, which at first was successful, but eventually declined through mismanagement.

PESTH (Hungary), built about 889, on the east bank of the Danube, opposite Buda, was repeatedly taken and besieged in the wars of Hungary, particularly with the Turks. The great insurrection broke out here, and the minister, count Lamberg, was killed, 28 Sept. 1848. Budapesth was taken by the imperialists, 5 Jan. 1849. The Hungarians afterwards defeated the Austrians, who were obliged to evacuate it 18 April, same year; see *Hungary*. Budapesth formally constituted capital of Hungary, Nov. 1873.

Hungarian national exhibition opened 2 May, 1885.

PESTILENCE, see *Plague*.

PETALISM (from the Greek *petalon*, a leaf), a mode of deciding upon the guilt of citizens of Syracuse, similar to the Athenian ostracism, the name being written on a leaf (generally of an olive) instead of on a shell, about 460 B.C. If guilt were established the sentence was usually banishment.

PETARD, or PETAR, an invention ascribed to the Huguenots in 1579. Petards of metal, nearly in the shape of a hat, were employed to blow up gates or other barriers, and also in countermines to break through into the enemy's galleries. Cahors was taken by Henry IV. by means of petards, in 1580, when it is said they were first used. "Hoist with his own petar." *Shakspeare*, Hamlet iii 4.

PETER THE GREAT'S WILL, see under *Wills*.

PETER THE WILD BOY, a savage creature found in the Harzwald, electorate of Hanover, when George I. and his friends were hunting. He was found walking on his hands and feet, climbing trees like a squirrel, and feeding on grass and moss, Nov. 1725. At this time he was supposed to be thirteen years old. He died, while under the care of an English farmer, Feb. 1785, unchanged in his habits.

PETERBOROUGH, anciently Medeshamstede (Northamptonshire); obtained its present name from a king of Mercia founding an abbey and dedicating it to St. Peter about 655. The church, destroyed by the Danes, was rebuilt with great beauty. The tower becoming dangerous, restoration resolved on, Dec. 1882. Foundation laid of new building, 7 May, 1884. Choir re-opened 11 July, 1889; Cathedral re-opened, 14 Oct. 1890; further restoration, May, 1894; completed (total cost about 80,000*l.*), July, 1902. The bishopric was erected by Henry VIII., out of the lands of dissolved monasteries in the diocese of Lincoln. The first bishop was John Chambers, the last abbot of Peterborough, 1541 The see was valued in the king's books at 419*l.* 19*s.* 11*d.* Present income 4500*l.* The oldest church clock known is said to be at Peterborough. Population, 1881, 21,228; 1891, 25,172; 1901, 30,870.

PETERLOO, see *Manchester Reform Meeting*, 16 Aug. 1819.

PETERSBURG, ST., the modern capital of Russia, founded by Peter the Great, 27 May, 1703. He built a small hut for himself, and some wooden hovels. In 1710, the count Golovkin built the first house of brick; and the next year, the emperor, with his own hands, laid the foundation of a house of the same material. The seat of empire was transferred from Moscow to this place in 1712. Here, in 1736, a fire consumed 2000 houses; and in 1780, another fire consumed 11,000 houses; this last fire was occasioned by lightning. Again, in June, 1796, a large magazine of naval stores and 100 vessels were destroyed. The winter palace was burnt to the ground, 29 Dec. 1837. The railway to Moscow was finished in 1851; to Berlin, opened 5 May, 1862. On 10 June, 1862, property to the amount of nearly a million sterling was destroyed by fire. PETER'S CHURCH, ST. (Rome), originally erected by Constantine, 306. About 1450, pope Nicholas V. commenced a new church. The present magnificent pile was designed by Bramante; the first stone laid by pope Julius II. in 1506. In 1514, Leo X. employed Raphael and two others to superintend the building. Paul III. committed the work to Michael Angelo, who devised the dome, in the construction of which 30,000 lbs. of iron were

used. The church was consecrated 18 Nov. 1626. The front is 400 feet broad, rising to a height of 180 feet, and the majestic dome ascends from the centre of the church to a height of 324 feet; the length of the interior is 600 feet, forming one of the most spacious halls ever constructed. The length of the exterior is 669 feet; its greatest breadth within is 442 feet; and the entire height from the ground 432 feet. Renewal of the leaden envelope completed, July, 1884.

PETER'S PENCE, presented by Ina, king of the West Saxons, to the pope at Rome, for the endowment of an English college there, about 725; so called because agreed to be paid on Peter Mass, 1 Aug. The tax was levied on all families possessed of thirty pence yearly rent in land, out of which they paid one penny. It was confirmed by Offa, 777, and was afterwards claimed by the popes as a tribute from England, and regularly collected, till suppressed by Henry VIII. 1534. *Camden.* A public collection (on behalf of the pope) was forbidden in France in 1860.

Evidence before a committee of the commons disclosed systems whereby vast numbers of fictitious and forged signatures were obtained, rendering the petitions for and against the continuance of the London coal and wine dues utterly valueless, May, 1887.

PETO'S ACT, 13 & 14 Vict. c. 28 (1850), renders more simple and effectual the titles by which religious bodies hold property.

PETRA, the ancient Sela, in mount Seir, near mount Hor, in the land of Edom. In the 4th century B.C. it was held by the Nabathæans, who successfully resisted Antigonus. About A.D. 70 it was the residence of the Arab princes named Aretas. It was conquered by Cornelius Palma, and annexed to the empire under Trajan, 105, to which period its remarkable monuments are ascribed. It was an important station for commercial traffic with Rome. It has been described by Burckhardt and other travellers.

PETRARCH AND LAURA; celebrated for the refined passion of the former for the latter, began in 1327, and the chief subject of his sonnets. He was born 1304, crowned with laurel, as a poet and writer, on Easter-day, 8 April, 1341; and died at Arqua, near Padua, 18 July, 1374. Laura died 6 April, 1348. PETRO-BRUSIANS, followers of Pierre de Bruys, an early reformer, who was burnt at St. Gilles, Languedoc, as a heretic, in 1130.

PETROLEUM, rock oil or mineral oil similar to paraffin, has been found in many parts of the world, especially at Rangoon. In 1859 and since, a number of oil-springs were discovered in the bituminous coal regions of N. W. Pennsylvania, now termed "Petrolia," and others have been discovered in Ohio and other states, and also in Canada. Numerous artesian wells were sunk, manufactories erected, and an almost unlimited supply obtained; between 1859-77, 2,802,500,000 gallons; in 1863, 8,907,365 gallons. In consequence of the importation of this oil into this country, and many accidents having taken place through its inflammability at low temperature, acts for "the safe keeping of petroleum" were passed, 29 July, 1802; July, 1868, Aug. 1871, and 1879. Petroleum became an awful weapon in the hands of the insurgents in Paris, 23-27 May, 1871. The Petroleum Association test petroleum, with the view of preventing the importation of that which is dangerous. Refined petroleum imported: 1872, 5,670,674 gallons; 1877, 33,474,955 gallons; 1881, 58,371,386 gallons. Unrefined and refined: 1882, 59,695,982 gallons; 1883, 70,526,996 gallons; 1886, 71,251,736 gallons; 1888, 94,401,285 gallons; 1890, 105,080,863 gallons; 1904, 257,297,387 gallons; 1900, 254,978,043 gallons; 1901, 253,764,741 gallons.

PETROLEUSES, a name given to women charged with throwing petroleum on the burning houses in Paris during the siege by the government, May, 1871.

PETROPAULOVSKI, a fortified town on the east coast of Kamtschatka, was attacked by an English and French squadron, 30 Aug. 1854. They destroyed the batteries, but failed to capture some Russian frigates, except the *Sitka*, a store-ship taken by the *President*, and a schooner taken by the *Pique*. Admiral Price was killed, it is supposed by the accidental discharge of his own pistol. A party of 700 sailors and marines landed to assault the place, but fell into an ambuscade; many were killed, including captain Parker and M. Bourasset, English and French officers. The objects of the attack were not attained. After this the Russians greatly strengthened their defences, but on 30 May, 1855, the allied squadron in the Pacific arriving here found the place deserted. The fortifications were destroyed, but the town was spared. The Russian ships escaped.

PETTY BAG, CLERK OF THE: power was given to the treasury, with consent of the lord chancellor and master of the rolls, to abolish this office, by the Great Seal Offices Act, 1874.

PEVENSEY (Sussex), said to be the site of the Roman Anderida, on which a Norman castle was erected. Here William of Normandy landed, 28 or 29 Sept. 1066. The duke of York, in the reign of Henry IV., was for some time confined within the walls of this castle; as was also queen Joan of Navarre, the last wife of Henry IV., who, with her confessor, friar Randal, was accused of a design to destroy Henry V., her step-son.

PEWS in churches. "In a London will we read of *sedile vocatum pew*" (a seat called pew), 1453. Pews were censured by Latimer and Bradford, 1553. *Walcot*. The church of Geddington St. Mary, Northamptonshire, long contained a pew dated 1602. The rev. W. M. H. Church (vicar 1844–6) restored and re-seated the church, and preserved the panel with the date in the door of the surplice press. Another pew in the chancel was dated 1604.

PFAFFENDORF AND LIEGNITZ (Silesia). Near these two places was fought a battle between the Imperialists and Prussians, 15 Aug. 1760. The Austrians were defeated by Frederick of Prussia, who thus prevented the junction of the Russian and Austrian armies.

PHALANSTERY, see *Fourierism*.

PHALANX, the Greek phalanx consisted of 8000 men in a square battalion, with shields joined, and spears crossing each other. The battalion of Philip of Macedon, called the Macedonian phalanx, was formed by him about 360 B.C.

PHALSBOURG (Pfalzburg, Palatine city), a strong town of Alsace, was founded in 1570, by the elector palatine George John. It was ceded to France in 1661, and its fortress erected by Vauban, 1679. It checked the progress of the victorious armies of the allies both in 1814 and 1815, and withstood the Germans from 16 Aug. to 12 Dec. 1870, when it capitulated unconditionally. It was retained at the peace in Feb. 1871.

PHARAOH, the general title of the kings of Egypt in the Old Testament, found only there and in the copyists. The Egyptian word, *pir-aa*, has been interpreted, *king* or *sun*. According to sir Erasmus Wilson, *Egypt of the Past* (1881), the hieroglyphs of *per*, a house, and *per-aa* a great house, are identical with that of Pharaoh, hence the signification, "royal ruler," "founder of a house."

PHARAOH'S SERPENTS, a dangerous chemical toy, composed of sulpho-cyanide of mercury, appeared in Paris in the summer of 1865.

PHARISEES, a sect among the Jews; so called from *pharash*, a Hebrew word for separated, because they pretended to a greater degree of holiness than the rest of the Jews. *Luke* xviii. 9–12. The Talmud enumerates seven classes of Pharisees.

PHARMACOPŒIA, a book of directions for the preparation of medicine, published by colleges of physicians, the earliest in England 1618. In 1862 the General Medical Council were empowered to prepare and sell a new pharmacopœia, to supersede those of the colleges of London, Edinburgh, and Dublin, which was published in June, 1864; succeeded by a new one in May, 1867; reprinted, 1890; another ordered, Dec. 1893; a new "Imperial" one, comprising the entire pharmacy of the empire, edited by prof. Attfield, reported, Dec. 1900.

PHILIPPIUM, a metal of the yttrium series, found in Samarskite earth (in Russia, North Carolina, &c.) by M. Marc Delafontaine, by means of the spectroscope; announced Oct. 1878. Also said to have been found by Mr. Lawrence Smith, and named Mosandrium, July, 1878.

PHILIPPOPOLIS, capital of (Eastern) Roumelia, *which see*. Population, 1888, 33,032; 1900, 41,849.

PHILISTINES, a people of Palestine, conquered Israel, 1156 B.C., and ruled it forty years. They were defeated by Samuel, 1120; and by Saul and Jonathan, 1087. They again invaded Israel about 1063, when David slew their champion, Goliath. After David became king he thoroughly subdued them, 1040. In common with Syria, their country was subjugated by the Romans, under Pompey, about 63.—In Germany, about 1830, Heine and the liberal party applied the term "Philistines" to the opponents of progress, or conservative party.

In England the term has been applied to the opponents of "culture" and refinement, chiefly among the upper middle classes by Mr. Matthew Arnold and others . . . . . 1867 *et seq.*

PHILOBIBLION SOCIETY, was instituted in 1853 by Mr. R. Monckton Milnes (aft. lord Houghton), M. Sylvain Van de Weyer, the Belgian minister, and others. It published volumes of "Miscellanies," &c.

PHILOLOGY, the science of *language*, much studied during the last and present century.

PHILOSOPHER'S STONE, see *Alchemy*.

PHILOSOPHICAL LAMP, constructed by Johann Wolfgang Döbereiner, who applied in it the property possessed by spongy platinum of causing the combination of oxygen and hydrogen, discovered by him in 1823.

PHILOSOPHY (love of wisdom), the knowledge of the reason of things (distinguished from history, the knowledge of facts, and from mathematics, the knowledge of the quantity of things)—the hypothesis or system upon which natural effects are explained. *Locke*. Pythagoras first adopted the name of philosopher (such men having been previously called sages) about 528 B.C. Philosophers were expelled from Rome, and their schools suppressed, by Domitian, A.D. 83. Philosophy is now divided into:—1. Moral or Ethical; 2. Intellectual; 3. Natural or Physical.

MORAL AND INTELLECTUAL PHILOSOPHY.

ANCIENT SCHOOLS.—The *Vedas* (*which see*) contain what is now considered to be the most ancient moral philosophy; the source of later systems, about the sixth or seventh century, B.C. (professor Max Müller, March, 1894.) *Pythagorean*, about 500 B.C.; *Platonic* (the academy), by Plato, 374; *Peripatetic* (the Lyceum), by Aristotle, 334; *Sceptic*, by Pyrrho, 334; *Cynic* by Diogenes, 330; *Epicurean* by Epicurus, 306; *Stoic*, by Zeno, 290; *Middle Academy*, by Arcesilaus, 278; *New Academy*, by Carneades, 160; *New Platonists* (who attempted to combine Platonism with Christianity): Ammonius Saccas, died A.D. 243; Plotinus, died about 270; Porphyry, died about 305; Jamblichus, died about 333; Julian the emperor, died 363.

MODERN SYSTEMS.—*Nominal*, Joan Roscellin, about 1092; Abelard, &c.; *Rational*, Bacon, about 1624; *Cartesian*, Descartes, about 1560: *Reflective* or *Perceptive*, Locke, 1690: *Idealistic*, Berkeley, 1720; *Elective*, Leibnitz, 1710; *Common Sense*, Reid, 1750-90; *Transcendental*, Kant, Hamilton, &c., 1770-1860; *Scientific*, Fichte, 1800-14; *Absolute Identity*, Schelling, 1800-20; *Absolute Idealism*, Hegel, 1810-30; *Utilitarian*, Bentham, Mill, &c. 1790-1873; *Positive*, Comte, 1830; *Realism* and *Evolutionary Materialism*, prevalent, Darwin, Herbert Spencer's, &c. 1873. "System of Synthetic Philosophy," 10 vols., 1860-96 (died 8 Dec. 1903). Mr. Howard Collin's "Epitome," 4th edition, published, autumn, 1897. [Prof. Wm. Wallace, of Oxford, died 19 Feb. 1897.] See *Ethics*.

NATURAL PHILOSOPHY.

Greek and Latin.—Thales, about 600 B.C.; Pythagoras, 590; Aristotle and Plato, 350; Euclid, 300; Archimedes, 287, Hipparchus, 150; Lucretius, about 100; Julius Cæsar, 50; Ptolemy, A.D. 150.
Middle Ages—Arabians: Ben Musa, 800; Alhazen, &c., 1100. Gerbert, Decimals, 959. Roger Bacon, *Opus Majus*, 1266.

PHIPPS' EXPEDITION. The hon. captain Phipps (afterwards lord Mulgrave) sailed from England in command of the *Sea-Horse* and *Carcass* ships, to make discoveries, as near as possible to the North Pole. In August 1773, he was for nine days environed with barriers of ice, in the Frozen Ocean, north of Spitzbergen, 80° 48′ N. lat. A brisk wind in two or three days accomplished their deliverance. They returned to England without having made any discoveries, 20 Sept. 1773. Nelson was coxswain to the second in command.

PHLOGISTON, a term employed by Stahl to designate the hypothetical matter or principle of fire; "the inflammable principle" of bishop Watson, near the close of the 17th century. The chemical theory based upon it was refuted by Lavoisier, 1790, who substituted for it the theory of oxygenation.

PHOCIS, a state in Northern Greece. The Phocians seized Delphi 357 B.C., and commenced the second Sacred War. They were opposed by Thebes and other states, and were utterly subdued by Philip II. of Macedon in 348. By the excavations of the British school of archæology at Abæ the remains of two ancient temples of Apollo, with relics of bronzes, inscriptions, &c., and at Hyampolis, a shrine of Artemis (Diana), &c., were discovered, reported, 30 Aug. 1894.

PHOENICIA, in the sea coast of Syria. The [illegible] ancient navigators and [illegible] their cities or allied states [illegible], Berytus, Tripoli, Byblos, and [illegible] of Aure. From the 19th to the 13th centuries before Christ, they established colonies [illegible] above or isles of the Mediterranean—Carthage, Utica, Gades, and Panormus, and they are said to have visited the British Isles. Phœnicia was conquered by Cyrus, 537 B.C.; by Alexander, 332; by the Romans, 47; and after partaking of the fortunes of Palestine, was added to the Ottoman empire, A.D. 1516. See *Sidon* and *Tyre*.

PHŒNIX CLUBS, of a treasonable character, were formed in Ireland in 1858. They met at night to drill. Several persons were arrested and tried in March, 1859, at Tralee; but the jury could not agree on their verdict. Daniel Sullivan was condemned to penal servitude for ten years, April, 1859. Eventually some of the prisoners pleaded guilty, and were discharged on being bound over to keep the peace.

PHŒNIX PARK, A beautiful park, 1,327 acres, in Dublin; for the murders here see *Ireland*, 1882-3, 1896.

PHONELDOSCOPE, an instrument for observing the colour-figures of liquid films under the action of sonorous vibrations, being a visible demonstration of the vibratory and molecular motion of a telephone plate; invented by Mr. Sedley Taylor, 1877; manufactured by S. C. Tisley & Co., London, 1878.

PHONO-CINEMA, a combination of the phonograph and cinematograph, which preserves the face, voice and gestures of living beings, displayed at the Paris exhibition, June *et seq.* 1900.

PHONOGRAPH, a machine proposed to be attached to pianofortes and other keyed instruments, by which any music that is played may be written down on blank paper, since it rules and prints the notes simultaneously. It was patented by Mr. Young, 13 June, 1863. The motive-power is electro-magnetism. Machines with a similar object were projected by Mr. Creedd in 1847; Mr. C. F. Unger in 1774; and by Mr. Carreyre in 1857. See *Telephonograph*.

The phonograph by Thomas Alva Edison, electrician of New Jersey, was announced . Dec. 1877
Silver indentations are made by means of a pin in a sheet of tinfoil by speaking or singing; and [illegible] casts may be taken. When these are [illegible] upon the diaphragm of a telephone connected with revolving apparatus, the sounds may be reproduced with a weirdlike effect. Improved by Mr. Shelford Bidwell, 1879. See *Telephone*.
An improved instrument by Mr. Edison adapted for postal communication, announced, 21 Nov. [illegible] experiments reported, 12 May, 1888
[illegible] Bell's *graphophone*, a modification of the phonograph, was announced . Nov. 1887
[illegible] (of Washington) announced his [illegible] modification of Leon Scott's [illegible] Nov. "
The *phonograph* and *graphophone* were both exhibited at the Association at Bath . Sept. 1888
Mr. Edison's greatly improved [illegible] considered perfect in the record, [illegible] and preservation of sounds of all [illegible] in place of tinfoil) Nov. 1888 *et seq.*
[illegible] phonograms from the duke of [illegible], Gladstone, and others . Jan. 1889
[illegible] halls, which utter about 30 [illegible] assembled phonograph and [illegible] exhibited at the Savoy Hotel, [illegible] Edison's phonographic [illegible] July, 1890
Mr. Edison adapts his phonograph as a water motor as well as electricity . reported Sept. 1890
The pope, by Mr. Moriarty, transmits a phonogram, containing a message, to the president of the United States N. A. . . . . 21 March, 1893
Many improvements made, and others in progress; almost perfect results obtained, and immense number of instruments in use 1894

PHONOGRAPHY (from the Greek, [illegible] sound), suggested by Franklin, 1768. The Phonetic society, whose object was to render our mode of writing and printing more consonant to sound, was established, 1 March, 1843; sir W. C. Trevelyan, president, and Mr. Isaac Pitman, secretary, the latter being the inventor of the system which was made known in 1837; knighted, May, 1894; died, aged 84, 22 Jan. 1897. Among other works published by the promoters of the system, was the "Phonetic News," in 1849. Phonography has been adopted for European and oriental languages, 1887 *et seq.* "Phonographic Quarterly Review," published, Nov. 1894; see *Visible Speech*.

PHONOPORE, an arrangement of telegraph wires to facilitate transmission of sound, by checking the influence of adjoining wires, the invention of Mr. C. Langdon Davies, announced, May, 1886. See *Telephones*. The system was stated to have worked successfully on the South Eastern railway between London and Folkestone, Feb. 1887, the Midland railway, and others, 1889-92.

PHONOSCOPE, an apparatus for testing the quality of musical strings, invented by Dr. Rudolph Koenig, and exhibited at the International Exhibition in 1862. He died, aged 68, 2 Oct. 1901.

Mr. Edmunds' phonoscope, exhibited to the British Association, Aug. 1878, is an instrument for producing figures and light from the vibrations of sound.
The name phonoscope is given to apparatus used by M. M. G. Dumeny in photographing the lips of a speaker and so combining the images that produced that they may be understood by a deaf mute, June, 1892. See *Photography*, 1891.

PHOSPHOR-BRONZE, an alloy of copper, tin, and phosphorus, invented by Messrs. Montefiore-Levi and Künzel, of Belgium, in 1867. It is very hard, ductile, and elastic, with a colour resembling gold.

PHOSPHORESCENCE. The property possessed by some bodies of retaining luminosity after exposure to light observed by the ancients; especially noticed by Vincenzo Cascariolo (1603), Boyle, Canton, Wilson, and others; and specially studied by Edmund Becquerel, and Balmain. See *Luminous Paint, Air* (footnote).

PHOSPHORUS was discovered in 1669 by Brandt, of Hamburg, who procured it from urine. The discovery was prosecuted by John Kunckel, a Saxon chemist, about 1670, and by Robert Boyle about the same time. *Nouv. Dict.* Phosphorescence said is first mentioned in 1243, but must have been known earlier. Galen

existence in bones in 1769, and Scheele devised a process for extracting it. Canton's phosphorus is so called from its discoverer, 1768. Phosphoretted hydrogen was discovered by Gengembre in 1812. The consumption of phosphorus has immensely increased since the manufacture of lucifer matches. In 1845, Schrötter, of Vienna, discovered allotropic or amorphous phosphorus, which ignites more slowly and is less unwholesome in working than ordinary phosphorus.

Mr. S. A. Rosenthal and dr. S. J. von Komocki succeed in preparing matches without yellow phosphorus, reported . . . . Sept. 1898

PHOTOGRAPHY. The action of light on chloride of silver was known as early as the 16th century. The phenomenon was studied by Scheele (1777), Senebier (1790), Ritter and Wollaston (1801). From the results of these investigations, experiments were made by Thos. Wedgwood and Humphry Davy, in the Royal Institution, London, which were published in its Journal, 1802. Wedgwood may be regarded as the first *photographer*. His paper was entitled "an account of a method of copying paintings upon glass, and of making profiles by the agency of light upon nitrate of silver."

Further discoveries were made by Niépce in 1814, and sir J. Herschel in 1819.

Louis J. M.-Daguerre commenced his experiments in 1824; and in 1826 joined Joseph Nicéphore Niépce, and worked with him till the death of the latter in 1833. The production of *Daguerreotype* plates was announced in Jan. 1839; and the French chamber of deputies granted a pension to Daguerre and to Niépce's son, Isidore.

In 1839 Mr. Henry Fox Talbot first published his mode of multiplying photographic impressions by producing a *negative* photograph (*i. e.*, with the light and shades reversed) from which any number of positive copies may be obtained. His patent for producing the *Talbotype* or *Calotype* (on paper) is dated Feb. 1841.

In 1851, collodion (*which see*) was applied to photography by Mr. F. Archer.

Herr Franz Veress of Klausenburg, Transylvania, photographs colours on glass and paper; specimens are exhibited at the Photographic Institute at Vienna, March, 1890.

The Photographic Society of London was established in 1852 (royal, 1894). It publishes a journal. On 22 Dec. 1852, 774 specimens of photography were exhibited at the rooms of the Society of Arts, Adelphi. 42nd annual exhibition, very successful, 25 Sept. *et seq.* 1897; congress held, New gallery, Regent-street, 19 May, 1903.

Carte de visite portraits (*which see*) taken by M. Ferrier at Nice, 1857.

In 1861 Mr. Thompson, of Weymouth, photographed the bottom of the sea.

Photography was successfully applied to the transfer of works of art to wood blocks by Mr. John Leighton, in his illustrated edition of *Lyra Germanica*, 1861.

The tannin process introduced by major Russell about 1861.

The *copyright* of photographs is secured by an act passed in 1862.

The Wothlytype process, in which nitrate of silver and albumen are discarded and a double salt of uranium and collodion substituted, invented by Wothly, was announced in the autumn of 1864.

The light of ignited *magnesium* was employed for photographs by Mr. Brothers, of Manchester, in the spring of 1864.

Mr. H. Van der Weyde, an American artist, succeeded in making electric light very effectual in photography, 1876-8.

Composite portraits (in which sometimes 9 components were used) formed by Mr. Francis Galton, by means of photography, 1877.

The *Autotype process* for transferring and printing reported successful, April, 1873.

Mr. E. J. Muybridge photographs, instantaneously, animals in rapid motion, 1881 *et seq.* See *Zoopraxiscope*.

Capt. Abney (K.C.B. 1900) photographs a disc in rapid motion by the electric spark, 17 March, 1882.

Celestial Photography began with professor Bond, the astronomer, of Cambridge, U.S., who exhibited a photograph of the moon in 1851. Afterwards, Mr Warren de la Rue, of London, produced excellent photographs of the moon, and other heavenly bodies, and on 18 July, 1860, photographed the solar eclipse. Since then the progress of photography has greatly facilitated astronomical work.

The *Photochronograph*, an apparatus invented by father Fargis, Georgetown, U.S.A., for measuring star transits, reported Oct. 1892.

Photography successfully applied to the heavens by MM. Paul and Prosper Henry, 1885-8.

PHOTOHELIOGRAPH, an apparatus for registering the position of the sun's spots by means of clockwork and photography; erected at the suggestion of sir John Herschel at Kew observatory about 1857. It was used by Mr Warren de la Rue to photograph the disc of the sun during the eclipse of 18 July, 1860.

PHOTOGALVANOGRAPHY, the art of producing engravings by the action of light and electricity The earliest specimens were produced by Nicéphore Niépce, and presented by him in 1827 to the great botanist, Robert Brown. Great advances have since been made in this art by MM. Niepce de St. Victor (who published a treatise on it in 1856), Vitry, W R Grove, H. Fox Talbot, &c. In 1852, Paul Pretsch patented a process which he called "Photogalvanography."

PHOTOGLYPHIC ENGRAVING (a process by which the light actually etches a picture on a plate that may be and has been printed from) was patented by Mr. Fox Talbot in 1858, and is described and exemplified in the Photographic News, 9 and 16 Sept. 1859, a specimen being given in the latter number.

PHOTOZINCOGRAPHY (a process by which photographs are transferred to zinc plates which may be printed from) was devised by sir Henry James, chief of the Ordnance Survey, and made known in 1860. By it maps, charts, and engravings may be printed at a small cost.

PHOTO-SCULPTURE: M. Villème's employment of photographs in the formation of sculpture was announced in 1863.

Messrs. Goupil's process of *Photogravure*, rivalling mezzo-tint, reported highly successful; fine pictures reproduced, Feb. 1884.

See *Kinematograph* and *Kinetoscope.*

PHOTOMETER (light measurer); one was constructed by Dr. W. Ritchie in 1825. Many improvements have been made recently in photometry. See under *Stars.*

Mr. A. Vernon Harcourt's new holophotometer highly approved June, 1888.

Stellar Photometry, the measurement of the light of the stars, has been much studied by astronomers, especially by sir John Herschel, prof. Argelander, prof. C. Pritchard and others. Mr. W. J. Dibdin, in his "Guide to the measurement of light," published in 1889, describes his application of terrestrial photometry to stellar light.

PHOTOPHONE. In this apparatus, constructed by professor Graham Bell and Mr. Sumner Tainter of Washington, in 1880, a thin plane mirror is thrown into vibration by the voice; a beam of light is reflected from this mirror and received at a distance by a cell of the metal selenium; when, by arrangement, this is connected with a telephone, the sounds are reproduced.

PHOTOSPHERE, see *Sun*, note.

PHOTOTACHOMETER, an instrument for measuring the velocity of light, invented by professor Simon Newcomb of Washington, 1879-80.

PHOTOTHERAPY, the treatment of disease by light, successfully applied by prof. Finsen, of Copenhagen, in treatment of lupus, 1893. The Finsen light was first introduced into this country in May, 1900. Queen Alexandra presented the first lamp to the London hospital, and the first patients were treated on 29 May, 1900. The Finsen light treatment is used solely for lupus. See *Tuberculosis*, 1901.

PHRENOLOGY, see *Craniology.*

PHRYGIA (now Karamania), a province in Asia Minor, became part of the Persian empire in 537 B.C., and partook of its changes. After their defeat of Antiochus the Great, king of Syria, 190 B.C., the Romans added Phrygia to the kingdom of Pergamus, which was bequeathed to them by Attalus III., the last king, 133 B.C.

PHYLLOXERA, see *Vine.*

PHYSIC appears to have been first practised by the Egyptian priests. Pythagoras endeavoured to explain the philosophy of disease and the action of medicine, about 529 B.C. Hippocrates, the father of medicine, flourished about 422 B.C., and Galen, born A.D. 131, was the oracle of medical science. About 980 Avicenna, an Arab, wrote a system of medicine. Dr. R. Quain's *Dictionary of Medicine*, published 1882. 3rd edition issued 1902. "The System of Medicine," consisting of contributions by eminent physicians and surgeons, edited by sir J. Russell Reynolds, in 5 vols., published 1866-75. A "System of medicine," by many writers, edited by dr. Clifford Allbutt, vol. I., June 1896; vol. III., 1898. See *Medical.*

The dogmatic age of medicine lasted till the Reformation, when it was attacked by Paracelsus (1493-1541), and Vesalius (1514-64). Since 1800 medical practice has been completely transformed by physiological and chemical research.

The discovery of the circulation of the blood, by Dr. Harvey, furnished an entirely new system of physiological and pathological speculation, 1628. See *Medical* and *Societies.*

PHYSICIAN TO THE KING.—John, the king's chaplain and physician (afterwards bishop of Bath and Wells), mentioned 1090.

The earliest mandate or warrant for the attendance of a physician at court is dated 1454, and 33 Henry VI., a reign fertile in the patronage which was afforded to practitioners in medicine; but no appointment existed which can justly be called physician to the royal person. By this warrant the king, with the consent of his privy council, deputed to three physicians and two surgeons the regulation of his diet, and the administration of such medicines and remedies as might be sufficient for his cure, without any allusion to the previous existence or permanency of the office which they were authorised for a time to fill, or to a remuneration for their services.—*Life of Linacre.*

Miss Garrett (afterwards Mrs. Anderson) licensed at Apothecaries' hall, London, to practise medicine, 28 Sept. 1865.

At a meeting of the Royal Medical and Chirurgical Society, 3 May, 1869, it was resolved that the "Royal Society of Medicine" (including the various sections) be founded; the resolution was affirmed, 22 Feb. 1870; but in 1871 the project dropped.

School of Medicine for Women in London (council: Professors Burdon-Sanderson and Huxley, Mrs. Garrett Anderson, M.D., Mrs. Blackwell, M.D., and others); opened, Oct. 1874.

Registration of medical women, permitted by Medical act, 39 & 40 Vict. c. 41, 11 Aug. 1876.

Queen Victoria laid the foundation of the Medical Examination hall on the Victoria embankment, 24 March, 1886.

The curriculum for medical students changed from 4 to 5 years; begins Oct. 1893.

London school of tropical medicine promoted by the liberality of Mr. Chamberlain, col. sec., Dec. 1898; established in the London Docks; good research work, reported, 3 Nov. 1902 *et seq.*

PHYSIC GARDENS. The first cultivated in England was by John Gerard, surgeon of London, in 1567; that at Oxford was endowed by the earl of Danby, in 1652; that at Cambridge was commenced about the middle of the last century; and that at Chelsea, originated by sir Hans Sloane was given to the Apothecaries' company in 1721; this last was very much admired by Linnæus. The trustees of the London parochial charities agree to dedicate 800*l.* per ann. to its maintenance, March, 1899. New laboratories and plant-houses opened by lord Cadogan, 25 July, 1902.

PHYSICAL EDUCATION, British College of, started in 1893; a meeting of the council was held at the earl of Meath's house, sir Benjamin Richardson in the chair, 20 Oct. 1894. Annual meetings. See *Scotland.* Royal Commission on PHYSICAL DETERIORATION appointed, 1903.

PHYSICAL SOCIETY, established 14 Feb. 1874; Dr. J. H. Gladstone, first president. NATIONAL PHYSICAL RECREATION SOCIETY founded, 1885-6; in full activity. NATIONAL PHYSICAL LABORATORY, committee appointed respecting its establishment, lord Rayleigh chairman, 1 Aug. 1897; favourable report issued, 4 Oct. 1898; government grants 14,000*l.* for erection and 4,000*l.* per ann. for maintenance. Bushy-house, Teddington, granted by queen Victoria to the Royal society for the laboratory, Dec. 1900; opened by the prince and princess of Wales, 19 March, 1902.

PHYSICIANS, ROYAL COLLEGE OF, of London (of England since 1858), was projected by Dr. Linacre, physician to Henry VIII., who, through his interest with cardinal Wolsey, obtained letters patent, constituting a corporate body of regular physicians in London, with peculiar privileges, 23 Sept. 1518. Linacre was elected the first president of the college. Dr. W. Harvey was a great benefactor to this institution, 1653. He built a library and public hall, which he granted for ever to the college, with his books and instruments. The college was afterwards held in a building in Warwick-lane, erected by sir C. Wren, where it continued till 1825, when the present elegant stone edifice in Trafalgar-square was erected from designs by sir R. Smirke. The college is composed of fellows and members, formerly called licenciates and extra-licenciates. The queen's bench division decided that the college was entitled by the medical act of 1886 to grant diplomas both of medicine and surgery, 8 March, 1893. The prince of Wales elected a fellow of the college, July, 1897.—The College of Physicians, Dublin, was founded by charter of Charles II. 1667, and was re-incorporated in 1692. The Royal College of Physicians, Edinburgh, 29 Nov. 1681.

PHYSICS, see under *Philosophy, Natural.*

PHYSIOGNOMY, a science which affirms that the dispositions of mankind may be discovered from the features of the face. The origin of the term is referred to Aristotle; and Cicero was attached to the science. It became a fashionable study from the beginning of the 16th century; and in the 18th century, the essays of Le Cat and Pernethy led to the modern system.

J. K. Lavater, who endeavoured to raise physiognomy to the rank of a science, published his celebrated work "Physiognomische Fragmente," 1775–78, of which an English translation by Holcroft was published in 1793. The subject was considered by C. R. Darwin in his work "Expression of the emotions in Man and Animals," 1873, and by Mantegazza in his "Physiognomy and Expression," 1890.

PHYSIOLOGY is that part of physics which treats of the inner constitution of animals and plants, and the several functions and operations of all their organs and tissues. The works of Müller, Milne-Edwards, Huxley, Carpenter, Virchow, Brown-Séquard, Helmholtz, Ludwig, Du Bois-Reymond, Salomon Stricker Rutherford and sir John Bucknill, are much celebrated, and Todd's "Cyclopædia of Physiology" (1836-59) is a library in itself. Physiological Society, in London, founded by Dr. Burdon-Sanderson (bart. 1899) and others, early in 1876; see *Anatomy, Biology, Morphology, Royal Institution.* International congresses of physiology have been held since 1889.

By means of the Röntgen rays the action of the heart and viscera in a living human body were made visible at a meeting in Munich, 9 Aug. 1896

PIACENZA, see *Piacenza*.

PIANETTE, a small upright piano introduced by Boré of Paris in 1857.

PIANOFORTE.* The invention is attributed to Cristofalli (or Cristofori), an Italian, J. C. Schröter, a German, and Marius, a Frenchman, early in the 18th century. The strings are struck by small hammers, and not by quills, as in harpsichords. Schröter is said to have presented a model of his invention to the court of Saxony, in 1717; and G. Silberman manufactured pianofortes with considerable success in 1772. Pianofortes were made in London by M. Zumpie, a German, 1766, and have been since greatly improved by Clementi, Broadwood, Collard, Kirkman, Erard, Pleyel, and others.

Upright pianos, first made in this country, were suggested by Isaac Hawkins in 1800, and Thomas Loud, in 1802. Wm. Southwell patented "cabinet pianos" in 1807; superseded, from about 1840, by the cottage, piccolo, and other pianos.

A keyed instrument at Modena was named "piano e forte," 1598.

A "*stone pianoforte*," formed of a series of flints and other stones of various sizes, collected in France and arranged by M. Baudre, was played on by him at the Royal Institution, on 16 March, 1866.

The *transposing* piano, invented by Mr. Henry Schallehn, was exhibited at the Savoy hotel, Westminster, 10 June, 1890.

The Janko pianoforte, with a new arrangement of keyboard, exhibited in the Portman rooms, London, W., 24 Nov. *et seq.* 1891, said to possess many advantages.

See Grove's "Dictionary of Music," article "*Pianoforte*."

Mr. A. J. Hipkins' "History of the Pianoforte," published 1896.

A "double piano," a new harpsichord and harp, played on at Messrs. Pleyel's rooms, London, 12 April, 1897.

Among mechanical contrivances for pianoforte playing or "dumb pianists" are the *Pianola*, and the *Metzler Piano-player*, 1905.

PICARDY (N. France), was conquered by the English in 1346, and by the duke of Burgundy in 1417, to whom it was ceded by the treaty of Arras, 21 Sept. 1435, and annexed to France by Louis XI., 1463.

PICCADILLY, a fine street, W. London; the name, of uncertain origin, was Pickadilla and Piccadello, about 1660, when a house of entertainment existed near the Haymarket, termed Pickadilly Hall, after which buildings were gradually extended westwards.

PICCOLO PIANO, a small pianoforte introduced by Robert Wornum in 1829.

PICENTINES, a Sabine tribe, subdued by the Romans, and their capital, Asculum, taken, 268 B.C. They began the Social war in 90, and were conquered in 89 B.C.

PICHEGRU'S CONSPIRACY, see *Georges*.

* The zealous of the instrument was a little box over which were stretched strings: such was the citole, the dulcimer, and the psaltery. The clavitherium had keys; the clavichord (about 1500) had dampers; successive improvements were the virginals (on which queen Elizabeth played), the spinet (about 1700), and the harpsichord (with two rows of keys), said to have been used in the 15th century, for which Bach and Handel composed in the 17th century. A collection of harpsichords (one dated 1521) is in the South Kensington museum. A double pianoforte (with two keyboards reversed), giving remarkable effects (patented by M. M. Mengeot), played on at Coventgarden theatre, 21 Oct. 1878.

PICKETING, see *Trials*, Aug. 1867 and 1897.

R. Read and four other cabinetmakers imprisoned for picketing . . . . . May, 1825
Watching dwellings, &c., declared illegal, 20 Dec. 1898

PICQUET, a game with cards, invented, it is said, by Joquemin, for the amusement of Charles VI. of France, then in feeble health, 1390. *Mézéray*.

PICTS (possibly from *Picti*, painted), the name given to the earliest known inhabitants of the east of Scotland, by the Romans, who made expeditions into the country, 296 *et seq.*; see *Roman Wall*.

PICTURES, see *Painting*.

PIEDMONT (*Pedemontium*, Latin, foot of the mountains), a region in N. Italy, formerly the seat of government of the kingdom of Sardinia, *which see*, and *Savoy*. Population, 1890, 3,234,506.

PIE-POUDRE COURT, the Court of Dusty Foot, whose jurisdiction was established for cases arising at fairs and markets, to do justice to the buyer and seller immediately upon the spot. By stat. 17 Edw. IV., it had cognizance of all disputes in the precincts of the market to which it might belong, 1477.

PIER AND HARBOUR ACT, to facilitate the formation, management, and maintenance of piers and harbours in Great Britain and Ireland, was passed in 1862.

PIETISTS, a Lutheran sect, instituted in Leipsic, by Philip James Spener, a professor of theology, about 1689, with the view of reforming the popular religion. He established "colleges of pietists," with preachers resembling those of the society of friends and the methodists in Britain, about 1760. A body resembling the Pietists, named Chasidim, arose among the Jews in the Ukraine, and spread through Poland and European Turkey.

PIETRO BARSANTI CLUB, see *Italy*, 1878.

PIEZOMETER (Greek *piezo*, I compress), an apparatus for measuring the compressibility of liquids, invented by Œrsted (died 1851); improved by Desprets & Saigey.

PIGEONS were employed as carriers by the ancients. Hirtius and Brutus corresponded by means of pigeons at the siege of Modena. The pigeons of Aleppo served as couriers at Alexandretta and Bagdad. Thirty-two pigeons liberated from London at 7 o'clock in the morning, 22 Nov. 1819; at noon one of them arrived at Antwerp; a quarter of an hour afterwards a second arrived; the remainder on the following day. *Phillips*. At a pigeon race, 25 July, 1872, from Spalding to London, the speed allowed was 90 seconds a mile; see *Post Office*, 1870.

In a pigeon race from Dover to Plymouth, some pigeons attained the velocity of 1,233 yards, 1,218 yards and 1,008 yards per minute 22 July, 1886. About 300 pigeon-flying societies exist in France: the organization of carrier-pigeon stations ordered by the minister for war, Jan. 1888. About 350 similar societies exist in Germany, stated Jan. 1888.

National Peristeronic Society (originating from the Columbarian Society, founded in 1750), has annual shows.

A bill for prohibiting shooting pigeons, rising from a trap attended with cruelties, passed by the commons, with large majorities, in 1883 and 1884 (195—40), was rejected by the lords in 1883 (90—17), and on 9 May 1884 (78—48).

Pigeon postal service successfully established between Auckland, New Zealand and Gt. Barrier island, summer, 1899.
National pigeon post for military and naval purposes, scheme inaugurated at the Crystal palace, 18 Dec. 1900.

PIGMIES; see *Dwarfs*.

PILCHARD FISHERY. Peculiar to Land's End, Cornwall, reverts to W. Ireland, after suspension of two centuries (stated July, 1883).

PILGRIMAGE OF GRACE, a name assumed by religious insurgents in the north of England, who opposed the dissolution of the monasteries. The movement, which commenced in Lincolnshire in Sept. 1536, was suppressed in Oct.; but soon after revived in Yorkshire; and an expedition, bearing the foregoing name, having banners on which were depicted the five wounds of Christ, was headed by Aske, and other gentlemen, and joined by priests and 40,000 men of York, Durham, Lancaster, and other counties. They took Hull and York, with smaller towns. The duke of Norfolk marched against them, and by making terms dispersed them. Early in 1537 they again took arms but were promptly suppressed, and the leaders, several abbots, and many others, were executed.

PILGRIMAGES began with the pilgrimage of the empress Helena to Jerusalem, 326. They became very frequent at the close of the 10th century. Robert II. of France made several pilgrimages; among others one to Rome about the year 1016, perhaps in 1020, when he refused the imperial dignity and the kingdom of Italy. The pilgrimage to Canterbury is described by Chaucer in his Canterbury Tales about 1383. The pilgrimage of Mahometans to Mecca, the birth-place of the prophet, is commanded in the Koran. This pilgrimage was very great from India, where it has been encouraged by the princes, but discouraged by the British as idolatrous. The great mortality due to want and disease compelled the government to intervene with strict sanitary regulations, with the result that the number of deaths has diminished, and the number of pilgrims increased. See *Cholera*. Pilgrimages to shrines of the Virgin Mary in France revived in 1873, and since, in consequence of miracles alleged to have taken place at La Salette in 1846 and at Lourdes, 11 Feb. 1858; those of La Salette discredited by Pope Leo X., 1879. See *Sacred Heart*.

PILGRIM FATHERS, the name given in North America to a party of 74 English puritans and 28 women, members of John Robinson's church, who sailed in the *May Flower* from Leyden to North America, and landed on Plymouth Rock, where they founded a colony, 25 Dec. 1620.

The rev. A. E. Dunning, D.D., of Boston, U.S., with 46 American congregational ministers and others, following the track of the pilgrim fathers, arrive at Plymouth, 11 June; the party were received at Oxford, Bedford and other places; the visitors leave, much gratified, 2 July, 1896.
Memorial congregational church in memory of the "Pilgrim Father," John Robinson, founded at Gainsborough, 29 June, 1896.
The MS. log of the *Mayflower* presented to the President and citizens of the United States by the bishop of London, in compliance with the petition of Mr. T. F. Bayard, U.S. ambassador, 25 March, 1897; given up by him to governor Wolcott, of Massachusetts, 26 May, 1897.
"The Story of the Pilgrim Fathers," reprinted and edited by Mr. Edw. Arber, 1897.

"PILGRIM'S PROGRESS FROM THIS WORLD TO THAT WHICH IS TO COME," written by John Bunyan, in Bedford gaol, where he was imprisoned twelve years, 1660-72. The first part was published in 1678. A Hebrew version appeared in 1851; see *Bedford*. A first edition (1678) realised 1,475*l*., 9 May, 1901.

PILLAR SAINTS, see *Monachism*.

PILLORY, a scaffold for persons to stand on, to render them publicly infamous. This punishment was awarded against persons convicted of forgery, perjury, libelling, &c. In some cases the head was put through a hole, the hands through two others, the nose slit, the face branded with one or more letters, and one or both ears were cut off. There is a statute of the pillory, 41 Hen III. 1256. Many persons died in the pillory by being struck with stones by the mob, and pelted with rotten eggs and putrid offal. It was abolished as a punishment except for perjury, 1815, and totally abolished in 1837. The last who suffered at the Old Bailey was Peter Jas. Bossy, for perjury, 22 June, 1830.

PILNITZ (near Dresden, Saxony). The convention of Pilnitz took place between the emperor Leopold and the king of Prussia, 20 July, 1791. On 27 Aug. the treaty of Pilnitz, or, as some style it, the Partition treaty, was finally agreed upon at Pavia by the courts in concert. It was to the effect "that the emperor should retake all that Louis XIV. had conquered in the Austrian Netherlands, and uniting these provinces to the Netherlands, give them to his serene highness the elector palatine, to be added to the palatinate; Bavaria to be added to the Austrian possessions," &c.

PILOT. The act relating to pilots, 16 & 17 Vict. c. 129 (1853), with other acts, is embodied in the Merchant Shipping act; 15th annual conference of the United Kingdom Pilots' association at Carnarvon, 12 July, 1898; see *Trinity-House*.

PILPAY, see *Fables*.

PIMLICO, S.W. suburb of London, belonging to the Grosvenor (Duke of Westminster) family, who have built largely upon it since 1830.

On 20 Dec. 1881, Georgina Moore, 7½ years old, living with her parents in Winchester-street, disappeared; her body was found by bargemen in the Medway, near Yalding, 30 Jan. 1882. Esther Pay, with whom she was last seen, accused of her murder, was acquitted, 29 April, 1882.
Pimlico poisoning case. See *Trials*, April, 1886.

PINCHBECK, an alloy of 25 per cent. of zinc and 75 copper, used for watch-cases, &c.; named after either Christopher or Thomas Pinchbeck,

London mechanics; the former is said to have died in 1732, the latter in 1783.

PINDAREES, bands of freebooters, or mercenary soldiers in the central provinces of India, headquarters Malwa, who, after the fall of the Mogul empire, ravaged the native territories and the British settlements, 1804 *et seq.*, till finally crushed by two armies commanded by the marquis of Hastings in 1817.

PINE-TREES. The stone pine (*Pinus Pinea*), brought to these countries before 1548. The cluster pine (*Pinus Pinaster*), brought from the south of Europe before 1596. The Weymouth pine (*Pinus Strobus*), from North America, 1705. Frankincense pine (*Pinus Tæda*), from North America, before 1713. There are other varieties.

PINKIE (near Edinburgh), where the English under the Earl of Hertford, protector, totally defeated the Scots under the regent Arran, 10 Sept. 1547. There fell not 200 of the English, but above 10,000 of the Scots. Above 1500 were taken prisoners.

PINS have been found in British barrows (*Fosbroke*); and are mentioned in a statute of 1483. Brass pins were brought from France in 1540, and first used in England, it is said, by Catherine Howard, queen of Henry VIII. Pins were made in England in 1543. *Stow.* They were first manufactured by machinery in England in 1824, under a patent of Lemuel Wellman Wright, of the United States.

PIOMBINO, a principality, Italy, previously ruled by the Appiani family, was acquired by the Spaniards, 1589. It was ceded to France, 1801, and given by Napoleon to his sister Elise, wife of prince Bacciochi, who held it from 1805 to 1815, when it was restored to the Buoncampagni family, subject to Tuscany. It became part of the kingdom of Italy, 1860.

PIPE ROLL SOCIETY, founded in 1884 for printing all extant public records prior to the year A.D. 1200.

PIRACY, Greek *pirati*, was severely suppressed by the Romans. Pompey destroyed the Cilician pirates, 67 B.C.; see *Buccaneers.* Many acts of parliament were passed for the suppression of piracy; the latest in 1837.

PIRÆUS, the port of Athens, was united to the city by two long walls, one erected by Themistocles, and the other by Pericles, 456 B.C., which were destroyed by Lysander, 404 B.C. It was fortified by Conon, 393 B.C. The Pirœus was able to contain 400 Greek vessels. It was occupied by the French during the Russian war in 1854.

PIRMASENS (Bavaria). Here Moreau and the French were defeated by the duke of Brunswick and the Prussians, 14 Sept. 1793.

PISA, an ancient city in Tuscany, was founded about six centuries before Christ, and was favoured by the early Roman emperors as a flourishing republic. The citizens took an active part in the Italian wars of the middle ages, but became subject to Florence, after a long siege, 1405-6. In 1494 Pisa became independent under the protection of Charles VIII. of France, but was retaken by the Florentines in 1509. The university was founded in 1343, and revived by the Medici in 1472 and 1542. The rival popes, Benedict XIII. and Gregory XII., were deposed at a council held at Pisa in 1409, and Alexander V. elected in their room. The Campanile or leaning tower was built about 1154,* and the Campo Santo about the same time. Fire panic in the cathedral, 9 persons crushed to death, 21 injured, 29 May, 1897.

PISCICULTURE, see *Fisheries.*

PISTOLS, the smallest fire-arms, said to have been invented at Pistoja in Italy; were first used by the cavalry of England about 1544. Subsequently they were made with a revolving cylindrical breech, in which are formed several chambers for receiving cartridges, and bringing them in succession into a line with the barrel ready for firing. The earliest model of this kind of arm is to be found in the museum of the United Service Institution, and is supposed to date from the reign of Charles I. An eight-chambered matchlock revolver of the 16th century is placed in the Royal Artillery Museum, Woolwich. The manufacture of pistols by machinery was first introduced into England from the United States, America, in the year 1853, by col. Colt, who invented the Colt revolving pistol, 1851. This system of manufacture induced the British government to establish the Enfield armoury, in 1855; see *Fire-Arms.*

PIT BROW WOMEN, see *Coal*, 23 June, 1887.

PITCAIRN'S ISLAND, in the Pacific Ocean, said to have been discovered by Pitcairn in 1768, seen by Cook in 1773, and since colonised by ten mutineers from the ship *Bounty*, captain Bligh, in 1789; see *Bounty.*

The mutineers remained unknown to England until discovered accidentally in 1814. A ship nearing the island was hailed by a swarthy youth in the English language, when it appeared that the mutineers, soon after settling there, had married some black women from a neighbouring island, and had become a well-conducted community under the care of Adams, the principal mutineer. He died in 1829, when George Hunn Nobbs, an Englishman, who arrived a few years before, became chief. In Aug 1852 admiral Moresby spent a few days on the island. By his means Nobbs was sent to England and obtained ordination. His death (aged 86) announced Jan. 1885. As their numbers increased, the island proved incapable of their support. The English government removed them, with all their property, in the ship *Morayshire*, on 3 May, 1856, and landed them, after a boisterous passage, on Norfolk Island, prepared previously for their reception, 8 June. The government stocked Norfolk Island with 2000 sheep, 450 head of cattle, and twenty horses, and gave them stores to last twelve months; their numbers were 96 males and 102 females.

Pitcairn's island visited by H.M.S. *Peterel* was found to be prosperous, Dec. 1875. Population, 15 Aug. 1879, 93; in 1890, 126; in 1904, 141.

Harry Christian sentenced to death for murdering a woman and her children (June, 1897), reported, 8 Nov. 1898; the *Sokota* s.s. visited the island, 30 Aug. 1902.

* The Campanile was erected to contain bells, and stands in a square close to the cathedral. It is built entirely of white marble, and is a cylinder of eight stories, each adorned with a round of columns, rising one above another. It inclines so far on one side from the perpendicular, that in dropping a plummet from the top, which is 188 feet in height, it falls sixteen feet from the base. Some thought this was done purposely by the architect; others attributed it to an accidental subsidence of the foundation. From this tower Galileo made his observation on gravitation (about 1635).

† William Pitt, second son of the great earl of Chatham, was born 28 March, 1759; became M.P. 23 Jan. 1781; moved for a reform in parliament, 7 May, 1782; became chancellor of the exchequer, July, 1782; prime minister, Dec. 23, 1783; died 23 Jan. 1806.

Parliament, military, 8 Dec. 1783, and continued by resignation in 1801. The second was formed 12 May, 1804; and terminated (after various changes) by Mr. Pitt's death, 23 Jan. 1806. A public funeral was decreed to him, and 40,000*l.* to pay his debts.

ADMINISTRATION OF 1783.

William Pitt, *first lord of the treasury* and *chancellor of the exchequer*.
Lord Gower, *lord president*.

PITTSBURG LANDING (near Corinth, Tennessee). On Sunday, 6 April, 1862, a great battle was fought between the American federals under Grant and Prentiss, and the confederates under Albert Sydney Johnston and Beauregard. The latter began the attack and were victorious, but lost their able general Johnston. The federals were reinforced the next day and renewed the attack; the confederates maintained their ground; but soon after retired in good order to Corinth. This engagement is also named the battle of Shiloh.

PITURINE, a new narcotic, said to have been discovered in 1882 in Australia. It resembles a mixture of opium and tobacco, and is extracted from the dried leaves of the *Duboisia piturí*.

PLACENTIA (now Piacenza), N. Italy, founded by the Romans about 220 B.C. It suffered in all the convulsions attending the fall of the empire and the wars of the middle ages. In 1254 it fell under the rule of the family of the Scotti. In 1302 Alberto Scotto was overcome, and Piacentia was united to Milan, then ruled by the Visconti. On their extinction in 1447, Placentia revolted, but was taken by Sforza duke of Milan, and treated very cruelly. In 1513 it was given to pope Leo X. In 1545 Paul III. gave it with Parma as a duchy to his son Peter Louis Farnese. The French and Spaniards were defeated by the Austrians and Sardinians near Placentia, 16 June, 1746; see *Parma*.

PLACILLA, Chili (*which see*). The site of the decisive victory of the congressists over president Balmaceda, 28 Aug. 1891.

PLAGUE. The plagues of Egypt (1491 B.C.) are described in *Exodus* IX., &c. The first recorded general plague in all parts of the world occurred 467 B.C. *Petavius*. At Rome a desolating plague prevailed, 453 B.C. The devastating plague at Athens, which spread into Egypt and Ethiopia, 430 B.C., is admirably described by Thucydides. Another which raged in the Greek islands, Egypt, and Syria, destroyed 2000 persons every day, 187 B.C. *Pliny*. See *Cattle*.

At Rome, a most awful plague; 10,000 persons perished daily, A.D. 80.
Again ravaged the Roman empire, 167, 169, 189.
Another in the Roman empire. For some time 5000 persons died daily at Rome; many towns entirely depopulated, 250-265.
In Britain, a plague swept away such multitudes that the living were scarcely sufficient to bury the dead, 432.
A long-continued, dreadful one began in Europe in 542, extended all over Asia and Africa.
At Constantinople, when 200,000 of its inhabitants perished, and in Calabria, Sicily, and Greece, 746-747.
In London, 962.
At Chichester, in England, an epidemical disease carried off 34,000 persons, 772. *Will. Malms.*
In Scotland 40,000 persons perished, 954.
In London, great mortality, 1094; and Ireland, 1095.
Again, in London; it extended to cattle, fowls, and other domestic animals, 1111. *Holinshed.*
In Ireland; after Christmas this year Henry II. was forced to quit the country, 1172.
Again, in Ireland, when a prodigious number perished, 1204.
The "Black Death" in Italy, 1340.
A plague raged throughout Europe, causing extensive mortality. Britain and Ireland suffered immensely. In London alone 200 persons were buried daily in the Charterhouse-yard, 1348-9. (That at Florence described by Boccaccio.)
["The Great Pestilence" (black death), by Alexander Aidan Gasquet, D.D., an elaborate work, published in 1894.]
In London and Paris a dreadful mortality, 1360-1361-2, 1367, 1369, and in Ireland in 1370.
A great pestilence in Ireland, called the [illegible], carried off a great number of the people, 1391.

The earliest mention of a dreadful pestilence in this country, 664.

Ireland, superinduced by a famine; great numbers died, 1486; and Dublin was wasted by a plague, 1490.

An awful pestilence at Oxford, 1471; and throughout England, a plague which destroyed more people than the continual wars for the fifteen preceding years, 1478. *Rapin: Salmon.*

The *Sudor Anglicus*, or sweating sickness, very fatal in London, 1485. *Delaune.*

The plague in London so dreadful that Henry VII. and his court removed to Calais, 1499-1500. *Stow.*

The sweating sickness (mortal in three hours), in London, 1506; and in 1527. In most of the capital towns in England half the inhabitants died, and Oxford was depopulated, 9 Henry VIII. *Stow.*

Limerick was visited by a plague, when many thousands perished, *1522.*

The sweating sickness again in England, 1528; and in North Germany in 1529; and for the fifth time in England, in 1551.

30,578 persons perished of the plague in London alone, 1603-1604. It was also fatal in Ireland.

200,000 perished of a pestilence at Constantinople in 1611.

In London a great mortality prevailed, and 35,417 persons perished, 1625.

In France a general mortality: at Lyons, 60,000 persons died, 1632.

The plague brought from Sardinia to Naples (being introduced by a transport with soldiers on board), raged with such violence as to carry off 400,000 of the inhabitants in six months, 1656.

THE GREAT PLAGUE OF LONDON, began Dec. 1664, which carried off 68,596 persons; some say 100,000. Fires were kept up night and day to purify the air for three days; and it was thought the infection was not totally destroyed till the great conflagration of Sept. 1666. [Graphically described by De Foe in his partially imaginative *History of the Plague.*]

"Lothographia: an account of the Great Plague in 1665," by William Boghurst, apothecary, edited by Joseph Frank Payne, M.D., from the MS. in the British Museum, 1896.

60,000 persons perished of the plague at Marseilles and neighbourhood, brought in ship from the Levant, 1720.

One of the most awful plagues that ever raged, prevailed in Syria, 1760. *Abbé Marié.*

In Persia, a fatal pestilence, which carried off 80,000 of the inhabitants of Bassora, 1773.

In Egypt, about 800,000 persons died of plague, 1792.

In Barbary, 3000 died daily; and at Fez 247,000 perished, 1799; in the east, 1800; 1840; 1873; many deaths in Bagdad, &c., April-May, 1876.

In Spain and at Gibraltar immense numbers were carried off by a pestilent disease in 1804 and 1805.

Again at Gibraltar, an epidemic fever much resembling the plague, caused great mortality, 1828.

The Asiatic cholera (see *Cholera*) made its first appearance in England, at Sunderland, 26 Oct. 1831: in Scotland, at Haddington, 23 Dec. same year; and in Ireland, at Belfast, 14 March, 1832.

The cholera again visited England, &c., 1848 and 1849 (see *Cholera*).

The cholera raged at Smyrna and Constantinople, and appeared in Paris, Marseilles, Naples; July-Dec. 1865.

Cattle plague (*which see*) in England, resembling typhus, near London, begins June, 1865.

A new and hitherto an incurable disease, named *black death*, on account of purple blotches coming out on the skin, appeared in Dublin; many persons of all ranks died a few hours after the seizure. March *et seq.* 1868.

Plague in Sarawan, Jan.—April, 1879.

Plague in Hong Kong (*which see*), June, July, 1894.

Plague in Bombay, Karachi (*which see*), and other parts of India, Oct. *et seq.* 1896-8.

Sanitary conference of the powers, 85 delegates, count Mattei elected president, 16 Feb. 1897; convention signed, 10 March, 1897.

The commission under prof. Koch issues a report, and their official report issued, June, 1898.

Plague at Samarkand, great mortality, Oct.—Nov. 1900.

Plague in India, great mortality in Bombay (Punjab, 230 deaths, 1899-1900; 4,397 deaths, 1900-1901; 200,000 deaths, 1901-02.)

Plague in Mauritius, 1899-1903; Oporto (*which see*).

Dr. Manson reports bubonic plague to be a rat-borne disease, and holds their extermination as a preventative, Oct. 1899 [disputed by dr. Bruce Low in his report of the spread of the disease in the world, 1898-1901; *Times*, 25 Oct. 1902].

Prof. Kitasato of Japan discovers the plague bacillus saprophytic, reported, ? 1900.

Prof. Haffkine's system of anti-plague inoculation successful; encouraged by government, Feb. 1900.

Plague at Sydney, spring *et seq.* 1900; total deaths, 103; town free, 8 Sept. 1900; 33 deaths up to 24 May, 1901.

Dr. Yersin's anti-plague serum obtained from horses, proved successful in Indo-China, Aug.-Oct. 1900.

Slight outbreak at Glasgow, 7 deaths, 27 Aug.-14 Nov. 1900; 4 cases, 1 death, 26 Oct. 1901.

Plague at Cape Town, 11 Feb. 1901.

Hong-kong: 113 deaths, week ending 18 May, 1901; total deaths, 1,509 (11 Europeans); subsiding, 24 July, 103 deaths, 7-21 June, 1902; subsides, reported clear, mid Sept. 1902; increasing Feb. 915 deaths, 18 April-Aug. 1903.

Oporto: 4 deaths, reported, 26 June, 1901.

Egypt: 173 cases, 83 deaths, 7 April-7 Oct. 1901; 147 deaths, April-19 July, 1902.

Plague in Liverpool: 6 deaths, 30 Oct.; 1 death, 7 Nov. 1901.

Plague in Madagascar: 4 deaths, 19-27 May, 1902.

Plague in Odessa: slight epidemic, Sept.-early Nov. 1902.

Plague in Durban: 27 deaths, reported, 26 Jan. 1903.

Plague in India, Bombay and elsewhere, 600,000 deaths, Jan.-Aug. 1903.

Plague in the Punjab: 130,000 deaths, March-April, 1903.

Plague in China: many deaths at Niuchwang, reported Sept. 1903.

Rats proved to be a means of spreading plague; 185,982 killed in Thames docks, &c., during 1902; 249,718 killed up to 1 Nov. 1903.

Plague in Mauritius: many deaths, 3 Sept.-Nov. 1903; 170 deaths, 24 Nov.-17 Dec. 1903.

Plague in India: chiefly Bombay, Bengal, the N.W. Provinces and the Punjab; weekly average early months of 1904, about 18,000, rising to 40,527 for the week ending 29 March; highest record, 47,599, for week ending 9 April; 46,812 week ending 16 April, maintaining this level, more or less, until 14 May (35,413); number drops from 20,484, 28 May, to 1,920, 9 July, rising to 9,914, 3 Sept.; 15,904, 29 Oct., declines to 15,197, 12 Nov. 1904.

Plague in India: in Bombay, N.W. Presidency, and the Punjab; in a less degree in Burma and other parts of India. Weekly mortality in Jan. about 20,000, reaching, by steady increase, to a total of 57,702, 1 April; drops to 4,000-5,000, 30 June, and to 1,050 weekly for all India, 1 Aug.; rises to 3,000, mid Oct. 1905.

Cases of plague in England in Jan. and June; a Lascar seaman, of the s.s. *Crewe Hall*, being attacked in the first instance; in the latter case, a youth, serving as cook on board ship, attacked in Manchester; at Leith a labourer admitted into hospital for supposed enteric fever, 5 May; mother and child, who recovered (the father died), also admitted, 10 May, 1905.

Plague in Chili: and some cases at Aden, Hong-kong, Queensland, and S. Africa, during 1905.

PLAIN-SONG, see *Chanting.*

PLAN OF CAMPAIGN (see *Ireland*), Oct. 1886.

By this plan the tenant of a farm was to pay his rent to the National League instead of to the landlord, and was to be supported if evicted. It was condemned by the pope, 20 April, 1888; given up by many tenants throughout the country, and disavowed by Mr. Parnell and others, 1890-1. The plan given up by many on the Woodford estate, Galway, Oct. 1891.

Mr. Dillon stated before the Evicted Tenants' commission that the total amount received from all sources for evicted tenants was 234,431*l.* 4 [illegible]

PLANE. A true plane, most successfully obtained by sir Joseph Whitworth. Fine specimens exhibited at the Royal Institution in 1873.

PLANETARIUM, see *Orrery.*

PLANETS. Jupiter was known as a planet to the Chinese and the Chaldeans, and inserted in a chart of the heavens, made about 600 B.C., and in which 1460 stars are accurately described; this chart is said to be in the national library at Paris. See *Jupiter, Mars, Saturn.* We now know eight primary planets, termed major; *Mercury, Venus,* the *Earth, Mars, Jupiter, Saturn, Uranus, Neptune;* and secondary or minor, situated between the orbits of Mars and Jupiter. The numerical order differs in the lists of English, German, and French astronomers. In the French and German lists, *Aglaia* to *Pandora* are numbered 47 to 55; *Meletè* is 56.

Uranus, formerly called *Georgium Sidus* and *Herschel;* discovered by W. Herschel (see *Georgium Sidus*) . . . . . 13 March, 1781

Neptune, discovered by Galle (in consequence of the calculations of Le Verrier) (see *Neptune*). 23 Sept. 1846. It had been theoretically discovered by professor J. Couch Adams of Cambridge . . . 1845

Vulcan (between Mercury and the Sun), said to be discovered by M. Lescarbault, a physician (not seen since), 26 March, 1859, and its discovery is now generally doubted; said to have been seen by Watson during the solar eclipse (doubted by Peters) . . . . . 29, 30 July, 1878

Between five and six hundred minor planets have been discovered since 1 Jan. 1801. In recent years this work has been greatly aided by photography.

During 1902 43 small planets were discovered. The minor planets are very small, being in general only a few miles in diameter. They are divided into three groups (Mars group, Chief group, and Jupiter group) according to their mean velocities.

The rapid discovery of planetoids by photography, especially by Wolf and Charlois, in recent years, has caused much confusion in records, 1892-1903.

PLANING-MACHINE. One for wood was constructed by Bramah, about 1802; and one for iron by Joseph Clement in 1825.

PLANTAGENET,* HOUSE OF, to which belonged fourteen English kings, from Henry II., 1154, to Richard III., 1485; see *England, Kings.*

PLANTATIONS, see *Trade.*

PLASSEY, in Bengal, India, the site of a battle fought between the British under Clive and the Hindoos under Surajah Dowlah, 23 June, 1757; 68,000 men were vanquished by 1000 British and about 2000 sepoys. The victory laid the foundation of our empire in India.

PLASTER OF PARIS. Gypsum, sulphate of lime, used for moulds, statuary, &c., first found at Montmartre, near Paris, whence its name. The method of taking likenesses by its use was first discovered by Andrea del Verrochio, about 1466.

* Fulke Martel, earl of Anjou, having contrived the death of his nephew, the earl of Brittany, in order to succeed to the earldom, his confessor sent him, in atonement for the murder, to Jerusalem, attended by only two servants, one of whom was to lead him by a halter to the Holy Sepulchre, the other to strip and whip him there, like a common malefactor. Broom, in French *genet,* in Latin *genista,* being the only tough, pliant shrub in Palestine, the noble criminal was smartly scourged with it, and from this instrument of his chastisement he was called *Planta-genista,* or Plantagenet; other accounts are given. *Skinner* and *Mézeray.*

PLATA, LA, see *Argentine Republic.*

PLATÆA (Bœotia, N. Greece), site of the battle between Mardonius, commander of the army of Xerxes of Persia, and Pausanias, commander of the Lacedæmonians and Athenians, 22 Sept. 479 B.C.; the same day as the battle of Mycale. Of 300,000 Persians scarce 3000 escaped with their lives. The Grecian army, about 110,000, lost but few men. The Greeks obtained immense plunder, and were henceforth delivered from the fear of Persian invasions. Platæa, as an ally of Athens, was destroyed by the Thebans, 372; and rebuilt by Philip II. after his victory at Chæronea, 338.

PLATE. In England, plate, with the exception of spoons, was prohibited in public-houses by statute 8 Will. III. (1696). The celebrated Plate act passed in May, 1756. This act was repealed in 1780. The act laying a stamp-duty upon plate passed in 1784; see *Goldsmiths' Company.* By 17 & 18 Vict. c. 96 (1854), gold wares were allowed to be manufactured at a lower standard; but a later act excepted marriage rings.—The art of covering baser metals with a thin plate of silver, either for use or for ornament (PLATING), said to have been invented by a Birmingham spur-maker, who began with making the branches of a pair of spurs hollow, and filling the hollow with a slender rod of steel. He continued to make the hollow larger and the iron thicker, till at last he merely coated the iron spur with silver; see *Electrotype.*

Mr Wilfred Joseph Cripps' "Old English Plate," a valuable work, containing the researches of Mr O. Morgan, published, 1878. His "Old French Plate," 1880.

Duty on silver plate to be reduced gradually till abolished, from 1 June, 1881; abolished 17 April, 1890.

Elizabethan salt-cellar realised 3000*l.*, at Christie's, 11 Dec. 1902.

PLATE-WAYS, on ordinary roads for waggons carrying goods, proposed at Liverpool about 1880, to supersede railways for cheapness; not adopted.

PLATFORM, see *Public Meetings.*

PLATINUM, the heaviest of all the metals, except iridium. The name originated with the Spaniards on account of its silvery colour; *Plata* signifying silver. It was found in the auriferous sand of the river Pinto, in South America, and was unknown in Europe until 1741, when don Antonio Ulloa announced its existence in the narrative of his voyage to Peru. *Greig.* In its ore have been found the metals palladium, rhodium, osmium, iridium, and ruthenium (*which see*). Platinum was rendered malleable and ductile by Dr. Wm. Hyde Wollaston, whose processes are described in the Royal Society's Bakerian lecture for 1829. He died in 1828, having, it is said, gained 30,000*l.* by his inventions. In 1859, M. H. Ste.-Claire Deville made known a new method of obtaining platinum from its ore, in great abundance and purity; and at the international exhibition of 1862 was shown a mass worth 3840*l.*, weighing 266½ lb., of a metal hitherto considered infusible, obtained by his process, employing the oxy-hydrogen flame. See *Philosophical Lamp.*

Platinotypes, photographic reproductions of pictures, by a peculiar process by Mr. F. Hollyer, specimens exhibited in the Dudley Gallery, Oct. 1892.

PLATONIC PHILOSOPHY, the most popular of all systems (see *Philosophy*). Plato's dialogues have been termed "Philosophy backed by

example." He was a disciple of Socrates, 409 B.C., and died 347. The leading feature of his mind was comprehensiveness. The Cambridge Platonists included Whichcote, Cudworth, John Smith, Henry More.

Professor Jowett's popular translation of "Plato's Dialogues" published in 1871; 3rd edition, 1893.

PLATONIC YEAR, the period of time which the equinoxes take to finish their revolution, at the end of which the stars and constellations have the same place with regard to the equinoxes that they had at first. Tycho Brahe says that this year or period requires 25,816 common years to complete it; Ricciolus computes it at 25,920; and Cassini at 24,800; at the end of which time some imagined that there would be a total and natural renovation of the whole creation.

PLATTSBURG. A British expedition against this place, a town of New York, on Lake Champlain, was designed under general sir George Prevost, but was abandoned after the naval force of England had suffered a defeat in an engagement with the Americans, 11 Sept. 1814, when the British squadron in Lake Champlain was captured; see *United States*.

PLAY-GROUNDS. In 1858 a society was established by the earl of Shaftesbury and other benevolent persons to provide play-grounds for the recreation of adults and the children of the humble classes. Ground was liberally offered by the government, and by the marquis of Westminster and others; and in 1859 an act of parliament was passed to facilitate grants of lands for this purpose, for which part of Smithfield was to be reserved. The scheme was not successful.

The Metropolitan Public Garden, Boulevard, and Playground association formed by lord Brabazon (aft. earl of Meath) and others in 1882 has done good service in the east of London.

The London Playing-fields association founded 1890; very active in obtaining places.

Hackney marsh (337 acres), purchased by the London county council and others as a playground for east London, opened by sir John Hutton, 21 July, 1894.

PLAYS, see *Drama* and *Theatres*.

PLEADINGS. In the early courts of judicature in England, pleadings were made in the Saxon language; and in Norman-French from the period of the conquest in 1066 until 1362. Pleadings were ordered to be in English by 36 Edward III. 1362, and Cromwell extended the rule to all legal proceedings 1650. In English law the proceedings are the mutual statements of the plaintiff's cause of action and the defendant's ground of defence.

PLEBEIANS, Plebes, or Plebs, the commons of Rome, as distinguished from the Patricians; see *Rome*, 494-366 B.C.

PLEBISCITUM, a term given to a law passed by the *comitia tributa*, an assembly of the Roman people in their tribes, first established in 491 B.C. The term has been revived in France and Italy, and applied to *Universal Suffrage* (*which see*).

PLETHYSMOGRAPH, an apparatus for detecting the state of the mind by observing the relations of the circulation of the blood from the heart to the brain, invented by M. Mossol, of Turin, 1882.

PLEVNA, Bulgaria, 27 miles N.N.W. of Nicopolis; near the river Vid; the site of very fierce conflicts during the Russo-Turkish war, 1877.

Occupied by the Russians, 6 July, but retaken by Osman Pacha, 18 July, and held by him after severe combats, with Schildner-Schuldner, 19, 20 July; with Krudener . . . 29-31 July, 1877

The Russians lost about 2000 killed, 4000 wounded. The Russian attack was considered rash, like that at Balaclava, and a disastrous check.

PLOTS, see *Conspiracies* and *Rebellions*.

PLOUGH. "Thou shalt not plough with an ox and an ass together." *Deut.* xxii. 10 (1451 B.C.). The Roman plough is minutely described by Virgil, about 31 B.C. Engines to plough grounds, whether inland or upland, were patented by David Ramsay and Thomas Wildgoose, in 1618; and many improvements in ploughs have been patented since. The application of steam power to ploughing was patented by John Upton in 1837, and by others since, more especially by lord Willoughby D'Eresby, the marquis of Tweeddale, and the earl of Caithness; see *Steam-Plough*. Petrol motor-ploughs are now in use.

PLOUGH MONDAY, in January, the first Monday after the Epiphany. It received the appellation from its having been fixed upon by our forefathers as the day upon which they returned to the duties of agriculture after enjoying the festivities of Christmas. *Ashe.* On Plough Monday, too, the ploughmen of the north country used to draw a plough from door to door and beg plough money to drink. *Bailey.*

On Plough Monday, the lord mayor of London holds annually at Guildhall a grand court of wardmote, at which the election of the common council and other officers on St. Thomas' day, 21 Dec., is confirmed.

PLUM. We have two native plums; our finer kinds came from Italy and Flanders about 1522. The *Diospyros Lotus*, the date plum, was brought from Barbary, before 1596; the Pishamin plum, *Diospyros virginiana*, from America, before 1629. Formerly damsons, apricots, and peaches went by this name, as raisins do to this day.

PLUMBAGO, see *Graphite*.

PLUMBERS. The company is dated 1611. A bill for their registration introduced into the commons in 1894; withdrawn, 15 Aug. 1894; passed, 10 March, 1902.

PLURALITIES. Clergymen have been restrained from holding more than one benefice by several statutes; the first being 21 Henry VIII. 1529. In 1838 an act was passed prohibiting the holding of more than two benefices except they were at a distance less than ten miles; and the law on this subject was still further amended in 1850, 1855, and 1885, provisions being made for the amalgamation of neighbouring benefices. See *Electors*.

PLURAL NUMBER, see *We*.

PLUS (+) AND MINUS (−). Professor De Morgan attributes these signs to either Christopher Rudolf, who published a book on algebra about 1522, or Michael Stifelius, about 1544.

PLYMOUTH, a fortified seaport in Devonshire, originally Sutton, was incorporated as Plymouth in 1439. It was in 1588 the rendezvous of the English fleet of 120 sail under Howard, Drake, &c., which pursued the Spanish armada. The fine hotel and assembly-rooms were burnt 6 Jan. 1863; loss about 50,000*l.* The National Association for Social Science met here, Sept. 1872. See *Armada*, 1588, 1890, *Breakwater*, and *Population*.

PLYMOUTH BRETHREN, a body of Christians calling themselves "the Brethren," first appeared at Plymouth about 1830. In 1851 they had 132 places of worship in England and Wales. They object to national churches as too latitudinarian, and to other dissenters as too sectarian. They receive into communion all who confess Christ, and own the Holy Ghost as his vicar. Their doctrines agree with those of most evangelical protestant churches, but they recognise no order of ministers. Mr. Darby, regarded as their founder, afterwards separated from them with some adherents.

PNEUMATIC DESPATCH COMPANY, to convey letters and parcels through tubes by means of atmospheric pressure and a vacuum. The company's act was passed 13 Aug. 1859, and tubes were laid down in Threadneedle-street on 12 Sept. 1860; and on 20 Aug. 1861, successful experiments were performed at Battersea. In 1862 tubes were laid down from the Euston railway station to the N.W. post-office in Camden-town, and on 21 Feb. 1863, the conveyance of the mail-bags began. In Oct. 1865, tubes had been laid down between Euston railway and Holborn; and on 7 Nov. several persons travelled in them. Engineer, Mr. Rammell. The company stopped through insufficient support, 1876. A pneumatic tube by Siemens, employed to transmit telegraphic messages, began about Jan. 1872.

PNEUMATIC LOOM, in which compressed air is the motive power, invented by Mr. Harrison, was exhibited in London in Dec. 1864. A company was formed to bring it into general use. Pneumatic tyre company, see *Velocipede*, 1896.

POET-LAUREATE. Selden could not trace the precise origin of this office.

Warton, in his *History of English Poetry*, states that in the reign of Henry III. there was a *Versificator Regis*, to whom an annual stipend was first paid of 100*s.*

Chaucer, on his return from abroad, assumed the title of poet-laureate; and in the twelfth year of Richard II., 1389, he obtained a grant of an annual allowance of wine.

In the reign of Edward IV., John Kay was laureate; Andrew Bernard was laureate, *temp.* Henry VII.; and John Skelton, *temp.* Henry VIII.

James I. in 1615 granted to his laureate a yearly pension of 100 marks; and in 1630, this stipend was augmented by letters patent of Charles I. to 100*l.* per annum, with an additional grant of one tierce of Canary Spanish wine to be taken out of the king's store of wine yearly. We believe that on Southey's appointment the tierce of Canary wine was commuted for 27*l.*

Laurence Eusden commenced a series of Birth-Day and New Year's Odes, which continued till the death of Pye, in 1813.

On the death of Warton its abolition was recommended by Gibbon, whose elegant compliment on the occasion still more forcibly applied on Wordsworth's death, in 1850—"This is the best time for not filling up the office, when the prince is a man of virtue, and the poet just departed was a man of genius."

POICTIERS (W. France), near which was fought the battle between Edward the Black Prince and John, king of France, in which the English arms triumphed, 19 Sept. 1356. The standard of France was overthrown, many of her nobility slain, and her king was taken prisoner, and brought to London; see *Tours* and *Vouglé*.

POISONING. A number of Roman ladies formed a conspiracy and poisoned their husbands. A female slave denounced 170 of them to Fabius Maximus, who ordered them to be publicly executed, 331 B.C. It was said that this was the first public knowledge they had of poisoning at Rome. Poisoning was made petty treason in England, and was punished by boiling to death (of which there are some remarkable instances), 23 Henry VIII. 1531; see *Boiling to death*. The frequency of cases of poisoning by means of arsenic, in England, caused the British legislature to pass a law rendering the sale of arsenic difficult (14 Vict. c. 13, 6 June, 1851). The sale of poison is now regulated by the Pharmacy act of 1868. Additional restrictions by act passed in 1885. The *Poisoned Grain Prohibition Act* passed 28 July, 1863.

A deadly poison, freely administered by Italians in the seventeenth century, was called *aqua tofana*, from the name of the woman Tofania, who made and sold it in small flat vials. She carried on this traffic for half a century, and eluded the police; but, on being taken, confessed that she had been a party in poisoning 600 people. Numerous persons were implicated by her, and many of them were publicly executed. All Italy was thrown into a ferment, and many fled, and some persons of distinction, on conviction, were strangled in prison. It appeared to have been chiefly used by married women who were tired of their husbands. Four or six drops were a fatal dose; but the effect was not sudden, and therefore not suspected. It was as clear as water, but the chemists have not agreed about its real composition. A proclamation of the pope described it as aquafortis distilled into arsenic, and others considered it as a solution of crystallised arsenic.

Between 1666 and 1676, the marchioness de Brinvilliers poisoned her father and two brothers and many others. She was executed, 16 July, 1676.

W. Palmer was executed in 1856, and Miss M. Smith tried in 1857, for poisoning; see *Trials*. Catherine Wilson, a noted poisoner, was executed on 20 Oct. 1862. Edward William Pritchard, M.D, was executed at Glasgow, 28 July, 1865, for the slow murder of his wife and her mother by antimony.

Nov. 1858, 17 persons died at Bradford through eating sweetmeats in which arsenic had been mixed by mistake. Mr Hodgson, a chemist, was tried for homicide, and acquitted.

Weltmann, a bookbinder at Posen, poisoned 4 wives and 2 children, about 1899.

Christiana Edmunds, of Brighton, was convicted of murdering a child by poisoned sweetmeats, other persons barely escaped (sentence remitted on the ground of insanity), 16 Jan. 1872.

Mary Ann Cotton, imprisoned Oct. 1872, suspected of poisoning 16 persons, principally children; convicted of poisoning her child, 7 March; executed at Durham, 24 March, 1873.

About 25 wives convicted of poisoning their husbands at Gross Bedakereh in Hungary; Theckla Popav was said to be the head of the conspiracy, Aug. 1882.

Catharine Flanagan and Margaret Higgins (sisters) convicted of poisoning Thomas Higgins, to obtain insurance money, 9 Feb.; other charges not tried; they confessed, and were executed, 3 March, 1884.

Mad. Van Der Linden convicted of many poisonings at Leyden, 3 May, 1885.

Albert Ier poisoned mother, wife, mistress, and others, 1872 et seq.; convicted at Paris 13 June; penal servitude, 14 Aug., 1885.

Dr. Thos. Cross convicted at Cork of poisoning his wife with arsenic and strychnine 17 Dec. 1887; executed 10 Jan. 1888.

Mrs. Maybrick charged with the murder of her husband James Maybrick by poisoning with arsenic, 6 June, 1889; she was tried before Mr. justice Stephen at Liverpool, and convicted 31 July—7 Aug.; sentence of death commuted to penal servitude for life, 22 Aug. 1889; released 1905.

* On 22 Feb. 1846, an Austrian force under general Collin, which had entered Cracow on the approach of armed bands of peasantry, was attacked and driven out of the town. A provisional government was then proclaimed by the insurgents, and two days afterwards they crossed the Vistula, expecting to be joined by the peasantry of Gallicia, who were solicited by the nobles and clergy to strike a blow in the cause of liberty. The Austrian government, in order to prevent this junction, excited in the peasantry a suspicion of the motives of the nobles, and offered a reward for every noble delivered up, alive or dead: a general massacre of the nobility and clergy in the circle of Tarnow followed: the insurgents from Cracow were defeated at Gdow, whence they retreated to Podgorze, a suburb of Cracow; here they were attacked by general Collin, and driven into Cracow on the 27th of February. The forces of the three powers then began to concentrate on Cracow; the people in the town opened negotiations with the Austrians about a surrender, and while these were going on a Russian corps entered the town without resistance, and soon afterwards the revolution was at an end.

POLE STAR or **POLAR STAR,** a star of the second magnitude, the last in the tail of the constellation called the *Little Bear.* As its nearness to the North Pole causes it never to set to those in the northern hemisphere, it is called the seaman's guide. Two stars in the constellation *Ursa Major*, or Great Bear, are called *pointers* to the Polar star. The discovery of the Pole star is ascribed by the Chinese to their emperor, Hong-ti, the grandson (they say) of Noah, who reigned and flourished 2970 B.C. *Univ. Hist.* Spectroscopic observations at Lick observatory prove the star to be a triple system, *i.e.*, a binary, with a revolution of about 4 days, moving round a third more distant star, Sept. 1899.

POLICIES OF ASSURANCE ACT, passed 20 Aug. 1867; see *Insurance*.

POLITICAL ECONOMY, the science which has for its object the improvement of the condition of mankind, and the promotion of civilisation, wealth, and happiness; was considered by Plato, Xenophon, and Aristotle. Its history in this country may be dated from the publication of sir Wm. Petty's "Treatise on Taxes," 1662, and "Political Arithmetic," 1691; Dr. Adam Smith's "Wealth of Nations," 1776. The works of J. S. Mill, M'Culloch, Malthus, Ricardo, Carey, Jevons, Sidgwick, Marshall, and Fawcett are celebrated. A professorship of political economy was established at Oxford by Mr. Henry Drummond, M.P., 1825; and at Cambridge, first by Mr. G. Pryme, in 1828; but regularly established by the university in 1863, Henry Fawcett (blind) being the first professor.

Archbishop Whately endowed a professorship at Trinity college, Dublin; Isaac Butt first professor 1832

POLITICAL OFFICES PENSIONS ACT passed 9 Aug. 1869.

POLITICAL UNIONS were formed in England in 1831 to carry the Reform Bill; the most important was that of Birmingham.

POLITICIANS. A politician is described as a man well versed in policy, or the well regulating and governing of a state or kingdom; a wise and cunning man. A man of artifice; one of deep contrivance. *South.* The term was first used in France about 1569. A new faction appeared, known by the name of Politicians, headed by the duc d'Alençon and the Montmorencies, and strengthened by the accession of the Huguenots in 1574. The duke was arrested and the Montmorencies sent to the Bastille.

POLKA, a dance said to have been invented between 1830 and 1834 in Bohemia, and to have obtained its name in Prague in 1835. It became very popular, and was introduced into England about 1844.

POLL ACT passed in Ireland by the Junto of the Pale, putting a price upon the heads of certain Irish; the earl of Desmond being then deputy, 5 Edward IV. 1465. This act long endured, see *Ireland*, 1465.

POLLENTIA (Piedmont, N. Italy), the site of a great victory of Stilicho, the Imperial general, over Alaric the Goth, 29 March, 403.

POLL-TAX or **CAPITATION TAX,** existed among the ancient Romans. It was first levied in England in 1380; and occasioned the rebellion of Wat Tyler (see *Tyler*), 1381. It was again levied in 1513. By the 18th Charles II. every subject was assessed by the head, viz., a duke 100*l.*, a marquis 80*l.*, a baronet 30*l.*, a knight 20*l.*, an esquire 10*l.*, and every single private person 12*d.*, 1667. This grievous impost was abolished by William III. 1689.

POLLUTION OF RIVERS, see *Rivers*.

POLO, the game of ball termed hockey played on horseback, became popular in England in 1872, having been introduced from India. Games were played by lancers and life-guards at Woolwich, 16, 19 July, 1872. A polo club was formed, and international contests held. Polo is said to have been an old Russian game, mentioned 1492 under the name of Chûgân, as brought from Persia. English beat the Americans, 3 games out of 4, June, 1902.

POLOTSK (Russia). The French under marshal Oudinot were here defeated by the Russians under general Wittgenstein, 30 and 31 July, 1812; the next day, the Russians were defeated. After several smaller actions with various results, Polotsk was stormed by the Russians, and retaken Oct. 1812.

POLTOWA, see *Pultowa*.

POLYGAMY, &c., was permitted among the early nations, and now by Mahometans and Mormons (*which see*). In Media, it was a reproach to a man to have less than seven wives. Among the Romans, Marc Antony is mentioned as the first who took two wives. The practice was forbidden by Arcadius, 394. The emperor Charles V. punished polygamy with death. In England, by stat. 1 James I. 1603, it was made felony, with benefit of clergy. It was formerly punished with transportation, but now by imprisonment or penal servitude; see *Marriages*. Abolished in the United States, 23 March, 1882.—POLYANDRY (where one woman has several husbands) is permitted in some eastern countries, the children having equal rights.

POLYGLOT, from two Greek words denoting "many languages," is chiefly applied to editions of the Bible in several languages.

Theophanes published a polyglot psalter, 1576.

1. The Complutensian Polyglot, in six vols. folio, was printed at Alcala (Complutensis), in Spain, 1502-14; the first edition published in 1522, at the expense of the celebrated cardinal Ximenes, costing 250,000 ducats. Six-hundred copies of it were printed; three on vellum. Count MacCarthy, of Toulouse, paid 48*l.* for one of these copies at the Pinelli sale.
2. The Polyglot, printed at Antwerp, by Montanus, 8 vols. folio, in 1559-69, at the expense of Philip II. of Spain.
3. Printed at Paris, by Le Jay, in 10 vols. folio, 1628-45.
4. Edited by Bryan Walton, in 6 vols. folio, 1654-7. Copies of all four are in the library of the British and Foreign Bible Society.
5. Edited by Dr. Samuel Lee, published by S. Bagster, 1 vol. folio, 1831.
6. Hexaglot bible: begun by Henry Cohn; completed by the rev. Edwd. R. De Levante and others, 6 vols. 4to, 1874.

POLYNESIA, a name recently given to the isles in the great Pacific Ocean, see *Hawaii*, *Otaheite*, *Sandwich Islands*, *Fiji Isles*, &c. These islands have been classified as Micronesia, Melanesia, and East Polynesia. The Polynesian society, Wellington, New Zealand, was founded in 1892. The archipelago explored by Mr. Fred. W. Christian, 1890-98.

POLYOLBION, a poetical description of the tracts, rivers, mountains, forests, &c. of Great Britain, with historical details, by Michael Drayton, published 1606-22; a new edition, 3 vols., by the rev. Richard Hooper, was published 1876.

POLYPES, also named Hydræ (*many-footed animals*), on account of their property of reproducing themselves when cut in pieces, every part soon becoming a perfect animal; first discovered by Leeuwenhoek, and described by him in the *Philosophical Trans.* 1703. The polypes are of the order Zoophytes, and are partly animal and vegetable.

POLYTECHNIC INSTITUTION, ROYAL, Regent-street, London, was erected by Thompson in 1838, opened 6 Aug. 1839, and enlarged in 1848. It contained a hall of manufactures with machines worked by steam-power, lecture theatres, &c., diving-bell, electric machine, &c. *Timbs.* The institution did not prosper commercially, and its decline was hastened by the fall of a staircase on 3 Jan. 1859, when one person was killed and many injured. The institution was closed in May, 1859, but was re-opened by a new company on 12 Nov. 1860; see *École Polytechnique*. Professor Pepper, the director for many years, resigned in 1872; returned, 1878. The classes were formed into a college, which was inaugurated by the earl of Shaftesbury, 7 Oct. 1872. Polytechnic institution announced to be closed on 27 Aug. 1881.; affairs wound up. Plant sold for about 2000*l.* 23 March, 1882. In 1882 it was occupied by the Polytechnic young men's christian institute, principally by the instrumentality of Mr. Quintin Hogg (suffocated by fumes in a geyser bath, 17 Jan. 1903), for educational purposes, with about 2000 members; over 17,000, Jan. 1903.

POMEGRANATE TREE (*Punica Granatum*) was brought to England from Spain before 1584.

POMERANIA, a Prussian province, N. Germany, was held by the Poles, 980, and by Denmark, 1210; made an independent duchy, 1479, and divided between Sweden and Brandenburg, 1648. The Swedish part, awarded to Denmark 1814, was given up to Prussia for Lauenburg, 1814; see *Denmark*; *Wrecks*, 1878.

POMPEII (S. Italy), an ancient city of Campania, was partly demolished by an earthquake in A.D. 63. It was afterwards rebuilt, but was overwhelmed by an eruption of Vesuvius, accompanied by an earthquake, on the night of 24 Aug. 79. The principal citizens were then assembled in an amphitheatre where public spectacles were exhibited. The ashes buried the whole city and covered the surrounding country. After a lapse of fifteen centuries, a countryman, as he was turning up the ground, found a bronze figure; and this discovery led to further search, which brought numerous other objects to light, and at length the city was uncovered. The part first cleared was supposed to be the main street, 1750. The kings of Naples greatly aided in exploring Pompeii, and the Italian government resumed the work in 1861. Many discoveries since.

A commemorative meeting of antiquarians and philosophers met at Pompeii, 29 Sept. 1879.

POMPEY'S PILLAR stands about three-quarters of a mile from Alexandria, between the city and the lake Mareotis. The shaft is fluted, and the capital ornamented with palm-leaves; the whole, which is highly polished, composed of three pieces, and of the Corinthian order. The column measures, according to some, 94 feet 10 inches

141, and even 160 feet; but of its origin, name, uses, and age, nothing is certain.

It is generally believed that the column has no reference to Pompey, to whom a mark of honour was, nevertheless, set up somewhere about this part. One supposes the edifice was dedicated to Vespasian, another to Severus; and Mr. Clarke, from a half-effaced inscription on the base, considered that Adrian is the person honoured; while many assert, from the same inscription, that it is dedicated "to Diocletian Augustus, most adorable emperor, tutelar deity of Alexandria."

PONDICHERRY (S.E. India), on the Coromandel coast, the chief of the French possessions in India. Area 115 square miles. Population 174,456. It was first settled by the French in 1674. It was taken from them by the Dutch in 1693, restored 1697; town besieged by the English, 1748; taken by them, Jan. 1761; restored, 1763; again taken, Oct. 1778; restored in 1783; taken 23 Aug. 1793, and in 1803; restored, 1815. Prosperous state of the colony reported Jan. 1889. Population, town of Pondicherry, 45,583.

PONT-À-CHIN, see *Espierres*.

PONT-À-NOYELLES. At this place, near Amiens, took place a fierce indecisive conflict, lasting from 11 A.M. to 6 P.M., between the Germans under Manteuffel and the French army of the north under Faidherbe, 23 Dec. 1870. Both sides claimed a victory; the French general asserted that he remained master of the field.

PONTEFRACT (formerly Pomfret) (S. York). At the castle (built 1080), Richard II. was confined and murdered, 10 Feb. 1400. Some writers assert that Richard escaped and died in Scotland. In this castle also, the earl Rivers, lord Grey, sir Thomas Vaughan, and sir Richard Haut or Hause, were put to death by order of the duke of Gloucester, then protector of England (afterwards Richard III.), about 26 June, 1483. The castle, which had stood four sieges, was dismantled in 1649. The first parliamentary election by ballot took place here, 15 Aug. 1872, very quietly. It lost one of its two members in 1885. Population, 1881, 8,798; 1891, 9,708; 1901, 13,398.

PONTIFFS (Latin *Pontifices*), the highest Roman sacerdotal order, established by Numa. The college first consisted of 4 patricians, with a chief (Pontifex Maximus); to these 4 plebeians were added, by the Ogulnian law, 300 B.C. Sylla increased the number to 15 (8 *majores*, 7 *minores*), (81), and Julius Cæsar to 16. T. Coruncanius, a plebeian, obtained this office, 254 B.C.

PONTUS, in Asia Minor, seems to have been a portion of Cappadocia, and received its name from its vicinity to the *Pontus Euxinus*. Artabazus was made king of Pontus by Darius Hystaspes in the 4th century B.C. His successors were mere satraps of the kings of Persia.

POOR. The poor of England, till the time of Henry VIII., subsisted as the poor of Ireland until 1838, entirely upon private benevolence. By statute 23 Edw. III. 1349, it was enacted that none should give alms to a beggar able to work. By the common law, the poor were to be sustained by "parsons, rectors of the church, and parishioners, so that none should die for default of sustenance;" and by 15 Rich. II. impropriators were obliged to distribute a yearly sum to the poor; but no compulsory law was enacted till the 27th Hen. VIII. 1535. The origin of the present POOR LAW is referred to the 43rd of Elizabeth, 1601, by which overseers were appointed for parishes. See *Settlement, Act of*.

* The census of Ireland in 1821 is the first which was made on such a basis as to afford a comparison with those of subsequent decades.

† The population for 1851 and for each succeeding census year includes the army at home and men on shore belonging to the royal navy, or to the merchant service, as well as those on board vessels in British waters.

PORCELAIN, see *Pottery*.

PORPHYROGENITUS, "born in the purple," a term applied to emperors of the east, born while their fathers were reigning.

PORT ARTHUR, China. See *Corea*, Nov. 1894; *Russia*, 1898 and 1904-5, also *Russo-Japanese War*, 1904-5. Surrender of Port Arthur to the Japanese by the Russian garrison, 2 Jan. 1905.

PORT BRETON, an isle near New Caledonia, South Pacific.

In 1877 the marquis Du Breil de Rays purchased of the king Maragano a quantity of land on which to found a colony. Glowing prospectuses were issued in France, a company was formed, and, the scheme being favoured by the legitimists, a large number of shares were purchased and much money received. Other speculating companies were formed, and colonial government officers nominated. In spite of warning and prohibition several vessels sailed in 1879 with emigrants to meet with misery, disease, and, to a large extent, with death. A few who had been landed in New Caledonia got back to France and published an account of their sufferings. The marquis and some of his associates were brought to trial 27 Nov. 1883; he was sentenced to four years' imprisonment and a fine of 3000 francs, his associates to shorter imprisonment, 2 Jan. 1884; on appeal, sentence confirmed, 14 March, 1884.

PORTE, or **SUBLIME PORTE**, official name of the court of the sultan of Turkey. Mostasem, the last of the Abbasside caliphs (1243-58), fixed in the threshold of the principal entrance to his palace at Bagdad a piece of the black stone adored at Mecca, and thus this entrance became the "porte" by eminence, and the title of his court. The sultans, successors of the caliphs, assumed the title. —*Bouillet*.

PORTEOUS MOB. Capt. Porteous, at Edinburgh, on 15 April, 1736, commanded the guard at the execution of Wilson, a smuggler, who had saved the life of a fellow criminal, by springing upon the soldiers around them, and by main force keeping them back, while his companion fled. This excited great commiseration, and the spectators pelted the guard with stones. Fearing a rescue, Porteous ordered his men to fire upon the mob, and seventeen persons were killed or wounded. He was found guilty of murder, 22 June, 1736; but the queen granted him a reprieve (the king being then in Hanover). The people, at night, broke open the prison, took out Porteous, and hanged him on a dyer's sign-post, in the Grass-market, 7 Sept. 1736. None of the rioters were ever detected.

PORTER. Dr. Ashe says that this malt liquor obtained its appellation on account of its having been drunk by porters in the city of London, about 1730. The number of licensed brewers in 1850, in England, was 2257; in Scotland, 154; and in Ireland, 96—total, 2507. On 17 Oct. 1814, at Meux's brewhouse two large vats of porter burst, destroying neighbouring houses. Several lives were lost; and the loss was between 8000 and 9000 barrels.

PORTERAGE ACT, regulating the charge for porterage of small parcels, passed 1799.

The Fellowship of Free Porters established in London in the 13th century, with exclusive privileges, relating to grain, &c., much reduced by the act of parliament of 1872 and the construction of docks. The institution was gradually dying out. After urgent demands and much delay, the distribution of the accumulated funds and property amongst the members was ordered by the rulers, 12 Oct. 1893. The fellowship disbanded by the court of common council, June, 1894.

Final payment of assets, 10,379*l.* 4*s.* 7*d.*, distributed to 495 members, 18 Dec. 1894.

PORT HAMILTON, see *Corea*.

PORT JACKSON (New South Wales), thirteen miles north of Botany Bay, was so named by capt. Cook in 1770; see *Sydney*. Here the duke of Edinburgh was shot by O'Farrell, a Fenian, 12 March, 1868, but soon recovered. The assassin was hanged, 21 April.

PORTLAND ADMINISTRATIONS. The first was the "coalition ministry," of which William Henry Cavendish, duke of Portland,* as first lord of the treasury, was the head. It obtained the name of the "coalition" ministry, and included lord North with Mr. Fox, formerly inveterate opponents. Formed 5 April, 1783; dissolved by Mr. Pitt's coming into power, Dec. same year.

FIRST ADMINISTRATION.

Duke of Portland, *first lord of the treasury.*
Viscount Stormont, *president of the council.*
Earl of Carlisle, *privy seal.*
Frederick, lord North, and Charles James Fox, *home and foreign secretaries*
Lord John Cavendish, *chancellor of the exchequer.*
Viscount Keppel, *admiralty.*
Viscount Townshend, *ordnance.*
Lord Loughborough, *chief commissioner of great seal.*
Charles Townshend, Edmund Burke, Richard Fitzpatrick, Richard B Sheridan, &c.

SECOND ADMINISTRATION, 25 March, 1807.

Earl Camden, *lord president.*
Lord Eldon, *lord chancellor.*
Earl of Westmorland, *lord privy seal*
Hon Spencer Perceval, lord Hawkesbury (afterwards earl of Liverpool), Mr Canning, and viscount Castlereagh (afterwards marquis of Londonderry), *home, foreign, and colonial secretaries.*
Earl Bathurst and Mr Dundas, *boards of trade and control.*
Lord Mulgrave, *admiralty.*
Earl of Chatham, *ordnance.*

PORTLAND CEMENT, first mentioned in a patent granted to Joseph Aspden, a bricklayer of Leeds, 1824. His son made the true cement at Northfleet. Its value as a building material was established by Mr. John Grant's tests, 1859-71. Portland cement concrete was used by Mr. E. A. Bernay in 1867.

PORTLAND ISLE (off Dorset), the English Gibraltar. Fortified before 1142. Portland castle was built by Henry VIII. about 1536. Off this peninsula a naval engagement commenced between the English and Dutch, 18 Feb. 1653, which continued for three days. The English destroyed eleven Dutch men-of-war and thirty merchantmen. Van Tromp was admiral of the Dutch, and Blake of the English.—Here is found the noted freestone used for building our finest edifices. The Portland lights were erected 1716 and in 1789. The pier, with nearly half a mile square of land, was washed into the sea in Feb. 1792. Prince Albert laid the first stone of the Portland breakwater, 25 July, 1849, and the last stone was laid by the prince of Wales, 10 Aug. 1872. Mr. James Rendel, the first chief engineer, was succeeded on his death in 1856 by Mr. (aft. sir) John Coode. The breakwater and other harbour works cost 1,033,600*l.* exclusive of convict labour. The Portland prison was established in 1848. A mutiny among the convicts here in Sept. 1858, was promptly suppressed. The king visits the prison and Whitehead's torpedo works, 4 April, 1902.

PORTLAND (or **BARBERINI**) **VASE.** This beautiful specimen of Greek art (composed of a glass-like substance, with figures and devices raised on it in white enamel; height 10 inches; diameter in the broadest part, 7; with a handle on each side) was discovered about the middle of the 16th century, in a marble sarcophagus in a sepulchre at a place called Monte del Grano, about 2½ miles from Rome. The sepulchre was supposed to have been that of the Roman emperor, Alexander Severus (222-235), and his mother Mammæa, and the vase is supposed to have been the cinerary urn of one of these royal personages. It was placed in the palace of the Barberini family, at Rome, where it remained till 1770, when it was purchased by sir William Hamilton, from whose possession it passed to that of the duchess of Portland. 1787; at the sale of her effects, it is said to have been bought by the then duke of Portland, who, in 1810, deposited it (on loan) in the British museum. On 27 Feb. 1845, this vase was smashed to pieces with a stone by a man named William Lloyd; it was skilfully repaired, and is now shown to the public in a special room. Josiah Wedgwood made a mould of it, and took a number of casts.

PORT MAHON, see *Minorca*.

PORTO BELLO (S. America), discovered by Columbus, 2 Nov. 1502, was taken by Morgan the buccaneer in 1668; by the British under admiral Vernon, from the Spaniards, 21 Nov. 1739, and the fortifications destroyed. Before the abolition of the trade by the galleons, in 1748, it was the great mart for the rich commerce of Peru and Chili.

PORTO FERRAJO, capital of Elba (*which see*); built and fortified by Cosmo I., duke of Florence, in 1548. The fortifications were not finished till 1628, when Cosmo II. completed them with great magnificence; see *France*.

PORTO NOVO (S. India). Here sir Eyre Coote, with about 9500 men and 55 light field-pieces, skilfully defeated Hyder Ali, ruler of the Carnatic, with 80,000 men and some heavy cannon, 1 July, 1781. Hyder lost about 10,000, the Briti 587 killed and wounded.—**PORTO NOVO**, W. Africa, a French settlement on the coast of Dahomey, *which see* (1890 *et seq.*).

PORTO RICO, a West India island, belonging to Spain; discovered by Columbus in 1493. Attacks on it by Drake and Hawkins repulsed, 1595. Revolt suppressed, 1823. Slavery abolished, 23 March, 1873. Ceded to United States, 10 Dec. 1898; see *Spanish American War*. Fearful hurricane, many deaths, 7 Aug. 1899; see *West Indies*.

PORT PHILLIP (New S. Wales), original name of the colony of Victoria (*which see*).

PORTRAIT GALLERY, &c., see *National Portrait Gallery* and *Composite Portraits*.

The Society of Portrait Painters held its first exhibition at the Institute of Painters in Water Colours in Piccadilly, July, 1891. The society includes the most eminent artists. Annual autumn exhibitions.

The formation of a "British Museum of Portraits" (photographs) was proposed by Mr. James Glaisher in 1864, and partly begun. The undertaking resumed mainly by the exertions of Mr. Glaisher and the Amateur Photographic association, and a collection of portraits deposited in the art department at South Kensington museum, July, 1891

PORTREEVE (derived from Saxon words signifying the governor of a port or harbour). The chief magistrate of London was originally so styled;

* Born 1738; became lord chamberlain, 1765; lord lieutenant of Ireland, 1782; premier, 1783; home secretary, 1794; lord president, 1801; premier again, 1807; died 1809, when Mr. Spencer Perceval became premier.

but Richard I. appointed two bailiffs, and afterwards London had mayors. *Camden*; see *Mayors*.

PORT ROYAL (Nova Scotia), capital of the French colony, Acadie, founded in 1604; after having been taken and restored several times, it was finally acquired by the British in 1710, and named Annapolis.

PORT ROYAL (Jamaica), once a considerable town, was destroyed by earthquakes in 1602 and 1692; laid in ashes by fire in 1702; reduced to ruins by an inundation of the sea in 1722; and destroyed by a hurricane in 1774. After these calamities, the custom-house and public offices were removed to Kingston. Port Royal was again greatly damaged by fire in 1750; by another awful storm in 1784; and by a devastating fire in July, 1815; in 1850 it suffered by cholera.

PORT ROYAL DES CHAMPS (near Paris) was a French Cistercian convent, founded by Odo, bishop of Paris, at the wish of king Philip Augustus, 1204. Having fallen into decay, it was revived and reformed in 1608 by Angelica Arnauld. In 1625 the increased community removed to Paris. The Port Royal des Champs, in 1656, became the retreat of the Arnaulds, Tillemont, Pascal, Lancelot, and other eminent Jansenists, who devoted themselves to education, and produced the Port Royal grammars, logic, and other works. This institution was condemned by the pope in 1709, and the buildings were pulled down, and tombs desecrated, by the order of Louis XIV., in 1710. The Port Royal at Paris was suppressed, with other monasteries, in 1790.

PORTUGAL, the ancient Lusitania. The present name is derived from Porto Callo, the original appellation of Oporto. After a nine years' struggle, under Viriathes, a brave able leader, the Lusitanians submitted to the Roman arms about 137 B.C. Portugal underwent the same changes as Spain on the fall of the Roman empire. There are in Portugal two universities, that of Coimbra, founded in 1308, and the smaller one of Evora, founded in 1533. Lisbon, the capital (pop. 1900, 365,009), has its royal academy, and the small town of Thomar has an academy of sciences; but in general literature is at a low ebb in Portugal. The poet Camoens, called the Virgil of his country, and author of the *Lusiad* (1569), translated into English by Mickle, was a native of Lisbon. The constitution, granted in 1826, was revised in 1852. Population of the kingdom and colonies, 1900: kingdom, 5,016,267; colonies (Madeira and Azores), 406,865; revenue (estimated), 1902–3, 12,203,000*l.*; expenditure, 12,415,000*l.*; imports, 1904, 17,812,000*l.*; exports, 10,900,000*l.*

POSITIVE PHILOSOPHY set forth by Auguste Comte, an eminent mathematician, born 19 Jan. 1798: died at Paris, 5 Sept. 1857, succeeded by M. Pierre Laffitte as director of positivism; died, aged 80, early Jan. 1903. M. P. Emile Littré, the great French philologist, ardently embraced the system, and published "De la Philosophie Positive," in 1845.—See *Calendar*.

Comte's "Cours de Philosophie Positive," published 1830-42; "Système de Politique Positive, ou Traité de Sociologie, instituant la Religion de l'Humanité (l'amour pour principe, l'ordre pour base, et le progrès pour but)," 1851-4.

It professes to base itself wholly on positive facts or observed phenomena, and rejects all metaphysical conceptions, which it considers negatives, having nothing real or true in them, and dispenses with the science of mind. It sets aside theology and metaphysics as two merely preliminary stages in life; and abandons all search after causes and essences of things, and restricts itself to the observation and classification of phenomena and the discovery of their laws. Comte asserted that Europe had now arrived at the third stage of its progress

Positivism does not recognise the supernatural or the future state.

"The Church of Humanity" is a modified form of positivism, described by Mr. Richard Congreve, an ardent comtist (*Pall Mall Gazette*, 17 Jan. 1884); he died, aged 81, 5 July, 1899.

POSSIBILISTS. A section of the liberal party in Spain; aiming at reforms: Sen. Castelar, a chief, Oct. 1883.

The name was also given to the workmen's party in Paris, who aimed at effecting social reforms by legal methods; they are said to have prevented a revolutionary outbreak of the violent Blanquists, or autonomists, at the presidential election, 3 Dec 1887.

POSTAL UNION, GENERAL, was established by the Treaty of Berne, signed 9 Oct. 1874, and took effect from 1 July, 1875. From time to time conferences have been held.

POSTING. Post-chaises were invented by the French, and, according to Grainger, were introduced into this country by Mr. William Tell, son of the writer on husbandry. Posting was fixed by statute of Edward VI. at one penny per mile, 1548. By a statute, re-establishing the post-office, none but the postmaster or his deputies could furnish post-horses for travellers, 1660. The post-horse duty was imposed in 1779. Post-horse duty yielded, in 1852, in England, 128,501*l.*, and in Scotland, 16,933*l.*

POSTS, said to have originated in the regular couriers established by Cyrus, who erected post-houses throughout the kingdom of Persia, about 550 B.C. Augustus was the first who introduced this institution among the Romans, 31 B.C. This was imitated by Charlemagne about A.D. 800.—*Ashe.* Louis XI. first established post-houses in France owing to his eagerness for news, and they were the first institution of this nature in Europe, 1470.—*Hénault.*

POST-OFFICE OF ENGLAND. In England, in the reign of Edward IV. 1481, riders on post-horses went stages of the distance of twenty miles from each other, in order to procure the king the earliest intelligence of the events that passed in the course of the war that had arisen with the Scots.—*Gale.* Richard III. improved the system of couriers in 1483. In 1543 similar arrangements existed in England.—*Sadler's Letters.* Post communications between London and most towns of England, Scotland, and Ireland, existed in 1635.—*Strype.*

The first chief postmaster of England, sir Thomas Randolph, appointed by queen Elizabeth . . 1581

James I. appointed Matthew de l'Equester as foreign postmaster, 1619; and Chas I. appointed William Frizell and Thomas Witherings . . . 1632

A proclamation of Chas. I, "whereas to this time there hath been no certain intercourse between the kingdoms of England and Scotland, the king now commands his postmaster of England for foreign parts to settle a running post or two to run night and day between Edinburgh and London, to go thither and come back again in six days," 1631

The king commanded his "postmaster of England for foreign parts," to open a regular communication by running posts between the metropolis and Edinburgh, West Chester, Holyhead, Ireland, Plymouth, Exeter, &c (Rates of postage—1 letter carried under 80 miles 2*d*; under 140 miles, 4*d*; above that distance in England, 6*d*, to any part of Scotland, 8*d*)

An enlarged office erected by the parliament in 1643, and one more considerable in 1657, with a view "to benefit commerce, convey the public dispatches, and as the best means to discover and prevent many dangerous wicked designs against the commonwealth by the inspection of the correspondence" 1657

POST-OFFICES.

THE GENERAL POST-OFFICE of London was originally established in Cloak-lane, near Dowgate-hill, whence it was removed to the Black Swan, in Bishopsgate-street. After the great fire of 1666 it was removed to the Two Black Pillars, in Brydges-street, Covent-garden, and afterwards (about 1690) to sir Robert Viner's mansion in Lombard-street. It was transferred to the building in St. Martin's-le-Grand, erected on the site of an ancient college, from designs by H. Smirke, 23 Sept. 1829. Foundation of a new general post-office laid 16 Dec. 1870; occupied 1873; additional buildings completed, 1894. Additional buildings commenced 1905.

The new post-office of Dublin opened, 6 Jan. 1818.

The foundation of a new post-office at Edinburgh was laid by the prince consort in Oct. 1861.

POTASSIUM, a remarkable metal, discovered by Humphry Davy, who first succeeded in separating it from its oxide, potash, by means of a powerful voltaic battery, in the laboratory of the Royal Institution, London, about 19 Oct. 1807; and also the metals *Sodium* from soda, *Calcium* from lime, &c. The alkalies and earths had been previously regarded as simple substances. Potassium ignites on contact with moisture.

POTATOES, natives of Chili and Peru, generally considered to have been brought to England from Santa Fé, in America, by sir John Hawkins, 1565. Others ascribe their introduction to sir Francis Drake, in 1586; their general introduction, 1592. Their first culture in Ireland is referred to sir Walter Raleigh, who had large estates in that country, about Youghal, in the county of Cork. It is said that potatoes were not known in Flanders until 1620. A fine kind of potato was first brought from America by Mr. Howard, who cultivated it at Cardington, near Bedford, 1765; and its culture became general soon after. The *failure of the potato crop* in Ireland, several years, especially in 1846, caused famine, to which succeeded pestilent disease of which multitudes died; among them many priests and physicians. Parliament voted ten millions sterling; and several countries of Europe, and the United States of America, forwarded provisions and other succours; see *Ireland*. In 1868 it was reported that in England and Wales 500,000 acres, and in Ireland 1,000,000 acres, were under cultivation for potatoes. Potato disease prevailed greatly in England, autumn of 1872. In consequence the value of potatoes imported in 1872 was 1,654,240*l.*; in 1871, only 225,732*l.*; in 1877, 7,964,840 cwt., value, 2,348,749*l.*; in 1883, 5,149,509 cwt., value 1,585,260*l.*; in 1887, 2,763,357 cwt.; in 1890, 1,940,100 cwt.; in 1900, 8,910,932 cwt.; in 1902, 5,699,090 cwt., value, 1,589,432*l.*; in 1904, 9,993,965 cwt., value 2,437,971*l.* Temporary alarm respecting the American Colorado beetle or bug, autumn, 1876. Acres cultivated for potatoes in Great Britain in 1867, 492,217; 1871, 627,691; 1877, 513,471; 1883, 543,455; in 1887, 559,652; in

POTTERY AND PORCELAIN. The manufacture of earthenware (the ceramic art) existed among the Jews as an honourable occupation (see 1 *Chron.* iv. 23), and the power of the potter over the clay as a symbol of the power of God is described by Jeremiah, 605 B.C. (ch. xviii.) Earthenware was made by the ancient Egyptians, Assyrians, Greeks, Etruscans, and Romans.

The Majolica, Raffaelle, or Umbrian ware of the 15th century was probably introduced into Italy from the Moors from Majorca. Raffaelle and other artists made designs for this ware.

POTWALLOPERS (or boilers). Before the passing of the reform act of 1832, persons who had boiled a pot for six months claimed the right to vote for the election of members of Parliament.

POULTRY. An exhibition of poultry was held in London, Jan. 1853, and similar exhibitions have been held at the Crystal palace since. A national poultry conference (first) opened at Reading by Mr. Walter Long, 11 July, 1899.

POULTRY COMPTER (London) was one of the most noted of the old city prisons. The compter of Wood-street belonged to the sheriff of London, and was made a prison-house in 1555. This latter and Broad-street compter were re-built in 1667. The Giltspur-street prison, built to supply the place of the old city compters, was pulled down in 1855. The Poultry chapel was erected on the site of the Poultry compter, in 1819.—*Leigh.*

POUND, from the Latin *Pondus*. The value of the Roman *pondo* is not precisely known, though some suppose it was equivalent to an Attic *mina*, or 3*l.* 4*s.* 7*d.* The pound sterling was in Saxon times, about 671, a pound troy of silver, and a shilling was its twentieth part; consequently the latter was three times as large as it is at present.—*Peacham.* Our avoirdupois pound weight came from the French, and contains sixteen ounces; it is in proportion to our troy weight as seventeen to fourteen; see under *Standard.*

POYNINGS' LAW, named after sir Edward Poynings, lord deputy of Ireland at the time of its passing, at Drogheda, 13 Sept. 1494. By this law all legislation in the Irish parliament was confined to matters first approved of by the king and the English council. The act was repealed, together with the English Declaratory act of the 6th of Geo. I. and other obnoxious Irish statutes, April, 1782.

PRÆMONSTRATENSIAN ORDER, or WHITE CANONS, founded in 1120 by Norbert, a monk, at Pré Montré, near Laon. Its first house in England was founded by Peter de Gousla or Gousel, at Newsham, in Lincolnshire, 1143—*Tanner*; according to others in 1146. The order spread widely through England soon after. The house at Newsham was dedicated to St. Mary and St. Martial.—*Lewis*.

PRÆMUNIRE, LAW OF. This law (which obtained its name from the first two words "*Præmoneri*," or "*Præmunire facias*," "Cause to be forewarned," which is applied to any offence in the way of contempt of the sovereign or his government) derived its origin from the aggressive power of the pope in England. The offence introduced a foreign power into the land, and created an *imperium in imperio*. The first statute of Præmunire was enacted 35 Edward I. 1306.—*Coke*. The pope bestowed most of the bishopries, abbeys, &c., before they were void, upon favourites, on pretence of providing the church with better qualified successors before the vacancies occurred. To put a stop to these encroachments, Edward III. enacted a statute in 1353. The statute commonly referred to as the statute of Præmunire is the 16th of Richard II. 1392. Several similar enactments followed. The assertion that parliament is independent of the sovereign was declared a *præmunire*, 1661.

PRÆTORIAN GUARDS, instituted by the emperor Augustus (13 B.C), their numbers enlarged by Tiberius, Vitellius, and their successors. At first supporters of the imperial tyrants, they eventually became their masters, actually putting up the diadem for sale (as in March, 193 A.D, when it was bought by Didius Julianus). They committed many atrocities, and were finally disbanded by Constantine in 312.

PRÆTORS, Roman magistrates, afterwards termed consuls (*which see*), were elected at the establishment of the republic, 509 B.C. In 366 the *prætor urbanus* was appointed for the city, and the *prætor peregrinus* for foreigners, 246 B.C. Two prætors were appointed for the provinces, 227, and two more, 197. Sylla, the dictator, added two, and Julius Cæsar increased the number to 10, which afterwards became 16. After this, their number fluctuated, being sometimes 18, 16, or 12; till, in the decline of the empire, their dignity decreased, and their numbers were reduced to three.

PRAGA, a suburb of Warsaw, where a bloody battle was fought, 4 Nov. 1794; 30,000 Poles were killed by the Russian general Suwarrow. Near here, on 25 Feb. 1831, the Poles, commanded by Skrznecki, defeated the Russians, under general Giemsar, who lost 4000 killed and wounded, 6000 prisoners, and 12 pieces of cannon.

PRAGMATIC SANCTION, an ordinance relating to church and state affairs. The ordinances of the kings of France are thus called; in one the rights of the Gallican church were asserted against the usurpation of the pope in the choice of bishops, by Charles VII. in 1438. The Pragmatic Sanction for settling the empire of Germany in the house of Austria, 1439. The emperor Charles VI. published the Pragmatic Sanction, whereby, in default of male issue, his daughters should succeed in preference to the daughters of his brother Joseph I., 19 April, 1713; and he settled his dominions on his daughter Maria Theresa, in conformity thereto, 1723 She succeeded in Oct. 1740; but it gave rise to a war, in which most of the powers of Europe were engaged, and which lasted till 1748.

PRAGUE, the capital of Bohemia (*which see*). The old city was founded about 759; the new city rebuilt in 1348 by the emperor Charles IV., who made it his capital and erected a university. Prague has suffered much by war. Population, 1880, 162,323; 1890, 184,109; 1900, 389,741.

PRASLIN MURDER. The duchesse de Choiseul-Praslin was murdered by her husband, the duc de Praslin, at his own house, in Paris, 17 Aug. 1847. She was the only daughter of the celebrated marshal Sebastiani, the mother of nine children, and in her forty-first year. Circumstances were so managed by him as to give it the appearance of being the act of another. During the arrangements for the trial, the duke took poison.

PRAYER-BOOK, see *Common Prayer*. The Prayer-book and Homily Society, London, was founded in 1812.

Prayer-book Revision Society, established 1854, for promoting a revision of the book of common prayer, and such liturgical reforms in the church of England as

in the opinion of the society would strengthen its Protestant and scriptural character.

PRAYERS. "Then began men to call upon the name of the Lord" (*Gen.* iv. 26), 3875 B.C. The mode of praying with the face to the east was instituted by pope Boniface II. A.D. 532. Prayers for the dead, first introduced into the Christian church about 190, are advocated by some ministers of the English church. Prayers addressed to the Virgin Mary and to the saints are said to have been introduced by pope Gregory, 593. See *Liturgies*.

PREBENDARY, a clergyman attached to a cathedral or collegiate church, who receives an income termed *prebenda* for officiating at stated times. The office slightly differs from that of a canon.

PRECEDENCE was established in very early ages, and was amongst the laws of Justinian. In England the order of precedency was regulated chiefly by two statutes, 31 Hen. VIII. 1539, and 1 Geo. I. 1714.

PRECEPTORS, COLLEGE OF, Bloomsbury, London, established in 1846, and incorporated by royal charter 28 March, 1849, for promoting sound learning, especially among the middle classes, by the instruction of teachers, and by the examination of pupils at stated times.

Professorship (the first in England) of the science and art of education, instituted, 1873.
New building in Bloomsbury Square opened by the prince of Wales, 30 March, 1887.

PREDESTINATION (*Ephes.* i.). The doctrine concerning this is defined in the seventeenth article of the Church of England (*Ephes.* i. and *Romans* ix.). It was maintained by St. Augustin, and opposed by Pelagius, in the early part of the 5th century. In later times it has been maintained by the Augustinians, Jansenists, the church of Scotland, and many dissenters (termed Calvinistic), and opposed by the Dominicans, Jesuits, and dissenters (termed Arminian), especially by the Wesleyan methodists.

PREFERENTIAL TARIFFS.

PREHISTORIC ARCHÆOLOGY began in Sweden, and first systematised by Mr. Nillson. Daniel Wilson's "Archæology and Pre-historic Annals of Scotland," published 1851. An international congress for treating prehistorical subjects met at Neuchâtel in 1866, and at Paris in 1867. At the third meeting at Norwich, Aug. 1868, it assumed the name of "International Congress for Prehistoric Archæology," and published its transactions in 1869. A meeting was held at Stockholm 7-14 Aug. 1874. See *Barrows*, *Man*, *Ancient Monuments* and *Lake Dwellings*.

Sir John Lubbock divides prehistoric archæology into four great epochs: 1. The Drift or Palæolithic or old stone age; 2 The Neolithic or polished stone age; 3. The Bronze age; 4 The Iron age, when bronze was superseded.

PRE-RAPHAELITE SCHOOL, a name given about 1850, to J. E. Millais, Wm. Holman Hunt, D. G. Rossetti, and other artists, who opposed the routine conventionality of academic teaching, and resolved to study nature as it appeared to them, and not as it appeared in the antique. For a short time they published "The Germ, or Art and Poetry," beginning in 1850. Their works have been much criticised, but their influence has been beneficial. Their principles were much advocated by the great art-critic, John Ruskin.

PREROGATIVE COURT, in which formerly all wills were proved, and all administrations taken, which belonged to the archbishop of Canterbury by his prerogative, a judge being appointed by him to decide disputes.* Appeals from this court, previously to the pope, were commanded to be made to the king in chancery, 1533; to the privy council in 1830-2. This court was abolished, and the *Probate Court* established in 1857. Sir John Dodson, the last judge, died in 1858.

PREROGATIVE, ROYAL. In England the sovereign is the supreme magistrate, and it is a maxim that he *can do no wrong*. He is the head of the established church, of the army and navy, and the fountain of office, honour, and privilege, but is subject to the laws, unless exempted by name. The royal prerogatives were greatly exceeded by several despotic sovereigns, such as Elizabeth, James I., and Charles I. Elizabeth used the phrase "We, of our Royal prerogative, which we will not have argued or brought in question" (1591). James I. told his parliament "that as it was blasphemy to question what the Almighty could do of His power, so it was sedition to inquire what a

* The records date from 1383; but the testamentary jurisdiction from that year to 1433 was exercised by the court of arches. Then abp. Stafford transferred it to a new court; president, the commissary of the prerogative court of Canterbury. There was also a prerogative court of the archbishop of York.

king could do by virtue of his prerogative." These extreme doctrines were nullified by the revolution of 1688, and the exercise of the prerogative is now virtually subject to parliament; see *Lords*.

PRESBURG, the ancient capital of Hungary, where the diets were held and the kings crowned. On 26 Dec. 1805, a treaty was signed between France and Austria, by which the ancient states of Venice were ceded to Italy; the principality of Eichstadt, part of the bishopric of Passau, the city of Augsburg, the Tyrol, all the possessions of Austria in Suabia, in Brisgau, and Ortenau, were transferred to the elector of Bavaria, and the duke of Würtemberg, who, as well as the duke of Baden, were then created kings by Napoleon. The independence of the Helvetic republic was also stipulated. A new iron and stone railway and passenger bridge over the Danube was inaugurated by the emperor, 30 Dec. 1890. Population, 1890, 52,444; 1900, 61,861.

PRESBYTERIANS are so called from their maintaining that the government of the church appointed in the New Testament was by presbyteries, or association of ministers and ruling elders, equal in power, office, and in order. "The elders (Greek, *presbyteros*) I exhort, who am also an elder (*sympresbyteros*)" 1 Peter v. 1. Presbyterianism was accepted by parliament in place of episcopacy in England in 1648, but set aside at the restoration in 1660. It became the established form of church government in Scotland in 1696. Its tenets were embodied in the formulary of faith said to have been composed by John Knox, in 1560, which was approved by the parliament, and ratified, 1567, and finally settled by an act of the Scottish senate, 1696, afterwards secured by the treaty of union with England in 1707. The first Presbyterian meeting-house in England was established at Wandsworth, Surrey, 20 Nov. 1572.

PRESS ASSOCIATION (a company "limited") was established by the newspaper proprietors of London and the provinces, at a meeting at Manchester, 29 June, 1868, to make arrangements to enable them to avail themselves of the increased facilities for the speedy transmission of news afforded by the post office, in consequence of the purchase of the rights of all the telegraph companies, authorised by the Telegraph Act of 1868. The organisation of the association was completed at a meeting in London, 3 March, 1869. The Provincial Newspaper Society, out of which it sprang, was founded in 1836, and became the Newspaper Society in 1889. Since 1868 the number of good daily provincial newspapers, containing the latest news of the world, has very greatly increased. Foreign press association registered as a society, March, 1898.

PRESS, LIBERTY OF THE The *imprimatur* "let it be printed" was much used on the title-pages of books printed in the sixteenth and seventeenth centuries. The liberty of the press was severely restrained, and the number of master-printers in London and Westminster limited by the Star Chamber, 13 Charles I., July 1, 1637. John Milton published his noble work, "Areopagitica; or, a Speech for the Liberty of Unlicensed Printing," 1644. See *Fourth Estate*.

PRESTON (Lancashire). Near here Cromwell totally defeated the royalists under sir Marmaduke Langdale, 17 Aug. 1648. Preston was taken in 1715 by the Scotch insurgents, under Forster, who proclaimed king James VII. They were defeated in a battle on 12, 13 Nov. by generals Willes and Carpenter, who with the royal army invested Preston on all sides. The Scots laid down their arms, and their nobles and leaders were secured; some were shot as deserters, and others sent to London pinioned and bound together, to intimidate their party.—The stoppage of the cotton manufacture in 1861 and 1862, through the civil war in America, occasioned great suffering in Preston. Population, 1901, 115,055.

"*The Preston guild Merchant festival*," said to have been instituted in Saxon times, recorded as beginning 1328, and to have been kept once in 20 years regularly since 1562, was duly celebrated in Sept 1862, Sept. 1882, and Sept. 1902

PRETORIA, capital of the Transvaal colony, in the neighbourhood of the goldfields of Lydenburg, situated 90 miles N.E. of Potchefstroom, and 980 miles from Cape Town. It derives its name from Andries Pretorius, who, during the Boer trek, by his military skill, waged war with the Zulus and defeated them on several occasions. Formerly the capital of the Transvaal or S. African republic. During the war in S. Africa 1899–1902 (*which see*) it was occupied by lord Roberts 5 June, 1900, and a new government under British authority instituted. The city has several handsome public buildings. Population (1899), 12,500.

PRIDE'S PURGE. On the 6th Dec. 1648, colonel Pride, with two regiments, surrounded the house of parliament, and seizing in the passage forty-one members of the Presbyterian party, sent them to a low room, then called *hell*. Above 160 other members were excluded, and none admitted but the most furious of the Independents. The privileged members were named the *Rump parliament*, which was dismissed by Cromwell, 20 April, 1653.

PRIENE, one of the twelve cities of the Ionian league in Asia Minor. The temple of Minerva Polias, founded here by Alexander the Great, and the work of Pythios, was excavated by Mr. R. P. Pullan, for the Dilettanti Society, in 1868-9.

PRIEST (derived from *presbyteros*, elder), in the English church the minister who presides over the public worship. In *Gen* xiv. 18, Melchizedek king of Salem is termed "priest of the most high God." (1913 B.C.; see *Hebrews* vii.) The Greek *hiereus*, like the Jewish priest, had a sacrificial character, which idea of the priesthood is still maintained by the Romanists and those who favour their views. Among the Jews, the priests assumed their office at the age of thirty years. The dignity of high or chief priest was fixed in Aaron's family, 1491 B.C. After the captivity of Babylon, the civil government and the crown were superadded to the high priesthood; it was the peculiar privilege of the high priest, that he could be prosecuted in no court but that of the great Sanhedrim. The heathens had their arch-flamon or high priest, resembling the Christian archbishop. For "Priest in Absolution," see *Holy Cross*.

PRIMER. A book so named from the Romish book of devotions, and formerly set forth or published by authority, as the first book children

should publicly learn or read in schools, containing prayers and portions of the scripture. Primers were printed 1535, 1539. Henry VIII. issued a prayer-book called a "primer" in 1545. The three were published by Dr. Burton in 1834.

PRIMITIVE CULTURE, see *Civilisation.*

PRIMOGENITURE, RIGHT OF. A usage brought down from the earliest times. The first-born in the patriarchal ages had a superiority over his brethren, and in the absence of his father was priest to the family. In some parts of England, by the ancient customs of gavel-kind and borough-English, primogeniture was superseded. It came in with the feudal law, 3 Will. I. 1068. The rights of primogeniture abolished in France, 1790. "Primogeniture," by Mr. Evelyn Cecil, published Feb. 1895.

PRIMROSE LEAGUE, formed in 1884 in memory of the late lord Beaconsfield (with whom the primrose is said to have been a favourite flower) and in support of conservative principles. He died 19 April, 1881, and the anniversary of that day is termed "Primrose Day," when the flower is generally worn by his admirers, and his statue in Parliament-square decorated.

The league, which began with under a thousand members, was declared to consist of 810,228 knights, dames, and associates, with 1,992 "habitations" on 20 May, 1889; 1,733,696 members, 2,475 habitations 1905
The league issues great number of political leaflets and songs. "Habitations" have been established in Scotland and Ireland
Annual meetings are held in the Albert hall, London.

PRINTERS' PENSION SOCIETY (now termed "Printers' Corporation"), founded 1827; chartered, 1865; almshouses instituted, 1841; orphan schools have been set up.

PRINTING. Block printing is said to have been invented by the Chinese about 593 A.D., movable types made in the 10th century. The honour of first printing with single types in Europe has been appropriated to Mentz, Strasburg, Haarlem, Venice, Rome, Florence, Basle, and Augsburg; but the names of the three first only are entitled to attention; the early history is very doubtful, and the subject of much controversy; see *Press.*

Adrian Junius awards the honour of the invention to Laurenzes John Koster, of Haarlem, "who printed with blocks, a book of images and letters, *Speculum Humanæ Salvationis*, and compounded an ink more viscous and tenacious than common ink, which blotted, about 1438."
[The leaves of this book, being printed on one side only, were afterwards pasted together]
[In 1859, Mr Samuel Leigh Sotheby issued an elaborate work compiled by his father and himself, entitled "*Principia Typographica*," containing fac-similes, &c, of the block-books of the 15th century; and Mr J Russell Smith published a fac-simile of the *Biblia Pauperum*, a very early block-book]
John Fust established a printing-office at Mentz, and printed the *Tractatus Petri Hispani* . . 1442
John Gutenberg invented *cut* metal types, and used them in printing the earliest edition of the Latin bible (termed the Mazarin, from the discovery of a copy in the cardinal's library) at Mentz 1450-55

CAXTON CELEBRATION of 400th anniversary of discovery of printing, 1877.

Exhibition (at South Kensington) of early printed books, bibles, and engravings; printing, paper-making, stereotyping, electrotyping, in operation; opened by Mr. W. E. Gladstone, 30 June, closed 1 Sept 1877.

PRINTING-MACHINES.—William Nicholson, editor of the *Philosophical Journal*, first projected (1790-1), but Mr. Konig first contrived and constructed a working printing machine, which began with producing the *Times* of 28 Nov. 1814, a memorable day in the annals of typography

In 1818, Mr E. Cowper patented improvements.†

König's machine printed 1800 an hour on one side; Cowper's improvements increased this number to 4200. This was raised to 15,000, by Mr. Applegath's machine, which printed the *Times*

Hoe's American machine, introduced into London 1858, prints 20,000 an hour

Marinoni's machine at Paris said to print 36,000 an hour; Dec. 1868.

Walter press, invented for the *Times* by J C. Macdonald and Mr. Calverley, between 1862-9, prints about 17,000 an hour *perfected*; 1872

American Campbell press said to print 50,000 sheets perfected in an hour, Feb 1876

Ingram web rotary machine, invented by Mr. (later sir) W. J. Ingram, M.P., for printing illustrated papers; first used to print *Illustrated London News*, 4 Oct. 1877.

PRINTING IN COLOURS was first commenced by the employment of several blocks, to imitate the initial letters in MSS. (for instance, the Mentz Psalter of Fust, 1455, which has a letter in three colours). Imitations of chiaroscuro soon followed ("Repose in Egypt," engraving on wood after Louis Cranach, in 1519, in Germany; others by Ugo da Carpi, in Italy, 1518).

J. B. Jackson (1720-54) attempted, without success, to imitate water-colour drawings and to print paper-hangings.

About 1783, John Skippe, an amateur, printed some chiaroscuros.

In 1819-22, Mr. William Savage produced his remarkable work, "Hints on Colour Printing," illustrated by imitations of chiaroscuro, and of coloured drawings, giving details of the processes employed.

In 1836, Mr. George Baxter produced beautiful specimens of Picture-Printing, and took out a patent, which expired in 1855. In some of the illustrations to the "Pictorial Album" (1836), he employed twenty different blocks

It has been applied to Lithography (hence Chromolithography).

In 1849, Mr. G. C. Leighton produced imitations of water-colour drawings, by means of modifications and improvements of Savage's processes. In 1851 he commenced colour-printing by machinery, and has since availed himself of aqua-tinted plates, and also of electrotyped silver and copper surfaces to obtain purity of colour as well as durability; Mr. Leighton died, 8 May, 1895.

The large coloured prints of the *Illustrated London News* were first issued in Dec. 1856.

Mr. E. Meyerstein explained his process of printing many colours at one impression (stenochromy), Society of Arts, 13 Dec. 1876.

Mr Ivan Orloff's colour-printing machine, multi-coloured designs produced by one operation; one set up in London, July, 1899.

Mr Carl Hentschel's three-colour process popular, 1905.

Printing surfaces. Vulcanised india-rubber was first employed for this purpose by Mr. John Leighton, F.S.A., about 1862, and patented in the name of Alfred Leighton, 1864. The application is much used for hand-stamps for books, &c.

Mr. Fred Wicks' type-casting machine (cheap), reported *Times*, 19 Nov. 1896, adopted 1900.

International exhibition of printing at Stationers' hall, London, opened by the lord mayor, 14 Oct. 1889; another at the Agricultural-hall, 30 April, 1904.

PRIORIES, at first dependent on the great abbeys, are mentioned in 722 in England; see *Abbeys*, and *Monasteries*. *Alien priories* were seized by the king (Edward I.) in 1285, and in succeeding reigns on the breaking out of war with France; but were usually restored on the conclusion of peace. These priories were dissolved, and their estates vested in the crown, 3 Henry V. 1414.—*Rymer's Fœdera.*

PRISCILLIANISTS, disciples of Priscillian, a Spanish bishop who propagated doctrines alleged to contain Gnosticism and Manicheism, 372. When condemned he appealed from the pope to the emperor, but was beheaded at Treves, 385.

PRISONERS OF WAR, among the ancient nations, when spared, were usually enslaved. About the 13th century, civilized nations began to exchange their prisoners.

The Spanish, French, and American prisoners of war in England were 12,000 in number,	30 Sept. 1779
The number exchanged by cartel with France, from the commencement of the then war, was 44,000	June, 1781
The English prisoners in France estimated at 6000, and the French in England 27,000 . .	Sept. 1798
The English in France amounted to 10,300, and the French, &c., in England to 47,600, in . . .	1811
Great numbers made by the Germans in the war	1870-1
Boer prisoners made by the English, about 32,000 (24,996 deported oversea) in the war . .	1899-1902

* Roman Service-books, used at Salisbury, by the devout called Pies (*Pica*, Latin), as is supposed from the different colour of the text and rubric. Our printing-type *Pica* is called *Cicero* by foreign printers.—*Wheatley.*

† In 1817 was published Blumenbach's Physiology by Elliotson, the first book printed by machinery. The machine employed was Konig's, one which printed both sides in one operation at the rate of 900 sheets an hour (1816).

BORSTAL SCHEME.—This scheme for dealing with male criminals between the ages of 16 and 21 had its inception in the suggestion made in 1894 by the departmental committee on prisons (Mr Herbert Gladstone, chairman) "that the most determined effort should be made to lay hold of these incipient criminals, and to prevent them by strong restraint and rational treatment from recruiting the criminal class." The scheme was tentatively tried at Bedford prison in 1900, and from thence transferred to Borstal, where it came into more active operation, Oct. 1902. In outline the scheme works on the basis of the "indeterminate" sentence; the magistrate fixing the maximum sentence, discretion being allowed the governor, chaplain, and medical officer, acting as a committee, to reconsider the term, should the conduct of the prisoner warrant such reconsideration. The probationer at the end of the first 6 months of his sentence appears before the committee, and his case is thoroughly examined, and if it appears that he is likely to really benefit by his release the prisoner is remitted a part of his sentence. Moral and religious influences are brought to bear upon each prisoner, and habits of industry and the cultivation of self-respect inculcated and encouraged. Various trades are taught, and recreations within the limits of discipline are permitted. The governor, Mr. A. G. Weston, in his report for 1902-3 to the prison commissioners, states: "The progress made in the several trades here can only be understood by those living with them, who can watch day by day the general improvements, both in tone, demeanour, and ability; indeed they become a living study of human nature. Considering the character of the youths and the element from which most of them have received their early training, it is very striking that under proper care they can be brought to their bearings in so short a time." The visiting committee in its report (1903-4) states that out of a total of 209 youths received only in three cases was it necessary to transfer a juvenile-adult back to the local prison as incorrigible. The period of 6 months' imprisonment being in the opinion of the prison commissioners too short a period for any lasting impression to be made on criminal character, they have decided to transfer to Borstal only cases of 12 months' sentence and upwards. Of 76 cases dealt with on discharge of lads, all of whom but 6 had previously been convicted—the majority more than once—no less than 36 have been satisfactory. In 1904 an association was formed to help the prisoners at Borstal on their discharge, and to supervise their future career. The principle of the Borstal scheme, "hard work, strict discipline, tempered by contrivances of reward, encouragement and hope," is acted upon in some of the states of America, at Elmira, and at Concord.

PRIVATEER, a ship belonging to private individuals, sailing with a licence (termed a *Letter of Marque*), granted by a government in time of war, to seize and plunder the ships of the enemy. The practice, said to have been adopted by Edward I. against the Portuguese in 1295, was general during the war between Spain and the Netherlands in the 17th century, and during the last French war. Privateering was abolished by the great sovereigns of Europe by treaty, 30 March, 1856. The United States government refused to agree unless the right of blockade was also given up. The British government declined this, asserting "that the system of commercial blockade was essential to its naval supremacy." On 17 April, 1861, Jefferson Davis, president of the southern confederacy, announced his intention of issuing letters of marque, and on the 19th president Lincoln proclaimed that all southern privateers should be treated as pirates. This decree was not carried out: see *United States* All the great powers forbade privateering during the American civil war (*which see*). By the treaty of Washington privateering was prohibited; and April, 1898, in relation to the Spanish-American war, a Spanish decree maintains liberty of action.

PRIVY COUNCIL. A council said to have been instituted by Alfred, 895. The number of the council was about twelve when it discharged the functions of state, now confined to the members of the cabinet, but it had become of unwieldy amount before 1679, in which year it was remodelled upon sir William Temple's plan, and reduced to thirty members: Anthony Ashley, earl of Shaftesbury, being president. The number is now unlimited. To attempt the life of a privy councillor in the execution of his office was made capital, occasioned by Guiscard's stabbing Mr. Harley while the latter was examining him on a charge of high treason, 9 Anne, 1711.

"The Proceedings and Ordinances of the Privy Council of England from 10 Richard II. to 33 Hen. VIII., edited by sir H. Nicolas, 7 vols," were published by the record commissioners, 1834-7.

The "Acts of the Privy Council," edited by Mr. J. R. Dasent, beginning with 1542, Vols. I.—IX., issued in 1890-4; Vol. XVI. 1897

JUDICIAL COMMITTEE OF THE PRIVY COUNCIL.—In lieu of the Court of Delegates, for appeals from the lord chancellors of Great Britain and of Ireland in cases of lunacy—from the Ecclesiastical and Admiralty Courts of England, and the Vice-Admiralty courts abroad—from the Warden of the Stannaries, the courts of the Isle of Man, and other islands, and the Colonial courts, &c.,—fixed by statute 3 & 4 Will IV., c. 41, 1833, amended by other acts in 1844, 1851, 1852

JUDGES.—The lord president, lord chancellor, master of the rolls, vice-chancellor, lords justices in appeal, lord chief justice of the queen's bench and common pleas, lord chief baron, judges of the courts of bankruptcy, probate, and admiralty, and others appointed by the queen. In consequence of the increase of business, and consequent delay, the Crown was empowered to appoint four new judicial members of the committee, by 34 & 35 Vict. c. 91 (21 Aug. 1871). The attorney-general, sir R. Collier, was made a judge of the Common Pleas, 7 Nov., and a member of the judicial committee 22 Nov. 1871.

These proceedings were considered contrary to the spirit of the act by several judges and the legal profession generally. A vote of censure on the Gladstone ministry was negatived in the house of lords (89-87), 15 Feb.; in the commons (268-241), 19 Feb. 1872

Other changes were made by an act passed in 1876.

The addition of judges from the colonies authorized by an act passed 6 July, 1895.

PRIVY SEAL, THE LORD, the fifth great officer of state, has the custody of the privy seal, which he must not put to any grant, without good warrant under the king's signet. This seal is used by the king to all charters, grants, and pardons, signed by him before they come to the great seal. Richard Fox, bishop of Winchester, held this office in the reign of Henry VIII previously to 1523, when Cuthbert Tunstall, bishop of London, was appointed. The privy seal has been on some occasions in commission.—*Beatson*. See under *Liverpool*, *Canning*, *Wellington*, and succeeding *Administrations*.

PRIZE-FIGHTING, see *Boxing*.

PRIZE MONEY, arising from captures made from the enemy, was decreed by government to be divided into eight equal parts, and distributed by order of ranks, 17 April, 1793. The distribution of army prize-money is regulated by an act passed in 1832. Naval prize-money is now regulated by royal proclamation; the last, 19 May, 1866.

PROBABILITY, THEORY OF (termed by Butler, "the guide of life", by Laplace, "good sense reduced to calculation"), was originated by Pascal, and taken up by Fermat, in their correspondence in 1654.

Its object is "the determination of the number of ways in which an event may happen or fail, in order that we may judge whether the chances of its happening or failing are greater".—*Jevons*

It has been treated upon by the most eminent mathematicians, viz., the Bernoullis, De Moivre, D'Alembert, Euler, Lagrange, Laplace, and Quetelet

PROBATE COURT, established in Aug. 1857 by 20 & 21 Vict. c. 77, which abolished all powers exercised by the ecclesiastical courts in the granting of probates of wills, &c., see *Prerogative Court*. The first judge appointed, 5 Jan. 1858, was sir Cresswell Cresswell, who took his seat on 12 Jan. On his death, sir James P. Wilde (aft. lord Penzance) was appointed judge, 28 Aug. 1863; see *Supreme Court*. The president of the probate, divorce, and admiralty division, sir James Hannen (1872), succeeded by sir Charles P. Butt, Jan. 1891 (died 25 May, 1892); sir Francis Henry Jeune, 30 May, 1892, resigns 28 Jan. 1905; lord St. Helier (died 9 March, 1905); sir Gorell Barnes, 1 Feb. 1905. By the Judicature Act of 1873, the probate, divorce, and admiralty courts were constituted the 5th division of the Supreme Court. A probate and matrimonial division of the high court of justice of Ireland was established by Judicature act, 1877. *Probate* is the exhibiting and proving a will before the proper authority. The probate registry is now at Somerset House.

Probate duties partly transferred to relieve local taxation by Local Government Act, 1888—amount received 1887-8, 4,596,620*l*. The duty was superseded in 1894 by the "estate duty," *which see*.

PROCEDURE RULES, see under *Parliament* 1882 and 1888, 1890.

PROCESSIONS ACT, 13 Vict. c. 2, passed 12 March, 1850, prohibited party processions, with banners, &c. It was repealed in 1872. Processions of workmen and others, for demonstrations in Hyde

Park, prohibited in the great thoroughfares of London, by the police, 31 May, 1890, and since.

PROCLAMATIONS, ROYAL, "have only a binding force when grounded upon and to enforce the laws of the realm."—*Coke.* Henry VIII., in 1539, declared that they were as valid as acts of parliament. This was annulled, 1547.

The lord-lieutenant of Ireland has power by proclamation to place districts under the provisions of the Criminal Law Procedure acts, 1881 and 1887, which districts are then said to be *proclaimed.*

PROCONSUL, a Roman consul, whose tenure of office was extended beyond his legal term. Q. Publilius was the first proconsul appointed during the war with Parthenope, 327 B.C. The name was afterwards given to governors of provinces.

PROCTOR (from *procurator*), an office in ecclesiastical courts, corresponding to that of an attorney or solicitor in courts of common law. It was abolished by the Judicature act, 1873. The persons chosen to represent the clergy in convocation are termed proctors. The university proctors enforce discipline.

PROFILES. The first profile taken, as recorded, was that of Antigonus, who, having but one eye, his likeness was so taken, 330 B.C.—*Ashe.* "Until the end of the 3rd century, I have not seen a Roman emperor with a full face; they were always painted or appeared in profile, which gives us the view of a head in a very majestic manner."—*Addison.*

PROGRESISTAS, a political party in Spain, headed by Espartero, duke of Victory, and latterly by general Prim. Since 1865 they adopted a policy of inaction in public affairs; by uniting with the unionists and republicans in Sept. 1868, the government were overthrown, see *Spain.*

A party in Servia and also in Portugal are termed *Progressists.*

In England, since 1888 *et seq*, the radical party in county councils, the school board, parish councils, and similar bodies have been termed PROGRESSIVES, and their opponents MODERATES.

PROPAGANDA FIDE, CONGREGATIO DE (congregation for the propagation of the faith of the Romish church), was constituted at Rome by Gregory XV. in 1622; the college, by Urban VIII., in 1627, for the education of missionaries to various countries, a special feature of the college being the education of some 200 natives at an early age for mission work in their own lands. It has a large and valuable library consisting of about 30,000 volumes, a museum, and a polyglot printing press. The Epiphany is celebrated as the great festival of the college.

PROPAGATION OF THE GOSPEL SOCIETY received its charter, 16 June, 1701. Its sphere, to minister to British subjects beyond the seas, much extended, see "Spiritual Expansion of the Empire," pub. 1899. PROPORTIONAL REPRESENTATION. The scheme propounded by Mr. Thomas Hare in 1857, in a pamphlet on "Representation," and perfected in his "Treatise on the Election of Representatives," published in 1859, which was well received by Mr. J. Stuart Mill. A society to introduce this principle was formed in Feb. 1884. It included sir John Lubbock (president), Mr. Leonard H. Courtney, and many other M.P.'s.

It proposed that "in all cases where an elector is entitled to one vote only, to enable the elector to nominate more than one candidate to whom, under certain circumstances, that vote might be transferred in the manner indicated by the elector." Negatived by the commons, 134—31, 3 March, 1885.

PROROGATION OF PARLIAMENT. By an act passed 12 Aug. 1867, the crown was enabled to issue a proclamation for the prorogation of parliament during the recess.

PROSECUTOR. By the Prosecution of Offences act, 42 & 43 Vict. c. 22 (3 July, 1879), the appointment of a director of public prosecutions with assistants was enacted, somewhat resembling officers in Scotland and Ireland. It came into operation 1 Jan. 1880. John Blossett Maule appointed director of public prosecutions, Dec. 1879; succeeded by sir Augustus Stephenson, 1884; succeeded by the hon. Hamilton Cuffe, now earl of Desart, Oct. 1894.

A committee reported the plan to be a failure, and recommended changes, June; act amended, 1884. 551 prosecutions; 451 convictions in 1891—449 in 1900.

A public prosecutor, "procureur du roi," in France, is mentioned in the 14th century; replaced by "accusateur publique" (elected), 1791; by "commissaire national," 1793; "procureur" restored by Napoleon I.

PROTECTION OF LIFE AND PROPERTY ACT (for part of Ireland), passed 16 June, 1871; another, 3 March, 1881. See *Ireland.*

PROTECTIONISTS, that section of the conservative party which opposed the repeal of the corn laws, and which separated from sir Robert Peel in 1846. The name was derived from a "Society for the *Protection* of Agriculture," of which the duke of Richmond was chairman, and which had been established to counteract the efforts of the Anti-Corn Law League, 17 Feb. 1844. Lord George Bentinck was the head of the party from 1846 till his death, 21 Sept. 1848. The Derby administration not proposing the restoration of the corn-laws, the above society was dissolved, 7 Feb. 1853.—The protection of native manufactures has been maintained in the United States since 1868, and in France, Germany, Italy, and other countries. See *France*, March, 1887; *England*, 1903-5; *United States*, Oct. 1890. President Cleveland condemned protection, 4 March 1893: Mr. McKinley, a protectionist, elected president of U.S.N.A. 3 Nov. 1896. See *Fair Trade*, *Free Trade*, *Tariff Reform League*, and *Preferential Tariffs.*

PROTECTORATES IN ENGLAND. That of the earl of Pembroke, 19 Oct. 1216, ended by his death, 1218. Of Humphry, duke of Gloucester, began 31 Aug. 1422; he was seized 11 Feb. 1447, and found dead a few days after. Of Richard, duke of Gloucester, began May, 1483, and ended by his assuming the royal dignity, 26 June the same year. Of Somerset began 28 Jan. 1547, and ended by his resignation in 1549. Of Oliver Cromwell began 16 Dec. 1653, and ended by his death, 3 Sept. 1658. [He firmly refused to be styled king, as solicited by the parliament, Feb.-May, 1657.] Of Richard Cromwell began 3 Sept. 1658, and ended by his resignation, 25 May, 1659; see *England.*

PROTEIN, from the Greek (*prōteion*, principal); a chemical term introduced by Mulder about 1844, for the basis of albumen, fibrin, and casein.

PROTESTANT REFORMATION SOCIETY, established 1820; it employs missionaries and readers.

PROTESTANTS. The emperor Charles V. called a diet at Spires in 1529, to request aid from the German princes against the Turks, and to devise means for allaying the religious disputes which then raged owing to Luther's opposition to the Roman catholic clergy. Against a decree of this diet, to support the doctrines of the church of Rome, six Lutheran princes, with the deputies of thirteen imperial towns, formally and solemnly *protested*, 19 April, 1529. Hence the term protestants was given to the followers of Luther; it afterwards included Calvinists, and other sects separated from the see of Rome. The six protesting princes were: John, elector of Saxony; George, margrave of Brandenburg; Ernest and Francis, the dukes of Lunenburg; the landgrave of Hesse; and the prince of Anhalt; these were joined by the citizens of Strasburg, Nuremberg, Ulm, Constance, Heilbron, and seven other cities; see *Lutheranism*, *Calvinism*, *Huguenots*, *Germany*, *Church of England*, &c.

PROVENCE (the Roman *Provincia*), S. E. France, was made a kingdom by the emperor Lothaire for his son Charles. It afterwards became part of the kingdom of Arles as a feudal fief, and was re-united to the German empire in 1032 by Conrad II. On the fall of the Hohenstaufens, it was acquired by Charles of Anjou, who married the heiress of the count in 1245, and became king of Naples, in 1268; and was held by his successors till its annexation to France by Charles VIII. in 1487.

PROVERBS. The book of Proverbs by Solomon is dated about 1000 B.C. The latter part was collected by order of Hezekiah, about 700 B.C. Ray's collection of English proverbs appeared in 1672, and Bohn's general collection in 1857. Martin F. Tupper's "Proverbial Philosophy" first appeared in 1839. Alfred Henderson's "Latin Proverbs," 1869. A society for the Revision of Proverbs existed in 1886.

PUBLIC LOAN COMMISSIONERS were constituted by the acts passed 13 Aug. 1875. Other acts passed 1879-83.

PUBLIC MEETINGS, for political purposes, were occasionally held in England in the latter part of the 17th century, but became very important in the reign of George III. The meetings in Devonshire in 1763 to protest against the Cider Tax, were very effective, and set an example speedily followed, with the warm approbation of Burke, Fox, and other statesmen. These meetings were prohibited by the Gagging acts, *which see*, passed in 1795; see *Sedition*. In the reign of George IV., the right of public meetings was fully assured, and they were very effectual in relation to the passing the Reform acts, the Repeal of the Corn Laws, and other important measures. See *Hyde Park*. The place on which the speakers stand is termed a "platform," corresponding to the Roman *rostrum*, and the French *tribune*. "The Platform," by Mr. H. Jephson, was published in 1792. The term "platform" is also applied to a set of political or religious opinions held by a party; such as the "platform of Geneva." *Hooker*.

PULTUSK (Russia), where a battle was fought between the Saxons, under their king Augustus, and the Swedes, under Charles XII., in which the former were signally defeated, 1 May, 1703. Here also the French under Napoleon fought the Russian and Prussian armies: both sides claimed the victory, but it inclined in favour of the French, 26 Dec. 1806.

PUMPS. Ctesibius of Alexandria is said to have invented pumps (with other hydraulic instruments), about 224 B.C., although the invention is ascribed to Danaus, at Lindus, 1485 B.C. Pumps were in general use in England, A.D. 1425. An inscription on the pump in front of the late Royal Exchange, London, stated that the well was sunk in 1282. The air-pump was invented by Otto Guericke in 1654, and improved by Boyle in 1657; see *Air* and *Wells*.

PUNCH, the puppet show, borrowed from the Italian Polichinello, is descended from a character well known in the theatres of ancient Rome. *Hogarth*. The satirical weekly publication, *Punch, or the London Charivari*, was established by Henry Mayhew, Mark Lemon, Douglas Jerrold, Gilbert a' Beckett, and others: amongst its early contributors were Wm. M. Thackeray; Prof. E. Forbes, and other eminent writers; first published 17 July, 1841. Mark Lemon, the first editor, died 23 May, 1870; 2nd, Shirley Brooks, died 23 Feb. 1874; 3rd, Tom Taylor, died July, 1880; 4th, Francis Cowley Burnand, 1880-1906; 5th, Owen Seaman. Richard Doyle, who designed the wrapper, and was a frequent contributor, died 11 Dec. 1883; John Leech died 1864, and was succeeded by Mr. George Du Maurier, born in Paris, 6 March, 1834, died, 8 Oct. 1896. Mr. Percival Leigh, an early and long-continued contributor to *Punch*, died 24 Oct. 1889, aged 77. Charles Keene, artist, a contributor since 1850, died 4 Jan. 1891. Phil May, artist and clever caricaturist, died, aged 39, 5 Aug. 1903. John Tenniel, cartoonist, since 1851 (ent. 1893), resigns, Jan. 1901; succeeded by Linley Sambourne. Mr. Wm. Agnew, proprietor (bart. June, 1895). An interesting jubilee number of *Punch* was published 17 July, 1891. Mr. Wm. Hardwick Bradbury,

born, 3 Dec. 1832, long printer of *Punch*; and of this volume, died, 13 Oct. 1892. "The history of *Punch*," by M. H. Spielmann, published autumn, 1895. Mr. Edwin James Milliken, contributor of the "'Arry papers," etc., died, aged 57, 26 Aug. 1897. "*Punch's* Holiday Book," edited by Mr. E. T. Reed, July, 1901. The king receives Mr. Burnand (knt. 26 June, 1902); accepts a copy of the Coronation number, 21 June, 1902. See *Caricatures* and *Charivari*.

PUNCTUATION. The Hebrew accents for punctuation are very ancient. The period (.) is the most ancient; the colon (:) was introduced about 1485; the comma (,) was first seen about 1521, and the semicolon (;) about 1570. In sir Philip Sidney's "Arcadia" (1587), they all appear, as well as the note of interrogation (?), asterisk (*), and parentheses ( ).

PUNJAUB (N. W. Hindostan) was traversed by Alexander the Great, 327 B.C., by Tamerlane, A.D. 1398; by Mahmoud of Ghizni, about 1000. It was an independent state under Runjeet Singh, 1791-1839. Our wars with the Sikhs began here, 14 Dec. 1845, and were closed on 29 March, 1849, when the Punjaub was annexed; see *India*. The Punjaub has since greatly flourished, and on 1 Jan. 1859, was made a distinct presidency (to include the Sutlej states and the Delhi territory); see *Durbar*. The Sirhind canal (502 miles) opened by the viceroy, marquis of Ripon, 24 Nov. 1882. Local self-government bill passed 10 Oct. 1883. Area, 97,209 sq. miles; population in 1881, 18,843,186; in 1891, 20,803,000; in 1901, 22,455,769. Capital, Lahore; population, 1901, 120,058.

[Dhuleep Singh (son of Runjeet Singh), born 1838, received a pension of 40,000*l.*; he resided in England till 1886 when he sailed for India; in consequence of an indiscreet proclamation to the Sikhs he was stopped at Aden about 3 May, 1886. After his release he wandered about Europe; in May 1889 he married a European in Paris; his manifesto to the Sikhs, inciting them to rebellion, indignantly rejected with strong censure, Nov. 1889. After severe illness, he expresses deep regret for his conduct, 27 July, and is pardoned by queen Victoria, 1 Aug. 1890; received by her at Grasse, 31 March, 1891; dies at Paris, 22 Oct. 1893.]

PURCHASE OF LAND, see under *Land*.

PURCHASE SYSTEM in the army. The payment of a present or gratuity for a commission was prohibited by William III., 1693; but in 1702 purchase was legally re-organised. In 1711 the sale of commissions was forbidden without the royal permission; in 1719-20 regulations were issued; and a fixed scale of prices was adopted in consequence of a commission in 1765. Large over-regulation payments continued to be paid. Commissions of inquiry were held frequently after 1858; and in 1871 the system was abolished, with compensation, by royal warrant, 20 July, 1871, the bill for the purpose having been rejected by the house of lords. For amounts paid, see under *Army*.

PURGATIVES of the mild species (aperients), particularly cassia, manna, and senna, are ascribed to Actuarius, a Greek physician, 1245.

PURGATORY, the middle place between heaven and hell, where, it is believed by the Roman catholics, the soul passes through the fire of purification before it enters the kingdom of God. The doctrine was known about 250; was introduced into the Roman church in the 5th century, and made a religious dogma by Gregory I., 590-604. It was first set forth by a council at Florence, 1439; enforced by the council of Trent, Dec. 1563; see *Indulgences*.

PURIFICATION, after childbirth, was ordained by the Jewish law, 1490 B.C. (*Lev.* xii.); see *Churching*. The feast of the purification was instituted, 542, in honour of the Virgin Mary's going to the temple. (*Luke* ii.) Pope Sergius I. ordered the procession with wax tapers, whence Candlemas-day.

PURITANS, the name first given, it is said, about 1564, to persons who aimed at greater purity of doctrine, holiness of living, and stricter discipline than others. They withdrew from the established church, professing to follow the word of God alone, and maintaining that the church retained many human inventions and popish superstitions; see *Cathari*, *Nonconformists*, and *Presbyterianism*.

PURLEY, see *Diversions*.

PURPLE, a mixed tinge of scarlet and blue, discovered at Tyre. It is said that Hercules Tyrius having observed his dog's lips to be stained, after eating a shell-fish named *murex* or *purpura*, was thereby led to invent the dye. Purple was anciently used by the princes and great men for their garments. It was restricted to the emperor by Justinian I. 532, and *porphyrogenitus* attached to the names of some emperors signifies "born to the purple."

PURVEYANCE, an ancient prerogative of the sovereigns of England of purchasing provisions,

&c., without the consent of the owners, led to much oppression. It was regulated by Magna Charta, 1215, and other statutes, and was only surrendered by Charles II. in 1660, for a compensation.

PUSEYISM, a name attached to the views of certain clergymen and lay members of the church of England, who proposed to restore the practice of the church of England to what they believed to be required by the language of her Liturgy and Rubrics, but which were considered by their opponents to be of a Romish tendency. The term was derived from the name of the professor of Hebrew at Oxford, Dr. Edwd. Pusey. The heads of houses of the university of Oxford passed resolutions censuring Dr. Pusey's attempts to renew practices which are now obsolete, 15 March, 1841; and his celebrated sermon was condemned by the same body, 30 May, 1843; he died 16 Sept. 1882; see *Tractarians*, and *Ritualism*.

PUTNEY, anciently Putilei and Putenheath, N.E. Surrey, on the Thames, opposite Fulham. A new granite bridge, founded by the prince of Wales (to replace the wooden one completed in 1729), 12 July, 1884. Opened by the prince, 29 May, 1886.

PYDNA (Macedon), where Perseus, the last king of Macedon, was defeated and made prisoner by the Romans, commanded by Æmilius Paulus, 22 June, 168 B.C.

PYRAMIDS OF EGYPT, about 75 in number, of various sizes, constructed for the preservation of mummies of the kings and their families.

The Stepped Pyramid of Sakkara is conjecturally assigned to Ouenephes of the first dynasty, see *Egypt*. Three great pyramids are situated near Gizeh on the W. bank of the Nile. The first or greatest, is said to have been erected as the tomb of Choofoo, fourth dynasty, the Cheops of Herodotus, dated by Brugsch, 3733-3666 B.C. Its height is said to have been originally 481 feet, and its base 774 square feet. The second pyramid is ascribed to Chafra, or Chephren, 3666-3633 B.C. The third pyramid is said to have been built by Menkaura or Mycerinus, 3633 B.C.

The pyramids have been visited and described by Belzoni, 1815; Vyse, 1836; C. Piazzi Smith, and others, see *Egypt Exploration Fund*.

Some of the eleven pyramids at Sakkara explored by M. Maspero, 1880 *et seq.*

At the *battles of the Pyramids*, Napoleon Bonaparte defeated the Mamelukes, and thereby conquered Lower Egypt, 13 and 21 July, 1798.

PYRENEES. After the battle of Vittoria (fought 21 June, 1813), Napoleon sent Soult to supersede Jourdan, with instructions to drive the allies across the Ebro; Soult retreated into France with a loss of more than 20,000 men, having been defeated by Wellington in a series of engagements from 25 July to 2 Aug. One at the Pyrenees on 28 July. A railway through the Pyrenees (from Bilbao to Miranda) was opened 21 Aug. 1862.—**THE PEACE OF THE PYRENEES** was concluded between France and Spain, by cardinal Mazarin, for the French king, and don Louis de Haro, on the part of Spain, in the island of Pheasants, on the Bidassoa. By this treaty Spain yielded Roussillon, Artois, and her right to Alsace; and France ceded her conquests in Catalonia, Italy, &c., and engaged not to assist Portugal, Nov. 1659.

PYROLETER, a mechanical and chemical apparatus for extinguishing fires, especially in ships, invented by Dr. Paton.

PYROMETER (fire-measurer), an apparatus employed to ascertain the temperature of furnaces, &c., where thermometers cannot be employed; Muschenbroek's pyrometer (a metallic bar) was described by him in 1731. Improvements were made by Ellicott and others. Wedgwood employed clay cylinders, 1782-6. In 1830 professor Daniell received the Rumford medal for an excellent pyrometer made in 1821. Mr. Ericsson's pyrometer appeared in the Great Exhibition of 1851. (*Eng. Cyc.*) Mr. (aft. sir) C. W. Siemens' electric pyrometer and those of Becquerel, and Le Châtelier are also in use.

PYROPHONE (Greek, *pur*, fire; *phone*, voice), a musical instrument, invented by M. Frédéric Kastner, of Paris. It consists of glass tubes of various lengths; the tones being produced by what are termed "singing flames." It is based upon the "chemical harmonicon." Keys are attached for playing, as in the piano. The invention was reported to the French Academy of Sciences, 17 March, 1873; exhibited at Vienna, same year; and at the Society of Arts, 17 Feb. 1875. M. Kastner died aged 31, 6 April, 1882.

PYROXYLIN, the chemical name of *Gun Cotton* (*which see*).

PYRRHONISM, see *Sceptics*.

PYTHAGOREAN PHILOSOPHY. Pythagoras, of Samos, head of the Italic sect, flourished in the 6th century B.C. He is said to have taught the doctrine of metempsychosis, or transmigration of the soul from one body to another, forbidden his disciples to eat flesh and beans, invented the multiplication table, improved geometry, and taught the present system of astronomy.

PYTHIAN GAMES, in honour of Apollo, near the temple of Delphi; asserted to have been instituted by himself, in commemoration of his victory over the serpent, Python. Also said to have been established by Agamemnon, or Diomedes, or Amphictyon, or lastly, by the council of the Amphictyons, 1263 B.C. They lasted till 394.

PYX, the casket in which Catholic priests keep the consecrated wafer. In the ancient chapel of the pyx, at Westminster abbey, are deposited the standard pieces of gold and silver, under the joint custody of the lords of the treasury and the comptroller-general. The "*trial of the pyx*" signifies the verification by a jury of goldsmiths of the coins deposited in the pyx or chest by the master of the mint; this took place on 17 July, 1861, at the exchequer office, Old Palace-yard, in the presence of twelve privy councillors, twelve goldsmiths, and others, and on 15 Feb. 1870. This trial is said to have been ordered in the reign of Henry II., 1154-89; King James was present at one in 1611. The first *annual* trial of the pyx, appointed by the Coinage act of 1870, took place 18 July, 1871; new regulations issued, Feb. 1901.

Q.

QUACKERY, or medical imposture, is very ancient. Quack medicines were taxed in 1783 *et seq.* An inquest was held on the body of a young lady, Miss Cashin, whose physician, St. John Long, was afterwards tried for manslaughter, 21 Aug. 1830; he was found guilty, and sentenced to pay a fine of 250*l.*, 30 Oct. following. He was tried for manslaughter in the case of Mrs. Catherine Lloyd, and acquitted, 19 Feb. 1831. Dr. Vriès, "the black doctor," a professed cancer-curer, at Paris, was condemned to fifteen months' imprisonment as an impostor in Jan. 1860. Alabone *v.* Morton, see *Trials*, 8 July, 1893.

QUADRAGESIMA SUNDAY, first Sunday in Lent and 40th day before Good Friday; see *Lent*, and *Quinquagesima*.

QUADRANT, a mathematical instrument in the form of a quarter of a circle. The solar quadrant was introduced about 290 B.C. The Arabian astronomers under the caliphs, in 995, had a quadrant of 21 feet 8 inches radius, and a sextant 59 feet 9 inches radius. Davis's quadrant for measuring angles was produced about 1600; Hadley's quadrant about 1731; see *Navigation*.

QUADRILATERAL or **QUADRANGLE**, terms applied to four strong fortresses in N. Italy, long held by the Austrians, but surrendered to the Italians, Oct. 1866;—Peschiera, on an island in the Mincio; Mantua on the Mincio; Verona and Legnago, both on the Adige; see *Italy*, *Peschiera*, &c.

The *Turkish Quadrilateral* was Shumla, Varna, Rustchuk, and Silistria, lost to the sultan by the treaty of Berlin, which established the autonomy of Bulgaria.

QUADRILLE, a dance (originally *quadrille de contre danse*, introduced into French ballets about 1745), in its present form became popular in France about 1804. It was introduced into this country about 1808 (*Miss Berry*), and promoted by the duke of Devonshire and others, in 1813. *Raikes*.

QUADRIVIUM, see *Arts*.

QUADRUPLE ALLIANCE. That between England, France, Austria and Holland (signed at London, 22 July, 1718), on the accession of the states of Holland, 8 Feb. 1719, guaranteed the succession of the reigning families of Great Britain and France, settled the partition of the Spanish monarchy, and led to war.

QUADRUPLE TREATY, concluded in London 22 April, 1834, by the representatives of Great Britain, France, Spain, and Portugal, guaranteed the possession of her throne to Isabella II., the young queen of Spain.

QUADRUPLEX TELEGRAPHY, see under *Electricity*.

QUÆSTORS (seekers). Two *quæstores parricidii*, public prosecutors, in cases of murder and other capital crimes, acted in Rome under the kings; two *quæstores classici*, who had the management of the public treasure; appointed about 484 B.C. The number of quæstors was raised from time to time, as circumstances demanded. Plebeians were first elected in 409 B.C. There were eight quæstors in 265. Sylla raised the number to twenty; Julius Cæsar to forty.

QUAKERS or **SOCIETY OF FRIENDS**, originally called Seekers, from their seeking the truth, and afterwards Friends (3 *John*, 14). Justice Bennet, of Derby, gave the society the name of Quakers in 1650, because George Fox (the founder) admonished him and those present to quake at the word of the Lord. This sect was commenced in England about 1646, by George Fox (then aged 22), who was joined by George Keith, William Penn, and Robert Barclay, of Ury, and others. Fox rejected all religious ordinances, explained away the commands relative to baptism, &c.; discarded the ordinary names of days and months, and used *thee* and *thou* for *you*, as more consonant with truth. He published a book of instructions for teachers and professors, and died 13 Jan. 1691. Sir H. Nicolas explains the Quaker calendar in his Chronology of History. The first meeting-house in London was in White Hart-court, Gracechurch-street. Headquarters of the Friends in England, Devonshire-house, 12, Bishopsgate-street Without, London, E.C. A numerous body of Friends called the *Hicksites*, from the name of their founder, Elias Hicks, exists in the United States; the *Wilburite* section in Pennsylvania are characterised by their adherence to the old-fashioned costume and mode of speech.

Their principles are contained in "Extracts of minutes" (from the beginning) published 1782: revised 1802, 1861, and 1883.

The Quakers early suffered grievous persecutions. At Boston, U.S., where the first Friends who arrived were females, they were cruelly scourged, and had their ears cut off, some put to death.

In 1659 it was stated in parliament that 2000 Friends had endured sufferings and imprisonment in Newgate: and 164 Friends offered themselves at this time, by name, to government, to be imprisoned in lieu of an equal number in danger (from confinement) of death, 1659

Fifty-five (out of 120 sentenced) were transported to America, by an order of council, 1664

The masters of vessels refusing to carry them for some months, an embargo was laid on West India ships, when a mercenary wretch was at length found for the service. The Friends would not walk on board, nor would the sailors hoist them into the vessel, and soldiers from the Tower were employed. In 1665, the vessel sailed; but it was immediately captured by the Dutch, who liberated twenty-eight of the prisoners in Holland, the rest having died of the plague. Few reached America

William Penn, with a company of Friends, colonised Philadelphia 1682

First meeting of Quakers in Ireland in Dublin in 1658; and their first meeting-house there was opened in Eustace-street 1692

The solemn affirmation of Quakers enacted to be taken in all cases in the courts below, wherein oaths are required from other subjects (see *Affirmation*) 1696

John Archdale, a Quaker, elected M.P. for Chipping Wycombe; refused to take the oaths, and his election was declared void 1699

Quakers emancipated their negro slaves . 1 Jan. 1788

A schism in the society was begun in America about 1827, by Elias Hicks publishing his opinions denying the divinity of Christ and his atonement and the authority of the Holy Scriptures. His numerous followers are styled Hicksite Friends.

Joseph Pease, a Quaker, was admitted to parliament on his affirmation . . . . 15 Feb. 1833
At an annual assembly it was agreed to recommend that mixed marriages should be permitted, and that many of the peculiarities of the sect in speech and costume should be no longer insisted on. 2 Nov. 1858

QUALIFICATION FOR OFFICE ABOLITION ACT, passed May, 1866, rendered it unnecessary to make and subscribe certain declarations.

QUARANTINE, the custom observed at Venice as early as 1127, whereby all merchants and others coming from the Levant were obliged to remain in the house of St. Lazarus, or the Lazaretto, forty days before they were admitted into the city. Various southern cities have now lazarettos; that of Venice is built in the water. In the times of plague, England and all other nations oblige those that come from the infected places to perform quarantine with their ships, &c., a longer or shorter time, as may be judged most safe. Quarantine acts were passed in 1753 and in 1825. The system was abolished in England by an act passed 1896, and the old quarantine men-of-war in the Solent were broken up. Quarantine established throughout Europe, in consequence of the bubonic plague at Bombay (*which see*), 16 Jan. 1897. By order of council, 10 Nov. 1866, foreign cattle were made subject to quarantine.

QUARRIES. An act was passed for their regulation in 1894. See *Slate*.

QUARTER SESSIONS established 25 Edw. III. 1350-1. Days of sitting appointed, 2 Hen. V. 1413. In 1830 it was enacted that quarter sessions of the peace should be held in the first whole weeks after 11 Oct., 28 Dec., 31 March, and 25 June. Further regulated, 1842, 1848, and 1858. *Brewster Sessions* are regulated by the Licensing Act 1902.

QUARTERLY REVIEW, the organ of the Tory party. The publication was proposed to Mr. George Canning, and his support solicited by Mr. John Murray, the publisher, in a letter dated 25 Sept. 1807, in opposition to the opinions of the *Edinburgh Review*. Mr. Murray was assisted by Walter Scott, Robert Southey, John Gibson Lockhart (editor 1825-53), J. W. Croker, and other eminent persons. It first appeared Feb. 1809, with William Gifford, the celebrated translator of "Juvenal" as editor. He died 31 Dec. 1826.

QUASI MODO, a name given to *Low Sunday* (the first Sunday after Easter) from the commencement of a hymn sung on that day.

QUATERNIONS, an important mathematical method or calculus, invented by Sir Wm. Rowan Hamilton, about 1843.

It is based upon the separation of multiplication from addition, and its fundamental idea is mental transference or motion by what he termed vectors. He attributed to addition motion from a point; to multiplication about a point. Four numbers are generally involved, hence the name quaternion. Hamilton's "Lectures on Quaternions," was published 1853: his "Elements," 1866. Other works by professors Kelland and Tait, published since

QUATRE-BRAS (Belgium) Here on 16 June, 1815, two days before the battle of Waterloo, a battle was fought between the British and allied army under the duke of Brunswick, the prince of Orange, and sir Thomas Picton, and the French under marshal Ney. The British fought with remarkable intrepidity, notwithstanding their inferiority in number, and their fatigue through marching all the preceding night. The 42nd regiment (Royal Highlanders) suffered severely in pursuit of a French division by cuirassiers posted in ambush behind growing corn. The duke of Brunswick was killed.

QUEENSTOWN (Upper Canada). This town, on the river Niagara, was taken in the war with U.S.N.A. by the troops of the United States, 13 Oct. 1812; but was retaken by the British forces, who defeated the Americans with considerable loss in killed, wounded, and prisoners, on the same day. Queenstown suffered severely in this war.—The Cove of Cork, Ireland, was named QUEENSTOWN, 3 Aug. 1849, by queen Victoria on her visit. The U. S. steamer *America* was burnt here, 29 Nov. 1893.

QUEEN'S UNIVERSITY (see *Queen's Colleges*), was directed to be dissolved by 42 & 43 Vict. c. 65 (1879), and was dissolved by proclamation, 31 Jan. 1882; see *University of Ireland.*

QUEEN VICTORIA STEAM SHIP. Wrecked 15 Feb. 1853; see *Wrecks.*

QUENTIN, ST. (N. France). The duke of Savoy, with the army of Philip II. of Spain, assisted by the English, defeated the French under the constable De Montmorency, at St. Quentin, 10 Aug. 1557. In fulfilment of a vow made before the engagement, the king built the monastery, palace, &c., the Escurial (*which see*). During the Franco-German war the army of the north, under Faidherbe, was defeated here by the Germans after seven hours' fighting, on 19 Jan. 1871; total loss about 15,000: the German loss about 3100.

QUERETARO (Mexico), was besieged and taken (through the treachery of Lopez) by the liberal general Escobedo, 15th May, 1867. The emperor Maximilian and his generals Miramon and Mejia, were taken prisoners, and after trial were shot 19 June following.

QUERN or HANDMILL, is probably the implement spoken of in Isaiah xlvii. 2, about 712 B.C. So-called Roman querns have been found in Yorkshire.

QUESNOY (N. France), was taken by the Austrians, 11 Sept. 1793, but was recovered by the French, 16 Aug. 1794. It surrendered to prince Frederick of the Netherlands, 29 June, 1815, after the battle of Waterloo.—It was here that cannon were first used, and called bombards. *Hénault.*

QUETTAH, see *Beloochistan.*

QUIBERON BAY (W. France). A British force landed here, Sept. 1746, but was repulsed. In the bay admiral Hawke gained a complete victory over the French admiral Conflans, and thus defeated the projected invasion of Great Britain, 20 Nov. 1759. Quiberon was taken by some French regiments in the pay of England, 3 July, 1795; but on 21 July, through treachery, the French republicans, under Hoche, retook it by surprise, and many emigrants were executed. About 900 of the troops, and nearly 1500 royalist inhabitants who had joined the regiments in the pay of Great Britain, effected their embarkation on board the ships.

QUICKSILVER, in its liquid state, mercury. Its use in refining silver was discovered, 1540. There are mines of it in various parts, the chief of which are at Almaden, in Spain, and at Idria, in Illyria; the latter, discovered by accident in 1497, for several years yielded 1200 tons. A mine was discovered at Ceylon in 1797; and at New Almaden and other places in California. Quicksilver was congealed in winter at St. Petersburg, in 1759. It was congealed in England by a chemical process, without snow or ice, by Mr. Walker, in 1787. Corrosive sublimate, a deadly poison, is a combination of mercury and chlorine; see *Calomel.*

QUICUNQUE VULT, see *Athanasian Creed.*

QUIETISM, the doctrine of Miguel Molinos, a Spaniard (1627-96), whose work, the "Spiritual Guide," published in 1675, was the foundation of a sect in France. He held that religion consisted in an internal silent meditation on the merits of Christ and the mercies of God. Madame de la Mothe-Guyon, a quietist, was imprisoned in the Bastille for her visions and prophecies, but released through the interest of Fénélon, archbishop of Cambray, between whom and Bossuet, bishop of Meaux, arose a controversy, 1697. Quietism was finally condemned by pope Innocent XII. in 1699. See *Jansenists, Quakerism* and *Pietism.*

QUILLS are said to have been first used for pens in 553; authorities say not before 635.

QUINCE, the *Pyrus Cydonia*, brought to this country from Austria, before 1573. The Japan quince, or *Pyrus japonica*, brought hither from Japan, 1796.

QUINDECEMVIRI, fifteen men, chosen to keep the Sybilline books. The number, originally two (duumviri), about 520 B.C., was increased to ten in 365 B.C., and afterwards (probably by Sylla) to fifteen, about 82 B.C. Julius Cæsar added one; but the precedent was not followed.

QUININE or QUINIA, an alkaloid (much used in medicine), discovered in 1820 by Pelletier and Caventou. It is a probable constituent of all

genuine cinchona barks, especially of the yellow bark; see *Jesuits' Bark*. Artificial quinine was prepared (synthetically) by Mr. W. L. Scott, in Oct. 1865.—QUINOIDINE, see *Fluorescence*. John Eliot Howard, promoter of the cultivation of cinchona in India, and author of "Quinologia" (1862), died 22 Nov. 1883.

QUINQUAGESIMA SUNDAY. The observation is said to have been appointed by Gregory the Great (pope, 590-604). The first Sunday in Lent having been termed *Quadragesima*, and the three weeks preceding having been appropriated to the gradual introduction of the Lent fast, the three Sundays of these weeks were called by names significant of their position in the calendar: and reckoning by decades (tenths), the Sunday preceding Quadragesima received its present name, *Quinquagesima*, the second *Sexagesima*, and the third *Septuagesima*.

QUINTILIANS, heretics in the 2nd century, the disciples of Montanus, who took their name from Quintilia, a lady whom he had deceived by his pretended sanctity, and whom they regarded as a prophetess. They made the eucharist of bread and cheese, and allowed women to be priests and bishops. *Pardon*.

QUIRINUS, a Sabine god, whose name was given to Romulus after his death. L. Papirius Cursor, general in the Roman army, first erected a sun-dial in the temple of Quirinus, from which time the days began to be divided into hours, 293 B.C. *Aspin*. The sun-dial was sometimes called the Quirinus, from the original place in which it was set up. *Ashe*. The Sabines who became Roman citizens were termed QUIRITES.

QUITO (capital of the republic of Equator), founded in 1534, was the scene of the measurement of a degree of the meridian, by the French and Spanish mathematicians, 1736-42. Forty thousand persons perished by an earthquake which almost overwhelmed the city of Quito, 4 Feb. 1797. Since then violent shocks, but not so disastrous, occurred; till one, on 22 March, 1859, when about 5000 persons were killed; see *Earthquakes* and *Equator*.

QUIXOTE, see *Don Quixote*.

QUOITS, a game said to have originated with the Greeks, and to have been first played at the Olympic games, by the Idæi Dactyli, fifty years after the deluge of Deucalion, 1453 B.C. Perseus, the grandson of Acrisius, by Danaë, having inadvertently slain his grandfather when throwing a quoit, exchanged the kingdom of Argos, to which he was heir, for that of Tirynthus, and founded the kingdom of Mycenæ, about 1313 B.C.

QUOTATIONS. Athenæus's "*Deipnosophistæ* or *Banquet of the Learned*" (compiled about 228), and Burton's "Anatomy of Melancholy" (1621), contain masses of extracts. Henry Ainsworth's "Communion of Saints" (died 1622) is a mosaic of Scripture quotations.

QUO WARRANTO ACT, passed 1280. By it a writ may be directed to any person to inquire by what authority he holds any office or franchise. Charles II. directed a writ against the corporation of London in 1683, and the court of king's bench declared their charter forfeited. The decision was reversed in 1690. The proceedings have been regulated by various acts, 1710, 1792, 1837, 1843.

RABBITS, see *New South Wales*, 1887.

The rabbit pest has spread devastation over the Australian colonies. Rabbit-proof wire-netting is chiefly used for checking its progress. The ravages of the *jack-rabbits* in California and adjoining states checked by hunters, 1895–6. Rabbits destroyed in Queensland by injection with chicken cholera, reported, 22 Oct. 1898.

RABELAIS CLUB, to promote the study of Rabelais and the illustration of his works; lord Houghton, sir W. Frederick Pollock and his sons, Walter Besant, and others; first meeting, Dec. 1879.

Rabelais Gallery, Pall Mall East, opened to the press, 13 Oct.; at the instance of the National Vigilance Association, four pictures were seized as indecent by the police, 3 Nov.; Mr. J. F. Sutton and Mr. H. Scarborough, the exhibitors, were prosecuted at Bow Street, 5 Nov.; committed for trial; 21 pictures ordered to be destroyed, 12 Nov.; Messrs. Sutton & Scarborough convicted, 18 Dec. 1890; fined 25*l.* each; the pictures ordered to be returned to France 18 April, 1891

Mr. W. F. Smith's translation of the works of Rabelais was issued by the club to subscribers, Feb. 1893

RABIES, see *Hydrophobia*.

RACES, one of the ancient games of Greece. Horse-races were known in England in very early times. Fitz-Stephen, in the days of Henry II., mentions the delight taken by the citizens of London in the diversion. In James I.'s reign Croydon in the south, and Garterly in the north, were celebrated courses. Near York there were races, and the prize was a little golden bell, 1607. *Camden.* In the end of Charles I.'s reign, races were run at Hyde Park. Charles II. patronised them, and instead of bells, gave a silver bowl, or cup, value 100 guineas. William III. added to the plates (as did queen Anne), and founded an academy for riding.

At Ascot, begun by the duke of Cumberland, uncle to George III.; mentioned 1727

The first racing calendar is said to have been published by John Cheney . . . . . ,,

Act for suppressing races by ponies and weak horses, 19 Geo. II 1739

The most important race meetings in England are those at Newmarket (*which see*), established by Charles II. 1667; and at Epsom, begun about 1711; by Mr. Parkhurst (annual since 1730, *Allen's Surrey*). [The earl of Derby began the Oaks, 1779; the Derby, 1780 (first won by Diomed).] See *Derby Day*.

Flying Childers, bred in 1715 by the duke of Devonshire, was allowed by sportsmen to have been the fleetest horse that ever ran at Newmarket, or that was ever bred in the world; he ran four miles in six minutes and forty-eight seconds, or at the rate of 35½ miles an hour, carrying nine stone two pounds. He died in 1741, aged 26 years.

At Doncaster, by col. St. Leger (the *St. Leger* stakes were founded in 1776, and so named in 1777) . 1776

Eclipse was the fleetest horse that ran in England since the time of *Childers;* he was never beaten, and died in February, 1789, aged 25 years. His heart weighed 14 lb., which accounted for his wonderful spirit and courage. *Christie White's Hist. of the Turf.*

At Goodwood, begun by the duke of Richmond, in his park 1802

RACK, an engine of torture, for extracting a confession from criminals, mentioned by Demosthenes, *de Coronâ*, B.C. 330, and in later times an instrument of the Inquisition. Lord Coke states from tradition that the duke of Exeter, in the reign of Henry VI., erected a rack of torture 1447 (thence called the duke of Exeter's daughter), now seen in the Tower. In the case of Felton, who murdered the duke of Buckingham, the judges of England protested against the proposal of the privy council to put the assassin to the rack, as contrary to the laws, 1628; the use of the rack was abolished 1640. See *Ravaillac* and *Torture*.

RACQUETS (Arabic *ra'hat*, "palm of the hand"). A game played in an open (now but seldom) or close court (60 ft. long, and 30 ft. wide and 40 ft. high, with high walls surrounding it, the floor being divided into two principal areas by the "short" line) with a bat resembling that used in tennis, and a small hard ball. 15 usually constitutes the game. Racquets first came into vogue during the early part of the 19th century, and Chas. Dickens refers to the game in "Pickwick" in connection with the Fleet prison, where insolvent debtors enlivened the monotony of their existence by playing this game against a single wall. In 1853, a racquet court was erected at Prince's Club, and since then courts have become common at the universities and public schools. On the sale of Prince's Club grounds in 1886, the Queen's Club, Kensington, became the headquarters of the game, and here the championship and the universities and public school matches take place. RADCLIFFE LIBRARY, OXFORD, founded under the will of Dr. John Radcliffe, an eminent physician. He died 1 Nov. 1714, leaving 40,000*l.* to the university of Oxford for the founding a library, the first stone of which was laid 17 May, 1737, and the edifice was opened 13 April, 1749 — The **RADCLIFFE OBSERVATORY**, Oxford, founded by the exertions of Dr. Hornsby, Savilian professor of astronomy, about 1771, was completed in 1794. The publication of the observations was commenced in 1842, by Mr. Manuel J. Johnson, the director, appointed in 1839. Radcliffe Infirmary opened in 1770; see *Oxford*, 1893.

RADIATION, see *Heat*.

RADICALS or "**RADICAL REFORMERS**," persons who professed to aim at procuring a thorough reformation in the government and policy of England, became prominent in 1816, when Hampden clubs were formed, of which sir Francis Burdett, lord Cochrane, major Cartwright, and William Cobbett were prominent members. Samuel Bamford's "Life of a Radical," published in 1842, gives much information; he died 13 April, 1872. Many radicals were severely punished, 1817-20. Wm. Harris's "History of the Radical Party," published early in 1885.—The "Radicals" in the United States were the party headed by Thaddeus Stevens, bitterly opposed to the policy of president Johnson, as too favourable to the subdued Southern States.

The *Radical Programme*, advocated by the rt. hon. Joseph Chamberlain, widely circulated, first appeared July 1885, in the *Fortnightly Review*; it included reform of the land laws, free education, increased local government, reform in taxation and finance, improvement of condition of agricultural labourers and of the poor, and religious equality and disestablishment of national churches.

Mr. C. C. Greville (*Journal*, 25 Aug. 1837) describes "Tory Radicals." Some politicians were so termed in 1885

RADIOMETER, &c., a little instrument constructed by Mr. (knt. 1897) Wm. Crookes, F.R.S., 1873-6. Two little disk arms, mounted on a pivot and placed in an exhausted glass-bulb, revolve when placed in bright light. The motion was attributed to heat-absorption, 1877; see *Light*.

Radiophone. By this apparatus professor Bell, at Philadelphia, showed how a ray of strong light, acting on a selenium cell, conveyed sound 500 feet, Sept. 1884.

RADIUM. This new and extremely rare metal is found in combination with chlorine and bromine, as radium chloride and radium bromide. It is obtained in very minute quantities from pitchblende after the metal uranium has been extracted. The principle of radio-activity was discovered by M. Becquerel, in Paris, in 1896, from the study of uranium, and Mme. Sklodowska Curie's investigation of this metal, when taking up the subject of radio-activity as the thesis for her doctorate degree, led to the discovery of radium. The discovery of the new metal was communicated by M. Curie to the Academy of Sciences, Paris, in March, 1903, and on 19 June of the same year M. Curie gave a demonstration of this new substance at the Royal Institution, London. Investigations of the properties and phenomena exhibited by radium have also been carried on by M. Becquerel, prof. E. Rutherford, sir William Ramsay, Mr. Soddy, prof. J. J. Thompson, sir William Crookes, and others. Radium possesses the extraordinary property of continually producing heat without combustion and spontaneously producing electricity, and maintains its own temperature, 1·5° Cent. above its surroundings. It gives off an emanation or gas which shines by its own light, resembling in appearance that of the glow-worm. This emanation, under the cold of liquid air, condenses and leaves behind

a rare gas, helium, an element existing in the sun. It is supposed that radium is an element breaking up, and in its dissolution giving out energy. Three kinds of rays are continually in a state of radiation, and are known as the alpha, beta, and gamma rays. The *alpha* rays consist of atoms of matter, each 1 per cent. of the weight of a radium atom, projected with an enormous velocity, but these can be stopped by a thin sheet of metal; they are the projectiles which are rendered visible on a chemical screen, as the zinc sulphide in sir William Crookes' ingenious spinthariscope. The *beta* rays consist of flying or escaped electrons, atoms of atoms, many thousand times smaller than anything else known, and possess the power of penetrating most metals. The *gamma* rays, also very penetrating, are probably a variety of the X-rays. Radium has been detected in the deposit of the hot mineral waters of Bath and Buxton, pointing to its existence in considerable, but widely diffused, quantities in the interior of the earth. It is supposed that the element uranium is the parent of radium, and that lead is the last stage in the series of transformations. As a therapeutic agent, radium rays have been used in cases of cancer, lupus and other skin diseases, but with no very definite result; it appears, however, to have a bactericidal action in certain cases. Experiments made by M. Danysz, Feb. 1903 *et seq.*, at the Pasteur Institute, on the action of radium on larvæ, demonstrated the power of the rays to suspend or modify functional developments. Experiments on various low forms of life have also been made by M. Bohn, at the biological laboratories of the Sorbonne, with remarkable results. M. and Mme. Curie, the discoverers of radium, were the recipients of various honours in recognition of their eminent services to scientific research. In 1905 prof. John B. Burke, of the Cavendish laboratory, Cambridge, by the exposure of a solution of gelatine to the action of bromide of radium, produced a thin pellicle, which gradually increased in depth; on microscopic examination it was found to be composed of corpuscles, to which the name of *radiobes* has been given. It has not, however, been proved that spontaneous generation has been produced by the action of radium. M. Curie was killed in a street accident in Paris in April, 1906.

RADSTADT, Austria. Here Moreau and the French defeated the Austrians, 5 July, 1796.

RAFFAELLE WARE, see *Pottery*.

RAGGED SCHOOLS, free schools for outcast destitute ragged children, set up in large towns. The instruction is based on the scriptures. John Pounds, a cobbler, of Portsmouth, who died in 1839, opened a school of this kind; and one was set up by Andrew Walker, in "Devil's Acre," Westminster, in 1839. *Knight.* They did not receive their name till 1844, when the "Ragged school union" was formed, principally by Mr. S. Starey and Mr. Wm. Locke (afterwards hon. secretary). The earl of Shaftesbury was chairman. In 1856 there were 150 Ragged school institutions. Sunday ragged schools reported in London in 1867, 226; in 1898, 231; day schools, in 1867, 204; in 1878, 58; week evening schools, in 1867, 207, in 1878, 147; 44 industrial schools in 1898. Ragged school buildings were exempted from rates, 1869. The day schools have now been superseded by those established by the school board and educational authorities; but the Sunday and night schools, mothers' meetings, &c., are still maintained in very great efficiency (1905). Dr. Guthrie, a founder of ragged schools in Edinburgh, &c., died 24 Feb. 1873. The earl of Shaftesbury, an ardent supporter of the movement, died 1 Oct. 1885. Jubilee celebrated, 20 April, 1894. Annual meetings; the union was styled Shaftesbury society in May, 1898; total members 127,087, 1902. Diamond jubilee held at Queen's-hall, princess Louise distributes prizes, 1 May, 1905. See *Shoeblack*.

RAGMAN ROLL (said to derive its name from Ragimunde, a papal legate in Scotland) contains the records of the homage and fealty to Edward I., sworn to by the nobility and clergy of Scotland at Berwick in 1296. The original was given up to Robert Bruce, king of Scotland, in 1328, when his son David was contracted in marriage to the princess Joanna of England.

RAGUSA, a city on the Adriatic, on the south confines of Dalmatia, was taken by the Venetians, 1171, but became an independent republic, 1358. It suffered much by an earthquake, 1667; was taken by the French in 1806, and given up to Austria in 1814.

RAILWAYS. Short roads, in and about Newcastle, laid down by Mr. Beaumont, so early as 1602, are thus mentioned in 1676:—"The manner of the carriage is by laying rails of timber from the colliery to the river, exactly straight and parallel; and bulky carts are made with four rollers fitting those rails, whereby the carriage is so easy that one horse will draw down four or five chaldron of coals, and is an immense benefit to the coal merchants." *Roger North.* They were made of iron at Whitehaven, in 1738. See *Gauges*, *Tramroads*. For electric railways see *Electricity*.

RAINBOW. Its theory was developed by Kepler in 1611, and by René Descartes in 1629; see *Spectrum*.

RAIN-FALL. Mr. G. J. Symons printed a table of rain-fall in Britain for 140 years, 1726-1865, in the reports of the British Association in 1866; and another table in 1883 for the years 1866—1880. The wettest year was 1852, being 38 per cent. above the average; but 1872 was 58 per cent. He began to publish his "Annual Rainfall in the British Isles" in 1866-95. In 1867 he published, "*Rain: How, When, Where, Why, it is Measured.*" It contains an attempt at a rainfall table of the world. Mr. Symons died, aged 62, 10 March, 1900.

RAJPUTANA, an administrative territory, N.W. India, embracing 20 native states and the British district of Ajmere-Merwara (27,11 sq. mi.; population, 460,722). Total area, 132,461 sq. mi.; population in 1881, 10,268,392; 1891, 12,089,330; 1901, 9,723,301 The Rajputs, the predominant race, are a proud aristocracy. At the time of the Mahometan invasions in the 11th century, the Rajputs ruled over half-a-dozen strong states. From the end of the 16th to the middle of the 18th century, these states acknowledged the supremacy of the Mogul emperor of Delhi; they were next subjected by the Mahrattas, but became independent when these were crushed by the British, 1817 *et seq.*, with whom they eventually became allies. The Rana of Jhalawar accused of misgovernment, etc., was deprived of full powers in 1887, reinvested, 1894.

"RALLIED" to republicanism, a name assumed by a party at the general election in France, Aug. 1893.

RAM, that portion of the bow of a battleship which projects below the water-line in the form of a beak, and designed by its momentum when striking a hostile vessel to crush in its side. The latest battleships, such as H.M.S. *Dreadnought*, constructed end of 1905, are being built without rams. The ram was first used during the American civil war, when the federal frigate *Cumberland* was sunk by the confederate ram *Virginia*, 1862. During the Austro-Italian war the Austrian ironclad *Ferdinand Max* sunk the Italian ironclad *Re d'Italia* at the battle of Lissa, 1866. In the war between Chile and Peru, the Peruvian battleship *Huascar* sunk the Chilian corvette *Esmeralda*, 1879. Accidents by collision between battleships have occurred:—The *Vanguard* was rammed and sunk by the *Iron Duke*, 1875; the *Grosser Kurfürst* by the *König Wilhelm*, 1878 (280 of the crew of the former were drowned); the *Victoria* by the *Camperdown*; Adm. Tryon and 400 men perished, 1893.

RAMADÁN, otherwise Ramadhām, Ramazān, the ninth month of the Mahometan year, in which is kept a strict fast in memory of the first revelation to Mahomet; the fast is followed by the short festival Bairam (*which see*). The Mahometan year is lunar, consisting of 354 days 21 hours, and in about 33 years the Ramadān passes through all the seasons.

RÂMÂYANA, the older of the two great Sanskrit epic poems, is said to have been written

by the poet Valmiki, 5th cent. B.C. Its hero is Rama, an incarnation of Vishnu, as the son of the king of Oudh. The Râmâyana consists of 24,000 verses, divided in 7 books. A translation in English verse by R. T. H. Griffiths in 5 vols., published 1870-75.

RAMBOUILLET, a royal château, about 25 miles from Paris. Here Francis I. died 31 March, 1547; and here Charles X. abdicated, 2 Aug. 1830. After being owned by the count of Thoulouse and the duc de Penthièvre, it was bought by Louis XVI. 1778.

RAMILLIES (Belgium), the site of a brilliant victory gained by the English under the duke of Marlborough and the allies over the French commanded by the elector of Bavaria and the marshal de Villeroy, on Whitsunday, 23 May (o.s. 12), 1706. The French were soon seized with a panic, and a general rout ensued: about 4000 of the allied army were slain in the engagement. This accelerated the fall of Louvain, Brussels, &c.

RAMSGATE, Kent, a fishing village in the 17th century, became important through commerce after 1689, and is now a popular summer resort. The erection of the pier began in 1750; the harbour was formed by George Smeaton, 1780-95, and the lighthouse erected soon after. Iron promenade pier, 1881; handsome Roman Catholic church, built by the Pugins, the elder of whom resided here; Jewish synagogue and college erected by sir Moses Montefiore, also a resident. Ramsgate incorporated as a borough 1884. Frith's "Ramsgate Sands" painted 1854. Population, 1881, 22,683; 1891, 24,676; 1901, 27,693.

RANELAGH (near Chelsea), a public garden for concerts and dancing, occupying the grounds of Ranelagh House (built by Jones, earl of Ranelagh, about 1691), was opened with a breakfast, 5 April, 1742. The music for the orchestra was frequently composed by Dr. Arne. The gardens were closed, and the buildings taken down, in 1804. A sports club of the same name near Barnes is now, 1905, a popular and select social resort.

RANGES ACT, 1891. See under *Commons*.

RANGOON, maritime capital of the Burmese empire, built by Alompra, 1753, was taken by sir A. Campbell on 11 May, 1824. In Dec. 1826, it was ceded to the Burmese on condition of the payment of a sum of money, the reception of a British resident at Ava, and freedom of commerce. Oppression of the British merchants led to the second Burmese war, 1852. Rangoon was taken by storm by general Godwin, 14 April, and annexed to the British dominions in December. An English bishopric founded, 1877. Destructive fire for two days about 18 April, 1884. Foundation stone of Cathedral laid by lord Dufferin, viceroy, 24 Feb. 1886. Population, 1891, 180,324; 1901, 232,326. Fighting between the Mahometans and Hindoos during a festival suppressed by government; many deaths, 23-25 June, 1893. Memorial of the officers who fell in the war, 1885-90, unveiled by the viceroy, the marquis of Lansdowne, 20 Nov. 1893. Mr. Macgregor, a merchant, bequeaths 75,000*l.* to the city, Jan. 1903. See *Burmah*.

RANSOME'S ARTIFICIAL STONE, the invention of Mr. Fred. Ransome, 1848, is made by dissolving common flint (silica) in heated caustic alkali, adding fine sand. The mixture is pressed into moulds and heated to redness.

RANTERS, a sect which arose in 1645, similar to the Seekers, now termed Quakers. The name is sometimes applied to the Primitive Methodists, separated from the *Wesleyans* in 1810.

RAPE was punished with death by the Jews, Romans, and Goths; by mutilation and loss of eyes in William I.'s reign. This was mitigated by the statute of Westminster 1, 3 Edw. I. 1274. Made felony by stat. Westminster 2, 12 Edw III. 1338; and without benefit of clergy, 18 Eliz. 1575. Rape made punishable by transportation in 1841; by penal servitude for life, or a less period, 1861. The Crimimal Law Amendment Act, 1885, contains provisions respecting rape.

RAPHIA, a port of Palestine. Here Antiochus III. of Syria was defeated by Ptolemy Philopater, king of Egypt, 217 B.C.

RAPHOE, a bishopric in N. Ireland. St. Columb-kille, a man of great virtue and learning, and of royal blood, founded a monastery in this place, and it was afterwards enlarged by other holy men: but it is the received opinion that St. Eunan erected the church into a cathedral, and was the first bishop of the see in the 8th century. Raphoe was united to the bishopric of Derry by act 3 & 4 Will. IV. 1833; see *Bishops*.

RAPPAHANNOCK, see *Chancellorsville*, and *Trials*, 1865.

RASPBERRY, not named among the fruits early introduced into this country from the continent. The Virginian raspberry (*Rubus occidentalis*) before 1696, and the flowering raspberry (*Rubus odoratus*), about 1700, came from North America.

RASTADT, Baden. Here the preliminaries of a peace were signed, 6 March, 1714, by marshal Villars on the part of the French king, and by prince Eugène on the part of the emperor; the German frontier was restored to the terms of the peace of Ryswick.—The Congress of Rastadt, to treat of a general peace with the Germanic powers, was commenced 9 Dec. 1797; and negotiations were carried on throughout 1798. The atrocious massacre of the French plenipotentiaries at Rastadt by the Austrian regiment of Szeltzler took place 28 April, 1799.

RATCLIFFE HIGHWAY (now St. George's-street), East London. Mr. Marr, a shopkeeper here, with his wife, child, and boy, were brutally murdered, 7 Dec. 1811; and on 11 Dec., Mr. and Mrs.

Williamson, their child, and servant, were also murdered. A man, named Williams, arrested on suspicion, committed suicide, 15 Dec.

RATIONALISM, the doctrine of those who reject a divine revelation and admit no other means of acquiring knowledge but experience and reason. The leading writers are Reimarus of Hamburg (died 1768), Paulus of Heidelberg, Eichhorn, Reinhard, and Strauss. W. Lecky's (died 23 Oct. 1903) "History of Rationalism in Europe" appeared, July, 1865; and Dr. J. Hurst's, April, 1867. See *Higher Criticism.*

RATISBON (in Bavaria) was made a free imperial city about 1200. Several diets have been held here. A peace was concluded here between France and the emperor of Germany, by which was terminated the war for the Mantuan succession, signed 13 Oct. 1630. In later times, it was at Ratisbon, in a diet held there, that the German princes seceded from the Germanic empire, and placed themselves under the protection of the emperor Napoleon of France, 1 Aug. 1806. Ratisbon was made an archbishopric in 1806; secularised in 1810: was ceded to Bavaria in 1815; became again an archbishopric in 1817. Population 1890, 37,567; 1900, 45,426.

RATTENING (from *ratten*, provincial for rat), the removing and hiding workmen's tools as a punishment for nonpayment to trades unions, or opposition to them. Much "rattening" was disclosed at the commission of inquiry at Sheffield in June, 1867; and at Manchester Sept. following; see *Sheffield.*

RAVAILLAC'S MURDER of Henry IV. of France, 14 May, 1610. The assassin was fearfully tortured, and executed, 27 May.

RAVENNA (on the Adriatic), a city of the Papal states, founded by Greek colonists, fell under the Roman power about 234 B.C. It was favoured and embellished by the emperors, and Honorius made it the capital of the Empire of the West about A.D. 404. In 568 it became the capital of an exarchate. It was subdued by the Lombards in 752, and their king, Astolphus, in 754 surrendered it to Pepin, king of France, who gave it to the pope Stephen, and thus laid the foundation of the temporal power of the holy see. On the 11th of April, 1512, a battle was fought between the French, under Gaston de Foix (duke of Nemours and nephew of Louis XII.), and the Spanish and Papal armies. De Foix perished in the moment of his victory, and his death closed the good fortune of the French in Italy. Ravenna became part of the kingdom of Italy in 1860.

REAPING-MACHINES. One was invented in this country early in last century, but failed from its intricacies. At the meeting of the British association at Dundee, Sept. 1867, the rev. Patrick Bell stated that he invented a reaping-machine in 1826, which was used in 1827; the principle being that on which the best machines are now constructed. On 15 Jan. 1868, he was presented with a valuable testimonial, and 1000*l.* in money. McCormick's American machine was invented about 1831, and perfected in 1846; he received a gold medal from the jurors of the exhibition of 1851; and also at the Royal Agricultural society's competition at Bristol, 6 Aug. 1878. The sheaves are bound by these reaping machines. Hussey's machine, also American, exhibited in 1851, was highly commended.

John Ridley, the inventor of the reaping machine largely used in Australia, died 28 Nov. 1887.

REASON was decreed to be worshipped as a goddess by the French republicans, 10 Nov. 1793, and was personified by an actress.—Thomas Paine's "Age of Reason" was published in 1794-5; Immanuel Kant's "Critique of Pure Reason," ("Kritik der reinen Vernunft"), 1781.

Mr. Balfour introduces his redistribution proposal (referred to in the king's speech, 14 Feb. 1905), proceeding by declaratory resolution, 10 July; memorandum issued by the president of the local government board, setting forth that by the scheme 17 seats would be gained by England, 1 by Wales, 4 by Scotland, and 22 seats lost by Ireland. By the ruling of the speaker the resolution could not be taken as a whole, but must be divided into 8 or 9 separate parts for discussion *seriatim* in committee of the whole house. Mr. Balfour thereupon announced that he should withdraw the resolution and proceed by bill, 17 July, 1905

Committee of 3 appointed by Mr. Gerald Balfour, comprising col. D. A. Johnson, Mr. A. Glen, K.C., and Mr. Howel Thomas, to obtain information for the guidance of the government in framing a scheme for the redistribution of seats . Sept. ,,

REFORMATION, THE. Efforts for the reformation of the church may be traced to the reign of Charlemagne, when Paulinus, bishop of Aquileia, employed his voice and pen to accomplish it. The principal reformers were Wickliffe, Huss, Jerome of Prague, Savonarola, Erasmus, Luther, Zuinglius, Tyndal, Calvin, Melanchthon, Cranmer, Latimer, Knox, and Browne. Luther thus characterised himself and his fellow reformers · "Res non Verba—*Luther.*" "Verba non Res—*Erasmus.*" "Res et Verba—*Melanchthon.*" "Nec Verba nec Res—*Carlstadt;*" see *Wickliffites, Protestants, Calvinists, Lutherans, Presbyterianism, Wittenberg,* &c. REFORMATORY SCHOOLS, for juvenile delinquents. The Reformatory School at Mettray, near Tours in France, was founded in 1839 by M. de Metz, formerly a councillor of Paris, warmly seconded by the vicomte de Courcelles, who gave the estate on which the establishment is placed. The one at Redhill, Surrey, is situated on land purchased in 1849 by the Philanthropic Society, and under the direction of the rev. Sydney Turner. The first stone of the building was laid 30 April, 1849, by the prince consort. The inmates of these establishments are instructed in farm labour, and divided into so-called families. In 1854 the Juvenile Offenders act was passed; amended act, 1901. In 1851 and 1853 great meetings were held on this subject; and in Aug. 1856, the first grand conference of the National Reformatory Union was held. See *Industrial Schools.*

REGATTA. A public boat race, introduced into this country from Venice in 1775: and in that year one took place on the Thames.

REGENCY BILLS. One was passed 1751. One was proposed to parliament in consequence of

the mental illness of George III., and debated 10 Dec. 1788. It was relinquished on his majesty's recovery, 26 Feb. 1789. The return of the malady led to the prince of Wales (afterwards George IV.) being sworn in before the privy council as regent of the kingdom, 5 Feb. 1811. The Regency Bill providing for the administration of the government, should the crown descend to the princess Victoria while under eighteen years of age, passed 1 Will. IV., 23 Dec. 1830. A Regency Bill appointing prince Albert regent in the event of the demise of the queen, should her next lineal successor be under age; passed 4 Aug. 1840.

REGENTS, see *Protectorates*.

REGENT'S CANAL, begun at Paddington, where it joins a cut to the Grand Junction, passes under Maida-hill, continues its course by the Regent's-park to Islington, where another subterranean excavation, about three-quarters of a mile in length, was formed for its passage. It then proceeds by Hoxton, Hackney, Mile-end, to Limehouse, where it joins the Thames. The whole length of it is nine miles; it comprises twelve locks and thirty-seven bridges. Begun, 1812; opened 1 Aug. 1820. Great explosion of *gunpowder* (*which see*), 2 Oct. 1874. New bridge, near Gloucester gate, Regent's park, opened by the duke of Cambridge, 3 Aug. 1878. Regent's Canal and City Railway Co. act passed, 1882.

REGENT'S PARK, originally part of the grounds belonging to a palace of queen Elizabeth, near to the north end of Tottenham court-road, pulled down in 1791. Since 1600, the property was let to various persons, but the leases having expired it reverted to the crown; and in 1814 great improvements were commenced under the direction of Mr. Nash. The park consists of about 450 acres; within it are the gardens of the Zoological Society and the Royal Botanical Society. During a frost on 15 Jan. 1867, the rotten ice of one of the lakes gave way, and about 200 persons were immersed, of whom above 40 perished. Addition of 20 acres made to the public park, 1883.

Joseph Rumbold was murdered near York Gate, 24 May. Eight youths, George Gallesly, 17, William Elvis, 16, Francis Cole, 18, Peter Lee, 17, William Joseph Graefe, 17, William Henshaw, 16, Charles Henry Govier, 16, and Michael Duling, 15, all described as labourers, were charged with the wilful murder, 1 Aug.; Gallesly was convicted; the rest acquitted of murder, 2 Aug.; they pleaded guilty to minor charges, and were sentenced to various terms of penal servitude, 4 Aug. The evidence disclosed the existence of local bands of young roughs carrying on internecine warfare. Joseph Rumbold was not the intended victim; Gallesly reprieved, Aug. 1888.

REGENT STREET, London, W.; designed and executed by John Nash; authorised by act, 53 George III. 1813 The colonnades of the quadrant were removed in 1848.

REGGIO, see *Rhegium*.

REGICIDES, in English history, are the commissioners appointed to try king Charles I., 150 in number; of whom 70 acted, and 59 signed the death-warrant, Jan. 1649. Of these last, 29 were tried, and 10 executed: Harrison, 13 Oct.; Cook and Peters, 16 Oct.; Scott, Scroop, Clement, and Jones, 17 Oct.; Axtell and Hacker, 19 Oct. 1660. They asserted themselves to be martyrs. Others were imprisoned. See *Assassinations*.

Argyll and Sutherland Highlanders.

REGISTERS. The registering of deeds and conveyances disposing of real estates was appointed to be effected in Yorkshire and in Middlesex, 2 Anne, 1703, *et seq*. Greater security was thus given to purchasers and mortgagees; and the value of estates increased in those counties. Wills have been for a series of years kept and registered, in London, at Doctors' Commons; see *Wills*. The registering of shipping in the Thames was commenced, 1786; and throughout England, 1787; and several acts and amendments of acts have since followed for keeping and improving registers.

The duties and payments of the Lord Clerk Register of Scotland and his deputy were regulated by 42 & 43 Vict. c. 44 1879

REGISTERS, PAROCHIAL, were established by Cromwell, lord Essex, by which the dates of births, marriages, and burials, became ascertainable, Sept. 1538. This measure was opposed by the people, who feared some new taxation. A stamp-tax was laid on registers in 1784. Laws for their better regulation were enacted in 1813 *et seq.* The great Registration act (introduced by lord John Russell), 6 & 7 Will. IV. c. 86, passed 17 Aug. 1836, see *Bills of Mortality*, &c.

A new registration act for births and deaths, passed 7 Aug. 1874; another passed in 1901.

REGULATION OF THE FORCES ACT passed 17 Aug. 1871. See *Army.*

REICHENBACH (Prussia). Here Duroc was killed during the conflicts between the French and the allies, 22 May, 1813; see *Bautzen* Here was signed a subsidy treaty between Russia, Prussia, and England, whereby the last engaged to provide means for carrying on the war against Napoleon I. on certain conditions, 14, 15 June, 1813. Austria joined the alliance soon after.

REICHSRATH, the representative council of the empire of Austria, reconstituted by decree 5 March; met on 31 May, 1860. In May, 1861, the upper house consisted of 17 spiritual, 55 hereditary, and 39 peers. The lower house consisted of 136 elected deputies. No representatives came from Hungary, Transylvania, Venetia, the Banat, Slavonia, Croatia, and Istria. The Reichsrath was abolished by a rescript, 21 Sept. 1865, with the view of restoring autonomy to Hungary and other provinces. It again met 20 May, 1867. The Reichstag of Germany, the imperial parliament or diet, first met at Berlin, 21 Mar. 1871.

REIGATE (Surrey), sent two members to parliament in the reign of Edward I.; lost one by the Reform Act of 1832, and was wholly disfranchised for corruption by that of 1867. Population, 1881, 18,662; 1891, 22,646; 1901, 25,993.

REIGN OF TERROR. Maximilien Robespierre headed the populace in the Champ de Mars in Paris, demanding the dethronement of the king, 17 July, 1791. He was triumphant in 1793, and numbers of eminent men and citizens were sacrificed during his sanguinary administration. Billaud Varennes denounced the tyranny of Robespierre in the tribune, 27 July, 1794. The next day he suffered death, with many of his companions; see *France.* This has been termed the *Red* Terror. The reaction after the restoration of the Bourbons, 1815, disgraced by many atrocious acts of wanton cruelty, has been termed the *White* Terror. The Jesuits were then conspicuous in the destruction of their adversaries.

REIGNS OF SOVEREIGNS. The average duration, according to Newton, is 19 years each; according to Hales 22½ years; that of the sovereigns of England being 23½ years, and that of the popes, 7½ years. Pius IX. was the first pope who reigned above 25 years, 1846-78.

REISNER WORK. The name applied to a kind of inlaid cabinet-work formed of woods contrasted in colour. So called from Reisner, a German workman, who lived in the reign of Louis XIV. (1643–1715) of France.

RELICS, the trade in these became general in the 7th century, fragments of bones, &c. being brought from Jerusalem. The sale of relics was prohibited by pope Innocent III. 1198, without effect.

RELIEF CHURCH, a secession from the church of Scotland, founded by Thomas Gillespie, who was deposed from his ministry for opposing the doctrine of passive obedience to the law of the church of Scotland respecting the settlement of ministers, 23 May, 1752. The church was constituted as the "presbytery of relief," 22 Oct. 1761. The Relief and Secession churches were united as the United Presbyterian Church, 13 May, 1847.

RELIEF OF DISTRESS (IRELAND) ACT, 43 & 44 Vict. c. 14, passed 2 Aug. 1880. See *Ireland, Dec.* 1890. Society for the relief of distress founded, 1860.

RELIGION. "The feeling of reverence which men entertain towards a Supreme Being or to any order of beings conceived by them as demanding reverence for the possession of superhuman control over the destinies of man or the powers of nature; more especially the recognition of God as an object of worship, love, and obedience." There are numerous classifications of religions. Hegel distributes them into religions of nature, religions of spirituality, and the absolute or Christian religion. Professor Tiele's classification includes nature religions and ethical religions; the former comprehending animism, polytheism, anthropomorphic polytheism, &c.; the latter comprehending Confucianism, Taoism, Brahminism, Buddhism, Mohammedanism, Judaism, and Christianity. The science of religion comprises the psychology, the history of religions, and comparative theology. Hume may be said to have initiated the study of religion as a process of mind and the factors which condition and determine its development in his "Natural History of Religion," 1759. During the 19th century the study of comparative religions was taken up and has made great progress in Germany, France, and England by the investigations of philosophers and scholars like Von Hartmann, Pfleiderer, Reveille, Kuenen, Renouf, Max Müller, Herbert Spencer, D'Alviella, De la Saussaye,

Tylor, Lubbock (lord Avebury), Rhys, Davids, Rawlinson, Lang, and others.

The following table gives the latest distribution and percentages of the leading religions of the world according to Dr. H. Zeller, director of the Stuttgart Statistical Bureau:—

	Per cent. of total.
Jews, 10,860,000	·7
Christians, 534,940,000	34·6
Mahometans, 175,290,000	11·4
Brahmins, 214,000,000	13·8
Buddhists, 121,000,000	7·8
Confucians, 300,000,000	19·4
Other religions, 188,420,000	12·2
Total, 1,544,510,000.	

RELIGION OF HUMANITY, see *Positive Philosophy* and *Secularism*.

RELIGIOUS TRACT SOCIETY, founded 1799. Centenary meeting in Exeter-hall, 5 May, 1899; centenary fund, total, 51,490*l.*, 20 April, 1900; receipts, 1902, 20,975*l.* Literature in 230 languages and dialects published. 3,613,938,330 publications circulated by the society from its foundation to year ending 1904-5. *Religious instruction* in board schools, see *Education*, 1870-94, and 7 Aug. 1902.

REMISSION OF PENALTIES ACT, see *Sunday*.

REMONSTRANCE, THE GRAND, drawn up by the house of commons, and presented to king Charles I., 1 Dec. 1641. It consisted of 206 articles, dwelt bitterly on all the king's illegal and oppressive acts, and was printed by order of the house.

REMONSTRANTS, see *Arminians*.

RENAISSANCE, a term applied to the revival of the study of classic literature and art in the 15th and 16th centuries, under the patronage of the Medici and others; see *Painters*, and *Sculptors*. Mr. John A. Symonds' "History of the Renaissance in Italy," with supplements, 7 vols., published 1875-86. He was born 1840 and died 19 April, 1893. "The Renaissance," vol. i. of the Cambridge Modern History, published Jan. 1903.

RENDSBURG (Holstein), was taken by the imperialists in 1627; by the Swedes in 1643; and by the Prussians and confederate troops in 1848. The first diet of Schleswig and Holstein met here 3 April, 1848. It was re-occupied by the Danes in 1852, and taken by the Prussians after a serious conflict, 21 July, 1864.

RENNES (capital of Brittany, N. W. France). Here was established by Henry II., in 1553, the parliament so celebrated for its independence, especially in its struggle with the court, 1788-89. On 20 May, 1788, it declared infamous every one who should take part in the *cour plenière* then proposed, but afterwards suppressed. Here took place the re-trial of the Dreyfus case (which see) 1899. Population in 1901, 74,006.

RENTS said to have been first made payable in money, instead of in kind, about 1135. Numerous statutes have been enacted in various reigns to define the relations and regulate the dealings between landlord and tenant. 8 & 9 Vict. c. 106 (1845) regulates leases. By the act 8 Anne, 1709, no goods are removable from tenements under an execution until the rent shall have been paid to the landlord by the sheriff, 1709. The rental of England, including land, houses, and mines, was 6,000,000*l.* about the year 1600, and twelve years' purchase the value of land. About 1690, the rental amounted to 14,000,000*l.*, and the land was worth eighteen years' purchase. *Davenant on the Revenues*. The rental of the United Kingdom was estimated during the nineteenth century at 127,000,000*l.*; Great anti-rent agitation in Ireland, 1879, *et seq.*; see *Land, Ireland*, and *Irish Land Act*, 1903.

REPEAL OF THE UNION, IRELAND. An Irish association was formed with this object under the auspices of Mr. O'Connell, in 1829. See *Home Rule* and *Ireland*.

A proclamation of the lord lieutenant prohibited the meetings of a society "leagued for the purpose of procuring a repeal of the union, under the name of the Irish Society for Legal and Legislative Relief, or the Anti-Union Society" . 18 Oct. 1830
The commons, by a majority of 484, reject Mr. O'Connell's motion for repeal . 27 April, 1834
A new association in 1841, 1842, and 1843 became more violent Assemblies of the lower classes of the people were held in the last-named year, in various parts of Ireland, some of them amounting to 150,000 persons, and called "monster meetings."
A meeting to be held at Clontarf, on 8 Oct., 1843, was prevented by government; and Mr. O'Connell and his chief associates were brought to trial for political conspiracy, 15 Jan. 1844; and convicted 12 Feb; but the sentence was reversed by the house of lords, 4 Sept; see *Trials*
The association for the repeal of the union continued for some time under the direction of Mr. John O'Connell, but was little regarded.
The total "repeal rent" is said to have amounted to 134,379*l.*
A fruitless attempt was made in Dublin to revive repeal agitation . . . . . 4 Dec. 1860
See *Home Rule* and *Ireland* for the revival of the home rule movement and its subsequent development.

REPORTING. The publication of the debates in parliament is forbidden as a breach of privilege, but was virtually conceded, after a severe struggle, in 1771.* Reporters' galleries were erected in the houses of parliament after the fire of 1834. To the unfettered liberty of reporting we doubtless owe much of our freedom and good government; see under *Law*. By the verdict for the defendant in the case of Wason *v.* *The Times* (for libel) reports of parliamentary debates were decided to be privileged, Nov. 1868. For the attempted exclusion of reporters, see *Parliament*, 1875. A commons committee on reporting recommend continuance of Hansard's debates with improvement, May, 1879.

The publication of Hansard's parliamentary debates began 1803 and closed in 1888. Latterly a subsidy was granted. The publication of the debates was taken up by Messrs. Macrae, Curtice & Co., Feb. 1889; and continued by the Hansard Publishing Union, limited, 1889; the Union ordered to be wound up, 13 May. See *Trials*, 1892-93.
Mr. Thomas Curson Hansard, formerly editor of the "debates," aged 78, dies . . 12 Nov. 1891
Reports of parliamentary debates now printed and published by private firms who tender for the work.

* Very inaccurate reports of parliamentary debates were inserted in the *Gentleman's Magazine* and other periodicals in the middle of the last century. Miller, printer of the *London Evening Mail*, was arrested in the city of London, by order of the house of commons, for publishing the debates, but was discharged by the lord mayor, who for doing this was sent to the Tower, where he remained until the end of the session. No opposition was made to the publication of the debates in the next session, 1772.

REPRESENTATION OF THE PEOPLE ACT FOR ENGLAND, passed 15 Aug. 1867; for Ireland and Scotland, 13 July, 1868; a new act passed, 6 Dec. 1884. See *Reform*.

The *Representative*, a daily Tory paper, was started by Mr. John Murray, the bookseller, in opposition to the *Times*, in 1826. Although he was assisted by Mr. Benjamin Disraeli and other eminent persons, the project was unsuccessful; the first number appeared 25 Jan., the last . 29 July, 1826

"REPTILE BUREAUCRACY," term applied in Germany to certain journalists writing for government pay, 1871, *et seq.*

REPUBLICANS, see *Democrats*. The name adopted by the Northern party in the United States, N.A., opposed to the democrats in the South. It is stated that the first delegate-nominating convention in the United States that adopted the name Republican party, was held in Strong, Franklin county, Maine, 7 Aug. 1854. Sir Charles Dilke, M.P. professed himself a republican at public meetings and was much applauded, Nov. 1871; but at some places his appearance led to riotous proceedings. His motion for returns respecting the expenditure of the civil list by queen Victoria was negatived in the house of commons (2—276), 19 March, 1872. A national republican conference of delegates was held at Sheffield, 1 Dec. 1872, when a national flag was adopted.

REQUESTS, COURTS OF; see *Conscience*.

REQUIEM, a solemn mass, sung for the dead, so called from the introit "Requiem Æternam," &c. Palestrina's Requiem was printed at Rome, 1591; Vittoria's at Madrid, 1605; Mozart's last work was a requiem, 1791.

REREDOS, the screen or decorated portion of the wall behind the altar in a church.

A highly sculptured reredos, designed by sir G. G. Scott, was erected in Exeter cathedral, by subscription 1873

Prebendary Philpotts, the chancellor, and others who objected, brought their objections before the bishop's visitation court, on 7 Jan.; it was decided that the bishop had jurisdiction in the matter, and he ordered the reredos to be removed, 15 April, 1874. Dean Boyd appealed to the court of arches, and sir R. Phillimore reversed the previous decision . . . . . 6 Aug. 1874

Prebendary Philpotts appealed to the judicial committee of the privy council, who decided that the reredos should remain . . . . 24 Feb. 1875

The magnificent reredos set up in St. Paul's Cathedral, London, was protested against as idolatrous by some of the London clergy, April, 1888. An action against the dean having been stopped by the bishop, the queen's bench division ordered the bishop to withdraw his veto upon the prosecution, 1 June, 1889. After further litigation, the house of lords sustained the bishop's veto . . . . . 20 July, 1891

RESERVE FORCES. In the summer of 1859, acts were passed to provide for the establishment of a military reserve force of men who had been in the service (not to exceed 20,000), and a volunteer reserve force of seamen not to exceed 30,000. These acts were consolidated and amended in 1867, 1882 and 1896. The reserve forces called out by proclamation, on account of possible war with Russia, 2 April, 1878. About 35,000 good soldiers appeared, and were commended. They were disbanded 31 Aug. 1878. Again called out on account of war in Egypt, 25 July, 1882, and prospect of war with Russia, 27 March, 1885. Average of army reserve: 1888, 55,068; 1890, 56,082; 1893, 76,874; 1896, 78,057; 1904, 74,940. Important changes to be made to meet exigencies during war time, act passed, 1 July, 1898. Reserve called out and sent to the front during South African war, 1899–1902

RESONATOR, a small apparatus, placed in the mouth to strengthen and increase the volume of the voice in singing, invented by signor Alberto Bach, who exhibited its effects at the Royal Academy of Music, 29 June, 1880.

RESPIRATORS, see *Charcoal* and *Fireman*.

RESTITUTION BILL, of Mr. Jesse Collings, proposes the surrender of lands illegally taken from commons, to be given to small cultivators, to become peasant proprietors, Jan. 1885.

RESTORATION, THE, of king Charles II. to the crown of England, after an interregnum of eleven years and four months, between 30 Jan. 1649, when Charles I. was beheaded, and 29 May, 1660, when Charles II. entered London amidst the acclamations of the people. The annual form of prayer, with thanksgiving, then appointed, was ordered to be disused by 22 Vict. c. 2, 25 March, 1849. See *France*, 1814, 1815.

RESTORATION CAMPAIGN, see *Zionists*.

RETREAT OF THE TEN THOUSAND GREEKS, who had joined the army of the younger Cyrus in his revolt against his brother, Artaxerxes Mnemon. The Greeks were victors, but Cyrus was defeated and slain at the battle of Cunaxa, 401 B.C. Artaxerxes having enticed the Greek leaders into his power and killed them, Xenophon was called to the command of his countrymen. Under continual alarms from sudden attacks, he led them across rapid rivers, through vast deserts, over the tops of mountains, till he reached the sea. The Greeks returned home after a march of 1155 parasangs or leagues (3465 miles), which was performed in 215 days, after the absence of fifteen months. This retreat has been immortalised by the account given by its conductor, in his "Anabasis Cyri" (Expedition of Cyrus).

* Revised in relation to army, navy, and India.

The weekly instead of the quarterly publication of the public revenue and expenditure was begun by Mr Robert Lowe, the chancellor of the exchequer, 16 Feb 1870. By an act passed 31 July, 1868, revenue officers are permitted to vote for the election of members of parliament.

Above 100 statutes relating to inland revenue fell into disuse 1 Jan 1871.

The revenue friendly societies, and national debt act, 45 & 46 Vict., c. 72, passed 18 Aug. 1882. New revenue act passed, 1884.

REVEREND, an honorary appellation given to the clergy, since the middle of the 17th century.

In Tamworth parish register the minister is first styled "reverend," in 1657, occasionally afterwards; but regularly so after 1727 It first appears in the registry of All Hallows, Barking . 1732

The prefix on a family tombstone was refused to Mr. Keet, a Wesleyan preacher, by the bishop of Lincoln, but given by the archbishop of Canterbury 1874

On trial, Mr Walter G. F. Phillimore, the chancellor of Lincoln, decided against Mr Keet, who gave notice of appeal, 3 June. Sir R. Phillimore gave a similar decision in the court of arches, 31 July, 1875

On appeal to the privy council these decisions were reversed It was decided that there is no law or usage restricting the epithet to ministers of the Church of England; it is merely laudatory.

REVIEWS. The *Journal des Scavans*, published on 5 Jan. 1665, by Denis de Salo, under the name of Hédouville, was the parent of critical journals. It was soon imitated throughout Europe, and was itself translated into various languages. George III. spoke of this publication to Dr. Johnson, in the private interview with which he was honoured by his majesty, in the library of the queen's house, in Feb. 1767. *Boswell.* The *Bibliothèque Anglaise* came out in 1716-27; the *Revue Britannique*, founded 1825, ceased Dec. 1901. REVISERS, see under *Bible*.

REVISING BARRISTERS' COURTS, to examine the lists of voters for members of parliament, were instituted by the Reform Act of 1832.

REVISION, see under *Bible*. Advocates of the revision of the French constitution, chiefly Bonapartists or Jeromists, termed *Revisionists*, Feb. 1884.

REVIVALS on the subject of religion arose in the United States in 1857. In the autumn of 1859, they began in Scotland, the north of Ireland (particularly Belfast), and England. Many meetings were held for prayers and preaching throughout the week, as well as on Sundays. The "*twelve days' mission*," a series of revival services, took place in many London churches during advent, 1869.

Mr. Moody, preacher (born 1837, died 22 Dec. 1899), and Mr. Sankey, singer, American Revivalists, visited many towns in the United Kingdom, 1874-5. Their meetings in London began at the Agricultural-hall, 9 March, about 15,000 present; at the Queen's theatre, Haymarket, 12 April–31 May; farewell meeting, 12 July, 1875. Moody and Sankey again in London, 6 Oct 1881; 3 Nov. 1883–23 June, 1884. Revival in Wales, chiefly the result of the preaching of Evan Roberts, a young miner of N. Wales; decrease of crime and drunkenness reported as an outcome of the movement, which spread throughout Wales in 1904-5. The Torrey-Alexander mission opened at the Albert-hall, London, 4 Feb., and at Brixton, 8 April, 1905. See *Salvation Army*.

REVOLUTIONARY TRIBUNAL, established at Paris, Aug. 1792.

Up to 27 July, 1794, when Robespierre was deposed, it had put to death 2774 persons, including queen Marie Antoinette, the princess Elizabeth, and a large number of nobility and gentry, male and female. The oldest victim was counsellor Dupin, aged 97; the youngest, Charles Dubost, aged 14. From 27 July to 15 Dec. 1794, only Robespierre and his accomplices (about 100) suffered by it.

Revolutions have been frequent in the South American republics.

[See the countries respectively.]

Among the results of the *Revolution* of 1688 in Great Britain, were the toleration act, the establishment of the presbyterian kirk of Scotland, the power of granting supplies limited to the house of commons, the purification of the administration of justice, and unlicensed printing.

REVOLVERS, see *Pistols*.

REVUE DES DEUX MONDES, the French literary and historical periodical published on the 1st and 15th of each month, first appeared in 1831. It includes among its contributors the most eminent writers in France.

REYNARD THE FOX, "REINEKE FUCHS," a satirical epic in low German, in which beasts are actors and speakers, was first printed as Reineke Vos, at Lubeck in 1498, and professes to be written by Hinreck van Alkmer. It has been frequently translated. Goethe's version in High (or literary) German hexameters appeared in 1794. Jacob Grimm has shown that the subject-matter of this "Thier-sage" or "beast-fable" is very ancient, many incidents being found in Pilpay and other oriental writers. The early French had a "Roman de Renart," and "Renart le Nouvel." A poem, entitled "der Reinaert," in Flemish, was known in the 11th century; Caxton's translation in English prose was printed 1481; a poetic English translation of Goethe's version, by T. J. Arnold, appeared in 1855.

REZONVILLE, BATTLE OF, 18 Aug. 1870, see *Metz*.

RHÆTIA (or RÆTIA), an ancient Alpine country, comprising the modern Grisons, Tyrol and part of Lombardy, inhabited by a wild rapacious people, after a long struggle was conquered by Drusus and Tiberius, B.C. 15.

RHEGIUM (now Reggio), S. Italy, a Greek colony, flourished in the 5th century, B.C. It was held by the Campanian legion, 281-271, afterwards severely punished for its rebellion. Reggio was taken by Garibaldi, Aug. 1860.

RHEIMS (N. France). The principal church here, built before 406, rebuilt in the 12th century, is now very beautiful. The corpse of St. Remy, the archbishop, is preserved behind the high altar, in a magnificent shrine. The kings of France were crowned at Rheims; probably because Clovis, the founder of the French monarchy, when converted from paganism, was baptized in the cathedral in 496; the only kings not crowned here down to 1825, were Henry IV., Napoleon I., and Louis XVIII. Several ecclesiastical councils have been held here. The city was taken and retaken several times in the last months of the French war, 1814. University founded by cardinal Lorraine, 1547, suppressed about 1790. Strike of the workmen of Mr. Jonathan Holden, mill owner, a great benefactor to the town, May, 1890. Population, 1891, 104,186; 1901, 107,773.

RHEOMETER, see under *Electricity*.

RHETORIC. Rhetorical points and accents were invented by Aristophanes of Byzantium, 200 B.C. Rhetoric was first taught in Latin at Rome by Photius Gallus, about 87 B.C. He taught Cicero, who said "We are first to consider what is to be said; secondly, how; thirdly, in what words; and lastly, how it is to be ornamented." A regius professor of rhetoric was appointed in Edinburgh, 20 April, 1762, when Dr. Blair became first professor.

RHINE (Latin, *Rhenus;* German, *Rhein;* French, *Rhin*), a river, about 760 miles long, rising in Switzerland, receiving the Moselle, Main, Meuse, Neckar, and other rivers, terminating in many arms in Holland, and falling into the German ocean. On its banks are Constance, Basel, Strasbourg, Spires, Mannheim, Cologne, Dusseldorf, Utrecht, and Leyden. The possession of the banks of the Rhine has been the cause of many wars, and it was crossed by the French above twenty times in a century. In the beginning of the revolutionary war, Custine invaded Germany by crossing it in 1792; and at the close of the war in 1815, France retained the left bank, but lost it at the close of the Franco-Prussian war, 1870-1 (*which see*). A navigation treaty with other powers was signed by France, 17 Oct. 1868. A central committee for the navigation exists, formed by members for Alsace, Lorraine, Baden, Bavaria, Hesse, Holland, and Prussia. Very great damage (about 4,000,000*l.*) and loss of life, caused by the rising of the river through excessive rain, end of November and December, 1882; relieved by government grants.

Becker's German song "They shall not have it, the free German Rhine;" and Alfred de Musset's reply, in French, "We have had it, your German Rhine," appeared in 1841. Max Schneckenburger, author of "The Watch on the Rhine," died 1851. All were popular during the war, 1870-71.

RHINOPLASTY, an operation performed by dissecting a flap of skin from the forehead and placing it over the nose.

RHODE ISLAND (N. America), settled by Roger Williams about 1636, was taken in the war of independence by the British, 8 Dec. 1776; but was evacuated by them, 25 Oct. 1779. Capitals, Providence and Newport. Population in 1880, 276,531; 1890, 345,506; 1900, 428,556; see *United States*.

RHODES, an island on the coast of Asia Minor, is said to have been peopled from Crete, as early as 916 B.C. The Rhodians were great navigators, and institutors of a maritime code afterwards adopted by the Romans. The city was built about 408 and flourished 300-200 B.C.; see *Colossus*. Rhodes, long an ally of the Romans, was taken by the emperor Vespasian, A.D. 71. It was held by the Knights Hospitallers from 1309 to 1522, when it was conquered by the Turks, who still retain it. The knights retired to Malta (*which see*). Rhodes suffered severely by an earthquake on 22 April, 1863.

RHODESIA, the name given (1895) to the territories subject to the S. Africa company (after the rt. hon. Cecil Rhodes, "the great empire builder") born at Bishop's Stortford, 5 July, 1853; (died 26 March, 1902), comprising an area of 750,000 sq. miles; chief towns, Bulawayo (capital of Matabeleland) and Salisbury. Rhodesia is divided into two parts: *Northern Rhodesia*, first opened to British influence by the late Dr. Livingstone, subdivided into North-Eastern and North-Western Rhodesia (called also Barotseland) and still occupied by native tribes living under their own chiefs. The headquarters of the administrator of N.-E. Rhodesia are at Fort Jameson, and of the administrator of N.-W. Rhodesia at Kalomo. *Southern Rhodesia* is governed by an executive council, composed of the administrator of S. Rhodesia and 4 members appointed by the British South Africa company, with the approval of the secretary of state for the colonies, and by a legislative council consisting of the administrator, the resident commissioner, and 14 other members, 7 of whom are appointed by the British S. Africa co. and 7 elected by the registered voters of Mashonaland and Matabeleland. The seat of government is at Salisbury, the capital of Mashonaland. Native affairs are administered, under the administrator, by a chief native commissioner in each province. About 1900 miles of railway are now (1905) open for traffic. Population (white) of S. Rhodesia, census 1904, 12,596, native, enumerated, 1905, 594,590. Revenue, 1905 (31 March), 453,173*l.*; expenditure, 590,139*l.* See *Zambesi* and *Mashonaland*, 1894.

RICE, the *Oryza sativa* of botanists, in the husk termed paddy; largely grown in intertropical regions, occupying the same place as wheat in the warmer parts of Europe. It was conveyed to South Carolina near the end of the 17th century, and its cultivation greatly increased.

The duty on foreign rice, 15*s.*, on colonial rice, 1*s.* per cwt., was reduced by sir Robert Peel in 1842 to 6*s.* 3*d.* and 6$\frac{1}{2}$*d.* respectively. Further reductions were made in 1846, and in 1860 the duty was totally abolished.

Imported into Britain: 1846, 770,604 cwt; 1856, 3,724,695 cwt.; 1866, 2,309,494 cwt.; 1877, 6,617,739 cwt.; 1881, 8,500,062 cwt.; 1883, 7,747,725 cwt.; 1885, 5,588,650 cwt.; 1889, 6,585,779 cwt.; 1890, 5,957,555 cwt.; 1893, 5,449,602 cwt.; 1896, 4,531,518 cwt.; 1900, 6,291,331 cwt.; 1904, 7,897,654 cwt.

RICHMOND (Surrey), anciently called Sheen, which in the Saxon tongue signifies *resplendent*. Here stood a palace in which Edward I. and II. resided, and Edward III. died, 1377. Here also died Anne, queen of Richard II., 1394. The palace was repaired by Henry V., who founded three religious houses near it. In 1497 it was destroyed by fire; but Henry VII. rebuilt it, and commanded that the village should be called Richmond, he having borne the title of earl of Richmond (Yorkshire) before he obtained the crown: and here he died in 1509. Queen Elizabeth was a prisoner in this palace for a short time during the reign of her sister. When she became queen it was one of her favourite places of residence; and here she died 24 March, 1603. It was afterwards the residence of Henry, prince of Wales. The beautiful park and gardens were enclosed by Charles I. 1,914 acres now open to the public. The observatory was built by sir W. Chambers in 1769. In Richmond, Thomson "sang the Seasons and their change;" and died 27 Aug. 1748.

Mr. Astor gives 10,000*l.* to the nat. rifle assoc., reported, 25 Dec. 1901. Lord Roberts publishes an appeal for the establishment of rifle clubs throughout the kingdom, 12 June, 1905. Many established. For *Rifle Ranges*, see *Commons*.

RIGHTS, BILL OF. To the PETITION OF RIGHTS, preferred 17 March, 1627-8, Charles I. answered, "I will that right be done according to the laws and customs of the realm." Both houses addressed the king for a fuller answer to their petition of rights, whereupon he gave them an answer less evasive, "*Soit droit fait comme il est désiré*," 7 June, 1628. The petition thus became a statute 13 Car. I. c. 1. An important declaration was made by the lords and commons of England to the prince and princess of Orange on 13 Feb. 1689, in an act "declaring the rights and liberties of the subject, and settling the succession of the crown." The Bill of Rights, virtually the same as the declaration, was passed by parliament. It totally abolished the dispensing power of the crown, Oct. 1689. See *Claim of Right*.

RITCHIE'S ACT, see under *Local Government*.

RITUALISTS, a name given in 1866 to a party in the church of England, formerly termed Puseyites, who, by giving a more imposing character to public worship, by the use of coloured vestments, lighted candles, incense, &c., desired to revert to the practices of the church as set forth in the first prayer-book of Edward VI., and, as they contend, following the use of the early Christian church. An ecclesiastical exhibition was held during the church congress at York in Oct. 1866, but was not officially connected with it. The practices of the ritualists were censured in several episcopal charges in Dec. 1866; in two reports of the ritualistic commission, 19 Aug. 1867, and April, 1868, and by the judicial committee of the privy council on appeal, 23 Dec. 1868. See *Church of England* and *Trials*, 1867-9. At a general convocation of the American episcopal church at Philadelphia, 27, 28 Oct. 1868, after a warm discussion on ritualism, the discussion was adjourned. It was renewed at the convocation 10 Oct. 1874, and the ritualists were defeated by the evangelical party, a stringent canon on ceremonies being passed 27 Oct. The "Public Worship Regulation Act" was passed 7 Aug. 1874, for the repression of ritualism in England. Clerical declaration on ritual, see *Times*, 13 July, 1903. See *Public Worship* and *Church of England* 1903 *et seq.*

Royal commission "to inquire into the alleged breaches or neglect of the law relating to the conduct of divine service in the church of England, and to the ornaments and fittings of churches; and to consider the existing powers and procedure applicable to such irregularities, and to make such recommendations as may be deemed requisite for dealing with the aforesaid matters," rt. hon. sir M. RIVOLI (near Verona, N. Italy). Near here the Austrians defeated the French, 17 Nov. 1796; and were defeated by Bonaparte 14, 15 Jan. 1797. Massena was made duke of Rivoli for his share in the actions.

ROAD CLUB, established in the autumn of 1874 in London, by gentlemen interested in the revival of coaching.

ROAD MURDER. On the night of 29-30 June, 1860, Francis Savile Kent, four years old, was murdered, and his body hid in a garden water-closet at Road. His step-sister Constance Kent (aged sixteen), and the nurse Elizabeth Gough (the first suspected), were discharged for want of evidence. The coroner was severely blamed for charging the jury improperly, but the court of queen's bench, in Jan. 1861, refused to issue a writ for a new inquiry. Constance Kent, on 25 April, 1865, before sir Thomas Henry at Bow-street, and at her trial at Salisbury, on 21 July following, confessed herself to be guilty of the murder. Her punishment was commuted to penal servitude for life. Let out on ticket-of-leave, 18 July, 1885. Road is near Frome, Somerset.

ROADS, see *Roman Roads*. The first general repair of the highways of this country was directed about 1285. Acts were passed for the purpose in 1524 and 1555, followed by others in Elizabeth's and succeeding reigns. Roads through the Highlands of Scotland were begun by general Wade in 1726. Loudon M'Adam's roads were introduced about 1818. Wooden pavements were tried with partial success in the streets of London: at Whitehall in 1839, and in other streets in 1840; asphalte pavement soon after; wood paving came into general use in the latter part of the 19th century. An act "for the better management of the highways" was passed in 1862 after much opposition; another, 16 Aug. 1878; also regulated the use of locomotives on roads; whilst another in 1903 regulated the speed of motor cars. Steam road-rollers were tried in 1867; used in London 18 March, 1868: see *Macadamising*, *Tolls*, and *Wooden Pavements*. Committee on Highways appointed, 18 March, 1903, report issued, 29 Sept. 1903. Royal commission on London traffic, sir D. M. Barbour, chairman, appointed Feb. 1903; first report issued, July, 1905. ROANOAKE, an island off N. Carolina, U.S., discovered by sir Walter Raleigh, 1584, and settled by him, 1585, without success. Other settlers also failed.

ROASTING ALIVE. An early instance is that of Bocchoris, king of Egypt, by order of Sabacon of Ethiopia, 737 B.C. *Lenglet.* Sir John Oldcastle, lord Cobham, was thus put to death in 1418, and Michael Servetus for heresy at Geneva, 27 Oct. 1553; see *Burning Alive*, and *Martyrs*.

ROBBERS were punished with death by Edmund I.'s laws, which directed that the eldest robber should be hanged. Remarkable robbers in England were Robin Hood, 1189 (see *Robin Hood*), and Claud Du Val, "executed at Tyburn," says an historian quaintly, "to the great grief of the women," Jan. 1670. In Ireland, the famous Mac-Cabe was hanged at Naas, 19 Aug. 1691. Galloping Hogan, the rapparee, flourished at this period. Freney, the celebrated highwayman, surrendered himself, 10 May, 1749. The accomplished Barrington was transported, 22 Sept. 1790. See *Trials*.

ROBIN HOOD, captain of a band of robbers, in Sherwood forest, Nottinghamshire; traditionally reported to have been the earl of Huntingdon, disgraced and banished the court by Richard I. at his accession (1189). Robin Hood and Little John and their band are said to have continued their depredations till 1247, when Robin died. *Stow.* Lord Tennyson's drama, "The Foresters; Robin Hood and Maid Marian," first represented at New York on account of the American copyright law, end of March, 1892.

"ROBINSON CRUSOE," by Daniel De Foe; the first part appeared in 1719. See *Juan Fernandez*. Three old ladies, Mary Ann, Jane Amelia, and Sarah Frances De Foe, lineally descended from De Foe, pensioned by queen Victoria, May, 1877.

ROBURITE, a German explosive invented by Dr. Carl Roth, reported 1888.

ROCHDALE, Lancashire. A charter was obtained for a market by Edmund de Lacy, 1241, and the grammar school was founded 1564. Rochdale canal was opened 1804. The new town was commenced in 1865. Rochdale first sent a member to parliament in 1832. The woollen manufacture was carried on in the 16th century. The first cotton mill was erected in 1795. Theatre royal and opera house, built in 1867, destroyed by fire, 27 Jan. 1894. Population, 1881, 68,866; 1891, 71,458; 1901, 83,112.

ROCHEFORT (W. France), a seaport on the Charente. The port was made by Louis XIV. in 1666. In Aix-roads or Basque-roads, near Rochefort, capt. lord Cochrane attacked the French fleet and destroyed four ships, 11-12 April, 1809. Near Rochefort, the emperor Napoleon I. surrendered himself to capt. Maitland of the *Bellerophon*, 15 July, 1815.

ROCHELLE (W. France), a seaport on the Atlantic, belonging to the English for some time, but finally surrendered to the French leader, Du Guesclin, in 1372. As a stronghold of the Calvinist party, it was vainly besieged by the duke of Anjou in 1573; and was taken after a siege of thirteen months by cardinal Richelieu in 1628. The duke of Buckingham was sent with a fleet and army to relieve it; but the citizens declined to admit him. He attacked the isle of Rhé, near Rochelle, and failed, 22 July, 1627. He was repulsed 8 Nov. following. A conspiracy here in 1822 caused loss of life to sergeant Bories and others.

New harbour opened by president Carnot, 19 Aug. 1890

ROCHESTER, in Kent, the Roman *Durobrivæ*. The bishopric, founded by Augustin, 604, is the next in age to Canterbury. The first cathedral was erected by Ethelbert, king of Kent. St. Justus was bishop in 604. Alterations were made in the diocese in 1845, 1867, and 1905. Rochester is valued in the king's books at 358*l.* 3*s.* 2½*d.* per annum. Present income 3,800*l.* The cathedral reopened after repairs of the choir, 11 June, 1875; west front and towers restored, 25 July, 1894. The old castle and grounds were purchased for the public by the Corporation. 1883. The "ten churches fund" begun by the bishop, 1884. St. Bartholomew's hospital, founded by Gundulf for lepers, 1078, was refounded as a general hospital, 1863; near to it is an ancient Norman church. Watts' charity house, founded 1579 to lodge "six poor travellers, not being rogues or proctors," has been immortalised by Chas. Dickens. The Guildhall

dates from 1687. Among other ancient buildings are Restoration house, where Charles II. slept in 1660; Satis house, the residence (1905) of the present bishop; the Cathedral grammar school, Henry VIII., and Eastgate house (see *infra*). James II. embarked at Rochester in his flight from England, 1688. Made a municipal borough by Henry II. Near to Rochester is Gadshill, formerly the residence of Chas. Dickens, who in "Edwin Drood," "Pickwick," and some of his other novels introduces Rochester. Since 1885, Rochester has returned one member to parliament instead of two. Population, 1881, 21,307; 1891, 26,309; 1901, 30,622.

Eastgate House, originally the residence of sir Peter Buck, clerk of queen Elizabeth's navy at Chatham. Date 1590 carved on woodwork. Referred to by Chas. Dickens in "Edwin Drood," opened as a public museum 31 March, 1903

ROCHESTER, N. York, capital of Monroe county, 360 miles by rail N.W. of New York city, is situated on the Genesse river, which has here three perpendicular falls. The city contains a state industrial school, a Roman catholic cathedral and numerous churches, a university, founded 1850, various hospitals, asylums, and libraries. A stone aqueduct, 850 feet in length, conveys the Erie canal across the river. Rochester is a port of entry, and carries on flour-milling and many other industries. It was settled in 1810, and incorporated, 1834.

Great fire in the business section of the city, estimated damage, 1,000,000*l* to 1,400,000*l*. 26 Feb. 1904

ROCKETS, destructive war implements, were invented by sir William Congreve about 1803. The carcase-rockets were first used at Boulogne, 8 Oct. 1806, when they set the town on fire, their powers being previously demonstrated in the presence of Mr. Pitt and several of the cabinet ministers, 1806. Improved rockets were made by Hales in 1846. Boxer's life-saving rope-carrying rocket, for communicating with stranded vessels, described in 1878. See *Wrecks*, March, 1892.

ROCROY (N. France). Here, 19 May, 1643, the Spaniards were totally defeated by the French, commanded by the great Condé.

RODNEY'S VICTORIES. Admiral Rodney fought, near Cape St. Vincent, the Spanish admiral, Don Langara, whom he defeated and made prisoner, capturing six of his ships, one of which blew up, 16, 17 Jan. 1780. On 12 April, 1782, he encountered the French fleet in the West Indies, commanded by the count de Grasse, took five ships of the line, and sent the French admiral prisoner to England: Rodney was raised to the peerage, June, 1782.

ROGATION WEEK. Rogation Sunday, the Sunday before Ascension-day, received its title from the Monday, Tuesday, and Wednesday following it, called Rogation days, derived from the Latin *rogare*, to beseech. Extraordinary prayers and supplications for these three days are said to have been appointed in the third century, as a preparation for the devout observance of our Saviour's ascension on the next day succeeding to them, denominated Holy Thursday or Ascension-day. The whole week in which these days happen is styled Rogation week; and in some parts it is still known by the other names of Crop week, Grass week, and Procession week. The perambulations of parishes have usually been made in this week.

ROHAN, an illustrious family, descended from the ancient sovereigns of Brittany. Henri de Rohan, son-in-law of the great Sully, after the death of Henri IV. (14 May, 1610), became head of the Protestant party, and sustained three wars against Louis XIII. He eventually entered the service of the duke of Saxe-Weimar, and died of wounds received in battle in 1638. Of this family was the cardinal de Rohan; see *Diamond Necklace.*

ROHILCUND, a tract of country, N.E. India, was conquered by the Rohillas, an Afghan tribe, who settled here about 1747. After aiding the sovereign of Oude to overcome the Mahrattas, they were treated with much treachery by him, and nearly exterminated. Rohilcund was ceded to the British in 1801. After the great mutiny, Rohilcund was tranquillised in July, 1858.

ROLLING-MILLS, in the metal manufactories, were in use here in the 17th century, and in 1784 Mr. Cort patented his improvements.

* Charles Watson Wentworth, marquis of Rockingham, was born 13 May, 1730, succeeded his father as marquis, 1750. He died without issue, 1 July, 1782, and his estates passed to his nephew, earl Fitzwilliam.

ROLLS, see *Master of the Rolls*, and *Records*.

ROLLS' CHAPEL (London), founded by Henry III., about 1233, for receiving Jewish rabbis converted to Christianity. On the banishment of the Jews in 1290 the buildings then called the Rolls, and the chapel, were annexed by patent to the office of the keeper or master of the rolls of chancery, from which circumstance they took their name. A number of public records from the time of Richard III., kept in presses in this chapel, have been removed to the Record Office (*which see*). The Rolls chapel was pulled down in July, 1892.

ROLT'S ACT, 25 & 26 Vict. c. 42 (1862), relates to the Chancery Court.

ROMAGNA, a province of the papal states, comprised in the legations of Bologna, Ferrara, Forli and Ravenna. It was conquered by the Lombards; but taken from them by Pepin, and given to the pope, 753. Cæsar Borgia held it as a duchy in 1501, but lost it in 1503. In 1859 the Romagna threw off the temporal authority of the pope, and declared itself subject to the king of Sardinia, who accepted it in March, 1860. It now forms part of the province of Emilia, in the new kingdom of Italy. Population, 1890, 1,218,392. See *Rome*.

ROMAINVILLE AND BELLEVILLE, heights near Paris, where Joseph Bonaparte, Mortier, and Marmont were defeated by the allies after a vigorous resistance, 30 March, 1814. The next day Paris capitulated.

ROMAN LAW, see *Codes;* ROMAN LITERATURE, see *Latin*.

ROMAN ROADS IN ENGLAND. Our historians maintain, but are mistaken, that there were but four of these roads. *Camden.* "The Romans," says Isidore, "made roads almost all over the world, to have their marches in a straight line, and to employ the people;" and criminals were frequently condemned to work at such roads, as we learn from Suetonius, in his life of Caligula. They were commenced and completed at various periods, between the 2nd and 4th centuries, and the Roman soldiery were employed in making them, that inactivity might not give them an opportunity to raise disturbances. *Bede.*

1st, WATLING-STREET, so named from Vitellianus, who is supposed to have directed it, the Britons calling him in their language *Gwetalin* (from Kent to Cardigan Bay).

2nd, IKNIELD, or IKENILD-STREET, from its beginning among the *Iceni* (from St. David's to Tynemouth).

3rd, FOSSE, or FOSSE WAY, probably from its having been defended by a fosse on both sides (from Cornwall to Lincoln).

4th, ERMIN-STREET, from *Irmunsul*, a German word, meaning Mercury, whom our German ancestors worshipped under that name (from St. David's to Southampton).

ROMAN WALLS. One was erected by Agricola (79 to 85) to defend Britain from the incursions of the Picts and Scots; the first wall extended from the Tyne to the Solway firth (80 miles); the second from the firth of Forth, near Edinburgh, to the firth of Clyde, near Dumbarton (36 miles). The former was renewed and strengthened by the emperor Adrian (121), and by Septimius Severus (208). It commenced at Bowness, near Carlisle, and ended at Wallsend near Newcastle. It had battlements and towers to contain soldiers. The more northern wall was renewed by Lollius Urbicus, in the reign of Antoninus Pius, about 140. Many remains of these walls still exist, particularly of the southern one; Dr J. C. Bruce's "*Roman Wall*," published 1853-1868.

ROMANCE, originally a composition in the Romance or Provençal idiom. The term in the middle ages was extended to narrative poetry in general. Heliodorus, a bishop of Tricca, in Thessaly, about 398, was the author of *Æthiopica* (relating to the loves of Theagenes and Charicleia), the first work in this species of writing. The first part of the "Roman de la Rose" was written by Guillaume de Lorres (1226-70); the second, a separate poem, by Jean de Meung (1285-1314), the Decameron of Boccaccio was published, 1358; Don Quixote, by Cervantes, 1605; Gil Blas, by Le Sage, 1715. Dunlop's "History of Fiction," published 1814. See *English Language;* "*Reynard the Fox.*"

ROME. The foundation of the city, by Romulus, was laid on the 20th April,* according to Varro, in the year 3961 of the Julian period (753 years before the birth of Christ, and in the fourth year of the sixth Olympiad. Other dates given: Cato, 751; Polybius, 750; Fabius Pictor, 747; Cincius, 728 B.C.). The Romans conquered nearly the whole of the then known world. In the time of Julius Cæsar, the empire was bounded by the Euphrates, Taurus, and Armenia on the east; by Æthiopia on the south; by the Danube on the north; and by the Atlantic on the west. Numerous ecclesiastical councils have been held at Rome, from 197 to the present time. Population, 1872, about 240,000; 1881, 300,467; 1890, 423,217; 1901, 463,000; 1905, 500,000. Chiefly through the exertions of Mr. John Henry Parker of Oxford, the Roman exploration fund was established, for the preservation of ancient archi-

* In its original state, Rome was but a small castle on the summit of mount Palatine; and the founder, to give his followers the appearance of a nation or a barbarian horde, was obliged to erect a standard as a common asylum for criminals, debtors, or murderers, who fled from their native country to avoid the punishment which attended them. From such an assemblage a numerous body was soon collected, and before the death of the founder, the Romans had covered with their habitations the Palatine, Capitoline, Aventine, and Esquiline hills, with Mounts Cœlius and Quirinalis.

tectural remains. His "Archæology of Rome" (with many photographs) published, 1874-8. Professor J. H. Middleton's works on "Ancient Rome," published 1885, 1888, and 1892. The Italian government votes 1200*l.* a year for a similar purpose. The early history of Rome is legendary, and the dates *purely conjectural*. It has been greatly elucidated by the researches of B. G. Niebuhr, whose Roman history was published 1811 and 1827-30, and still further by Dr. Mommsen in his history of Rome, 1854 (died 1 Nov. 1903), and later by Ihne, Ranke, Bury, Shuckburg, Dyer, Villari, &c.

ROMILLY'S ACT, Sir Samuel, 52 Geo. III., c. 101 (1812) relates to charities.

The Romilly society, founded for the improvement of the criminal law, reform of prison regulations, abolition of cruel punishments, &c., inaugurated Essex hall, London, Lord Justice Vaughan Williams in the chair, 1 May, 1898; annual meetings.

RONCESVALLES (in the Pyrenees), where, it is said, Charlemagne's paladin, Roland or Orlando, was surprised, defeated and slain by the Gascons, 778. On 25 July, 1813, marshal Soult was defeated here by the British entering France.

RONDO, a short piece of music having one prominent subject to which returns are made; many composed by Beethoven, Chopin, and others.

RÖNTGEN RAYS, see *Surgery*, 1896. Prof. W. C. Rontgen while experimenting with a Crooke's vacuum tube, electrically excited, and enveloped in a black covering, observed that some rays proceeding from the tube passed through the black paper and affected a fluorescent screen at a distance of two yards, 8 Oct. 1895. See *Vacuum*.

The continued researches proved that many substances opaque to ordinary light were transparent to these rays, as flesh, wood, &c.; the shadows of such objects thrown on a screen can be photographed; the interior of a dead monkey was photographed with great distinctness, *Lancet*, March, 1896.

The movements of the bones in living animals were exhibited by these rays by means of a cinematograph, in 1897 *et seq.* These rays have the power of discharging electrified bodies.

The rays are much utilized in surgery; 416 cases at St. Thomas's hospital were reported in 1897; very successful in military surgery in 1898 *et seq.*

The Rontgen society founded, prof. Silvanus P. Thompson, president, June; first meeting in London, 5 Nov. 1897 (see *Radiographs*).

Experiments by dr. Heineke in Leipsig show röntgen rays exert a harmful effect on the internal organs of the body, reported, 9 Dec. 1903.

N-rays, "a supposed novel series of radiations, whose properties comprise ability to pass through aluminium, wood, and other substances, and the brightening of an electric spark while being non-fluorescent and without photographic action," stated to be discovered by prof. Blondlot, of Nancy, in the course of his researches on rontgen rays; the *prix* Leconte of 150,000 francs awarded to prof. Blondlot for his discovery by the Academy of Sciences, 1904

Existence of N-rays not generally accepted by English scientists; prof. Blondlot claims to have made over one hundred experiments, establishing their identity, 1905.

ROOF. The largest in the world was said to be that over a riding school at Moscow, erected in 1791, being 235 feet in span. The roof of the London (St. Pancras) station of the Midland railway, in Euston-road, London, N.W., is 240 feet wide, 690 feet long, 125 feet high. The extent of ground covered is about 165,000 square feet.

ROPE-MAKING MACHINE. One was patented by Richard March in 1784, and by Edmd. Cartwright, in 1792. Many improvements since.

ROQUE, see *Croquet*.

RORKE'S DRIFT, boundary of British territory of Natal, in South Africa and Zululand. Behind extemporised defences a handful of British soldiers, under lieuts. Chard and Bromhead, here successfully resisted a large Zulu army, and probably saved the colony, 22 Jan. 1879. See *Zululand*.

ROSAMOND'S BOWER. Rosamond was daughter of lord Clifford, and mistress of Henry II. about 1154. A conspiracy against her was formed by the queen, prince Henry, and the king's other sons. Henry kept her in a labyrinth at Woodstock, where his queen, Eleanor, it is said, discovered her apartments by the clue of a silk thread, and poisoned her. Buried at Godstow church, from whence Hugh, bishop of Lincoln, had her ashes removed, 1191.

ROSARY, see *Beads*.

In a brief of pope Pius IX., 30 Sept. 1852, it was asserted that 40 repetitions in a rosary of 40 beads of "Sweet Heart of Mary, be my salvation!" will obtain a large number of days of indulgence for souls in purgatory (23,300 days calculated).

ROSAS (N. E. Spain), Bay of, where a brilliant naval action was fought by the boats of the *Tigre*, *Cumberland*, *Volontaire*, *Apollo*, *Topaze*, *Philomel*, *Scout*, and *Tuscan*, led by lieut. John Tailour (of the *Tigre*), which ended in the capture or destruction of eleven armed vessels in the bay, 1 Nov. 1809; for which purpose lord Collingwood had organised the expedition commanded by capt. Hallowell. Rosas was gallantly defended by lord Cochrane, 27 Nov.; but surrendered, 4 Dec. 1809.

ROSBACH (Rosebecque), Flanders. Here Charles VI. of France beat the Flemings, who had revolted against their count, 27 Nov. 1382.—At Rosbach, in Prussia, a great battle was fought between the Prussians, commanded by Frederick the Great, and the combined army of French and Austrians, in which the latter were defeated with severe loss, 5 Nov. 1757.

"ROSCIUS, INFANT," Wm. Henry West Betty, born 13 Sept. 1791. After acting at Belfast, 16 Aug. 1803, and at other places, with much applause, he appeared at Covent-garden, 1 Dec. 1803, as Selim, in "Barbarossa," and is said to have gained in his first season, 17,210*l.*

After several years' retirement, he re-appeared, but soon after left the stage, not being successful. He retired on the fortune he had amassed, and died Aug. 1874

Mr. Thos. Henry Betty, his son, died, aged 77 bequeathing large sums to form eventually the "Betty's Fund for poor actors and actresses," and to the Royal Theatrical fund, &c. 7 Feb. 1897

ROSE, see under *Flowers.* The rose, a symbol of silence, gave rise to the phrase *sub rosâ*, "under the rose;" said, by Italian writers, to have risen from the circumstance of the pope's presenting consecrated roses, which were placed over the confessionals at Rome, to denote secrecy, 1526. The pope sent a *golden rose* to the queen of Spain, which was given to her with much solemnity, 8 Feb. 1868. A "national rose society" opened its first annual show, St. James's hall, 4 July, 1877; shows held annually at the Crystal palace.

The *League of the Rose*, under the patronage of the Comtesse de Paris, formed to promote the restoration of the monarchy in France, autumn 1888.

ROSEBERY ADMINISTRATION succeeded the fourth of Mr. W. E. Gladstone, who resigned 3 March, 1894; the ministry resigned in consequence of a minority on a vote of supply (132—125), virtually a vote of censure on the secretary of state for war (Mr. Campbell-Bannerman), who immediately resigned, 21 June. 1895.

ROSE'S ACT, 33 Geo. III. c. 54 (1793) brought benefit societies under the control of government.

ROSES, WARS OF THE, between the Lancastrians (who chose the red rose as their emblem) and the Yorkists (who chose the white rose), 1455-1485. It is stated that in the Wars of the Roses there perished 12 princes of the blood, 200 nobles, and 100,000 gentry and common people. The union of the roses was effected in the marriage of Henry VII. with the princess Elizabeth, daughter of Edward IV. 1486.

Richard II, who succeeded his grandfather Edward III. in 1377, was deposed and succeeded in 1399 by his cousin Henry IV. (son of John of Gaunt, duke of Lancaster, the fourth son of Edward III.), in prejudice to the right of Roger Mortimer (grandson of Lionel, duke of Clarence, Edward's *third* son), who was declared presumptive heir to the throne in 1385

Roger's grandson, Richard duke of York, first openly claimed the crown in 1449

Attempts at compromise failed, and the war began in 1455

The Lancastrians were defeated at St. Albans; the protector Somerset was slain, a truce was made, and Richard was declared successor to Henry VI. 23 May, ,,

The war was renewed, and the Yorkists defeated the Lancastrians at Bloreheath . . 23 Sept. 1459

The Yorkists eventually dispersed, and the duke was attainted.

He defeated his opponents at Northampton, took Henry prisoner, and was declared heir to the crown, but fell into an ambuscade near Wakefield, and was put to death . . 31 Dec. 1460

His son (Edward) continued the struggle; was installed as king . . . . . 4 March, 1461

Defeated the Lancastrians at Towton . 29 March, ,,

Was deposed by Warwick, who restored Henry VI. Sept. 1470

Edward defeated the Lancastrians at Barnet, 14 April, and finally at Tewkesbury . . 4 May, 1471

The struggle ended with the defeat and death of Richard III. at Bosworth . . . 22 Aug. 1485

ROSETTA (in Egypt), taken by the French in 1798; and by the British and Turks, 19 April, 1801. The Turks repulsed the British here, 22 April, 1807. Near Rosetta was fought the battle of the Nile, 1 Aug. 1798; see *Nile.* Mehemet Ali rendered great service to his country by constructing a canal between Rosetta and Alexandria.

The *Rosetta Stone*, discovered by the French in 1799, was brought from Rosetta in a French vessel, from whence it was taken by Mr. Wm. R. Hamilton, who deposited it in the British Museum. In 1841, Mr Letronne published the text and a translation of the Greek inscription. It is a piece of black basalt, about 3 ft. long and 2½ ft. wide, with an inscription in three languages, viz., hieroglyphics, modified hieroglyphics (demotic or enchorial), and Greek, setting forth the praises of Ptolemy Epiphanes (about 196 B c.). It was studied by Dr. T. Young and especially by J. F. Champollion,

whose works were published 1814-1845. Champollion's method was adopted by Rosellini, and extended by Lepsius, Bunsen, Birch, Brugsch, and others. Champollion discovered that the hieroglyphs represented sounds by an initial letter, and after studying the "Ritual of the dead," published a grammar and dictionary.

ROSICRUCIANS, a sect of mystical philosophers who appeared in Germany in the 14th century. It is asserted that their founder was a noble German monk named Christian Rosencreutz, born 1378, who travelled in Arabia, Egypt, Africa, and Spain; returned to Germany and founded the fraternity of the Rosy Cross, and died aged 102. The *Fama Fraternitatis* and the *Confessio Rosæ Crucis*, 1615, the latter attributed to Johann Valentin Andreas and others, are important works. They swore fidelity, promised secrecy, and wrote hieroglyphically, and affirmed that the ancient philosophers of Egypt, the Chaldeans, Magi of Persia, and Gymnosophists of the Indies, taught the same doctrine.

Mr. Arthur E. Waite's elaborate work "The Real History of the Rosicrucians" published in 1887.

ROSS, Cork (S. Ireland), a bishopric founded, it is supposed, by St. Fachnan, in the beginning of the 6th century. It was united to Cork in 1340, and Cloyne to both, by the Irish Church Temporalities act (1833); see *Bishops; New Ross.*

ROSTRUM (plural *rostra*), a beak, the name given to the prows of ships, which were affixed to the front of the platform (hence termed *rostra*), erected between the comitium and the forum in Rome, whence the tribunes addressed the people. The custom is said to have begun with the ships of Antium, taken during the Latin war, which ended 33 B.C.

ROTA CLUB, a society who met at Miles's Coffee-house in New Palace-yard, Westminster, during the administration of Oliver Cromwell; their plan was that all the great officers of state should be chosen by ballot: and that a certain number of members of parliament should be changed annually by rotation, from whence they took their title. Sir William Petty was one of the members in 1659. *Biog. Brit.*

ROTHAMSTED EXPERIMENTS, see *Agriculture*, 1843.

ROTHESAY, capital of the Isle of Bute. The ruined castle, founded about 1098, was repaired by the marquis of Bute, 1871-77. After 1398, the eldest son of the Scottish sovereign was styled duke of Rothesay. The Glenburn hydropathic establishment destroyed by fire, estimated loss, 45,000*l.*, 10 July, 1891. Population, 1881, 8,329; 1891, 9,034; 1901, 9,383.

ROTHSCHILD FAMILY. Meyer Amschel, or Anselm, was born at No. 148, Judengasse (Jew-lane), Frankfort, in 1743. In 1772 he began business as a money-lender and dealer in old coins, in the same house, over which he placed the sign of the red shield (in German, Roth Schild). Having had dealings with the landgrave of Hesse, that prince entrusted him with his treasure (said to have been 250,000*l.*) in 1806, when the French held his country. With this sum as capital, Anselm traded and made a large fortune, and restored the 250,000*l.* to the landgrave in 1815. At his death his sons continued the business as partners. His son, Nathan, began at Manchester in 1798, removed to London in 1803; and died immensely rich, 28 July, 1836. The baron, James, head of the family, died at Paris, 15 Nov. 1868.

Sir Nathaniel de Rothschild, son of Lionel, created a peer; takes his seat, 9 July, 1885.
Hannah, daughter and heiress of the late baron Amschel de Rothschild, married to the earl of Rosebery, 1878, a great benefactress, dies, aged 39, 19 Nov. 1890.
Baron Ferdinand de Rothschild, born 1839, died, 17 Dec. 1898.
See *Jews* and *British Museum*, 1899.
Baron Wilhelm Carl von Rothschild, of Frankfort; benefactor, born, 16 May, 1828; died, 25 Jan. 1901.
Baron Alphonse de Rothschild, head of the Paris firm of Rothschild Bros, dies, aged 78, 26 May, 1905.
Baron Nathaniel Rothschild, head of the Vienna branch of the family, dies, aged 68, 13 June, 1905.

ROTTERDAM, the second city in Holland. Its importance dates from the 13th century. The commerce of Antwerp was transferred to it in 1509. In 1572, Rotterdam was taken by the Spaniards by stratagem, and cruelly treated. It suffered much from the French revolutionary wars, and from inundations in 1775 and 1825. Desiderius Erasmus was born here in 1467. The museum and picture-gallery of Rotterdam were destroyed at the fire of the Schieland palace, 16 Feb. 1864. Strike of dock labourers about 27 Sept.-14 Oct. 1889. Population, 1887, 193,658; 1890, 209,136; 1900, 332,185. See *Danube*, 1890 *et seq.*

ROUEN (N. France), an archbishopric, 260, became the capital of Normandy in the 10th century. It was held by the English kings till 1204; and was retaken by Henry V., 19 Jan. 1419. Joan of Arc, the Maid of Orleans, was burnt here, 30 May, 1431. It was taken by Charles VII. of France in 1449; and by the duke of Guise from the Huguenots, Oct. 1562 and 1591. Rouen, after slight conflicts, 4, 5 Dec. 1870, surrendered to general Von Göben, 6 Dec. It was ordered to pay a contribution of 17,000,000 francs. Population, 1886, 107,163; 1891, 109,541; 1901, 115,914.

ROUND. A species of musical canon in regular rhythm. Ancient rounds for six voices were composed in Italy, and introduced into England by the earl of Essex, about 1510. The first printed collection appeared in 1609. Warren's collection published 1763-94. Round, Catch, and Canon club founded in 1843.

ROUND-HEADS. In the civil war which began in 1642, the adherents of Charles I. were called Cavaliers, and the friends of the parliament Round-heads. The term, it is said, arose from those persons who had a round bowl or dish put upon their heads, and their hair cut to the edge of the bowl; see *Cavaliers*.

ROVEREDO (Austrian Tyrol) was held by the Venetians from 1416 till 1609, when it was acquired by Austria. It was taken by Bonaparte and the French, 4 Sept. 1796, after a brilliant victory.

ROWING, see *Boat Races*.

On 16 Oct. 1873, Mr. Reginald Herbert undertook to row on the Thames, from Maidenhead to Westminster bridge (47 miles 3 furlongs), in twelve hours, for 1000*l*. He did it in 10h. 2m. 19sec.

ROWLAND HILL MEMORIAL FUND. See *Mansion House*. Mr. W. D. Keyworth was chosen to make a bust of sir Rowland Hill for Westminster abbey, March, 1881. A benevolent fund for the widows and orphans of postmen established 1882. A statue of him at the Royal Exchange uncovered by the prince of Wales, 17 June, 1882.

ROWTON HOUSES, buildings erected to afford respectable unmarried working-men cheap comfortable lodgings, with some of the advantages of the west-end clubs. The first in Bond-street, Vauxhall, was erected by lord Rowton, at a cost of 30,000*l*., to accommodate 470 persons; opened by his niece, Miss Berta Corry, 15 Dec. 1892. Lord Rowton died, aged 65, 9 Nov. 1903.

The scheme proved very successful; a company was started in March, 1894, the first directors being lord Rowton, chairman; Mr. R. E. Farrant, the hon. C. Ashley and Mr. Walter Long. A second Rowton house was erected in Calthorpe-street, King's-cross-road. The building contains 677 cubicles, with good beds and large dining-room, &c., May, 1896; a third house still larger (804 cubicles), opened at Newington Butts, 23 Dec. 1897; a fourth (800 cubicles) opened, Hammersmith-road, 30 Nov. 1899; a fifth, in Fieldgate-st., Whitechapel (816 cubicles), opened, 11 Aug. 1902; a sixth, the largest, at Camden-town (1,103 cubicles), completed, Dec. 1905.

ROYAL ACADEMY. A society of artists met in St. Peter's-court, St. Martin's-lane, about 1739, which Hogarth established as the society of Incorporated Artists, who held their first exhibition at the Society of Arts, Adelphi, 21 April, 1760. From this sprang the Royal Academy, in consequence of a dispute between the directors and the fellows. On 10 Dec. 1768, the institution of the present Royal Academy was completed under the patronage of George III.; and sir Joshua Reynolds, knighted on the occasion, was appointed its first president. *Leigh*. The first exhibition of the academicians (at Pall-Mall) was on 26 April, 1769, when 136 works appeared. In 1771 the king granted them apartments in old Somerset-house, and afterwards, in 1780, in new Somerset-house, where they remained till 1838, when they removed to the National Gallery. Among the professors have been Johnson, Gibbon, Goldsmith, Macaulay, and Hallam. Turner, the painter, gave funds to the academy for the award of a medal triennially for landscape-painting, which was awarded to Mr. N. O. Lupton in 1857. A commission of inquiry into the affairs of the academy, appointed in 1862, recommended various changes in July, 1863, which were carried into effect. The hundredth anniversary of the foundation of the academy was celebrated 10 Dec. 1868. The Royal Academy held its first exhibition in Burlington-house, Piccadilly, 3 May, 1869. The annual exhibition of pictures by the old masters, with some British, began 3 Jan. 1870. The money received has been devoted to the establishment of a professorship of chemistry and a laboratory, &c. In 1874 the exhibition included many of Landseer's pictures.

Sir Francis Chantrey, R.A., sculptor, died 25 Nov. 1841. At the death of his wife, Jan. 1875, in conformity with his will, 105,000*l*. was bequeathed to the Academy,

and invested in Consols (now [1905] producing an income of about 2,100*l.* per annum), for the purchase of works of art for the nation, and other purposes. The collection, of some 110 pictures, since 1897 has been permanently located in the Tate gallery, Pimlico.

The court of appeal upholds Mr. justice North's decision that the works of sculpture purchased must be finished in marble or bronze, and not models, June, 1889.

The gallery containing the sculptures of John Gibson, bequeathed by him, was opened free, 27 Nov. 1876.

The number of the works of art exhibited in 1789 was about 620; in 1889, 2196, including sculptures.

Rembrandt exhibition, 95 oil paintings and collection of drawings, opened, 31 Dec. 1898.

10,000*l.* bequeathed by the late lord Leighton constituted a trust fund as "The Leighton Bequest," the interest to be devoted to the adornment of public places, &c.; announced, 11 Feb. 1899.

Adverse criticism respecting the choice of pictures purchased by the trustees of the Chantrey fund leads to the appointment of a select committee to consider the subject, 1904. Select committee's report recommends that all purchases be made by a committee to consist of the president of the Royal Academy, a royal academician appointed by the council, and an associate of the Royal Academy nominated by the associates, 1905.

The king accepts at the Royal Academy the picture of the opening of the first parliament of the Australian commonwealth, 4 July, 1904.

ROYAL EXCHANGE (Cambium Regis), London. The foundation of the original edifice was laid by sir Thomas Gresham, 7 June, 1566, on the site of the ancient Tun prison. Queen Elizabeth opened it on 23 Jan. 1571, and her herald named it the *Royal* Exchange. *Hume.* It was totally destroyed by the great fire, Sept. 1666. Charles II. laid the foundation-stone of the next edifice, 23 Oct. 1667, which was completed by Mr. Hawkesmore, a pupil of sir Christopher Wren, in about three years; it was repaired and beautified in 1769. This also was burnt, 10 Jan. 1838. The present Royal Exchange, erected under the direction of Mr. Tite, was opened by queen Victoria, 28 Oct. 1844.—Basement of Lloyd's offices damaged by fire, 27 Dec. 1894. Messrs. Smith's offices damaged by fire, 16 Jan. 1903. The ROYAL EXCHANGE, Dublin, commenced 1769, opened 1779.

ROYAL GEORGE, a man-of-war of 108 guns, lost off Spithead. While heeled over to repair a pipe, a sudden gust of wind washed the sea into her ports, and she went down. The rear-admiral Kempenfeldt, the crew, many marines, women, and Jews, in all about 600 persons, were drowned, 29 Aug. 1782. By the use of the diving-bell, the ship, embedded in the deep, was surveyed in May, 1817, *et seq.* Portions of the vessel and its cargo were brought up in 1839-42, under the superintendence of sir Charles Pasley, when gunpowder was ignited by the agency of electricity.

ROYAL GRANTS to members of the royal family:—

Queen Victoria, on July 2, applied to parliament for a grant to prince Albert Victor of Wales for his maintenance, and for one to the princess Louise of Wales on her marriage with the earl of Fife, a select committee was appointed consisting of 23 members (including Mr. Goschen, Mr. W. H. Smith, lord Hartington, Mr. J. Chamberlain, Mr. Gladstone, Mr. John Morley, Mr. Labouchere, Mr. Burt, dr. Cameron, Mr. Parnell, and Mr. Sexton), 8 July, the committee first met 10 July, 1889

After several meetings at which there was much discussion on various propositions, a report was submitted to the house of commons, who eventually resolved, after several amendments had been rejected, that 36,000*l.*, out of the consolidated fund should be paid annually (through trustees) to the prince of Wales for the support and maintenance of his family, the same to continue till six months after queen Victoria's decease, 29 July, 1889. An act of parliament to this effect was passed . . . . 12 Aug. 1889

ROYAL HUMANE SOCIETY (London), see *Humane Society*.

ROYAL INSTITUTION OF GREAT BRITAIN, the earliest of the kind in London, was founded 9 March, 1799, by count Rumford, sir Joseph Banks, earls Spencer and Morton, and several other noblemen and gentlemen. It received the immediate patronage of George III., and was incorporated 13 Jan. 1800, by royal charter, as "The Royal Institution of Great Britain, for the diffusing knowledge, and facilitating the general introduction of useful mechanical inventions and improvements, and for teaching, by courses of philosophical lectures and experiments, the application of science to the common purposes of life." It was enlarged and extended by an act of parliament in 1810; the original plan, as drawn up by count Rumford, in 1799, having been considerably modified. The members are elected by ballot, and pay ten guineas on admission, and five guineas annually, or a composition of sixty guineas. "The Royal Institution, its Founder, and its first Professors," by Dr. Bence Jones, hon. sec., published 1871.

The HOUSE (in Albemarle-street, Piccadilly) was purchased in June, 1799, and the present front was added by subscription in 1838. The Lecture theatre was erected in 1800–1, under the superintendence of Mr. T. Webster.

The Laboratory established in 1800; was rebuilt, with the modern improvements, 1872.

The LIBRARY was commenced in 1803, by the munificent subscriptions of the proprietors of the institution, It now comprises about 60,000 volumes Classified catalogues (by W. Harris) were published in 1809 and 1821; new ones (by B. Vincent) in 1857 and 1882.

The MUSEUM contains original philosophical apparatus of Young, Cavendish, Davy, Faraday, and De la Rue

The first LECTURE was delivered 4 March, 1800, by *Dr. Garnett*, he being the first professor of natural philosophy and chemistry.

In Aug he was succeeded by *Dr. Thomas Young*, so celebrated for his researches in optics, resulting in the discovery of the interference of light, and the establishment of the theory of undulation. His "Lectures on Natural Philosophy and the Mechanical Arts," first published in 1807, are still considered a text-book of physical science His works on antiquarian literature (hieroglyphic inscriptions, &c) are highly esteemed

In Feb. 1801, Mr (afterwards sir *Humphry*) *Davy* was engaged as assistant lecturer and director of the laboratory, and on 31 May, 1802, he was appointed professor of chemistry. His lectures were eminently successful, and his discoveries in chemistry and electricity have immortalised his name, and conferred honour on the institution. By him the alkaline metals potassium and sodium, were discovered in 1807; the nature of chlorine was determined in 1810, and the safety-lamp invented in 1815.

William Thomas Brande succeeded sir Humphry Davy as professor of chemistry in 1813, and held that office till his resignation in 1852, since which time, till his death (Feb. 1866), he was hon. professor. From 1816 to 1850 he delivered, in the laboratory of this institution, his celebrated chemical lectures to students.

In 1813 *Michael Faraday* (born 22 Sept. 1791), on the recommendation of sir H Davy, was engaged as assistant in the laboratory, and in 1825 as its director; in 1827 he became one of the permanent lecturers of the institution. In 1820 he commenced those researches in electricity and magnetism which form an era in the history of science. In 1823-4 he discovered the condensability of chlorine and other gases; in 1831 he obtained electricity from the magnet; in 1845 he exhibited the two-fold magnetism of matter, comprehending all known substances, the magnetism of gases, flame, &c; in 1850 he published his researches on atmospheric magnetism: died, 25 Aug. 1867.

John Tyndall, F.R.S., professor of natural philosophy, July, 1853, hon. professor, 9 May, 1887; died 4 Dec. 1893; eminent for his researches on magnetism, heat, glaciers, &c.; bequeathed 1,000*l.* to the Royal Institution, received Jan. 1898.

Lord Rayleigh, F.R.S., professor of natural philosophy, 9 May, 1887; is eminent for his researches on sound, light, &c.

Edward Frankland, F.R.S. (after sir), professor of chemistry 1863-8, eminent for his discoveries in organic chemistry; he died, 9 Aug. 1899.

James Dewar, F.R.S. (born 20 Sept. 1842), professor of chemistry, 9 April, and director of the laboratory, 7 May, 1877; eminent for his discoveries and researches in the liquefaction and solidification of gases at high temperatures, air, oxygen, hydrogen, &c., 1878 *et seq.*

In 1804, sir J. St. Aubyn and other gentlemen proposed to form a SCHOOL OF MINES at this institution; but the plan, although warmly supported by the members, was withdrawn for want of encouragement by the government and by mining proprietors.

The WEEKLY EVENING MEETINGS, on the Fridays, from January to June, as now arranged, commenced in 1826. Discourses (of which abstracts have been printed, 1851 *et seq.*) are given at these meetings by the professors of the institution and other eminent scientific men.

ENDOWMENTS. In 1833, John Fuller, esq , of Rosehill, endowed two professorships, of chemistry and physiology; the former bestowed on Mr Faraday for life; succeeded by Dr. Wm. Odling, 1868-73, by Dr. John Hall Gladstone, 1874, died 7 Oct. 1902; by James Dewar, 1877 The latter on Dr. Roget for three years, to be filled up afterwards by triennial election —The Fullerian professors of physiology have been P. M. Roget, R E Grant, T. R. Jones, W B Carpenter, W. W Gull, T. W. Jones, T H Huxley (*twice*), R. Owen, J. Marshall, Michael Foster, Wm. Rutherford, Alfred H. Garrod, and E A. Schafer (1878-81), J. G. McKendrick, 1881-4; A. Gamgee, 1884; G. J. Romanes, 1888, Victor Horsley, 1891; Charles Stewart, 1893; Augustus D. Waller, 1897; Edwin Ray Lankester, 6 Jan. 1898; Dr. Allan Macfadyen, Jan. 1901; Louis C. Miall, 1904.—In 1838, Mrs Acton gave 1000*l.* to be invested for paying every seven years 100 guineas for the best essay on the beneficence of the Almighty, as illustrative of a department of science; which have been awarded in 1844 to Mr G Fownes; in 1851 to Mr. T. Wharton Jones; in 1858 no award was made; in 1865 to Mr George Warington, in 1872 to Rev. George Henslow and B Thompson Lowne; in 1879, to Mr G S Boulger; in 1886, to Prof. (aft. sir) G. G. Stokes, Pres. R.S.; Miss Agnes M. Clerke, 1893; sir Wm. and lady Huggins, 1900.

The "Fund for the Promotion of Experimental Research" was founded on 6 July, 1863, by sir Henry Holland, Professor Faraday, sir R I. Murchison, Dr Bence Jones, and others.

Many donations received, 1863 *et seq.*; since 1892 liberal donations have been received to support prof. Dewar's researches connected with low temperatures: Mr. Thomas G. Hodgkins, of Long Island, New York, 100,000 dollars; Goldsmiths' company, 1,000*l.*, Nov. 1892; again 1,000*l.*, Nov. 1899. The earl of Derby bequeaths 2,000*l.*, 21 April, 1893 *et seq.*; Mr. Ludwig Mond, 1887-93, 1,540*l.*; others since.

In 1843 the establishment of a school of practical chemistry in the institution approved by profs. Faraday and Brande was proposed but failed.

On 2 July, 1894, the scheme was revived by Mr. Ludwig Mond, F.R.S. and M.R.I., who presented to the institution the house adjoining, with a proposal for its transformation into a laboratory, to be termed the DAVY-FARADAY RESEARCH LABORATORY. He supplied the funds necessary for the incidental expenses of the work, and also gave an endowment suffigient to maintain a staff of professors and assistants, and to supply everything necessary for the prosecution of scientific research, especially in pure chemistry and physical science. The laboratory is an adjunct to the Royal Institution, and is open, conditionally, to independent private research. The conveyance and deed of trust dated 8 June, 1896. The laboratory is subject to a committee appointed by the managers of the institution, the first directors being lord Rayleigh and prof. James Dewar. Dr. Alexander Scott appointed superintendent, 1896. The laboratory was opened by the prince of Wales, after an historical address by Dr. Ludwig Mond, followed by experiments in liquid air, by prof. Dewar, 22 Dec. *Times*, 23 Dec. 1896.

The *first officers* of the institution were sir Joseph Banks, *president*, till the charter was granted, afterwards the earl of Winchilsea; Mr. (afterwards sir Thomas) Bernard, *treasurer*; rev. Dr. Samuel Glasse, *secretary*.—Algernon

duke of Northumberland, K.G., elected *president*, 1842; succeeded by sir Henry Holland, in 1865 (died 27 Oct. 1873); by Algernon George, duke of Northumberland, K.G., 1873 (died 2 Jan. 1899); by his son, Henry George, duke of Northumberland, 6 March, 1899. W. Pole, esq, *treasurer*, elected 1849; succeeded by Wm. Spottiswoode, esq, in 1865; by George Busk, esq., 1873; by Henry Pollock, esq., 1886; by sir James Crichton Browne, 1889. The rev. John Barlow, *secretary*, elected 1842; succeeded by Henry Bence Jones, M.D, 1866; by Wm. Spottiswoode, 1873; by Warren de la Rue, 1879; by sir Wm. Bowman, Bart., 1882; by sir Frederick Bramwell, Bart., 1885; by sir Wm. Crookes, 1900. *Librarians:* Wm. Harris, 1803-23; S. Weller Singer, 1826-35; Wm. Mason, 1835-48; Benjamin Vincent, 1849-89 (hon. librarian, 1889; died 3 May, 1899); Henry Young, 1889. 21 eminent foreign scientific men were elected honorary members, 4 May, 1891, in relation to the Faraday centenary, *which see.*

Centenary celebrations: 26 eminent foreign scientists elected honorary members, 1 May, 1899; banquet to the foreign delegates at the Merchant Taylors' hall, the prince of Wales, the dukes of Cambridge and Northumberland, the lord chancellor and others present, 5 June; the prince of Wales presides at a commemorative lecture by Lord Rayleigh on the "Discoveries of Thos. Young," 3 p m., and presents diplomas to the foreign scientists, 4 p.m.; the lord mayor holds a reception in the evening, 6 June; at the second lecture (the duke of Northumberland in the chair), prof. Dewar produced liquid hydrogen, *which see*, in substantial quantities at about 21° absolute temperature, and by it solidified liquid oxygen and air, and exhibited a succession of beautiful experiments before lords Kelvin, Rayleigh, and a brilliant audience, Friday eve, 7 June, 1899.

Historical apparatus, &c., was exhibited in the upper library, 5-7 June, 1899.

Bust of sir Frederick Bramwell unveiled by the duke of Northumberland, 17 Jan. 1902.

Michael Faraday relics, bequeathed by Mr. Thos. Deacon, of Newcastle-on Tyne, received, Jan. 1902.

ROYAL SOCIETY (London). In 1645 several learned men met in London to discuss philosophical questions and report experiments; the *Novum Organon* of Bacon, published in 1620, having given great impulse to such pursuits. Some of them (Drs. Wilkins, Wallis, &c.), about 1648-9, removed to Oxford, and with Dr. (afterwards bishop) Seth Ward, the hon. Robert Boyle, Dr. (afterwards sir) W. Petty, and several doctors of divinity and physic, frequently assembled in the apartments of Dr. Wilkins, in Wadham college, Oxford. They formed what has been called the Philosophical Society of Oxford, which only lasted till 1690. The members were, about 1658, called to various parts of the kingdom, on account of their respective professions; and the majority coming to London, constantly attended the lectures at Gresham college, and met occasionally till the death of Oliver Cromwell, 3 Sept. 1658; see *Societies*, and *Scientific Papers.* "Record of Royal Soc." issued 1897.

The society was organised in 1660, and constituted by Charles II. a body politic and corporate, by the appellation of "The President, Council, and Fellowship of the Royal Society of London, for improving Natural Knowledge," 22 April, 1662.

Henry Oldenburg, the first secretary, an eminent philosopher, a native of Bremen, a friend of Milton, Boyle, Wilkins, Wallis, and Petty, died Sept. 1677.

Evelyn records the first anniversary meeting, St. Andrew's-day, 30 Nov. 1663.

The *Philosophical Transactions* begin 6 March, 1664-5.

In 1668 Newton invented his reflecting telescope (now in the possession of the society), and on 28 April, 1686, presented to the society the MS. of his *Principia*, which the council ordered to be printed. This was done under the superintendence and at the expense of Halley the astronomer, at that time clerk to the society.

The society met for some years at Gresham College, and afterwards at Arundel House (1666), where it came into possession of a valuable library, presented by Mr. Howard, grandson of its collector, the earl of Arundel After various changes the fellows returned to Gresham College, where they remained till their removal to Crane-court, in a house purchased by themselves, 8 Nov. 1710.

The Croonian lecture was founded in 1701; the Bakerian lecture by Henry Baker, 1774.

The first Copley medal was awarded to Stephen Gray in 1731; the royal medal to John Dalton, 1826; the Rumford medal (instituted in 1797) to count Rumford himself in 1800.

The society remove to apartments granted them in Somerset-house, 1780; to apartments in Burlington-house, Piccadilly, 1857.

Parliament votes annually 4000*l.* to the Royal Society for scientific purposes; raised to 5,000*l* in 1895.

Regulations made by which only fifteen fellows are to be annually elected, who pay ten pounds on admission, and four pounds annually, or a composition of sixty pounds, March, 1847 In consequence, the number of fellows was reduced from 839 in 1847, to 626 in 1866; to 567 in 1875; to 552 in 1877; to 523 in 1888; 511 in 1893; 450 in 1905.

The entrance fee abolished, and the annual payment reduced to 3*l.*, announced, Nov 1878.

The "Royal Society Scientific Fund" was founded in imitation of the "Literary Fund" in 1859; see *Scientific Fund*

The Davy medal (*which see*) first awarded, Nov 1877.

The Darwin medal (see *Development*) first awarded, 1890.

The Croonian lecture given by prof. Virchow, of Berlin, 16 March, 1893.

Sir Wm. Mackinnon bequeaths over 16,000*l.* to the society, announced Dec. 1897.

The "Hughes" medal for original discovery in physical science, particularly electricity and magnetism (from a bequest by prof. David Edw. Hughes), first awarded to Joseph John Thomson, Nov. 1902.

The Royal Society entertains, at a banquet at the hotel Cecil, delegates to the triennial conference of the International Association of Academies, 24 May, 1904.

Anonymous donor presents 1,000*l.* to the society for the advancement of science, Nov. 1904.

ROYAL SOCIETY OF EDINBURGH, incorporated 29 March, 1783, arose out of the Philosophical Society of Edinburgh, founded in 1739. It received a second charter in 1811.

ROYAL SOCIETY OF LITERATURE was founded under the auspices of king George IV. in 1823, and chartered 13 Sept. 1826.

ROYAL STYLE, &c., see *Style, Royal*, and *Titles*. Royal titles act passed by royal assent, 17 Aug. 1901.

ROYAL UNIVERSITY OF IRELAND, see *University*.

RUBICON, a small river flowing into the Adriatic sea, separated Cisalpine Gaul from Italy proper. Roman generals were forbidden to pass this river at the head of an army. Julius Cæsar did so, Jan. 49 B.C., and thereby began a revolt and deadly civil war.

RUBIDIUM, an alkaline metal, discovered by Bunsen by means of the spectrum analysis, and made known in 1861.

RUBRICS, directions in church offices, often printed in red. New ones for the English service agreed to by convocation, 4 July, 1879.

RUBY MINES OF BURMAH. Tavernier (middle of 17th cent.) describes Burmah as a place where rubies and other precious stones are largely obtained, a country difficult of access. Similar accounts were given by Father Giuseppe d'Amato, about 1830. The largest stones were royal property. Mr. Bredemeyer had charge of these and other mines in 1868. Revenue about 1855, from 12,500*l.* to 15,000*l.* per annum. These mines are now British property (see under *Burmah*, 1885), and for the use of them a revenue is paid by the Shan tribes, 1887. An agreement respecting them made between the Indian Government and Messrs. Streeter & Co. of London, announced May, 1887; suspended July, 1887. Working licences issued to persons on the spot, 1887. Lease for seven years to the Streeter Syndicate signed at the India office, 22 Feb. 1889; formation of a company headed by Messrs. Rothschild, March *et seq.*, 1889. Visit of sir Lepel Griffin to the mines, satisfactory to the company, reported March, 1890. Lt.-governor, sir Hugh Shakespear Barnes, April 1903; sir H. Thirkell White, Jan. 1905.

RUFFLES became fashionable about 1520; and went out about 1790.

RUGBY SCHOOL (Warwickshire), was founded in 1567 by Lawrence Sheriff, a London tradesman; its arrangements were affected by the Public Schools act 1868. Dr. Thomas Arnold, the historian, entered on the duties of head-master here in August, 1828, and under him the school greatly prospered. He died 12 June, 1842. His successors were Drs. Tait, Goulburn, Temple, Hayman, Jex Blake, Percival and H. A. James (since 1895). See *New Rugby*.

Dr. H. Hayman was opposed by the masters of the school, and after much dissension and discussion, was dismissed by the trustees, Dec. 1873, and Dr. Jex Blake elected in his room, Feb. 1874. Vice-Chancellor Malins decided against Dr. Hayman in his attempt to set aside his dismissal, but expressed his own opinion on "the grievous hardship of Dr. Hayman's case," 21 March, 1874.

Mr. Disraeli, the premier, presented Dr. Hayman to the living *at* Aldingham, Lancashire, April, 1874; he died, aged 62, 11 July, 1904.

Home mission, in addition to the Fox memorial mastership in India, established in connection with Rugby, 1889.

RUGEN, an island in the Baltic, has frequently changed masters, having been held by the Danes, Swedes, and French. Transferred to Prussia 1815.

RUHMKORFF'S INDUCTION COIL, see *Induction*.

"RULE, BRITANNIA." The words are by James Thomson (altered by Mallet); the music, ascribed to Dr. Arne, is said by Schœlcher (in his life of Handel) to have been taken from an air in Handel's "Occasional Oratorio" composed 1746, but the song and music were really printed in Dr. Arne's masque of "Alfred," 1740. *Grove.*

Long-lost score of Wagner's "Rule, Britannia," overture, composed as a tribute to the British nation, discovered by Mr. Cyrus Gamble at Leicester, May, 1904.

RULE-OF-THE-ROAD, see *Seas*.

RULING MACHINES, used for ruling paper with faint lines, for merchants' account-books, &c. They were invented by an ingenious Dutchman, resident in London, in 1782, and were subsequently greatly improved by Woodmason, Payne, Brown, and others. They were improved in Scotland in 1803. Herr F. A. Nobert devised a ruling machine in 1845 for the production of microscopical test plates, diffraction gratings, and micrometers, specimens of which were exhibited in 1851. The test plates contain bands of lines in a graduated series of fineness from $\frac{1}{1000}$ to $\frac{1}{10000}$ of a Paris line.

RUM (French *rhum*), ardent spirit distilled from sugar lees and molasses, deriving its peculiar flavour from a volatile oil. Rum is principally made in the West Indies. The duty (since 1900) on rum imported into the United Kingdom is 11*s.* 4*d.* per gallon, 1*s.* additional per gallon if imported in bottle (since 1899).

RUSSELL ADMINISTRATIONS,* see *Palmerston Administration*, &c.

FIRST ADMINISTRATION (formed on the resignation of sir Robert Peel), July, 1846

First lord of the treasury, lord John Russell.
Lord chancellor, lord Cottenham (succeeded by lord Truro).
Lord president of the council, marquis of Lansdowne.
Privy seal, earl of Minto
Chancellor of the exchequer, Mr. (aft. sir Charles) Wood.
Foreign, home, and colonial secretaries, viscount Palmerston, sir George Grey, and earl Grey.
Boards of control and trade, sir John Hobhouse (aft. lord Broughton), and earl of Clarendon (succeeded by Mr. Labouchere).
Admiralty, the earl of Auckland (succeeded by sir Francis Thornhill Baring).
Duchy of Lancaster, lord Campbell (succeeded by the earl of Carlisle, late viscount Morpeth).
Secretary at war, Mr. Fox Maule.
Postmaster, marquis of Clanricarde.
Paymaster-general, T. B. Macaulay.

Lord John Russell and his colleagues resigned their offices, 21 Feb. 1851; but were induced (after the failure of lord Stanley's party to form an administration) to return to power, 3 March following.

* Lord John Russell, third son of John, duke of Bedford, was born 19 Aug. 1792; M.P. for Tavistock, 1813; for London, 1841–61; was paymaster of the forces, 1830–34; secretary for home department, 1835–9; for the colonies, 1839–41; first minister, July 1846 to March 1852; secretary for foreign affairs, Dec. 1852 to Feb. 1853; president of the council, June 1854 to Feb. 1855; secretary for the colonies, March to Nov. 1855; secretary for foreign affairs, June 1859 to Oct. 1865, when he succeeded lord Palmerston as premier; created a peer, as earl Russell, 30 July, 1861. His motion for reform in parliament was negatived in 1822; adopted 1 March, 1831: he introduced the registration bill and a new marriage bill in 1836; introduced and withdrew a reform bill, 1860; died 28 May, 1878.

SECOND ADMINISTRATION (or continuation of his first), March, 1851.
First lord of the treasury, lord John Russell.
President of the council, marquis of Lansdowne.
Lord privy seal, earl of Minto.
Chancellor of the exchequer, sir Charles Wood.
Home, foreign, and colonial secretaries, Sir George Grey, viscount Palmerston (succeeded by earl Granville, 22 Dec.), and earl Grey.
Lord chancellor, lord Truro.
First lord of the admiralty, sir Francis T. Baring.
Board of control, lord Broughton.
Board of trade, Mr Labouchere.
Secretary at war, Mr. Fox Maule (aft. lord Panmure, and earl of Dalhousie).
Postmaster-general, marquis of Clanricarde.
Paymaster-general, earl Granville.
Lord Seymour, earl of Carlisle, &c.
This ministry resigned 21 Feb. 1852 ; see *Derby Administration*.

THIRD ADMINISTRATION. (On the decease of lord Palmerston, 18 Oct. 1865, earl Russell received Her Majesty's commands to reconstruct the administration.)
First lord of the treasury, John, earl Russell.
Lord chancellor, Robert, lord Cranworth.
Postmaster-general, John, lord Stanley of Alderley.
President of the poor-law board, Chas. Pelham Villiers.
Lord president of the council, George, earl Granville.

RUSSELL TRIAL. William, lord Russell's trial for complicity in the Rye-house plot was marked by a most touching scene. When he requested to have some one near him to take notes to help his memory, he was answered, that any of his attendants might assist him ; upon which he said "My WIFE is here, and will do it for me." He was beheaded in Lincoln's-Inn-Fields, 21 July, 1683. Lady Russell survived him forty years, dying 29 Sept. 1723, in her eighty-seventh year. His attainder was reversed, 1 Will. III. 1689.

RUSSIA, the eastern part of ancient Sarmatia. The name is generally derived from the Roxolani, a Slavonic tribe. Ruric, a Varangian chief, appears to have been the first to establish a government, 862. His decendants ruled amid many vicissitudes till 1598. The progress of the Russian power under Peter the Great and Catherine II. is unequalled for rapidity in the history of the world. The established religion of Russia is the Greek church, with toleration of other sects, even Mahometans. By an imperial ukase, in 1802, six universities were established, viz., at St. Petersburg, Moscow, Wilna, Dorpat (in Livonia), Charcov, and Kasan ; but literature made little progress till the 19th century, the native publications being very few, and the best books being translations. The Russian language, though not devoid of elegance, is, to a foreigner, of very difficult pronunciation ; the number of letters and diphthongs is forty-two. The Anglo-Russian Literary Society, with library, &c., set up at the Imperial Institute, 1893. The population of the empire in 1867, 82,159,630 ; in 1872, about 85,685,945 ; in 1877 (estimated), 86,952,347 ; in 1885, 108,843,192 ; 1st general census of the empire, total, 129,211,113, 9 Feb. 1897 ; 106,265,000 European, including Asiatic Russia, 141,000,000 (estimated), 1903. By the first Russian budget (1862), the estimated revenue was 34,500,000*l.* ; expenditure, 37,850,000*l* ; 1892, revenue, 118,025,000*l.* ; expenditure, 112,549,000*l.* ; 1905 revenue estimated 197,704,561*l.* (ordinary), 275,000*l.* (extraordinary) ; expenditure 191,606,557*l.* (ordinary), 7,856,868*l.* (extraordinary). Public debt 1904, 707,851,930*l.* Imports, 1904, 58,360,000*l.* exports, 95,500,000*l.* Besides about 500 cathedrals, about 35,000 churches (Greek church, *which see*). Total armed strength of Russia, estimated at 3,460,000, 1903 ; 4,500,000, 1905. Railways, 1893, 19,441 miles ; 1903, 40,836 miles open.

RUSSO-JAPANESE WAR.—The war between Japan and Russia was due to three principal causes: the rights of the Japanese in Manchuria; the independence of Corea; and the independence of China, all these interests being imperilled by the rapid extension of the Russian power. The conflict between China and Japan, 1894-95, resulted in the recognition by China of the independence of Corea, and the cession to Japan of Port Arthur and the Liao-tung peninsula, the latter advantage was, however, lost to Japan by the action of Russia, supported by France and Germany, on the ground that its possession by the Japanese would "constitute a perpetual menace to the capital of China, and render the independence of Corea illusory." Japan failed in her attempt to obtain pledges from Russia that neither Port Arthur nor the Liao-tong peninsula would be occupied by the forces of that power, assurances were, however, given "that Russia had no designs whatever on Manchuria"; but Russia refused to embody these assurances in a treaty on the ground that to do so would be an imputation on her *bona fides*. In 1898, Russia obtained from China a lease over Port Arthur and Ta-lien-wan, together with railway concessions (granted 23 March); Russian forces were landed (28 March), the Trans-Siberian railway was rapidly extended south to Port Arthur, fortifications were erected, garrisons established, and Manchuria treated as if it were virtually a Russian province. In return for her support given to China after the relief of Pekin, 1900, Russia sought, but unsuccessfully, to obtain a convention securing her special rights in Manchuria, and ultimately agreed to evacuate two provinces of Manchuria on 8 Oct. 1903. The promised evacuation was not carried out, and on 30 Oct. 1903, Russian troops reoccupied Mukden, and a great number of troops were sent into Manchuria. This action of Russia in maintaining her occupation of Manchuria, notwithstanding her treaty with China and the repeated assurances given to the powers by Russia, together with aggressive action on the Ya-lu in Corean territory, caused great apprehension to Japan, as threatening the independence of Corea and the safety of Japan, especially if Manchuria were annexed by Russia. In a despatch dated 28 July, 1903, M. Kurino, the Japanese minister at St. Petersburg, was instructed by baron Komura, Japanese foreign minister, "to approach the Russian

government in a spirit of conciliation and frankness, with a view to the conclusion of an understanding" on these questions, and "to a definition of their respective interests in those regions." The Japanese proposals were stated in the following terms in a despatch from Tokio, dated 3 Aug. 1903:—

I. A mutual agreement to respect the independence and territorial integrity of the Chinese and Corean empires, and to maintain the principle of equal opportunity for the commerce and industry of all nations in those countries.

II. Reciprocal recognition of Japan's preponderating interests in Corea and Russia's special interests in railway enterprises in Manchuria, and of the right of Japan to take in Corea and of Russia to take in Manchuria such measures as may be necessary for the protection of their respective interests as above defined, subject, however, to the provisions of Article I.

III. Reciprocal undertaking on the part of Russia and Japan not to impede the development of those industrial and commercial activities respectively of Japan and Russia in Corea and of Russia in Manchuria, which are not inconsistent with the stipulations of Article I.

IV. Reciprocal engagement that in case it is found necessary to send troops by Japan to Corea, or by Russia to Manchuria, for the purpose either of protecting the interests mentioned in Article II., or of suppressing insurrection or disorder calculated to create international complications, the troops so sent are in no case to exceed the actual number required, and are to be forthwith recalled as soon as their missions are accomplished

V. Recognition on the part of Russia of the exclusive right of Japan to give advice and assistance in the interest of reform and good government in Corea, including necessary military assistance.

The following counter proposals were submitted on behalf of Russia, 3 Oct. 1903:—

I. Mutual engagement to respect the independence and territorial integrity of the Corean empire.

II. Recognition by Russia of Japan's preponderating interests in Corea, and of the right of Japan to give advice and assistance to Corea tending to improve the civil administration of the empire without infringing the stipulations of Article I

III. Engagement on the part of Russia not to impede the commercial and industrial undertakings of Japan in Corea, nor to oppose any measures taken for the purpose of protecting them, so long as such measures do not infringe the stipulations of Article I.

IV. Recognition of the right of Japan to send for the same purpose troops to Corea, with the knowledge of Russia, but their numbers not to exceed that actually required, and with the engagement on the part of Japan to recall such troops as soon as their mission is accomplished.

V. Mutual engagement not to use any part of the territory of Corea for strategical purposes, nor to undertake on the coasts of Corea any military works capable of menacing the freedom of navigation in the straits of Corea.

VI. Mutual agreement to consider that part of the territory of Corea lying to the north of the 39th parallel as a neutral zone, into which neither of the contracting parties shall introduce troops

VII. Recognition by Japan of Manchuria and its littoral as in all respects outside her sphere of interest.

The proposal of Russia that Manchuria should be regarded as outside the Japanese sphere of interest was, in view of the important political and commercial interests of Japan in that country, rejected by Japan 30 Oct. 1903; other amendments, including one relating to a neutral zone, in Manchuria as well as in Corea, were proposed by Japan. Russia, in response to the protest of the Japanese government respecting the delay of the Russian government in replying to its communication, reaffirmed the proposals of 3 Oct., but omitting Article VII., 11 Dec. 1903. In reply, 21 Dec. 1903, the Japanese government stated that Russia's exclusion of Manchuria from the negotiations nullified them entirely, the negotiations having been expressly undertaken to remove every cause for misunderstanding respecting both Corea and Manchuria; Russia was asked to reconsider the question; the neutral-zone clause to be omitted. The Russian government reply, 6 Jan. 1904, proposing to insert the following article in the agreement, "Recognition by Japan of Manchuria and its littoral as being outside her sphere of interests, while Russia within the limits of that province will not impede Japan or other powers in the enjoyment of rights and privileges acquired by them under existing treaties with China, exclusive of the establishment of settlements." This article was subject to the understanding that the articles respecting a neutral zone, and the prohibition of Corean territory for strategical purposes, were conceded by Japan. The final proposals of the Japanese government were presented to Russia, 13 Jan. 1904, and comprised the following modifications of the Russian terms:—

I. The elimination from Article V. of the words "not to use any part of the territory of Corea for strategical purposes."

II The elimination from Article VI. as to a neutral zone.

III. The acceptance of the final Article concerning Manchuria, provided that Russia agreed to respect the territorial integrity of China in Manchuria; not to impede Japan or other Powers, within the limits of Manchuria, in the enjoyment of rights and privileges acquired by them under the existing treaties with China, to recognise Corea and its littoral as being outside the Russian sphere of influence.

IV. The recognition by Japan of Russia's special interests in Manchuria, and of the right of Russia to take measures necessary for the protection of those interests.

Owing to the dilatory tactics of Russia the patience of the Japanese government became exhausted, and becoming convinced that no hope existed of a peaceable settlement of the questions at issue, and having regard also to the preparations being made with both her army and navy by Russia, the Japanese government at Tokio announced, 6 Feb. 1904, through their minister at St. Petersburg, the breaking off of diplomatic relations with Russia. The mikado issued, 10 Feb., an imperial rescript, giving the Japanese statement of the case against Russia, and declared war against Russia.
